''Kaga is a highly respected distributor with the staff and resources needed in the sophisticated Japanese market. They are capable of increasing ICT's sales in Japan as much as 100 percent in the next 12 months. This increase is based on readily available products currently in full production. With over 50 percent of ICT's sales already in Japan I am confident that Kaga and ICT will have a long and successful business relationship,'' stated Drew Osterman, chairman and chief executive officer.

''Taxan and Kaga Electronics are very pleased with the addition of ICT to our line card. We are proud to carry ICT's line of quality and innovative products. These products will provide us with a more global range of choices to our Japanese customers,'' stated Bobby Osato, Taxan's director of marketing.

Kaga Electronics is the parent company to wholly owned United States subsidiary TAXAN USA Corp., located in San Jose. Kaga is headquartered in Tokyo, and is traded on the Tokyo Stock Exchange. Kaga was founded in 1968 and has annual sales exceeding $290 million.

International CMOS Technology Inc. designs, manufactures and markets user programmable integrated circuits. ICT's products include a variety of memory and logic devices, and the development tools for designing with user programmable products. ICT is publicly owned and traded Over The Counter (pink sheets).

DAYTON, OH (JULY 10) BUSINESS WIRE - NCR Corp. announced Tuesday that Fleet/Norstar Financial Group has signed a $10 million contract to automate its network of branch offices with NCR's FTS II branch automation system.

The full implementation of NCR's branch automation technology, which begins in New York and will spread across Fleet/Norstar's 560 branches in Rhode Island, Maine and Connecticut, could exceed approximately $20 million over the next three years.

NCR's FTS II branch automation system is based on NCR's latest PC technology, utilizing a token ring network and includes a comprehensive set of software solutions.

The software solutions include NCR's communication network management, software distribution and branch integrated services. The configuration also includes Cross Sell Manager, which is a leading platform automation software package.

Fleet/Norstar can apply the same architecture utilized by the branch automation system in areas such as student loan processing, mortgage origination, and imaging, throughout the bank's 1,000 offices in 41 states.

Before selecting the NCR branch automation system, Fleet/Norstar Financial Group evaluated five computer vendors over a two year period.

''This agreement with NCR will significantly enhance our strategy to prepare the bank for the decade ahead by improving product delivery systems and the level of service provided to our customers,'' said Dave Sheppard, executive vice president, Office of the President, Fleet/Norstar Service Group.

Fleet/Norstar Financial Group, a $37 billion regional bank, is among the 20 largest banking institutions in the United States. Its offices include eight banks in the New England and New York markets, as well as more than a dozen financial services subsidiaries across the nation in such businesses as mortgage banking, consumer finance, asset-based lending and student loan processing.

NCR Corp., based in Dayton, develops, manufactures, markets and supports business information systems for worldwide markets.

GREENVILLE, SC (JULY 10) BUSINESS WIRE - American Federal Bank (NASDAQ:AMFB) announced Tuesday it has signed an agreement in principle to sell the loan portfolio and office operations of its consumer finance company, Finance South, to First Family Financial Services of Atlanta.

The portfolio amounts to about 2 percent of the bank's $1.1 billion total assets.

The proposed sale of assets, if completed as scheduled by August 10, will result in a pre-tax gain of approximately $3 million. The transaction is subject to the negotiation of a definitive agreement, its approval by the boards of directors of the two parties and satisfaction of the conditions contained in the agreement.

Roy Abercrombie, president and chief executive officer of American Federal said ''The sale is not part of our capital plan, but it's an excellent opportunity and it makes good business sense.''

He said the bank retains the right to open new Finance South offices in business communities not subject to a non-compete agreement with First Family Financial Services. Bill Minton, president of Finance South, will remain with the American Federal organization.

''This transaction provides a substantial boost to our capital position and at the same time gives American Federal sufficient flexibility for future operations in the consumer finance area,'' Abercrombie said.

Alan K. Chalmers, president and chief executive officer of First Family Financial Services, said: ''The acquisition of these new locations present us with a solid base for expansion within the growing South Carolina market. We are pleased to bring the experience of Finance South personnel onto our team.''

First Family Financial Services is a subsidiary of First Financial Management Corp., a national leader in the providing of information services.

SANTA BARBARA, CA (JULY 10) BUSINESS WIRE - County Bank (NASDAQ:CNBA) Tuesday announced that its Capital Plan has been approved and it will proceed with previously announced plans to sell up to $10 million in new Series A preferred stock.

It also plans to convert $18 million of its subordinated debt to a new class of Series B preferred stock.

William J. Levy, chairman, and Roy G. Green, president and chief executive officer, said details of the new preferred stock are set forth in an Offering Circular to be approved by the Office of Thrift Supervision and will be released with the offering materials.

Green said senior management and directors who already own, or have options to acquire, 47 percent of the bank's common stock have committed to invest more in the new convertible preferred stock offering.

Levy, Green and Roy J. Millender Jr., a director, are leading the bank's investment group and have guaranteed the sale of at least $6 million of the Series A preferred stock offering.

Commenting on the subordinated debt conversion, Green said, ''We have signed Subscription Agreements from existing holders of $18 million of our subordinated debentures to convert them to a new Series B preferred stock.''

''When these new stock issues are completed, over $24 million will be added to County Bank's capital base. This will nearly double the tangible and core capital of the bank and will move us closer to full capital compliance,'' Green stated.

He said that there were still a number of steps which County must take before these two offerings will be concluded but it is anticipated that they will be completed before year end.

County Bank has $1.2 billion in assets and serves Santa Barbara, Ventura and San Luis Obispo counties.

BALTIMORE (JULY 10) BUSINESS WIRE - Polk Audio Inc. (NASDAQ:POLK) announced Tuesday that it expects earnings for its first fiscal quarter

ended June 1990, to be significantly lower than expected, and lower than earnings for the comparable quarter of the preceding fiscal year.

The company attributes these expected results in part to lower than anticipated sales levels and also to higher than normal costs associated with the introduction of 10 new speaker models during the period.

Although expected results for the first fiscal quarter will be disappointing, the company still expects positive growth in its financial performance for the full fiscal year ending March 1991, partly because of the beneficial effect on sales expected as a result of the large number of new products which took place during the first fiscal quarter.

Polk Audio Inc. is a high quality speaker manufacturer located in Baltimore.

PHOENIX (JULY 10) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL; PSE:AWA) reported June 1990 traffic at 936,252,000 revenue passenger miles, an increase of 41.8 percent over June 1989.

Available seat miles for the month rose 33 percent from 1,105,311,000 in 1989 to 1,469,956,000 during 1990. America West reported a passenger load factor for June 1990 of 63.7 percent.

The airline also reported second quarter 1990 traffic increased 49.9 percent over the same period in 1989 to 2,746,075,000 revenue passenger miles. Available seat miles grew 33.4 percent over 1989 to 4,399,250,000 while load factor rose 6.9 points over 1989 to 62.4 percent.

Peter Ortradovec, vice president of planning, said, ''Passenger response to America West's product has been tremendous. The 50 percent increase in revenue passenger miles, 1990 vs. 1989, is a direct result of the maturation of many new markets such as Honolulu, Houston, Boston and San Francisco.'' He continued, ''Although fuel costs remain high, the price per gallon has slowly declined since the first quarter. We are optimistic for a successful 1990 and look forward to the challenges we face with our plans for expansion to the Pacific Rim.''

America West was again the nation's leader in on-time performance for the month of May with nearly 92 percent of its flights arriving within 15 minutes of schedule. The carrier is the national champion in on-time performance for 1989, 1988 and since the Department of Transportation

began mandatory reporting in 1987.

America West's route system extends from coast-to-coast with daily service to Hawaii and western Canada, utilizing a fleet of over 92 Boeing aircraft including 747s, 757s, 737s and Dash 8s. On July 15, the airline will begin new service at Dallas/Ft. Worth International Airport with four daily flights to its hubs at Phoenix and Las Vegas.

FREMONT, CALIF. (JULY 10) BUSINESS WIRE - Mylex Corp. (NASDAQ:MYLX) Tuesday announced that it expects sales of approximately $12.5 million for the second quarter ended June 30.

This exceeds the record sales volume of $12.2 million achieved in the first quarter of 1989. The company also expects to report net profits exceeding those of the first quarter of 1990.

Dr. Akram Chowdry, president, commented, ''The achievement of record sales and increased profits represents the results of the extensive research and development program undertaken by Mylex in 1989. ''Demand for our higher profit margin 80486 and EISA products, which we began selling in the first quarter of the current year remains strong. However, our sales level continues to be dependent upon component availability, particularly from Intel Corp.''

Unaudited second quarter and six-month results are expected to be released on or about the end of July.

Mylex Corp. is engaged in the design, development, manufacture, and marketing of high-end technology electronic products, including a 386 and EISA 486 microprocessor board product line of system boards and peripheral controller devices as well as graphics boards.

These products are used to enhance the performance of personal computers, microsystems, and workstations. Mylex products are recognized in the marketplace for both their high performance and high quality standards.

WALTHAM, MA (JULY 10) BUSINESS WIRE - The Reece Corp. (NYSE:RCE) Tuesday announced that it would close its Stantonsburg, N.C., distribution center and consolidate its operations into other company facilities.

As a result, the company will take a $775,000 charge in its second quarter to cover costs and expenses associated with the closure.

Peter J. Abate, president and chief executive officer, said, ''The current soft demand in the North American market as well as the continuing redeployment of distribution activities elsewhere to better serve the company's growth markets necessitated the action. With lower volumes of shipments being handled, a separate distribution center was no longer operationally or economically viable.''

Abate said, ''The charge to second quarter results to cover write-off of surplus assets in North Carolina, severance payments, relocations and other costs, will add to an expected loss for the second three months.'' The company expects to report its final results later this month.

Abate continued, ''However, the closing should result in substantial annualized savings once the initial expenses are overcome and the facility is sold.'' The company expects to add only small numbers of staff at its other facilities to handle the consolidation. Severance and outplacement

assistance will be provided to employees not relocating elsewhere in the company. Reece has operated the North Carolina facility since 1980.

The Stantonsburg distribution activities will be shifted to the company's Gorham, Maine manufacturing plant and its Miami-based Latin American sales operation. Other activities will be consolidated into a Reece operation in Greenville, S.C. Approximately 25 employees will be affected by the closure which will take place immediately. A small number of employees will be offered positions at other company facilities.

The Reece Corp. manufactures and distributes equipment and parts for the worldwide apparel industry.

WAYLAND, MASS. (JULY 10) BUSINESS WIRE - Candela Laser Corp. (CLZR) announced Tuesday that it has received Federal Food and Drug Administration clearance to market a Pigmented Lesion Laser.

This laser will treat pigmented lesions of the skin including age spots, freckles and brown birthmarks. The company is currently developing an enhancement for this system that will also enable it to treat tattoos.

Dr. Horace W. Furumoto, chairman and CEO, said, ''This new laser may prove to be even more successful than our Vascular Lesion Laser because the size of the potential patient population is two to three times larger. We anticipate the first units will be shipped this fall.''

Dr. Oon Tian Tan, associate professor at Boston University Medical School and a leading clinical investigator in this field, said, ''Benign pigmented lesions appearing as brown spots or patches are one of the most common skin disorders. The Candela laser is safe and effective; producing better clearance of these lesions which are caused by excess pigment.''

This is Candela's second product for the dermatology market. The company's first product, a Vascular Lesion Laser, treats a variety of disorders such as Port Wine Stain birthmarks and facial spider veins. This product has been enthusiastically received by the medical community and their patients. There are more than 150 units installed all over the world and more than 50,000 treatment sessions have been performed.

ATKINSON, N.H. (JULY 10) BUSINESS WIRE - Omni Quest Corp., a two-year-old magnetic specialty company that develops products and applications for the biotechnology, pharmaceutical, medical diagnostics, and electronics industries, has recently raised almost $1 million in a private placement of its stock.

The dramatic increase in funding coincides with management's decision to relocate the company's headquarters from Lawrence, Mass. to Atkinson, N.H.

''We're a company that's really on the 'grow','' says John Ferris, chairman and chief executive officer of Omni Quest. ''Our magnetic macromolecule product, for instance, has opened so many windows of opportunity for us in so many different markets that 'bootstrapping' the company's growth as we have done in the past no longer seemed to be the practical thing to do.

''We felt that an infusion of cash at this time would enable us to expand our marketing and sales operations, increase our R&D efforts, and boost our staff head count as soon as possible.

Simultaneously, we concluded that as long as we were making the transition from an R&D company to a marketing and technology development firm, we might as well complete the process in attractive quarters that would act as a magnet during the heavy recruiting activities we'll be conducting in the months ahead.

''Pioneer Commerce Center here in Atkinson offers just about everything that we (or our prospective employees) could want.''

Adds Mark Chagnon, Omni Quest's president, ''The entire management team here is intent on maintaining our focus on the development and manufacture of intermediary materials. We're well aware that neither Omni Quest nor any other company can be all things to all people. That's why we're looking for partners who will add value to our family of products.''

For additional information on Omni Quest and/or any of its products, contact John Ferris or Mark Chagnon at 603-893-0060. The company is located at 8 Commerce Drive, Atkinson, N.H. 03811.

LOS ANGELES (JULY 10) BUSINESS WIRE - Coral Inc. (OTC) reported first quarter 1990 revenues of nearly $11 million with more than $160,000 pre-tax profit.

Compared with first quarter 1989, revenues reflect an increase of 120 percent, with pre-tax profits increasing more than 216 percent.

Coral chairman, Michael H. Epstein stated that ''First quarter profit increases reflect greater sales volume per customer, as well as cost savings from new in-house equipment. First quarter 1990 earnings also reflect an expanded sales and administrative support staff to ensure Coral's position as an audiotext industry leader in the decade ahead.''

Coral, a Nevada corporation, is a provider of value-added audiotext conferencing services, as well as a leader in audiotext product and program development. Coral's commitment to provide comprehensive audiotext services includes offering advertising, marketing and graphic design to information providers.

Coral primarily consists of three Los Angeles-based subsidiaries: System 800 International Inc. (TM), Graffiti Graphics Inc. and International Telemedia Group Inc.

System 800 functions as a value-added utility and is one of the largest and fastest-growing providers of audiotext conferencing services in the country.

Graffiti Graphics is a full-service advertising agency which is responsible for media buying, ad placement and graphic arts for System 800 International Inc. customers and other outside clients.

International Telemedia Group is a full-service telepromotion agency serving information providers, consumer product, entertainment and direct marketing companies. Additionally, International Telemedia Group creates promotes and services its own campaigns.

Coral is located at 9255 Sunset Boulevard, Los Angeles, Calif. 90069. Coral's telephone number is 213/288-2100.

OTTAWA, ONTARIO (JULY 10) BUSINESS WIRE - Gandalf Technologies Inc. (NASDAQ: GANDF, TSE: GAN) has opened an office in Singapore to address local support for its Southeast Asian distributors and expand the company's ability to deliver prompt service anywhere in the world.

By having Gandalf more easily accessible to its customers in the growing Southeast Asian market, Gandalf expects to ensure its continued success there, according to John Wandell, senior vice president of North American and Export sales and service.

''Establishing a Gandalf office in Singapore not only illustrates Gandalf's commitment to the Asian market but also demonstrates support of our globalization strategy,'' Wandell said.

In addition, the Gandalf executive said the move would help the company over come barriers to the development of business that are caused by differences in language, culture and business practices.

Gandalf's Southeast Asian and Pacific Rim operations account for a growing portion of the company's annual revenue.

Note to editors: Gandalf Technologies Inc. provides computer communications solutions to end users. The company is a leading international designer, manufacturer and supplier of a broad range of computer and communications systems which it markets through subsidiaries worldwide.

Shares of Gandalf Technologies Inc. are listed on the Toronto Stock Exchange (GAN), on The Stock Exchange, London, and traded over-the-counter (NASDAQ: GANDF) in the United States.

LOS ANGELES (JULY 10) BUSINESS WIRE - Trihoof Investments B.V. and A&M Cammy Company Inc. announced Tuesday termination and withdrawal of their tender offer to purchase for cash all shares of Common Stock and all Class A and B Warrants of Cannon Pictures Inc.

The withdrawal and termination of the tender offer is based upon failure of a condition to the closing of such tender offer. It was a condition

to the completion of such tender offer that Pathe Communications Corp. tender to Trihoof all shares of Common Stock and Class A and B Warrants of Cannon owned by Pathe.

On Thursday, July 5, Pathe informed Trihoof that Pathe was terminating the agreement by which Pathe had agreed to tender its shares of Common Stock and Class A and B Warrants of Cannon. The termination of such agreement prevents the purchase by Trihoof of the shares of Common Stock and Class A and B Warrants owned by Pathe.

All shares and warrants of Cannon previously tendered by public shareholders will be returned to them as quickly as possible.

Trihoof further announced that it intends to seek to continue negotiations of the agreement with Pathe for the purchase by Trihoof of the shares of Common Stock and Class A and B Warrants of Cannon owned by Pathe. If such agreement can be revived, Trihoof intends to renew the tender offer for all shares of Common Stock and all Class A and B Warrants of Cannon.

In a separate development on Thursday, July 5, Ovidio Assonitis and William J. Immerman were informed during a Cannon board of director's meeting that Assonitis and Immerman were removed, effective as of July 5, as directors and officers of Cannon. Assonitis and Immerman stated that they intend to review with their counsel such removal as directors and officers of Cannon.

LOS ANGELES (JULY 10) BUSINESS WIRE - David H. Murdock, chairman of the board and chief executive officer of Castle & Cooke Inc., the Los Angeles-based holding company for Dole Food Co. and Oceanic Properties Inc., Tuesday announced record earnings for the second quarter of 1990 and major management changes at its Dole Food Co. subsidiary.

The company reported second quarter net income of $38.9 million, up from $35.2 million in the second quarter of 1989. Earnings per share were 66 cents compared with 59 cents in the prior year's second quarter. For the first half of 1990, the company reported net income of $57 million, or 96 cents per share, after absorbing a $15 million pre-tax charge for some major organizational changes related to the formation of the Dole Produce Co. and unusually large marketing costs related to programs initiated in 1989 as compared to $47.7 million, or 80 cents per share, after absorbing a $10 million pre-tax charge related to its Chilean grape operation for the same period of 1989.

Second quarter revenue was $792 million vs. $693 million in last year's second quarter. Revenue for the first half of 1990 was $1.5 billion compared to $1.3 billion in the same period in 1989.

Dole Food Co. reported earnings above its 1989 performance. The fresh fruit division had improved earnings over the prior year primarily due to improved market prices for bananas. The fresh vegetables and packaged foods divisions had lower earnings. The dried fruit and nut division's results were slightly better than last year's second quarter.

Castle & Cooke's real estate development operations reported improved performance over 1989's second quarter because of increased residential sales in Hawaii.

Interest expense, net of interest income, during the second quarter increased slightly to $10.2 million from $10.1 million in 1989.

Murdock also announced the promotion of David A. DeLorenzo to president of Dole Food Co. and to executive vice president, office of the chairman of Castle & Cooke.

DeLorenzo joins Murdock, Raymond F. Henze III and Alan B. Sellers in the office of the chairman. DeLorenzo, previously president of Dole Produce Co., succeeds Robert W. Fisher, who resigned late last month.

In addition, Harry E. Stephens, III was promoted to president of Dole Packaged Foods Co. and Alan B. Sellers will become executive vice president - administration and legal of Castle & Cooke and will have his duties increased to include managing the areas of finance, treasury and human resources.

DeLorenzo joined Dole as a management analyst in 1970. He has served in various management positions, including controller and operations manager in Nicaragua, controller in Honduras, assistant general manager in Costa Rica, general manager of Nicaragua, general manager of Honduras, vice president production-Latin America and vice president/general manager-deciduous. He was promoted to president of Dole Fresh Fruit Co., Boca Raton, Fla., in 1986.

DeLorenzo is a B.A. graduate of Colgate University and holds an M.B.A. from The Wharton School of the University of Pennsylvania.

Stephens joined Castle & Cooke in 1986 as vice president -- planning and business development. He has worked extensively in the development of business plans and strategies for all the Dole divisions.

In particular, he has been involved with the production and marketing

plans for the company's new products in the Dole Packaged Foods Division, specifically new breakfast juice and Pure & Light.

Stephens holds a B.S. degree from Virginia Polytechnic Institute, an M.S. from Massachusetts Institute of Technology and an M.B.A. from Harvard Business School. Prior to joining Castle & Cooke, Stephens was a senior associate with Booz, Allen & Hamilton Inc.

Sellers joined Castle & Cooke as vice president - legal affairs and corporate secretary in 1985. He was promoted to senior vice president, general counsel and corporate secretary in 1988 and to executive vice president, office of the chairman earlier this year.

Sellers holds a B.A. in Economics from Yale University, an M.B.A. from The Wharton School of the University of Pennsylvania and a J.D. from Columbia University Law School. He is also a certified public accountant.

Castle & Cooke is a holding company conducting business in two primary operating areas: food production and distribution through Dole Food Co. and real estate development.

UPPER SADDLE RIVER, NJ (JULY 10) BUSINESS WIRE - Western Union Corporation announced Tuesday that it has expanded service in the Pacific Rim with the introduction of EasyLink electronic mail service to customers in Korea and Taiwan, in addition to Japan.

To facilitate the use of EasyLink messaging services to multinational companies doing business in the Pacific Rim, Western Union has appointed local distributors. Now, both local multinational companies and United States multinationals in this region can receive support for EasyLink services from a nearby source.

Western Union also announced new rates for EasyLink services that will provide customers in Japan, Korea and Taiwan with a price- competitive mode of global communication deliverable via electronic mail, fax, telex or paper-based services. The new rates became effective July 1.

Western Union Corporation provides a broad range of messaging, financial and other services, both domestically and internationally, to meet specific needs of business customers and individual consumers. The company is the leading provider of public electronic mail services, which enable business customers to reach more than seven million electronic mail

fax and telex users worldwide.

DALLAS (JULY 10) BUSINESS WIRE - Medical Care International Inc. (NASDAQ/NMS:MEDC) Tuesday announced that it has filed with the Securities and Exchange Commission a registration statement relating to a proposed offering of $50 million principal amount of convertible subordinated debentures due 2015.

The company will use the proceeds of the offering to support its long-term expansion plans and for general corporate purposes.

Donaldson, Lufkin & Jenrette Securities Corp., Dillon, Read and Co. Inc., and The First Boston Corp. will co-manage the offering.

The company also today announced that it presently intends to redeem, with existing available cash, approximately $12,717,000 of its 13+ percent Senior Subordinated Debentures due Aug. 1, 1998. The proposed redemption date is Sept. 11, 1990.

Medical Care International is the nation's largest owner and operator of freestanding outpatient surgery centers. The company's facilities include 70 surgery centers and 10 specially equipped eye care practices from coast to coast, where a variety of surgical procedures are performed that do not require an overnight hospital stay.

PALO ALTO, CA (JULY 10) BUSINESS WIRE - Hewlett-Packard Co. and IDACOM Electronics Ltd. Tuesday announced an agreement in principle for Hewlett-Packard (Canada) Ltd., HP's wholly owned subsidiary, to acquire IDACOM.

Officials of both companies expect that the agreement will be completed in August. Terms were not disclosed.

IDACOM, which has headquarters in Edmonton, Alberta, is a leading supplier of high-performance computer-based protocol testers used in data communication.

Its products extend a similar family of HP products, and the integrated product line of both companies will offer customers a single source of hardware and software solutions for protocol testing and analysis from entry-level portables to high-end test systems.

Completion of the acquisition will require approval of IDACOM shareholders.

IDACOM, which is privately owned, was founded in 1981 and has 120 employees. For the foreseeable future, it will retain its employees, location and product focus as a division in HP's Communications Test Business Unit. In addition to its plant in Edmonton, it has subsidiaries in the United States, West Germany, Singapore and Australia.

HP's acquisition of IDACOM is an important component of HP's overall strategy for becoming a greater player in the worldwide high-performance instrument and computer business. It is one of several steps HP has taken since 1988 to strengthen its overall position in key businesses.

Others include the acquisitions of Apollo Computer Inc. and Eon Systems Inc.; equity investments in Cascade Microtech Inc., Actel Corp., Sequoia Systems Inc., 3Com Corp. and Octel Communications Corp.; joint ventures with Oki Electric Industry Co. and Northern Telecom; and strategic alliances with Hughes Aircraft Co., Samsung Electronics Co. and Hitachi Ltd. Hewlett-Packard (Canada) Ltd. was established in 1961. The company employs more than 1,300 people in 26 offices across Canada, including manufacturing divisions in Waterloo, Ontario and Calgary, Alberta. The company had revenue in its 1989 fiscal year of more than $407 million (Cdn.).

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 93,000 employees and had revenue of $11.9 billion (U.S.) in its 1989 fiscal year.

CARLSBAD, CA (JULY 10) BUSINESS WIRE - Decom Systems Inc. (NASDAQ:DSII) Tuesday announced new contract awards exceeding $650,000 for its new Quad 7 telemetry acquisition and processing systems, including a contract with Jaycor Corp. for Quad 7 systems to receive, process and store test data for the evaluation of nuclear blast and radiation effects on electronic subsystems.

Jack Robinson, president of Decom Systems, said, ''The nuclear blast effects application of the Quad 7 is expected to achieve dramatically increased data handling and processing capabilities at a reduced cost.

''The Quad 7's high performance-to-cost ratio and customer funded software and engineering development for this project, which is very different from our traditional flight test and satellite communication markets, may lead to substantial business opportunities in the future.''

The company also announced receipt of another order for a Quad 7 telemetry processing system from Northrop Corp. on the Advanced Tactical Fighter (ATF) development program. The unit is to be used to process flight test data for ground certification tests, telemetry processing and data reduction tasks during flight tests to be conducted at Edwards Fir Force Base in California. This additional contract raises total Quad 7 system awards on the ATF program to over $600,000.

Decom Systems Inc. designs, manufactures and integrates aerospace telecommunications equipment and systems for military and commercial users.

SUGAR LAND, TX (JULY 10) BUSINESS WIRE - Henley International, Inc. announced Tuesday that it has agreed to acquire certain assets of the custom procedural tray operations of the White Knight Health Care division of Work Wear Corporation, Inc.

White Knight's custom procedural trays are used in surgical applications in hospitals throughout the United States.

In announcing the acquisition, Kenneth W. Davidson, chairman and president, said, ''Acquiring the White Knight custom tray assets fits a strategic desire to expand our hospital products division. This is the company's smallest division and the one we believe has the largest market potential. While we expect division sales to more than double due to this

acquisition, we must make a number of changes to improve operating efficiencies of the acquired business.''

Henley International, Inc. (NASDAQ:HINT) is a Sugar Land, Texas developer manufacturer and distributor of physical therapy, pain management, and disposable specialty hospital products.

FRAMINGHAM, MA AND CUPERTINO, CA (JULY 10) BUSINESS WIRE - Liant Software Corp. and Motorola Computer Group Tuesday announced the signing of a two-year agreement.

Under the agreement, Motorola will sell the RM/COBOL-85 programming language system from Liant's Ryan McFarland Corp. to users of Motorola's full line of UNIX-based multiuser systems, including the company's newest reduced instruction set computing (RISC) system -- the MultiPersonal Computer (MPC).

The agreement will provide RM/COBOL-85 for the Motorola's MPC and Delta Series 8000 midrange platforms, both based on the company's M88000 RISC microprocessor. Ryan McFarland will also provide a version of the programming language for Motorola's 68030 complex instruction set computing (CISC) system family, the Delta Series 3000.

RM/COBOL-85 conforms to the highest level of ANSI standards for the COBOL programming language, which is used in more than 80 percent of the software applications developed for commercial use.

The programming system is also compliant with the Binary Compatibility and Object Compatibility Standards (BCS and OCS, respectively), developed by the 88open Consortium Ltd., an organization dedicated to accelerating the development and support of ''shrink-wrapped'' M88000-based software.

In accordance with the agreement, Ryan McFarland will provide direct technical support for RM/COBOL-85 to Motorola users through RM/CareWare, the company's toll-free service and support telephone number. Motorola's Field Service Division (FSD) will continue to provide hardware, communications and additional support through on-site maintenance and toll-free access to its national support center.

The Motorola Computer Group (MCG) is a part of the General Systems Sector of Motorola Inc. (NYSE:MOT). It is comprised of four divisions: the Computer Systems Division (CSD), based in Cupertino, markets midrange,

multiuser computer systems and software solutions for commercial and government end users, and value-added resellers; the Field Service Division (FSD), based in Dallas, provides comprehensive service, support and systems integration capabilities for Motorola systems and components users nationwide; the International Computer Division (ICD), based in Schaumburg, Ill., markets, supports and services all Microcomputer Division and CSD products that are sold outside the U.S.; and the Microcomputer Division (MCD), based in Tempe, Ariz., is the world's largest designer and manufacturer of boards and systems based on the VMEbus architecture and markets fully configured systems to technical and OEM computing markets.

Liant Software Corp., a privately held company headquartered in Framingham provides integrated programming systems for constructing and maintaining portable applications.

Liant is the parent company of three operating subsidiaries: Framingham-based Language Processors Inc. (LPI), specializing in scientific and engineering programming systems; Austin, Texas-based Ryan McFarland Corp. (RM), specializing in commercial programming systems; and Template Graphics Software Inc. (TGS), based in San Diego, which specializes in program development systems for graphic applications. Liant Software Ltd., based in London, is Liant's European sales headquarters, and an affiliate, Nippon LPI, is based in Tokyo.

BUDAPEST, HUNGARY (JULY 10) BUSINESS WIRE - Investrade, a US$100 million banking joint venture between Korea's Daewoo Securities Co. Ltd. and Hungarian Credit Bank Ltd., opened for business here Tuesday.

''Investrade's objective is to assist in the internationalization of the Hungarian economy,'' said Chang-Hee Kim, Daewoo Securities' president, at

a ceremony inaugurating the office. ''As the name suggests, the joint venture will focus on investment and trading activities in addition to other banking services.''

Arpad Bartha, president of Hungarian Credit Bank, said, ''The partnership will combine our bank's strong ties to Hungarian business and industry with the international strengths and expertise of Korea's largest securities company.''

''Investrade will invest in equity securities issued by Hungarian companies. We will also be advising on mergers and acquisitions for domestic and international clients,'' said Moon-Han Kim, who has been appointed president of Investrade. He said the joint venture will also promote trade ''by introducing Hungarian products and market information to international clients.''

Investrade will offer a range of corporate finance services and will be active in money market operations. It is also a member of the Budapest Stock Exchange.

Daewoo Securities, Korea's largest securities firm, is a member of the Daewoo Group which is engaged in a broad range of manufacturing activities international trade through over 70 overseas offices, construction and financial services. Hungarian Credit Bank is one of Hungary's leading commercial banks.

#90191b0700 07/10/1990 ~Business Wire

PURCHASE, NY (JULY 10) BUSINESS WIRE - International Paper Tuesday reported preliminary 1990 second quarter net earnings of $185 million, or $1.70 per common share, on sales of $3.2 billion.

Earnings were above the $1.65 per share recorded for 1990's first quarter on comparable sales. In the second quarter a year ago, earnings were $229 million, or $2.04 per share, on sales of $3 billion.

For the first half of 1990, net earnings were $365 million, or $3.35 per common share, on sales of $6.4 billion. Earnings per share declined 16 percent from the $4.00 per share reported for the first six months of 1989. Earnings for the first half of 1989 were $452 million on sales of $5.6 billion.

''Compared to last year, earnings were lower due to price declines for uncoated printing and writing papers and containerboard,'' said John A. Georges, chairman and chief executive officer. ''Our quarter-to-quarter improvement this year was largely due to strong performances by our European and Specialty products businesses.''

Georges noted that Europe's economy is currently expanding at about twice the rate of domestic GNP growth. Sales by the company's European paper and packaging businesses rose 6 percent in the second quarter of 1990 compared to the first quarter.

''We also were able to overcome manufacturing difficulties related to major capital projects that reduced first-quarter performance. These factors enabled us to offset price declines in some of our major product lines.''

Looking ahead to the third quarter, Georges said, ''Slow domestic GNP growth and the traditional summer decline in European business will impact performance. However, price improvement in the uncoated papers markets, and the strength of our consumer packaging and specialty products businesses provide a basis for guarded optimism.''

International Paper Tuesday declared a regular quarterly dividend of 42

cents per share on its common stock and $1.00 per share on its $4.00 cumulative preferred stock. Both dividends are payable on Sept. 17, to holders of record at the close of business on Aug. 24.

International Paper, headquartered in Purchase, is a worldwide producer of paper and forest products. The company is a major producer of printing and writing papers, paperboard and packaging products, and wood products.

The company also operates specialty products businesses and distributes paper and wood products. International Paper has manufacturing operations in 22 countries and exports its products from the United States to more than 70 nations.

#90191b0702 07/10/1990 ~Business Wire

WALTHAM, MA (JULY 10) BUSINESS WIRE - Cambex Corp. reported Tuesday that net income more than doubled on a 48 percent increase in revenues for the third quarter of fiscal 1990, ended June 2, 1990.

The manufacturer of computer storage systems reported that revenues increased to $7,612,000 for the third quarter of fiscal 1990, up from $5,129,000 for the same period of the prior year. Net income for the third quarter this year increased to $1,003,000, equal to 32 cents per share, from $386,000, or 14 cents per share, for the third quarter of fiscal 1989.

For the nine months ended June 2, 1990, Cambex revenues increased to $21,352,000, compared to $12,946,000 for the nine months of the previous year. Net income for the nine months of the current year reached $2,689,000, equal to 87 cents per share, compared to $1,005,000, or 35 cents per share, for the nine months of the prior year ended June 3, 1989.

''With the continuation of our steady growth and the good market acceptance of our STOR/9000 memory product line, the company is now satisfactorily positioned to put in place elements of a long-term plan for the 1990's,'' Joseph F. Kruy, Cambex chairman and president, commented.

Among such activities occuring during the third quarter, Cambex created a new business unit to focus on AIX-based (IBM's UNIX) computer workstation market opportunities and established sales development efforts for current

products in both Europe and Asia, which together represent almost half of the world market for STOR/9000 mainframe computer memory systems.

Cambex Corp. (OTC:CBEX), headquartered in Waltham, Mass., develops and manufactures central and expanded memory storage systems for IBM System/3080, System/3090 and ES/3090 mainframe computers and controller and peripheral enhancement products for IBM Series/1, RT and RS/6000 computers.

CHICAGO (JULY 10) BUSINESS WIRE - Sears Merchandise Group Tuesday announced plans for full implementation of Electronic Data Interchange (EDI), linking Sears with more than 5,000 primary suppliers.

EDI is an electronic method of communicating business documents between

companies.

Michael Bozic, chairman and chief executive officer, said Sears plans to aggressively expand EDI ''because the benefits are so important to both Sears and our suppliers. We believe that EDI will help Sears and all its trading partners become more efficient, reduce transaction costs and improve customer service.

''Our commitment to EDI is so strong that we will provide special training and software packages without cost to our suppliers,'' he said.

Assistance to suppliers will include availability of a fully staffed implementation center to help guide Sears suppliers through EDI installation and use.

The software package allows suppliers to receive and send EDI transmissions of business transactions in the standard format of the American National Standards Institute. It also will enable integration of EDI information into existing vendor systems. In addition to connecting with Sears, the software package can be enhanced to allow interconnecting with other networks and retailers.

Sears has been exchanging electronic documents with vendors for more than 20 years, using proprietary formats. Sears EDI program using industry standards has already has been implemented with more than 300 suppliers through Sears Communications Co., a subsidiary of Sears, Roebuck and Co.

BOSTON (JULY 10) BUSINESS WIRE - Psychemedics Corp. (NASDAQ/OTC:PCMC) of Boston, Friday announced a private placement of $2 million.

The private placement was in the form of common and preferred stock, subordinated notes and warrants.

Dr. Lawrence Kaufman, president and chief executive officer of Psychemedics said, ''We will use the proceeds of this private placement to finance this period of rapid and accelerating growth. Additionally, we look forward to expanding our sales and marketing programs both in the United States and abroad.''

An investor group including H. Wayne Huizenga of Ft. Lauderdale, Donald F. Flynn of Chicago, and other investors will invest approximately $2 million for 317,220 shares of common stock or approximately 3 percent of the

company's outstanding shares; 127,479 shares of a newly created series of 15 percent convertible preferred stock,; convertible subordinated notes in the principal amount of $500,000 and warrants to acquire an additional 475,949 shares.

Part of the investment is being made by converting $1,050,000 of the company's debt to equity. The warrants are for a term of five years and are exercisable at the current market price. The preferred stock and convertible subordinated debt are convertible after six months at $3.53 per share, a discount of 20 percent from the current market price.

Psychemedics Corp. is engaged in drug testing using a proprietary method which analyzes hair for drugs of abuse. Hair testing using Psychemedics technology is currently being used successfully by over 80 corporations throughout the United States. Psychemedics is traded on NASDAQ/Over-the-counter under the symbol ''PCMC.''

     #90191b0721 07/10/1990 ~Business Wire
WESTBOROUGH, MA (JULY 10) BUSINESS WIRE - Epoch Systems Tuesday announced two new breakthrough software options for the Epoch-1 InfiniteStorage family of servers.

HyperWrite is the industry's fastest NFS write software, increasing performance by as much as 250 percent over traditional file servers.

HyperSave is the industry's fastest high-capacity backup software, performing full system backups up to 2000 percent faster than traditional servers. Also announced is Release 4.0, an enhanced version of Epoch's network storage management software and the platform for HyperWrite and HyperSave.

HyperWrite improves the NFS write rate, without violating the NFS protocol by using an innovative patent-pending software design requiring no additional hardware. Performance is increased using a sophisticated caching technique in the Epoch-1 server.

Normally individual files are lined up and written to a disk one at a time regardless of size. With HyperWrite, files are automatically grouped together allowing the maximum amount of data to be written to a disk at any given time.

HyperSave incorporates patent-pending technological advances that dramatically reduce the time to back up large amounts of data

automatically, without operator intervention. With HyperSave the time it takes to backup 30GB of data is reduced from 30 hours to 1.5 hours. It uses a disk mirroring technique that automatically and continuously backs up inactive data by staging it to a set of optical disks in an optical library unit that are dedicated to backup.

HyperWrite is available for $3,900 and HyperSave starts at $5,000. Both options are available 90 days after receipt of order. Release 4.0 is bundled with the purchase of any Epoch-1 InfiniteStorage server.

Epoch Systems is a leading supplier of network storage management systems for users of high performance workstations in business, industry, education and government. The company is headquartered in Westborough with sales and support offices located throughout the United States, Canada, Europe and Asia.

InfiniteStorage is a trademark of Epoch Systems Inc.

Network File System is a trademark of SUN Microsystems Inc.

#90191b0723 07/10/1990 ~Business Wire

WESTBOROUGH, MA (JULY 10) BUSINESS WIRE - Epoch Systems Tuesday announced the Epoch-1 20-Series, an entry-level member of the Epoch-1 family of InfiniteStorage servers. The 20-Series, with 20 GB of storage, has all the capabilities of existing Epoch servers, but starts at just $82,900.

It provides fully automated storage management and five times the storage capacity than comparably priced all magnetic file servers.

The 20-Series is a 20-40GB, dedicated, dedicated NFS storage server that transparently integrates high capacity, low cost optical disks and high speed magnetic disks with file server technology and storage management software. This design offers a unique storage solution for today's data intensive environments.

The system greatly increases productivity and reduces costs by providing on-line access to 20GB-40GB of data, freeing up local disk space which enables al systems on the network to perform more efficiently; automatic on-line archiving, eliminating manual bookkeeping; fully automated system backup, enabling on-line, unattended backups with no disruption to the user and protection against accidental data loss; integrated magnetic and optical disks for magnetic disk performance at optical disk prices; and a specialized server architecture for high performance file access.

The base configuration of the 20-Series includes a 760MB magnetic disk, a 2.3GB 8mm carridge tape drive, 8MB of memory and a Hewlett Packard 5-1/4'' 20.8GB rewritable optical disk library unit. Expansion options include a second 20.8GB library unit, up to five additional magnetic disks and an additional 16MB of memory in 8MB increments.

The Epoch-1 InfiniteStorage family are NFS and TCP/IP-compatible storage servers that use hierarchical storage techniques to transparently integrate optical and magnetic disks. The Epoch-1 family includes systems that can be configured with 1GB to 1000GB of online storage. They are designed as a central data storage resource for networks requiring very fast online access to high-capacity disk storage over an Ethernet network.

Epoch Systems Inc. is a leading supplier of network storage management systems for users of high performance workstations in business, industry, education and government. The company is headquartered in Westborough with sales and support offices located throughout the United States, Canada, Europe and Asia.

#90191b0729 07/10/1990 ~Business Wire

NEW YORK (JULY 10) BUSINESS WIRE - S&P CreditWire 7/10/90 -- S&P affirms Time Warner Inc.'s double-'B' long-term debt, and single-'B'-plus subordinated debt and preferred stock ratings and removes them from CreditWatch where they were placed April 16 with negative implications.

Time Warner units American Television & Communications Corp.'s double-'B' senior debt and Lorimar Telepictures Corp.'s single-'B'-plus subordinated debt ratings (both analyzed on a consolidated basis with Time Warner) are also affirmed and removed from CreditWatch.

Time Warner's and American Television & Communications' single-'B' commercial paper ratings are affirmed; these ratings were not on Watch.

About $1.5 billion rated long-term debt and $5.6 billion (liquidation value) rated preferred stock are affected.

Time Warner's agreement to guarantee $650 million of debt of unrated Pathe Communications Corp., pursuant to Pathe's proposed acquisition of MGM/UA Communications Co., appears unlikely to be consummated.

The transaction, on the heels of other recent acquisitions, would have increased Time Warner's already substantial financial risk. However, if

the deal is revived, S&P will again weigh the potential financial impact.

S&P also remains concerned about Time Warner's sizeable debt repayments in March 1992 (extendable to March 1993), which are expected to require refinancing.

In light of these factors, S&P's outlook for the rating is negative. S&P continues to view Time Warner's business positions, cash generating capacity, and asset values favorably despite the company's aggressive financial profile.

CONTACT: S&P CreditWire, New York Heather M. Goodchild, 212/208-1606.

#90191b0731 07/10/1990 ~Business Wire

KENILWORTH, NJ (JULY 10) BUSINESS WIRE - Harmonia Bancorp (NASDAQ:HBCI), the parent company for Harmonia Savings Bank, Tuesday reported net income of $1,116,000 or 23 cents per share for the second quarter of 1990 compared with net income of $1,090,000 for the year-ago second quarter.

For the six months ended June 30, net income was $2,201,000 or 46 cents per share vs. net income of $2,160,000 in the same period of 1989.

Per share figures are not applicable to the periods prior to the bank's conversion from mutual to stock ownership in November 1989.

Walter D. Tombs, chairman of the board and chief executive officer, attributed the results to continued growth in income from core banking activities, partly offset by a higher provision for loan losses and a further adjustment to the value of a real estate joint venture.

''Overall, the quarterly and year-to-date performances in 1990 are in line with our expectations,'' said Tombs.

''That these results were achieved in a slower-growth environment demonstrates the underlying strength of our core banking operations.''

Net interest income grew to $5,804,000 in the second quarter of 1990, up $1,031,000 or 21.6 percent from the comparable period of 1989. For the six months in 1990, net interest income totaled $11,241,000, a 17.4 percent rise from the first half of 1989. Other operating income was $339,000 and $796,000 for the quarter and year-to-date, respectively, in 1990 vs. $418,000 and $738,000 in the comparable periods of 1989.

At June 30, Harmonia's total assets were $700.6 million, an increase of 11.4 percent from the same date in 1989, and deposits of $602.6 million exceeded the prior year level by 4.4 percent. Shareholders' equity

represented 12.6 percent of total assets or $18.64 per share.

Nonperforming assets stood at 0.47 percent of total assets compared with 0.42 percent at March 31.

Through its principal subsidiary, Harmonia Savings Bank, Harmonia Bancorp Inc., operates 20 offices in five central New Jersey counties. Organized in 1851, Harmonia provides traditional savings bank products and services complemented by multifamily residential loans and home equity lending.

BOSTON (JULY 10) BUSINESS WIRE - Wellfleet Communications, a leading vendor of high performance internetworking products, Tuesday announced it has jointly defined the basis for an SNMP-based Access Module with Digital Equipment Corp., that will allow the DECmcc Management Station to manage a network of Wellfleet Feeder Node, Link Node, and Concentrator Node multiprotocol router/bridges.

Wellfleet also announced it has joined Digital's DECmcc Strategic Vendor Program. Under this program, Wellfleet has provided Digital with the specifications for its SNMP Management Information Base (MIB) which Digital plans to incorporate into the DECmcc Management Station.

Digital's DECmcc implements the Enterprise Management Architecture, a standards-based management framework designed to integrate heterogeneous, multivendor, distributed computing environments, and the communications facilities that link them.

Based upon a foundation of emerging ISO/OSI management standards, EMA provides for managing both standards-based and proprietary systems, devices and applications. The highly flexible architecture provided by EMA is designed to enable network and systems operators to design and implement management solutions which address their specific organizational and technical requirements.

Wellfleet History of Standard-based Network Management

The DECmcc Wellfleet Access Module supports the standard SNMP-defined Management Information Base (MIB) as well as a set of Wellfleet-defined private enterprise MIB extensions.

Wellfleet has extended SNMP to provide fully integrated, standards-based management for large multiprotocol, multi-media internetworking environments. In addition to monitoring protocols like DECnet and TCP/IP, Wellfleet's MIB can monitor all the wide area components and circuits in a network.

Wellfleet Communications Inc. is a leading provider of standards-based internetworking products for connecting LANs within the campus and across the wide area. Based on the most advanced multiprocessor architecture in the industry, its products offer users an expandable platform for network growth and migration.

Wellfleet was the first vendor to provide concurrency -- multiprotocol routing and bridging services in a single product -- and today offers an extensive range of local area and wide area network connectivity options. Its products currently operate in engineering, manufacturing, financial, telecommunications, government, and academic environments throughout the world.

MIAMI (JULY 10) BUSINESS WIRE - Peerless Productions Ltd. Inc. (NASDAQ:PEER) Tuesday announced that video production of the Broadway play ''Doubles'' will begin with rehearsals on Aug. 13, with actual shooting to begin Aug. 20.

''Doubles'' the video, is based on the 1985 Broadway comedy of the same name which revolved around four middle-aged professional men who played tennis every week for five year, and their wives, trials, tribulations, etc.

''Doubles'' the video will be produced and directed by Joseph Adler of Noah Productions, with Paul Lazarus III of Peerless Productions acting as Executive Producer.

The cast includes such notable stars as Gary Burghoff, who played Radar on M.A.S.H. and Steve Landesburg of Barney Miller. The video will be shot in a studio in Miami. Peerless has 45 percent ownership in this production.

The ''Doubles'' video will be sold to various cable companies on a market-by-market basis, with each market getting two showings. After the showings, the video will be returned to the Peerless library for further distribution wherein Peerless will maintain its 45 percent interest.

Peerless Productions Ltd. Inc. is a Florida-based company developing and producing high quality, original theatrical properties for the motion picture industry, live theater and television internationally.

TIMONIUM, MD (JULY 10) BUSINESS WIRE - Kirschner Medical Corp. (NASDAQ:KMDC) reported Tuesday the company has settled all existing legal disputes with ALM Equipment Hospitaliers S.A., a former supplier of surgical lights to Kirschner's Chick Medical Products Division.

While terms of the settlement were not disclosed, the company said the settlement eliminates Kirschner's liabilities to ALM associated with the litigation, and returns approximately $1,760,000 from reserves previously established for this purpose to Kirschner's March 31 balance sheet.

Kirschner also stated its Chick Medical Products Division, located in Greenwood, S.C., began shipments of its new surgical and birthing room lighting system in June. Chick is operating as a discontinued operation of Kirschner while the company positions Chick for disposition. Jason Beeble, Chick's national sales manager, said in anticipation of the separation from Kirschner, fourteen of the total sixteen designated U.S. sales areas have already been filled with experienced territory sales managers. In addition to marketing the new light, the expanded sales force will also be marketing Chick's line of general and orthopedic surgical tables.

Kirschner develops, manufactures and markets orthopedic instruments and implants including reconstructive surgery and trauma devices, orthopedic support products and medical endoscopic systems. The company operates facilities in Timonium; Fair Lawn, N.J.; Delray Beach, Fla.; Marlow, Okla.; Hopkinton, Mass.; and Valencia, Spain.

HOUSTON (JULY 10) BUSINESS WIRE - Tenneco Inc. (NYSE:TGT) Tuesday announced an increase of four cents in its quarterly common stock dividend effective with the third quarter of this year.

Tenneco's board of directors voted to raise the dividend from 76 cents a common share to 80 cents. The new annual rate is $3.20 compared with a previous annual rate of $3.04. The dividend is payable September 11 to stockholders of record at the close of business on August 10.

James L. Ketelsen, Tenneco chairman and chief executive officer, said, ''This dividend increase is confirmation of Tenneco's successful restructuring and reflects the confidence we have in the prospects for our businesses in 1990 as well as the opportunities we think will be available for earnings growth in 1991.''

The board also declared a dividend of $1.85 per share on Tenneco's issue of $7.40 cumulative preferred stock. The preferred stock dividend is payable on September 30 to those who are holders of stock at the close of business on August 24.

Tenneco Inc. is a Houston-based, diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

BOSTON (JULY 10) BUSINESS WIRE - BBN Communications, a leading vendor of private wide area communications networks, Tuesday announced it has chosen Digital Equipment Corp.'s Enterprise Management Architecture (EMA), and the DECmcc Director software, as the network management platform upon which it plans to build its next generation integrated network management solution.

BBN expects this platform to allow present and future customers to monitor and control their diverse, wide-area backbone networks more efficiently and cost effectively.

The company simultaneously announced it has joined Digital's DECmcc Strategic Vendor Program, and stated its intention to OEM Digital's DECmcc Director software. BBN is the first company to utilize the DECmcc Director as a software platform upon which it will integrate its unique

network management system products. BBN expects to build upon Digital's extensive enterprise management capabilities.

Digital's highly regarded Enterprise Management Architecture is a standards-based management framework designed to integrate heterogeneous, multi-vendor, distributed computing environments, and the communications facilities that link them. Based upon a foundation of emerging ISO/OSI management standards, EMA provides for managing both standards-based and proprietary systems, devices, and applications.

BBN Communications intends to build a unified architecture on the Digital platform to manage all the wide-area network components in its product line. In additon, BBN intends to utilize EMA to link to other OSI-based network management systems, in order to pass the status and control information necessary for full management capability.

Over the next six to 12 months, BBN will draw on its experience with, and understanding of, large scale network environments to add significant value to the EMA platform. BBN plans to initially develop advanced planning, operations and integration capabilities for general release in the first half of 1991.

For existing customers, BBN anticipates a phased migration from the current BBN Communications network management system, without disruption to existing network service, according to Palmer.

A division of Bolt Beranek and Newman Inc., BBN Communications designs and builds private wide-area communications networks for commercial, government and international organizations. The company also provides network consulting, management and other personal services. For the fiscal year ending June 30, 1989, Bolt Beranek and Newman had sales of $292 million.

Digital Equipment Corp., headquartered in Maynard, is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise, from the desktop to the data center.

CINCINNATI (JULY 10) BUSINESS WIRE - Cincinnati Bell Inc. (NYSE:CSN) today announced it has signed a definitive agreement, subject to Public Utility Commission of Ohio approval, to acquire the customer base and certain other assets of Unitel Communications Inc., an Ohio based long

distance service reseller.

The purchase price was not disclosed.

Unitel, based in Columbus, Ohio, has been in operation since April 1988, providing service in the Cleveland, Columbus, Dayton, and Akron areas. Its primary market is small to mid-sized businesses.

''Unitel's business concept is to deliver high quality service with a guaranteed lowest price compared to major carriers,'' said Colin LeVeque Unitel's founder and President.

Unitel will be merged into the Cincinnati Bell Long Distance division of LDN Communications which is the resale subsidiary of Cincinnati Bell Inc. Unitel's business concept will continue to be offered as a CBLD product using the Unitel name.

''Unitel has been very successful in attracting new customers by promoting its guaranteed lowest price -- highest quality concept,'' said L.L. Hendrickson, president and chief executive officer of LDN Communications.

''This relationship will give LDN an entry into the northern half of Ohio. The Cleveland and Akron markets are particularly strategic to us as we more fully develop our four state operating area,'' Hendrickson concluded.

Cincinnati Bell Inc. supplies telecommunications, information management and telemarketing services.

Services include information systems development, data processing and systems consulting, discount long distance telecommunications, market research, electronic database services, telecommunications equipment supply and repair, and inbound and outbound telemarketing.

CAMBRIDGE, MA (JULY 10) BUSINESS WIRE - Atlas Venture Tuesday announced that it has led a $4.5 million financing for Marlboro, Mass.-based Viewlogic Systems Inc., to form Viewlogic Europe B.V., the exclusive European operations of Viewlogic's computer-aided engineering (CAE) software products.

Atlas Venture, the lead investor in the financing, and Viewlogic have set in motion a marketing, sales and support strategy that parallels

Viewlogic's successful efforts in the United States, using a direct sales and support organization and leveraging OEM agreements and distributors. Viewlogic Europe B.V., a Dutch holding company, has been established with operations headquarters in Basingstoke, U.K., and sales subsidiaries in West Germany, France and Italy.

Alain Hanover, president of Viewlogic Systems Inc., stated that ''Atlas Venture has successfully brought together a top-tier group of international investors who will allow us to accelerate substantially our plans to develop the European market. Europe is a growing market and will be a crucial element in our successful expansion during the 1990s.''

''Many small U.S. companies need to open field operations in Europe, but do not have the capital, contacts, credibility or familiarity with Europe to compete and succeed,'' according to Barry Fidelman, general partner of Atlas Venture, an international venture capital firm.

''Atlas Venture is uniqely positioned to help U.S. high-technology companies break into the European market. During the past year, we worked closely with Viewlogic to develop a European business plan, syndicate the financing, and select management for its European company.

''The group of European venture capital firms now investing in the company provide the capital, market familiarity and experience needed for Viewlogic Europe to build strong direct sales and customer support forces in major markets,'' Fidelman said.

The investors in Viewlogic Europe B.V and Partech Associates (France), GENES GmbH Venture Services (West Germany), 3i Capital (United Kingdom) and Atlas Venture.

Kanti Purohit, previously vice president of sales for Viewlogic Systems Inc., has been named president of Viewlogic Europe. Eric Laurent, formerly with Daisy Systems and Texas Instruments, has joined as sales manager for Viewlogic France.

Hans-Dieter Machuta, formerly with Daisy Systems and Ferranti Electronics, is sales manager for West Germany. An office in Italy will be opened shortly. Sales in other European markets will be handled through distributors.

Atlas Venture, a leader in high-technology investment, has offices in Cambridge, Mass.; Amsterdam, The Netherlands; and Munich, West Germany. Since 1980, it has invested in more than 80 companies. Today, Atlas Venture manages $100 million in funds through independent U.S. and European partnerships.

MYRTLE BEACH, SC (JULY 10) BUSINESS WIRE - Anchor Financial Corp., based in Myrtle Beach, and the parent company of the Anchor Bank, Tuesday reported a 5 percent increase in net income of $772,139, or 80 cents per share for the six months ended June 30, 1990 over the $733,433, or 77 cents per share for the like period in 1989.

Net income for the second quarter of 1990 was $377,782, or 39 cents per share, compared with the $374,456, or 39 cents per share earned a year earlier.

Annualized return on average assets was 1.28 percent at June 30, 1990 compared with 1.35 percent at June 30, 1989.

Total assets on June 30, 1990 were $129.4 million, up 16.7 percent from the $110.9 million reported on June 30, 1989. Total deposits were $105.4 million, up 20.4 percent from $87.6 million a year earlier. The company's ratio of common equity to assets was 12.8 percent and book value per share reached $17.29 on June 30, 1990.

The primary reasons for the increase in earnings during 1990 were an increase in net interest income and tighter non-interest expense controls. Net interest income was up 4.0 percent during the period while non-interest expense decreased 1 percent.

ROCHESTER, NY (JULY 10) BUSINESS WIRE - Paychex Inc. (NASDAQ:PAYX) Tuesday reported net income of $8,566,000 or 66 cents per share for the fiscal year ending May 31, compared to $9,446,000 or 73 cents per share a year earlier.

Revenue for fiscal 1990 increased to $120,200,000 from $101,154,000 last year.

Fourth quarter earnings were $1,802,000 or 14 cents per share on revenue of $31,213,000, compared to net income of $2,187,000 or 17 cents per share on revenue of $26,541,000 for the same period last year.

Tom Golisano, chief executive officer, noted that although revenue for the year increased 19 percent, new client additions were below expectations. ''Lower than anticipated client growth, along with increased costs associated with the expansion of our sales and field management organization, the introduction of two new products, and the installation of a new payroll software system, resulted in the lower earnings,'' he noted.

Golisano added that the new products, Taxpay and Personnel Services, are now available through Paychex offices representing over 50 percent of the existing client base and will be introduced in the balance of the offices during fiscal 1990. He observed, ''We continue to be pleased with the acceptance of these new products and with the profit margin improvement trend Paychex is beginning to experience in the basic payroll business. We fully expect our investment in people, new rSducts and software over the last twelve months to result in improved financial performance in the years ahead.''

Paychex is primarily engaged in the preparation of payroll checks, internal accounting records, and all federal, state and local payroll tax returns for businesses with 1 to 200 employees. At fiscal year end Paychex' branch offices were processing payrolls for over 120,000 clients.

SUGAR LAND, TX (JUNE 10) BUSINESS WIRE - Appearing before the New York Society of Security Analysts, Robert C. Hanna, president and chief executive officer of Imperial Holly Corp. (AMEX:IHK) projected another good year for Imperial Holly in fiscal 1991.

''Our extensive capital improvement program at Holly is bearing fruit in terms of greater slice capacities and more efficient operations in California and is expected to produce similar results in our Rocky Mountain operations. We expect continued firm prices for refined sugar during the year, and sugarbeet acreage contracted in the Rocky Mountains exceeds last year's levels,'' Hanna stated.

''Assuming that normal development of the Rocky Mountain crop continues and our price outlook is correct, fiscal 1991 results should be substantially ahead of those reported in fiscal 1990,'' he went on to say.

Speaking of the first quarter ended June 30, Hanna stated that ''Although June results are not yet in, present indications are that earnings for the quarter could be double those reported in the preceeding quarter and compare favorably with the first quarter of fiscal 1990.'' Hanna cited an excellent spring California campaign and continued capital improvement based efficiencies in the California factories as contributing factors in the strong first quarter showing.

CHARLOTTE, NC (JUNE 24) BUSINESS WIRE - Datasouth Computer Corp. and Gates F/A Distributing (NASDAQ: FACO) Tuesday announced a distribution agreement that makes Datasouth's heavy-duty dot matrix printers available

to new and existing Gates/FA customers.

Under terms of the agreement, Gates/FA will distribute Datasouth's entire line of heavy-duty dot matrix printers including the DS 180, DS 180DD and DS 400 through a national distribution network of resellers across the country. The agreement takes effect immediately.

''We are excited about the increased market presense we will gain through our association with Gates/FA. This relationship will provide a high degree of visibility for Datasouth in the reseller market,'' said Jim Busby, Datasouth's president. ''And, Gates/FA gains a manufacturer with a line of heavy-duty dot matrix printers that will complement its existing line of products.''

According to Phil Ellett, executive vice president of Gates/FA Distributing, ''The heavy-duty performance of Datasouth's 'industrial strength' printers fit nicely with our high-end strategy incorporating UNIX and workstations. Additionally, since Datasouth's printers meet rigid government specifications, they will fill a niche for our resellers dealing with those markets.''

The proliferation of LANs, high-powered operating systems and workgroup technologies has let to multiple users and applications, as well as the need for multiple printers for hardcopy output. While laser printers handle letter quality and grahics needs, dot matrix printers are required for such front office activities as payroll checks, invoices, labels and multi-part forms.

Datasouth's product line was developed for applications where reliability and durability are important considerations.

Located in Greenville, S.C., Gates/FA Distributing is a national distributor of a select number of high quality microcomputer product lines. Serving only the reseller, Gates/FA provides ''Next Day/No Extra Cost!'' delivery from its centralized-hub warehousing facility in Xenia, Ohio, to resellers across the country who place their orders by 9 p.m. EST.

Located in Charlotte, Datasouth was founded in 1977 to design, manufacture and distribute heavy-duty dot matrix printers. With speeds ranging from 180 to 620+ cps, Datasouth printers are intended for tasks such as printing multi-part forms, invoices, labels, checks and high-speed report printing.

A variety of available interfaces allows plug compatability with virtually any system. Datasouth sells its products through distributors, VARs and direct to large OEMs.

NASHVILLE, TN (JULY 10) BUSINESS WIRE - Northern Telecom (NYSE:NT) and Hewlett-Packard Co. (NYSE:HWP) Tuesday announced the first world-wide licensing agreement of the HP-UX operating system for use with telecommunications equipment.

The contract is projected to generate several hundred million dollars in additional revenues for the two companies during the next few years.

HP-UX will be used with Northern Telecom's current DMS SuperNode switching systems, and with the company's emerging S/DMS fiber-optic transmission and S/DMS broadband switching products.

Northern Telecom's decision to use HP-UX, an open architecture computing platform, will become increasingly important as the Advanced Intelligent Network (AIN) market evolves and users choose to access new services from telephone companies.

HP-UX will provide a tighter integration of general purpose computers and telecommunications systems, allowing telephone companies to connect HP and other manufacturer's workstations and minicomputers. HP-UX will also facilitate the use of industry standard, third party software on Northern Telecom's products, thus reducing development intervals, ensuring applications portbility, and resulting in more cost-effective enhanced service introduction.

The implementation of the HP-UX operating system across the operations, administration, maintenance and provisioning (OAM&P) aspects of Northern Telecom's DMS SuperNode and S/DMS products will allow telephone companies to further streamline their network operations, reduce operating costs and increase revenues.

For example, offering a common ''look and feel'' across various products will reduce training requirements and allow faster, more efficient service introduction.

HP-UX will be used within Northern Telecom's transmission products in the fourth quarter of 1990, and on its access and switching products in 1991. HP-UX is based on, and fully complies with AT&T's UNIX system.

Northern Telecom is the leading global supplier of fully digital switching systems. Its revenues in 1989 were approximately $6.1 billion. Its common shares are listed on the Montreal, Toronto, Vancouver, New York, London and Tokyo stock exchanges.

Hewlett-Packard is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 93,000 employees and had revenues of $11.9 billion in its 1989 fiscal year.

BLUE BELL, PA (JULY 10) BUSINESS WIRE - Unisys Corp. said Tuesday that Edward A. Blechschmidt has been appointed president of its Pacific Asia Americas Division (PAAD), responsible for marketing, sales, training and service for 19 subsidiaries and distributors in 18 countries, and for joint ventures in Japan, India, and Thailand.

As vice president, Japan Operations, and president, Unisys Japan Limited, Blechschmidt has been responsible for all Unisys interests in Japan and has served as the corporation's primary interface to its Japanese joint venture since January 1988. He will continue to serve on the board of directors of both Nihon Unisys Limited, the Unisys joint venture with Mitsui & Co. Ltd., and of Oki Unisys Limited, a Unisys manufacturing joint venture company.

Blechschmidt will continue to report to Unisys executive vice president Reto Braun who had been PAAD president and was recently given additional responsibilities including U.S. computer marketing and sales and Unisys Corporate Marketing.

PAAD encompasses more than 30 countries, including Japan and Pacific Rim markets, Central and South America, Mexico and Canada. The division accounted for more than $2 billion in consolidated revenue to Unisys last year and employs approximately 7,500 people.

Blechschmidt, 37, joined the corporation in 1975. He has been president, Memorex Media Products Group; president, Burroughs Business Forms Division; executive assistant to the president and secretary to the corporation's Management Committee.

Blechschmidt holds a bachelor's degree in Business from Arizona State University and a MBA from San Diego State University.

CARMEL, IN (JULY 10) BUSINESS WIRE - Conseco Inc. (NYSE:CNC), a financial services company headquartered in Carmel, announced today that Conseco Capital Partners L.P. (CCP) has agreed to acquire the life insurance group of Lomas Financial Corp. (NYSE:LFC) for approximately $140 million in cash and $25 million principal amount of junior pay-in-kind securities.

The life insurance group includes Jefferson National Life Insurance Co., Indianapolis; Union Life Insurance Co., Little Rock, Ark.; and First Continental Life & Accident Insurance Co., Salt Lake City. The group in 1989 had total revenues and premiums collected of approximately $380 million; total assets at March 31, 1990, were approximately $860 million. The group distributes life insurance products through a nationwide agency force and annuity products through financial institutions.

The transaction is subject to approval by the Bankruptcy Court that has jurisdiction over Lomas' Chapter 11 proceedings and by various state insurance regulatory agencies. The acquisition is expected to be completed by the fall of 1990.

Conseco Chairman Stephen C. Hilbert said, ''We're very excited about the opportunities presented by this acquisition. Jefferson National Life, the lead company in Lomas' insurance group, has earned the long-term respect of the industry for its ability to distribute life insurance products to niche markets and for its excellent customer service. We plan to capitalize on opportunities to enhance its profitable products.''

CCP is a Delaware limited partnership to which Conseco Inc. and several institutional investors have committed $70 million in equity capital for the purpose of acquiring and operating life insurance companies. The Lomas insurance group would be the second partnership acquisition. The first partnership acquisition, Great American Reserve Insurance Co., was completed June 27, 1990.

GREENWICH, CONN. (JULY 10) BUSINESS WIRE - After only two months of its planned 18-month relaunch program, The Perrier Group of America (PGA) announced Tuesday that it has already regained distribution in 80 percent of its retail outlets.

Perrier has also returned to over 50 percent of the nation's top restaurants, bars and hotels, and to over 70 percent in its key markets, including New York and Washington D.C.

The company reports that sales of its regular, unflavored product in May 1990 were 67 percent of total Perrier sales in May 1989. ''We honestly didn't think we'd reach this benchmark until months from now. The response shows what we've always believed. When people have the chance to choose Perrier, they do,'' said Kim E. Jeffery, senior vice president of sales and marketing for PGA.

''We're not even at full strength. Our 'Perrier With A Twist' products, which traditionally account for 40 percent of our total volume, aren't available yet,'' says Jeffery.

With distribution and consumer demand running ahead of schedule, Perrier says it is ready to begin Phase II of its relaunch program, a $25 million advertising, promotion and marketing campaign. Pivotal elements of the effort include.

-- Perrier's most aggressive advertising campaign ever, featuring the recently relaunched Earth's First Soft Drink theme. The campaign will run in print, radio and on major network television sporting events.

-- Special events sponsorships, including the Corporate Challenge Race Series in 18 U.S. markets, the Volvo Tennis Series for 120,000 amateurs and many local programs.

-- On-premise support, including an additional 50 special assistants, servicing key restaurant and food service accounts in major markets.

-- National promotional activity, which will encompass widespread product sampling and coupon distribution in top markets.

     #90191b0823 07/10/1990 ~Business Wire
DALLAS (JULY 10) BUSINESS WIRE - Lomas Financial Corp. (NYSE:LFC) announced Tuesday that it has executed an agreement to sell its life insurance group to Conseco Capital Partners L.P., a limited partnership formed by Conseco Inc.

The purchase price will be approximately $140 million in cash and $25 million principal amount of junior pay-in-kind securities.

The life insurance group includes Jefferson National Life Insurance Co., Indianapolis, Ind.; Union Life Insurance Co., Little Rock, Ark.; and First Continental Life & Accident Insurance Co., Salt Lake City.

In connection with this transaction, Lomas will retain certain office buildings previously used in the life insurance business which have a statutory book value of approximately $15 million.

The sale of the life group is subject to approval by the Bankruptcy Court that has jurisdiction over Lomas' Chapter 11 proceedings, various state insurance regulatory agencies and certain other conditions. It is

anticipated that subject to receipt of the required approvals, the transaction will be consummated in the fall.

Jess Hay, chairman and chief executive officer of Lomas, said that the sale of the life insurance group is the second major divestiture step the company has taken this year to streamline its operations and to focus on its core businesses.

''The life insurance businesses were performing well,'' he said, ''but we have determined that all of our resources should be focused on Lomas' core businesses, principally mortgage banking and information and systems services to the mortgage finance industry.''

Hay said that, with the sale of the company's ELLCO Leasing Corp. in April approximately $300 million in cash will have been raised through asset disposition if the sale of the life insurance business is consummated pursuant to the agreement.

''Over the past several months we have been working to more sharply focus, better define and grow our mortgage banking business,'' he stated. ''By concentrating our business in fewer areas, we are better able to identify opportunities for growth and ultimately to maximize profitability.

''We have made excellent progress in this area and believe very strongly that the businesses we are in today have a viable and exciting future,'' he said.

Hay said that in the 90s, Lomas plans to concentrate on mortgage servicing systems and communication services, administrative services to conduit issuers of mortgage-backed securities, funds and asset management and investment advisory services, real estate and mortgage-related investment banking services, and general administrative services to the mortgage finance industry.

BOCA RATON, FLA. (JULY 10) BUSINESS WIRE - SK Technologies Corp. (NASDAQ:SKTC) Tuesday announced that the company has signed an agreement subject to completion of the test phase for installation of SK's StoreKare point-of-sale computer software with Brice Foods, franhisor of I Can't Believe It's Yogurt frozen yogurt franchises.

The test phase of the StoreKare system is scheduled to begin July 12.

Upon the successful completion of the test phase, SK and Brice will enter into an agreement which SK's management anticipates could result in the sale of approximately 100 StoreKare point-of-sale and complete back-office systems this year.

SK has agreed to sell the IBM/PS2 computer to any franchisee requiring a hardware package as well. Brice Foods, based in Dallas, currently has 400 I Can't Believe It's Yogurt stores throughout the country and opens, on a historical average, 12 to 15 new stores each month.

Randy Selman, president of SK said, ''We are very excited about working with Brice Foods (I Can't Believe It's Yogurt). We are impressed with the historical growth pattern the stores have shown to-date and look forward to a long and mutually beneficial relationship.''

SK Technologies Corp. develops and markets point-of-sale and data communications software specifically designed for fast foot restaurant and retail operations as well as other franchise businesses.

#90191b0843 07/10/1990 ~Business Wire

DOVER, NH (JULY 10) BUSINESS WIRE - Great Bay Bankshares Inc. (NASDAQ:GBBS) Tuesday announced preliminary unaudited net income of $470,000, or 17 cents per share, for its fiscal year ended June 30, 1990, compared to $4.5 million, or $1.37 per share, for the fiscal year ended

June 30, 1989.

The company expects audited financials to be released by July 31, 1990.

Preliminary unaudited results for the fourth quarter reflect a loss of $946,000, or 35 cents per share, compared to a profit of $1,329,000, or 42 cents per share, for the fourth quarter one year ago, as the company will be allocating $2 million in additional loan loss provisions this quarter. This will bring loan loss reserves to approximately $5.2 million or 2.2 percent of total loans.

The additional provisions are in response to a further increase in non-performing assets to $12.7 million or approximately 4.1 percent of total assets, as compared to $4.7 million or 1.52 percent at March 31, 1990. Non-performing assets included $6.4 million of non-performing loans, $4.8 million of restructured loans, and $1.5 million of real estate owned.

Certain closely monitored loans mentioned in the third quarter accounted for most of the increase in non-performing assets.

''The additional provisions for loan losses, most of which were non-deductible for tax purposes, will adversely affect what otherwise would have been a profitable quarter,'' according to Donald R. Hatt, president and chief executive officer.

''The company is being affected by the generally adverse real estate market in New Hampshire. Due to the depth and duration of the real estate downturn, management believes further increases in non- performing assets may be realized. As a result, the company will continue to establish loan loss provisions prudently.

''Our capital to asset ratio is expected to approximate 13.7 percent as of June 30, 1990, providing us with a strong capital base of over $42 million to help weather the current real estate correction. Book value per share is expected to approximate $15.58 per share compared to $15.85 per share at June 30, 1989.''

The principal subsidiary of Great Bay Bankshares, Southeast Bank for Savings (a $300 million, FDIC insured, full-service community bank), is the dominant financial institution in its market area with over 20 percent of the deposit market. Great Bay Bankshares is also the parent holding company of Constitution Trust Co., which has $55 million of assets under management.

#90191b0850 07/10/1990 ~Business Wire

LOS ANGELES (JULY 10) BUSINESS WIRE - Argonaut Group Inc. Tuesday announced consolidated net income after tax of $21.4 million, or $2.30 per common share, on total revenue of $139.7 for the quarter ended June 30, 1990, and $41.3 million, or $4.42 per common share, on total revenue of $287 million for the six months ended June 30, 1990.

For the second quarter last year, net income was $20.2 million, or $2.02 per common share, on total revenue of $128.2 million. For six months ended June 30, 1989, net income was $40.7 million, or $4.01 per common share, on total revenue of $254.8 million.

Consolidated operating income after tax -- excluding gains on the sale of investments -- was $21.4 million for the quarter ended June 30, 1990, compared with $20.1 million for the second quarter of 1989. For the six months ended June 30, 1990, operating income was $39.4 million, compared with $40.2 million for the same period last year.

Total revenue includes a net loss on sales of investments of $100,000 for the current quarter and a net gain of $2.8 million for the six months ended June 30, 1990. In 1989, gains on sales of investments were $60,000 for the second quarter and $660,000 for the six months ended June 30.

Current-year gains resulted primarily from the sale of investments in Earle M. Jorgensen Co. in response to a tender offer. Argonaut cannot anticipate when or if similar gains may occur in the future.

On July 27, 1989, the Argonaut Group board of directors authorized the repurchase of up to 2 million shares of its outstanding common stock. The company re-acquired 89,400 shares during the second quarter of 1990 for a total to date of 403,084 shares.

There were 9,254,551 common shares outstanding at June 30, 1990, compared with 9,426,351 common shares outstanding at December 31, 1989.

On July 2, 1990, the California Insurance Commissioner filed formal regulations regarding implementation of the rollback provisions of Proposition 103. Argonaut Group does not write personal automobile insurance, the main thrust of Proposition 103.

The Argonaut Insurance subsidiary, however, had commercial liability premiums of approximately $30 million in 1989 that could be subject to the 20 percent rollback provision of the proposition, resulting in a maximum pre-tax charge to earnings of $6 million.

A number of carriers, including Argonaut, have filed suit challenging

these regulations on several grounds. If the regulations are upheld by the court, Argonaut would be entitled to a hearing, however, and believes it has strong grounds for a variance from the maximum rollback provision currently outlined in the regulations.

Pending court action and these hearings, it is not possible to determine what financial impact there may be on the company; therefore, no charge to earnings has been recorded.

Argonaut Group is a holding company whose subsidiaries are primarily engaged in the selling, underwriting and servicing of workers compensation and other lines of property-casualty insurance.

#90191b0851 07/10/1990 ~Business Wire

DALLAS (JULY 10) BUSINESS WIRE - American Medical Holdings Inc., (American, London and Zurich Stock Exchange -- AMI) Tuesday reported improved operating results and a net profit in the third quarter.

Earnings before interest, taxes, depreciation, amortization and asset writedowns rose 8 percent in the quarter to $143.5 million from $132.9 million in the prior year. Net revenues of $706.9 million were below last year's result of $720.1 million.

The comparative improvement in 1990's quarterly and year to date operating performances is more favorable than indicated above, since last year's results included the contribution of AMI's UK operations, AMI Healthcare Group plc, which was sold in March 1990.

AMI reported quarterly net profits of $3.0 million or 6 cents per share despite increased interest expense due to higher debt levels associated with AMI's acquisition of 86 percent of American Medical International Inc. last October. The company reported a loss in the second quarter of 1990 of $6.0 million or $0.12 per share and profits in the third quarter of the prior year of $21.1 million or $0.30 per share.

Commenting on the Company's performance, Harry J. Gray, chairman and chief executive officer, noted, ''We have made considerable progress in our efforts to restructure and improve the operating performance of the company's key assets, domestic acute care hospitals.

''In the most recent quarter the gross profit margins of our hospitals are 10 percent above last year's levels and corporate spending has been reduced by 29 percent. AMI's cash flow, which continues to improve, is

more than adequate to service our debt costs. Further progress can be expected as additional streamlining and hospital management initiative take effect.''

Gray further noted, ''To date, AMI's asset divestiture program has realized more than $600 million of its $1 billion gross proceeds target. Net proceeds from these sales have been utilized to pay down a substantial portion of the Company's asset sale bridge loan and further reduce interest costs. Progress toward additional asset sales has been made, and we expect to complete the divestiture program well ahead of October 24, 1991.''

In the first nine months of 1990, which includes the results of American Medical International Inc. for the two months ended October 31, 1989, AMI's net revenues increased 6 percent to $2,173.1 million and earnings before interest, taxes, depreciation and amortization, merger costs and asset writedowns increased 25 percent to $408.5 million.

Including the results of operations for American Medical International Inc. for the two months ended October 31, 1989 the company had a year to date net loss of $69.2 million due to non- recurring merger costs of $128.2 million which were recorded in the first quarter. These results when compared to a net profit in the prior year period of $39.7 million reflect the higher interest expense incurred for acquisition debt and the non- recurring merger costs noted above.

Admissions at AMI's domestic hospitals in the first nine months were up 2.6 percent, total equivalent patient days rose 3.9 percent and the average occupancy rate was 50.4 percent versus 49.5 percent last year.

AMI, which founded the investor-owned hospital industry in 1960, currently operates 54 hospitals, including 46 acute care hospitals and 6 psychiatric hospitals in the United States and 2 hospitals in Spain.

NEW CANAAN, CT (JULY 10) BUSINESS WIRE - Century Communications Corp. announced Tuesday that it has successfully concluded a new long-term credit agreement providing for a $700 million line of credit.

This new agreement replaces the company's $600 million credit facility.

The company currently has approximately $580 million outstanding under the new credit facility.

Citibank acted as agent on the transaction with Chase Manhattan, The Bank of Nova Scotia, and Bankers Trust as lead managers.

Bernard Gallagher, president and chief operating officer of Century stated that he was ''delighted by the continued confidence repose in us by our lendors. This continued support is especially gratifying in these times of tightened credit availability.''

The credit facility provides funds for the continued upgrade and expansion of Century's cable television operations.

Century operates 55 cable television systems in 24 states and Puerto Rico serving approximately 850,000 primary basic subscribers. Century also owns and operates four radio stations and owns or has agreed to purchase cellular telephone systems which serve markets with a population of approximately 2,225,000.

SINGAPORE (JULY 10) BUSINESS WIRE - American Fine Wire Corp., Selma, Ala., announced Tuesday that its Singapore affiliate, American Fine Wire, Limited has purchased the IC Metals Division of an indirect subsidiary of Degussa AG.

American Fine Wire Corp., American Fine Wire Limited, and the IC Metals Division are engaged in the manufacture and sale of bonding wire to the semi-conductor business throughout the world. Another affiliate of American Fine Wire, Mueller Feindraht AG, Zurich, Switzerland, is also engaged in the manufacture and sale of bonding wire to the semi-conductor business.

Larry Striplin, the founder and chairman of the board of both American Fine Wire Corp. and its parent, Circle S Industries Inc., who is in Singapore attending the closing, stated: ''We are simply delighted with this acquisition. It will give us the additional strength, in terms of research, marketing, and market base, to more effectively compete in this highly competitive business.

''We are fortunate that the management and substantially all the staff of IC Metals are coming with us, and we look forward to their working closely with our superb management and staff in Singapore.''

''We are most pleased that Degussa Electronics has agreed to sell its IC Metals Division to American Fine Wire, Ltd.,'' stated a spokesman for American Fine Wire, Limited. ''This affiliation will result in a continuation of the very high quality that has always characterized all Degussa operations.''

The sale by Degussa Electronics was the result of a global restructuring and refocusing by Degussa AG on electronics activities most closely related to its precious metal business.

#90191c0050 07/10/1990 ~Comtex

WASHINGTON (JULY 10) COMTEX - The 8-K report filed at the SEC shows the shareholders of Black Hawk Resources Co. Inc. elected Christian Vahab as the new president and director of Blackhawk. That election replaced the former officers and directors of the company: W.K. Ledgard, Jr., Fred Rosemilia and Wyman Dickerson. Shareholders further voted to change the name of the company from Black Hawk Resources Co. Inc. to Trionics Inc.

Mr. Vahab is the founder, president and director of Mitek Inc., as well as the founder and president of Digital Optoelectronics Corp. Inc.

The company announced an agreement for merger with Mitek Inc., of Fountain Valley, California. Mitek produces high-powered lasers and flexible fiber optics for industrial applications. Mr. Vahab, the inventor and patent holder of those technologies, provides exclusive license of the technologies to Mitek.

Black Hawk also announced that it is contemplating the acquisition of Digital Optoelectronics Corp. Inc., Mitek's affiliate company. Digital is in the business of developing laser and precision electronics, computer based technology of medical and consumer cosmetic products. Digital anticipates volume manufacture and sale of its cosmetic and therapeutic products in September of 1990.

Black Hawk announced that it is also negotiating a license agreement with a Vancouver based, Canadian manufacturer of white light source machinery. That machinery may be used for use in the processing of semiconductors and chemical reaction starters, the heat treating of large surfaces, etc. The licensing agreement should grant Black Hawk access to manufacturing rights of super high-power power supplies, controlling electronics and optical pumping means for the fabrication of super high power industrial lasers.

Black Hawk has been inactive since 1979, and filed this 8-K report under section 15(d) of the Security Exchange Act of 1934.

The telephone number of the executive offices of Black Hawk Resources Co. Inc. is (714) 847-6027.

#90191c0077 07/10/1990 ~Comtex

WASHINGTON (JULY 10) COMTEX - The 8-K report filed at the SEC shows on June 22, 1990 the Office of Thrift Supervision placed Germania Bank FSB of Alton, Illinois under government conservatorship and appointed the Resolution Trust Corp. to manage the institution.

The conservatorship did not result in any interruption of Germania Bank's day-to-day operations.

OTS stated in a press release dated June 22, 1990 that the action was taken because Germania Bank was operating in an unsafe and unsound condition and has suffered losses that have depleted all of its capital, with no prospect of replenishment without federal assistance.

Also on June 22, 1990, the OTS served Germania Bank with a temporary cease

and desist order instructing the thrift to notify holders of its subordinated capital notes that they were sold by persons not licensed to do so in Illinois. In consequence, such sales may be voidable and rescinded.

In addition, the cease and desist order says Germania Bank must pursue claims against all appropriate parties, including professionals and consultants who participated in the offering and were responsible for failing to obtain licenses to sell the notes.

STAMFORD, CT (JULY 11) COMTEX - Phoenix-based Del Webb Corp., the adult community developer, expects to purchase 1,574 acres in the Coachella Valley portion of Riverside County, Calif., for $36 million.

The company plans to build a 5,800-unit residential project with two golf courses, two community centers and commercial services.

If certain issues with the Coachella Valley Water District are not resolved, however, and Del Webb cannot receive the appropriate approvals

for water in a reasonable time period, construction of the project could be substantially delayed.

Also, the cost could be increased and the company may reevaluate its plans, according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on JULY 10, 1990

Tokyo (JULY 10) - Three Japanese firms have signed an agreement with a major Czechoslovakian bank to form a joint venture for building shopping centres and hotels in the eastern European country, officials said Tuesday.

The parties involved in the joint venture are the Slovak State Savings Bank of Czechslovakia, Trans-Media Resources Inc., Nexas and Sakata Purified Co. from Japan and Czech-American entrepreneur Anton Kajrich, said the officials.

In the first joint venture with Japanese firms in Czechoslovakia, the partners plan to construct a shopping centre in Prague which will have sales space of some 3,400 square metres.

#90191d0330 07/10/1990 ~French/German News Agency

TOKYO (JULY 10) - The Export Import Bank of Japan is negotiating to sign an agreement next month to lend the Hungarian government 200 million dollars, a bank official said Tuesday.

The untied loan will be part of the aid Prime Minister Toshiki Kaifu promised during a tour of Eastern Europe in January.

The bank has sent experts to Hungary to study ways of cutting its government budget deficit and liberalizing its financial sector.

It plans total aid worth 500 million dollars for Hungary and Poland, the

bank official said.

SUVA (JULY 10) - Fiji's government-run sugar milling company on Tuesday deferred crushing of the country's main crop because of a continuing boycott by the largely ethnic Indian farmers.

Fiji Sugar Corporation executives said in a statement that a survey revealed that only 18 percent of the 23,000 farmers had signed agreements with the millers to start harvesting.

"A disappointingly low number of harvesting gangs have come forward with their memorandum of understanding," the statement said, adding that the corporation would review the situation on Thursday.

It said the corporation expected to start crushing as soon as the farmers show readiness to harvest.

National Farmers Union secretary Mahendra Chaudhry, who has been coordinating harvesting boycotts for the past two months, said he expected the farmers to end their strike this week and start harvesting by Monday.

Mr. Chaudhry said the onus was on the farmers to harvest after amendments to disputed clauses in a controversial sugar industry master award.

Sugar is Fiji's economic lifeblood, bringing in 220 million Fijian dollars (148 million U.S.) annually from exports to the European Economic Community, Malaysia, China, Singapore and New Zealand.

Fiji Sugar Marketing Company managing director John May said that while the delays in crushing were a concern, "The situation has not yet reached a critical stage.

"But if the worst comes to the worst the company would have to negotiate with buyers to delay shipments."

Tokyo (JULY 10) - Japanese and American businessmen here Tuesday adopted a resolution calling for a further yen rise against the dollar to rectify the huge Japan-U.S. trade imbalance.

The joint statement, issued after three days of talks at the 27th U.S.-Japan Businessmen's Conference at an Osaka hotel, western Japan, also urged the necessity of opening of the Japanese market and reducing U.S.

budget deficits.

Conference sources said businessmen agreed that Japan, the United States and Europe should give assistance to the Soviet Union in a harmonious way.

Referring to eastern European countries' pro-democratic moves, Japan and the United States confirmed that the two western economic powers would share burdens for supporting the moves through the European Bank for Reconstruction and Development (Ebrd), the sources said.

FRANKFURT, West Germany (JULY 10) - Consumer prices in West Germany were 2.3 percent higher in June than in the same month last year, definitive official figures showed on Tuesday.

During June the price of food products fell by 0.2 percent compared with May, while the prices of other consumer products fell by 0.1 percent. The prices of services and rents rose by 0.3 percent.

The figures confirmed provisional statistics published by the federal statistical office in Wiesbaden on June 28.

BERLIN (JULY 10) - Railway workers stopped work for an hour in major East German stations on Tuesday in support of a demand for higher wages, disrupting passenger and freight traffic, the ADN news agency said.

Farmers from 10 cooperatives in the Leipzig region in the south meanwhile poured thousands of liters of milk into the streets in the centre of the city in a bid to draw public attention to the current problems in the agriculture industry.

The farm workers also offered milk, eggs and vegetables to passers-by, complaining that dairies were increasingly unwilling to take their produce and demanding the same subsidies and guarantees that their produce would be bought that exist in West Germany.

Train drivers called a halt in busy stations including East Berlin, Rostock in the North, Dresden in the southeast and Magdeburg in the west for an hour in response to a call from their union.

The stoppage was in protest at Monday's failure of wage talks with the Deutsche Reichsbahn rail company.

The railworkers say their wages should be raised because the implementation of German monetary union at the beginning of July has cut their take home pay because of higher social security payments and income tax.

The railway and farmers' protest were the latest signs of dissatisfaction over the immediate results of economic and monetary union.

Negotiations between employers and metalworkers in the Berlin-Brandenburg region broke off without reaching agreement Tuesday morning, but were due to resume later in the day.

The metalworkers have already staged several work stoppages of an hour or more in support of their demand for guarantees that their jobs will be safe for two years, higher wages and a reduction in the working week.

PARIS (JULY 10) - French bank Credit Agricole said Tuesday that it had acquired a 70 percent stake in the consumer credit and leasing subsidiaries of Spanish banking group Ibercorp.

Ibercorp Financiaciones and Ibercorp Leasing, both established in 1987, have a national network of 38 offices, and their portfolio was worth two billion francs (363 million dollars).

The Ibercorp group, which also controls a merchant bank and an insurance company, made a profit last year of 3.8 billion pesetas (38 million dollars).

Credit Agricole said at the end of last year that it wanted to develop its position in southern Europe, which it said was a good market for developing banking services for individual clients.

It already has interests in Spain, including a 51 percent stake in credit company Cofigasa and a 35 percent stake in stockbrokers ABA.

LONDON (JULY 10) - British investors topped the list of buyers of foreign shares worldwide in 1989, well ahead of their U.S. and Japanese counterparts, according to a report published here Tuesday.

British investors bought foreign shares worth a net 29.8 billion dollars during the year, out of a world total of 92.3 billion dollars (85.1 billion excluding Japanese share warrants), according to the report from U.S. brokers Salomon Brothers.

U.S. investors were in second place with net purchases of 20.9 billion dollars, followed by Japan with 17.9 billion (10.6 billion excluding European-issued warrants), while continental European purchases totalled 16.4 billion dollars.

Europe proved the chief attraction to foreign buyers last year, with net purchases totalling 41.1 billion dollars in continental Europe and three billion in Britain.

West Germany attracted foreign buying totalling 11.6 billion dollars, beating the U.S. market which attracted net purchases worth 11 billion.

Japanese investors increased their purchases of foreign stocks last year, with 27 percent of their buying carried out in Europe, and only 31 percent of their money going into Japanese stocks, down from 78 per cent in 1987.

British investors held a total of 222.3 billion dollars' worth of foreign stocks at the end of last year, shared more or less equally between the markets in continental Europe, the United States and the Far East.

LONDON (JULY 10) - The International Wheat Council (IWC) on Tuesday reduced its forecast of world wheat production in the July 1990-June 1991 season by one million tons from its June forecast, to 564 million tons.

This prediction is still 28 million tons above the IWC's revised estimate of the 1989-1990 crop.

World wheat stocks at the end of June 1990 were estimated at 100 million tons, two million tonnes up on the estimate a month ago, while stocks in 12 months' time were forecast at 108 million tons.

BANGKOK (JULY 10) - Thai consumer prices rose 6.3 percent in the first half of 1990 over the same period last year, Department of Business Economics officials said Tuesday.

The June price level was up 0.3 percent from May, they said.

Prices were expected to increase at a slightly slower rate in July, at six to 6.2 percent on a year-on-year basis.

In Bangkok, consumer prices were up 7.6 percent in the first half of the

year over the corresponding period of 1989.

The nationwide wholesale price index was up 2.8 percent in the January-June period compared with the same period of 1989.

TOKYO (JULY 10) - Machinery orders placed in Japan during May rose 13.4 percent from a year earlier but fell 8.9 percent from April to 1.885 trillion yen (12.6 billion dollars), the Economic Planning Agency said Tuesday.

The month-on-month fall was a reaction to a sharp rise in April, when the orders jumped 17.7 percent from a year before and 11.2 percent from March, the government agency said.

Of the May total, orders for exports accounted for 453.4 billion yen (three billion dollars), down 6.5 percent from the preceding month, the agency said without providing a year-on-year comparison.

#90191d1600 07/10/1990 ~French/German News Agency

TOKYO (JULY 10) - Moody's Investors Service Inc. said Tuesday it gave its top rating of AAA to Nippon Telegraph and Telephone Corp.'s 250 million dollar Eurobond offering due 1997.

The Tokyo branch of the U.S. rating agency said it had assigned the rating based on the domestic market and solid financial position of the Japanese telecommunications giant.

NTT's consolidated operating revenues rose 3.1 percent in the last fiscal year, ending in March, while its operating profit dropped 3.8 percent, Moody's said.

But the Japanese company's financial position still remained strong, the rating agency added.

#90191d1780 07/10/1990 ~French/German News Agency

PARIS (JULY 10) - Passenger traffic carried by airlines in the Association of European Airlines in May rose 11.5 percent in May over the same month last year, the Association said in a statement Tuesday.

The passenger kilometers (number of passengers multiplied by the distance travelled) in May totalled 22.6 billion in May, taking the total for the first five months of the year to 101.2 billion, up 9.3 percent on the same period in 1989.

Long haul traffic, particularly to Australia and the Far East, was up 14.1 percent in May, while North Atlantic traffic was up 12.7 percent.

The airlines' total passenger capacity was up 14 percent.

Passenger traffic within Europe was up 11.3 percent in May over the same month last year, and for the first five months of the year totalled 25 billion passenger kilometers, up 12.4 percent on the same period last year.

Freight traffic was up 5.3 percent in May on a year on year basis, taking the total for the first five months of the year to 6.87 kilometer tons (weight multiplied by distance travelled), up 4.9 percent on the same period in 1989.

#90191d1790 07/10/1990 ~French/German News Agency

WELLINGTON (JULY 10) - New Zealand's Parliament voted Tuesday to ban corporal punishment in schools, but only after an impassioned and at times bitter debate.

New Zealand inherited the English tradition of the cane and the leather strip, and although numerous attempts have been made to ban it, parliament in the past failed to do so.

Usually only boys had been caned on the bottom, but one school recently said it also punished girls that way.

However many schools had banned the method of punishment before parliament outlawed it on a vote of 42 to 37.

The opposition officially wanted the decision on whether or not to use the cane left to individual schools, although all its members who spoke in the debate favoured the use of canes.

As a result of the vote any teacher who strikes a child now will risk a charge of criminal assault.

#90191d1830 07/10/1990 ~French/German News Agency
WEST BERLIN (JULY 10) - West Berlin police have identified a new suspect in the 1986 La Belle discotheque bombing here, a man with an Arabic name currently serving a jail term in the city for another crime, the West German weekly magazine Stern said Tuesday.

But a spokesman for the West Berlin prosecutor's office dismissed the report, released ahead of publication Thursday, as speculation.

Stern said authorities were going to great lengths to protect the suspect, including keeping his identity a tight secret, because of his potential role as a witness for the state.

The prosecutor's spokesman said new documents pertaining to the case were expected from East Berlin in the coming days. The West Berlin prosecutor's office requested the documents, from the files of the former East German secret police, in mid-June from East German officials.

The La Belle investigation, which now involves East Berlin police as well as their western counterparts, was re-opened in May by the West Berlin prosecutor's office.

The April 1986 bomb blast killed three people and injured some 200 at the discotheque frequented by U.S. soldiers. The U.S. accused Libya of sponsoring the attack and launched a retaliatory air raid on the Libyan capital, Tripoli.

#90191d2000 07/10/1990 ~French/German News Agency
MANILA (JULY 10) - The Philippines' Roman Catholic bishops declared their firm opposition to artificial birth control Tuesday in a country whose annual population growth is among the highest in the developing world.

"The church advocates natural family planning as the only morally acceptable way of practising responsible procreation," the Catholic Bishops Conference of the Philippines (CBCP) said in a statement that asked President Corazon Aquino's government to clarify its new population policy.

The CBCP statement was issued after a three-day meeting in the nearby resort of Tagaytay.

Mrs. Aquino recently transferred responsibility for the population program from social services secretary Mamita Pardo de Tavera to health secretary Alfredo Bengzon, and boosted its funding with U.S. financial aid.

These changes spawned fears in church ranks that a more aggressive birth-control policy will be adopted in this nation of 60 million, whose annual growth rate of 2.4 per cent is among the highest in the developing world.

Rejecting the economic arguments for birth control, the bishop said the increase or decrease of population growth "does not by itself spell development or underdevelopment."

The bishops said they will soon meet government officials, after they received an invitation from emissaries sent by Mrs. Aquino to their conference, which was largely centered on the population issue.

The CBCP statement conceded the state's right to intervene in population growth, but said any program must allow for freedom of conscience, the responsible decision of couples, and sexual and family morality.

"It is hoped that the dialogue will ward off confrontation and produce some understanding between church and state," the bishops said.

"The bishops believe that it is possible for the church to work harmoniously with this government in an effort to solve the national problems of poverty and of economic development," it added.

The country's 99 bishops exercise substantial political influence in this country, where at least 80 per cent of the people are Roman Catholic. Moslems form the biggest minority.

JAKARTA (JULY 10) - Indonesia will publicly list its national airline, Garuda Indonesia Airways, by 1992, Finance Minister Johannes Sumarlin said Tuesday.

The airline was among 52 state enterprises due "to go public in due time" and would be listed by 1992, Mr. Sumarlin said while answering questions

during an economic forum here.

Garuda chairman Mohamad Suparno, current president of the International Air Transport Association (IATA), said in November that 30 percent of the airline would be sold into private hands.

The finance minister said the government supported private sector participation in the airline industry.

"If Garuda has the monopoly it won't improve its services," he said, adding with a smile that there was "still a lot of room for improvement" in this area.

The company has said it plans to invest 3.6 billion U.S. dollars in new aircraft over the next eight years to increase capacity to eight to 10 million passengers per year by 1993.

The airline plans to buy six 747-400's and 12 737's from the U.S. maker Boeing Co. and six MD-11's from McDonnell Douglas Corp.

It is also due to buy nine A-330's from the European consortium Airbus Industrie and 12 F-100's from the Netherlands' Fokker Aircraft BV.

The company, whose current fleet comprises is 81 aircraft, plans to fly international routes exclusively, gradually leaving domestic flights to its subsidiary Merpati Nusantara Airlines.

Merpati Nusantara is run by the private group Bimantara, which is owned by one of President Suharto's sons.

#90191d2310 07/10/1990 ~French/German News Agency

PARIS (JULY 10) - Tuffier, one of the last independent brokers operating on the Paris exchange, said Tuesday it would be cutting its 300-strong workforce by one third and seeking a British partner as part of a major restructuring plan.

Thierry Tuffier said his group was suffering from a steep fall in the volume of transactions, and thus commissions, particularly because of competition with brokers which are bank subsidiaries.

The company's broking operations were down 30 percent in the first half of this year over the same period last year, and its losses as of the end of May totalled 62 million francs (11.2 million dollars), Mr. Tuffier said.

He stressed the increasing costs of market operations, saying that the RELIT system of automatic handling of orders would mean a bill of 10 million francs (1.8 million dollars) next year.

Mr. Tuffier said the problem of orders made on undelivered shares was not the main cause of the crisis.

The group plans to cut its workforce by 100 and is seeking to refocus its activities on managing accounts for individual clients.

A Paris-based British insurance concern will take a stake in the group, Mr. Tuffier said. Talks were under way with two groups, he added, but would not identify them.

The Tuffier group showed a profit of 16.5 million francs last year on a turnover of 473 million.

#90191d2350 07/10/1990 ~French/German News Agency

KABUL (JULY 10) - Afghan President Najibullah is to visit India for talks with Prime Minister Vishwanath Pratap Singh and other leaders, a government spokesman said here Tuesday.

Mr. Najibullah will leave for New Delhi "within a few weeks," spokesman Humayun Mukammel said, adding that the visit would be the president's first tour abroad since he survived an army coup attempt on March 6.

Diplomatic sources here said the 43-year-old president was expected to begin his Indian tour within the next two weeks.

New Delhi invited Mr. Najibullah to visit India during Foreign Minister Abdul Wakil's official tour there last month.

The spokesman said he could not confirm reports here that a representative of former Afghan king Zahir Shah might meet with Mr. Najibullah in New Delhi.

The ex-monarch broke a long silence in May when he vowed to become actively

involved in resolving the drawn-out conflict in Afghanistan. He described Mr. Najibullah's government as an imposed communist regime.

Mr. Najibullah hit back at the ex-king, who has lived in exile in Rome since his ouster in 1973, but said he might still have a role in ending the Afghan conflict.

Zahir Shah's representatives have held recent meetings with the Afghan resistance based in Pakistan.

India has been a close ally of the Soviet-backed Kabul regime battling the Afghan resistance supported by Pakistan, Saudi Arabia, Iran and the United States.

ISTANBUL (JULY 10) - A McDonald's restaurant in Istanbul was attacked Tuesday by six people armed with Molotov cocktails and clubs, police said.

No one was injured in the attack which occurred in the Beyazit university district.

Witnesses said the assailants, who fled immediately afterward and left behind leaflets signed "resistance movement", spoke a foreign language.

They broke windows and tried to set fire to the two-storey restaurant which seats 150.

The restaurant manager said the attackers shouted slogans in English, including "Yankee go home".

Police said they questioned four people, without revealing their names and nationality. An investigation was under way, they added.

#90191d2480 07/10/1990 ~French/German News Agency

PORT ELIZABETH, South Africa (JULY 10) - Demand moved slightly up Tuesday at the South African Mohair Board's ninth sale in this Eastern Cape city, with 30 per cent of the 3,820 bales sold.

The board said selection was average and prices remained basically unchanged.

The market situation also remained unchanged.

Approximate prices in South African cents per kilogram (233 cents to 1 U.S.

dollar):

Adults	Young Goats	Kids
Strong 810 - 820	-	-
Average 830 - 840	1600 - 1800	2600 - 3000
Good-Average 850 - 870	1950 - 2150	3700 - 3800
Fine 1060 - 1160	2350 - 2600	4000 - 4300

The next sale will be on July 24.

-30- 803

#90191d2490 07/10/1990 ~French/German News Agency

PRISTINA, Yugoslavia (JULY 10) - Tens of thousands of ethnic Albanians in the southern Yugoslav province of Kosovo staged a strike against the country's biggest republic Serbia Tuesday.

An estimated 20,000 workers downed tools in Pristina alone and marched to the city centre in protest. Other towns and cities reported work stoppages of at least an hour.

The ethnic Albanians are protesting against Belgrade's decision last week to dissolve parliament in Kosovo and sack the provincial government amid a seething ethnic conflict between Albanians and Serbians.

The moves follow the declaration of the ''Republic of Kosovo'' by the overwhelming Albanian majority in the Kosovo parliament. Some 90 per cent of Kosovo's population are ethnic Albanians.

In a letter to Serbian authorities, the Kosovo provincial administration described the end to Albanian autonomy as ''unconstitutional''.

#90191d2570 07/10/1990 ~French/German News Agency

SINGAPORE (JULY 10) - Singapore will keep to current policies and enjoy continuing stability despite a change in premiers due in November, the Political and Economic Risk Consultancy said in its latest half-yearly report.

But the report said analysts would look closely at the new cabinet lineup for any signs of a power struggle between the designated successor to veteran Premier Lee Kuan Yew and Mr. Lee's son, Brigadier-General Lee Hsien Loong.

The report, received here Tuesday, also warned that Singapore's economy was beginning to overheat, and that inflation and business costs were on the rise.

In the July-December transitional period, "some changes in political style are inevitable, but basic policies will remain," the Hong Kong-based consultancy held.

Overall, the report gave Singapore high marks in all areas, with low risk ratings in social stability, political change and foreign investment.

On the political front, if Brig-Gen. Lee were chosen as deputy to the next prime minister, Goh Chok Tong, it might reinforce the widespread impression that Mr. Goh was to be only an interim leader and that the elder Lee -- "the power behind the throne" -- was manoeuvring his son to take over.

Even if Mr. Goh wanted to choose another minister to be his deputy, the risk consultancy said there were few candidates willing or able to take on the job.

The report said one way to minimise the influence of Brig-Gen. Lee, who currently heads the powerful Trade and Industry Ministry, would be to appoint him to the posts now held by Mr. Goh as Deputy Premier and Defence Minister.

On the economy, the report said that despite robust 10.1 percent growth in the first quarter of the year, there was a danger of a repeat of the 1985 recession.

It cited 3.8 percent annualised inflation in the first quarter, and the Unit Business Cost for the manufacturing sector which increased by 7.1 percent during the first quarter, up from 4.3 percent in the previous quarter and 4.6 percent for the whole of last year.

The risk consultancy said these statistics reflected an overheating economy and that the government's current moves towards deregulation of wages, housing, health and education may boost inflation.

#90191d2590 07/10/1990 ~French/German News Agency

TAIPEI (JULY 10) - Spectacular gains by foreign auto makers in the Taiwan market have ground to a halt, with sales expected to drop sharply in the second half of 1990, market analysts said Tuesday.

Sales of imported cars were down 8.95 percent in the first half of this year to 79,100, compared with a year-on-year gain of 64.4 percent in the first half of 1989.

New buyers for foreign sedans have all but disappeared with subdued economic growth, tighter credit and a 60 percent decline in local stock prices since February, the analysts said.

They added that two years of cut-throat competition among dealers had nearly saturated the market.

In four years, foreign auto makers' share of the Taiwan market shot up from less than 10 percent to 43 percent last year.

One indication of the sluggish market is the 60,000 imported vehicles now parked in customs at the northern port of Keelung.

Some importers have been forced to waive their rights to claim the cars because they are unable to pay import taxes and accumulated warehousing fees,
while others simply have no place to put them.

Consumers have shown lukewarm interest even in passenger cars auctioned by the customs at cut-rate prices, and some vehicles have been left in the warehouses for more than two years.

"Our June sales dropped 20 percent over May," said Arthur Lee, sales marketing manager of Chrysler International Services, S.A.

"Most consumers are taking a wait-and-see attitude with new tariff cuts expected in 1991," he said.

Taiwan reduced tariffs on imported sedans from 42.5 percent to 40 percent in January last year and is due to further lower the rate to 30 percent in January 1991.

"Basically, we are not optimistic about the market in the second half of this year," Mr. Lee said, noting that the sharp drop in stock prices over the past four months had held back potential buyers.

Economic officials have said the declining bourse may lower Taiwan's economic growth for the second half of this year to a five percent annual rate from the seven percent target.

The analysts said foreign cars became popular in the past two years due to strong consumer purchasing power, tariff cuts and the appreciation of the Taiwan dollar.

Foreign auto makers were among those reaping the bounty of a six-month bull run on the Taiwan Stock Exchange that saw the weighted index more than double to a record high on February 10.

Stock speculators eagerly acquired imported sedans to gain prestige and get better quality and service.

Figures compiled by car dealers showed 158,300 foreign vehicles were sold here last year, accounting for 43 percent of the entire market, compared with 40 percent in 1988, 16.6 percent in 1987, 13 percent in 1986 and less than 10 percent before that.

Local auto makers also foresee a decline in sales for the whole of this year despite a 19.6 percent rise in sales in the January-June period to 119,300.

Orders for locally-made sedans received by the island's 10 car makers fell 25 percent in June from a year earlier, according to K.K. Hsu, chairman of the Taiwan Transportation Vehicle Manufacturers' Association.

To cope with the tightening domestic market, Yue Loong Motor Co. Ltd., Taiwan's largest car maker, has decided to cut output this year to around 70,000 units from 80,000 units.

Ford Lio Ho Motor Co. Ltd., another local auto maker, is planning to stop its production for 10 working days in July and reduce its scheduled output by five to six percent to 100,000 vehicles this year.

TOKYO (JULY 10) - The Industrial Bank of Japan (IBJ) and the main Austrian bank, Kreditanstalt Banksverein, have agreed to create a fund to finance projects in Eastern Europe, a source at IBJ said Tuesday.

This joint venture, based in Vienna, will be capitalized this month with 12.5 million Austrian schillings (about one million dollars) and will start operating in August.

It will help Western and Japanese businesses to invest in Eastern Europe and the Soviet Union.

Its activities will initially be limited to consulting on such matters as investment and joint ventures and expanded later to include loans and credits, the IBJ source said.

The Austrian bank already has 11 branches in Eastern Europe and the Soviet Union.

ABU DHABI (JULY 10) - An Eritrean rebel leader has sharply criticised the Palestine Liberation Organisation (PLO) and some Arab states, including Libya, for allegedly aiding the Ethiopian Government.

"Some Arab states have been cooperating with the Ethiopian colonial regime and offering it their assistance," said Assyasi Aforqi, secretary general of the Eritrean People's Liberation Front (EPLF), in remarks published Tuesday.

He told the United Arab Emirates newspaper Al Khaleej that countries involved had "deprived the Eritrean people of their right to national independence and self-determination."

The EPLF is the largest of seven rebel groups fighting since 1962 for the independence of the Red Sea province of Eritrea from Ethiopia.

Mr. Aforqi singled out Libya, the former Marxist state of South Yemen, and the PLO as having provided political or military assistance to Addis Ababa. South and North Yemen united into a single Yemeni republic in May.

He described the opening of a PLO office in the Ethiopian capital as a "black spot" in the history of Eritrean-Palestinian relations.

The Arab position remained unchanged, he said, even after rebels captured the Red Sea port of Massawa in February, a victory Mr. Aforqi claimed shifted the balance of power in the Eritrean conflict in favour of the insurgents.

Mr. Aforqi said Arab countries had failed to provide humanitarian aid to famine-stricken people in Eritrea.

He dismissed talks held this year in the former North Yemeni capital Sanaa between five Eritrean rebel groups and the Ethiopian government, saying there could be no negotiations without United Nations participation.

#90191d2770 07/10/1990 ~French/German News Agency
LIMA (JULY 10) - Some 5,000 police launched house-to-house searches and rounded up thousands of people in a masssive hunt for a Peruvian guerrilla leader and 47 other rebels who tunneled out of a maximum security prison here, authorities said Tuesday.

The nation's security forces were placed in a state of emergency and all off-duty police were called back to work to help search for the fugitives led by Victor Polay Campos, head of the Tupac Amaru Revolutionary Movement (MRTA).

Mr. Campos, who was being tried here on charges related to his rebel activities, fled the Miguel Castro Castro prison before dawn Monday through a 250-meter-(yard-)long tunnel with 47 other rebels, authorities

said.

The inmates escaped through the subterranean passageway to a nearby house they had rented in eastern Lima, officials said.

Late Monday and early Tuesday, heavily armed police fanned out across the city, searching poor neighborhoods near the prison and taking up positions at highways and sidestreets on the lookout for the 39 men and nine women.

In their search for the rebels, police stopped pedestrians for identification checks and searched private and public transit vehicles along main avenues and at all access points to the capital.

At least 20,000 people without proper identification or otherwise considered suspicious were detained in the dragnet, said General Oswaldo Diaz Salvador of the National Police.

Tuesday, helicopter gunships flew over Lima for a second day. Monday, the international airport west of the Peruvian capital was put under heavy guard.

President Alan Garcia told reporters Monday the escape was a "serious setback" in the government's fight against the pro-Cuban Tupac Amaru rebels and the ultra-violent Maoist Shining Path guerrillas.

No Shining Path rebels were involved in the escape, authorities said, although several were being held at the prison.

The breakout comes less than three weeks before Mr. Garcia is to relinquish the presidency to President-elect Alberto Fujimori.

It was the second major prison escape by jailed rebels in eight years. In March 1982, commandos attacked a prison in the Andean city of Ayacucho -- one of the centers of the Shining Path insurgency -- and freed 150 Shining Path guerrillas.

A police official said that after leaving the tunnel, the rebels made their way through hills east of Lima in the dark for some 25 kilometers (15 miles) to the area of Huachipa where vehicles awaited them.

The escape tunnel was at least four meters (yards) in diameter and was equipped with electrical lighting, Attorney Genearal Juan Leon Gamarra said.

Radio equipment, air compressors, tools and tubes also were found inside the tunnel, other sources said.

"It could only have been constructed by an expert," said one official.

The sophistication of the escpe tunnel has raised suspicions that the escapees had help from some prison authorities and members of the Security Police, charged with guarding penal institutions.

Mr. Garcia said there would be an investigation into whether prison officials were involved in the escape.

"The tunnel must have been dug over a period of months and nothing like that can be done without authorities finding out," he said.

National prison officials said that in the past few weeks they had received reports of unusual explosions at night at the prison which were attributed to routine police exercises.

Other escapees included Rosa Luz Padilla, an MRTA leader who was captured with Mr. Polay in February 1989 in a hotel in the city of Huancayo.

Mr. Polay, who goes by the nom de guerre of Comander Rolando, is the son of a founder of Mr. Garcia's American Popular Revolutionary Alliance party and was himself a member of the party before taking up arms against the government.

The prison, built for 2,000 prisoners, houses twice that many, mostly classified as high security risks or terrorists, prison authorities said.

#90191d2820 07/10/1990 ~French/German News Agency

PARIS (JULY 10) - The Paris stock market slumped by 1.62 percent on Tuesday, with the CAC-40 index ending the day at 1,957.8 points with most sectors losing ground and a lower opening on Wall Street doing nothing to improve sentiment.

Transaction volume at 2:00 p.m. was less than one billion francs (181.8 million dollars), against average daily turnover of 1.8 billion (327.2 million dollars).

"There is no reason to buy," one dealer said.

There was heavy dealing in Peugeot shares, with 184,000 changing hands, as the stock shed 1.4 percent after the car maker announced a 6.6 percent production increase in the first six months of the year but predicted profit at the same level as 1989, or a little less.

But a current takeover bid by Altus Finance on Calciphos and the Bafip bank took Bafip shares up a massive 21.2 percent to 309 francs before the stock was suspended at midday until Wednesday.

Compagnie Parisienne de Reescompte, whose shareholders include Bafip and the Indosuez bank, were up 5.9 percent at 450 francs.

Frankfurt (JULY 10) - The West German retail group Asko Deutsche Kaufhaus Ag said Tuesday it has nominated Professor Youssif S. al-Sabah of Kuwait to its corporate supervisory board, fueling speculation that Kuwaiti interests have purchased a share of the corporation's stock.

Board chairman Helmut Wagner, presenting the 1989 annual report here, confirmed that a fourth large share holder had joined the corporation in 1990 but declined to identify the new partner.

Asko, the fifth largest retail concern in West Germany, saw its turnover increase 7.9 percent in 1989 to 10.6 billion marks (6.4 billion dollars).

BRUSSELS (JULY 10) - Five European telecommunications companies said here Tuesday that they had formed an alliance to develop common standards for private telephone exchanges (PABX).

Alcatel Business Systems Group and Societe Anonyme de Telecommunications of France, Siemens and Telenorma of West Germany, and GEC-Plessey-Telecom of Britain said they wanted their respective systems to be compatible.

Alcatel PABX director Francois Seveque said that for example European Economic Community institutions were seeking to replace their 25,000-line telephone system with a network that would enable officials to telephone each other easily across national boundaries.

This is not possible at the moment because the equipment in use in different EEC countries is not compatible.

Outside the EEC many other potential clients are seeking to tie up their private phone networks, and the world market is worth 10 billion dollars a year, Mr. Seveque said.

HONG KONG (JULY 10) - Tensions between Hong Kong and China over the run-up to 1997, when the British colony reverts to Chinese rule, appear to be relaxing amid a flurry of exchanges.

This week Hong Kong is host to Ke Zaishuo, former head of the Chinese team in the Sino-British Joint Liaison Group, who is here to study ways of implementing the Basic Law for post-1977 Hong Kong, Chinese sources said.

And for the first time, Hong Kong and China have joined forces to curb cross-border pollution with the establishment of a top-level environmental protection liaison group on Tuesday.

Also on the agenda is a visit to Beijing by Francis Maude, British minister of state for foreign and Commonwealth affairs, from July 24 to 27.

Mr. Maude's visit will represent the first top-level dialogue between Beijing and London since the British decision, passed by the House of Commons last month, to offer citizenship to up to 50,000 Hong Kong families before 1997, a move vehemently opposed by China.

The military crackdown on the democracy movement in China in June 1989 led to a rift between Hong Kong and Beijing, with China accusing Hong Kong of being used as a base for "counter-revolutionary activities."

The thaw began early last month with a visit by Shanghai Mayor Zhu Rongji to the territory.

Sources said the growing number of exchanges could help curb the outflow of about 1,000 emigrants per week prompted mainly by the confidence crisis.

Next month, law experts from China are to visit the territory to discuss the setting up of a court of appeal here within two years, a spokesman of the British liaison group here said.

The Privy Council in London currently acts as the colony's court of appeal.

Hong Kong Governor Sir David Wilson has said Hong Kong should be in touch with the government that will take it over in 1997. "We have to deal with China. China is our next-door neighbour," he said June 24 on an international call-in talk show in London.

Mr. Ke arrived last week from the nearby Portuguese enclave of Macau, said sources at the New China News Agency, Beijing's de facto consulate here.

The liaison group was set up to oversee the smooth transfer of the colony's sovereignty to China in accordance with the Sino-British Joint Declaration of 1984.

Mr. Ke, accompanied by several officials from the Hong Kong and Macau Affairs Office of the State Council, will work here on the Basic Law implementation project for the next month.

The document, which is to serve as Hong Kong's mini-constitution after 1997, was promulgated by Beijing this year.

The Hong Kong-Guangdong Environmental Protection Liaison Group held its first meeting here Tuesday attended by a high-level delegation from the neighbouring southern Chinese province.

Graham Barnes, secretary for planning, environment and land who is leading the Hong Kong group, said: "Environmental pollution does not respect boundaries. There are issues of mutual, international interest and problems affecting territories on both sides of the border."

Qiang Binghuan, vice-chairman of the Guangdong Environmental Protection Bureau, is leading the Chinese side for the two-day meeting which aims to enhance cooperation on environmental management and pollution control efforts in the Guangdong-Hong Kong area.

It will meet alternatively in Guangdong and Hong Kong to discuss air and water quality, development projects and contingency plans for dealing with pollution emergencies.

PARIS (JULY 10) - The French government on Tuesday reaffirmed its opposition to plans by U.S.-Swedish group Lexmar to relaunch the La Ciotat shipyard outside Marseilles as a major shipbuilding operation.

"During the summer of 1989, after talks involving local authorities and social partners, an accord was reached to develop a range of industrial and diversified service activities on the site," the statement from the office of Prime Minister Michel Rocard said.

"Later, and after nobody had come forward since Normed (which previously operated the shipyard) went into liquidation, Lexmar declared its intention to relaunch a major shipyard, although it cannot claim any experience in the sector," the statement added.

Expert studies by the industry ministry had shown that "this project is not credible. The interested parties have been informed of these conclusions.

"In these conditions, a relaunch of the shipyard risks putting the economic future of La Ciotat in serious danger."

The government and the local authorities support a plan for a yacht repair yard and leisure activities on the site, while the regional council of Bouches du Rhone favours Lexmar's plan.

Tuesday's government statement came after the number two of the Confederation Generale de Travail (CGT) trades union, Louis Viannet, issued a statement Monday following talks with Mr. Rocard.

That statement said that if the Bouches du Rhone council decided to give Lexmar the green light, the government would not oppose an agreement between the council and the Worms bank, which now owns equipment on the site, to make it available to Lexmar and enable the yard to start work.

#90191d2950 07/10/1990 ~French/German News Agency

KUALA LUMPUR (JULY 10) - Prime Minister Mahathir Mohamad said Tuesday the government was inviting foreigners to observe the forthcoming general elections because it suspects the opposition ''will attempt to create trouble.''

''The move to bring in observers is to enable outsiders to see how the opposition parties behave during the election,'' said Mahathir.

Speaking to reporters, Mahathir declined to disclose the date of the election, which he said would be announced soon. All precautions were being taken ''to ensure a swift, clean election through the democratic process '' he added.

Mahathir has invited representatives from Commonwealth nations to observe the elections so that the opposition ''will not make stupid allegations after the results.''

''It is possible, they (opposition parties) will want to reject the observers but because they do not have an excuse and find themselves cornered they are forced to accept them,'' Mahathir said.

The main opposition to Mahathir's ruling National Front coalition government is the pro-Chinese Democratic Action Party (Dap), which has teamed with the Malay base, the ''Spirit of 46'', a break-away radical group from the dominant United Malays National Organisation (Umno) of which Mahathir is President.

ACCRA (JULY 10) - Ghana said Tuesday that it would send a ship to Liberia by the weekend to evacuate its citizens because of the deteriorating situation there.

The Ghana News Agency (Gna) quoted officials of the ministry of transport

and communications here as saying the government was awaiting clearance from Liberian authorities for the ship to sail.

Gna said it would send a vesel capable of accommodating 1,500 passengers. Foreign ministry officials estimate that there are between 70,000 and 100,000 Ghanaians in Liberia.

The situation in Liberia has deteriorated rapidly with rebels of the National Patriotic Front of Liberia (Npfl) already in the capital Monrovia.

The rebels, led by former civil servant Charles Taylor, are seeking to topple President Samuel Doe. Fighting has been intense in the past week with many people reported dead.

An Economic Community of West African States (Ecowas) mediation committee was due to continue its efforts Tuesday in Freetown, Sierra Leone, to find a peaceful solution to the conflict.

However, reports from Sierra Leone said the talks were delayed because the Patriotic Front delegation failed to turn up on time.

#90191d3040 07/10/1990 ~French/German News Agency

JOHANNESBURG (JULY 10) - Sales of new cars dropped marginally by 0.5 percent to 18,600 vehicles units in June compared to May's figure of 18,700, the National Association of Automobile Manufacturers of South Africa (NAAMSA) said Tuesday.

Compared to the corresponding month in 1989, June's sales show a decline of slightly more than eight per cent, or 1,600 vehicles.

In a statement here, NAAMSA warned that trading conditions in the motor industry were expected to remain difficult in the current economic climate, adding the aggregate new vehicle sales had been in line with industry expectations.

#90191d3080 07/10/1990 ~French/German News Agency

MEDELLIN, COLOMBIA (JULY 10) - Colombian police have arrested 11 more men suspected of belonging to bands of paid assassins who this year have killed hundreds of people in this drug-trafficking center, authorities said Tuesday.

Police said army troops captured the suspected hitmen late Monday during an operation against members of the Medellin cocaine cartel headed by Pablo Escobar Gaviria.

The suspects were charged with violating a 1988 anti-terrorism law against aiding or hiding drug trafficking.

In the first six months of this year, at least 3,000 people have been slain -- including more than 170 police shot by hitmen allegedly hired by the drug lords. The assassins have detonated at least five car bombs here this year, police said.

Also overnight Monday, police deactivated a powerful car bomb on the highway between Medellin and Bogota, which lies 240 kilometers (150 miles) southeast of here.

Police explosives experts deactivated 900-kilograms (2,000 pounds) of dynamite in plastic containers hidden under a culvert near the town of Puerto Barrio.

Initial investigations indicated the bomb was to explode when a military convoy passed by.

The incident marked the second time in a week that security forces have deactivated a large bomb. On July 3, army troops neutralized a bomb containing 800 kilograms (1,760 pounds) in the northwestern city of Puerto Triunfo.

Colombia has been wracked by violence since August 1989, when President Virgilio Barco launched a major offensive against the nation's powerful drug traffickers and resumed extradition of drug suspects wanted in the United States.

The drug lords, who fear trial in U.S. courts where they are unlikely to bribe or shoot their way to freedom, responded with bombings and shootings against police, judges and government officials.

Since last August, the Barco government has extradited 17 Colombian nationals to the United States.

Over the weekend, seven drug suspects in Bogota -- including a U.S. citizen identified as Edward Mitchell -- went on a hunger strike after authorities informed them they would be handed over over to U.S. authorities.

The launched their fast to protest what they called Colombian authorities' "injustice" against them. Tuesday, the seven extraditables called off their hunger strike.

PESHAWAR, PAKISTAN (JULY 10) - Proposals submitted recently by eminent Afghan emigres on resolving the stalemate in Afghanistan have been given a lukewarm response by the Afghan Mujahedin's interim government (Aig) based in Pakistan.

''It does not contain any method which can be effective and fruitful for solving the Afghanistan problem under the present conditions,'' the Aig announced Tuesday after discussing the report of the emigres at a cabinet meeting.

Observers found the report prepared by 26 former Afghan leaders and diplomats at the invitation of Aig president Sibghatullah Mujaddidi vague on key issues.

The report said the Aig was not fully representative and called for achieving ''understanding and cooperation among all acceptable elements of Afghan society'' in the pursuit of an elected government in Afghanistan, but did not say how to achieve broader unity.

However, the Aig cabinet Tuesday decided to continue its talks with the Iran-based Afghan mujahedin group Hezb Wahdat in a bid to strengthen unity.

It also instructed its ministry of defence to send a mission to the Ajrestan district of Uruzgan province in central Afghanistan ''to solve the problems which have led to clashes among some groups there''.

Ajrestan lies in the Hazarajat region, which is said to be dominated by pro-Iranian Shiite Moslems.

AMSTERDAM (JULY 10) - Shares in troubled Dutch electronics giant Philips plunged to a record low in Amsterdam on Tuesday, following a report that it was unlikely to pay a dividend this year.

Philips stock ended the day down 1.10 guilder at 28.6 after the AMRO bank said in a report published Friday that the group was unlikely to pay a dividend for 1990.

The report also criticised the draconian restructuring plan announced by new chairman Jan Timmer on July 2 as not being detailed enough and not giving enough information on the measures to be taken and their consequences.

Mr. Timmer, announcing the restructuring plan, said that Philips expected to lose two billion guilder (a billion dollars) this year and would be axing 10,000 jobs worldwide.

#90191d3200 07/10/1990 ~French/German News Agency
LONDON (JULY 10) - British insurance group Prudential said Tuesday it was to close 175 of its estate agents' offices, or more than a quarter of its total, and axe 500 jobs, because of the slump in the property market.

Prudential, Britain's largest institutional investor, had already closed 100 estate agencies last year, axing 1,000 jobs, after losing 50 million pounds (90.9 million dollars) in this sector.

The latest cuts will leave it with 500 property offices.

Prudential invested 220 million pounds (400 million dollars) in the 1980's setting up a chain of some 800 estate agents, but has suffered from a fall in the property market which began in 1988 due to rising British interest rates.

The group sold only 39,500 properties last year, against 88,000 in 1988.

The Nationwide Anglia building society said recently that the volume of property transactions was at its lowest in 36 years, and that average house prices had fallen a record 5.3 percent last year.

#90191d3220 07/10/1990 ~French/German News Agency
BERLIN (JULY 10) - East German Interior Minister Peter-Michael Diestel said here Tuesday that he was on the point of proving that former leader Erich Honecker had provided protection to notorious terrorist Carlos.

Mr. Diestel accused Mr. Honecker who was ousted in November, and the head of his Stasi secret police, General Erich Mielke, of allowing Carlos to take refuge in East Berlin on several occasions, his spokesman Werner Twarog said.

They also allowed Carlos, a Venezuelan whose real name was Illich Ramirez Sanchez, to fly in and out of the Berlin-Schoenefeld airport.

Mr. Diestel was quoted as saying he would "probably" be able to prove the accusations against Mr. Honecker by the end of the month.

#90191d3240 07/10/1990 ~French/German News Agency
JOHANNESBURG (JULY 10) - The Zulu movement Inkatha is ready to form an alliance either with South Africa's ruling National Party (NP) or with the

formerly banned African National Congress (ANC), Zulu leader Mangosuthu Buthelezi said here Tuesday.

Inkatha, which claims 1.7 million members, would at the end of the week officially become a political party open to all races, he said.

"Apartheid is doomed and there will be a multi-party democracy," the chief said. Inkatha would be a "centre-stage political force" and would be "guided by pragmatism" in its economic policies, he told an audience of businessmen.

The NP and the ANC were moving to the centre from the right and left respectively. "If the National Party is too late in arriving, Inkatha will combine with the ANC, if it has already arrived," the Zulu leader said.

"If the ANC is too late in arriving, it (Inkatha) will combine with the National Party, if it has arrived.

The ANC currently views Mr. Buthelezi as its prime foe in the world of black politics and rules out any cooperation with Inkatha.

The ANC and its allies last week staged an action week against Inkatha and its leader, blaming them as solely responsible for fighting in black townships in Natal province which has left more than 3,000 people dead since 1986.

Mr. Buthelezi said he stood for a market economy and protection of private property, including landholdings.

Referring to ANC talk about some nationalisation to compensate for years of inequality under apartheid, Mr. Buthelezi commented: "To take from the wealthy and give to the poor will end up being nothing other than the redistribution of poverty."

He said the redistribution of wealth needed in part to "be tackled with the redistribution of opportunity."

-30- 2001

#90191d3270 07/10/1990 ~French/German News Agency

BERLIN (JULY 10) - The East German monopolies office said Tuesday it had taken its first action against companies accused of pushing prices up to rapacious levels since German economic and monetary union took effect last week.

The state fuel distributor Minol has been ordered to stop dictating a fixed price to retailers selling liquefied gas for domestic use, office spokesman Rolf Lais said.

The monopolies office is also taking action against a trader who had raised the price of bread tenfold.

The monopolies office, modelled on its West German counterpart, is charged with overseeing the operation of East Germany's market economy, which took effect with monetary and economic union.

#90191d3280 07/10/1990 ~French/German News Agency

FRANKFURT, WEST GERMANY (JULY 10) - West German bank BfG said Tuesday it planned to reduce its 240 branches by between 25 and 35 percent as part of a restructuring programme approved by the board of trustees on Saturday.

A network of 160 to 180 branches is "a realistic size," a spokesman for the Bank fuer Gemeinwirschaft said.

He did not give any indication of how many jobs would be threatened by the move, but union sources said that 2,700 jobs out of the current total of 7,430 could be axed.

The bank refused to comment on the figure, but said that the restructuring would mean "major measures concerning staffing."

Full details of the restructuring program will be released in a few weeks, the bank spokesman said.

BfG is facing major profitability problems, particularly due to heavy administrative costs, with some 18 to 19 per cent of its staff working at the administrative headquarters against nine to 10 per cent in its competitors.

Bank president Paul Wieandt faces a particularly difficult task in turning the bank around as until 1987 it was 100 per cent owned by the West German trades union holding BGAG, and this past continues to weigh heavily on the bank's attitude, despite the fact that BGAG's stake has now been cut to 49 per cent.

But he has apparently won the first round, as the board, which includes the head of the powerful metalworkers' union IG Metall, Franz Steinkuehler, and Ernst Breit, the former president of the trades union federation, approved the restructuring plan unanimously Saturday.

The majority shareholder in BfG is West Germany's second largest insurancegroup, Aachener und Muenchener (AMB), which nominated Mr. Wieandt to bank in March.

#90191d3660 07/10/1990 ~French/German News Agency
ANKARA (JULY 10) - U.S. Secretary of Defense Richard Cheney wrapped up ''detailed and productive discussions'' with Turkish leaders here Tuesday during a 24-hour visit, the last leg of a visit to Nato flank countries.

He said his talks with Premier Yildirim Akbulut, Defense Minister Safa Giray, General Staff Chief Necip Torumtay and Foreign Ministry Undersecretary Tugay Oezceri covered subjects taken up at the recent Nato summit in London, U.S. force and budget plans, Nato's future role and bilateral relations.

Confirming that his hosts had raised concern over a recently concluded defense cooperation agreement between Washington and Athens, Cheney said he had assured the pact was in full confirmity with Nato obligations and committments and was not aimed against Turkey.

Turkey, having a similar agreement with the U.S. due to be renewed next year, had demanded an explanation from Washington about ''vague phrases suitable for misinterpretation and misuse'' in its pact with Greece.

At loggerheads with fellow Nato member Greece over Cyprus, rights in the Aegean and minority problems, Turkey also resents a seven-to-ten ratio heeded by Washington in military aid provision, which Cheney said was a long-time practice ''we have to live with''.

But he took care to stress Washington's wish for the peaceful conclusion of outstanding disputes between its allies.

#90191d3860 07/10/1990 ~French/German News Agency
BRASILIA (JULY 10) - An Ariane rocket is to launch Brazil's first natural resource-detection satellite in 1992, reliable sources said here Tuesday.

The satellite originally was to be launched by Brazil's state-run space firm.

Mucio Robert Dias, director of engineering and technology at the National Space Research Institute, told a special session of Congress Monday that Brazil's Satellite Launch Vehicle would not be ready for blast off until 1993 or 1994.

He added that the 115-kilogram (250-pound) satellite would be ready for launch in 1991.

Sources said budget cuts due to the nation's economic crisis had significantly slowed the timetable for construction of the Brazilian rocket and the launch site in Alcantara, Maranhon state.

Industrialized nations' restrictions on transfers of technology that might have military applications also have slowed the Brazilian rocket program.

In exchange for a contract to launch two other Brazilian satellites, the French-based Arianespace corporation is to furnish Brazil with technology from France's Vicking rocket program and know-how on gyroscopic guidance systems which Brazilian technicians need, the sources said.

Mr. Dias indicated that the decision to use foreign launch firms -- a move which is expected to be formally approved by the government in coming days -- raises the possibility of launching Brazilian space probes aboard rockets made in France, China, the Soviet Union and the United States.

PARIS (JULY 10) - The French construction group Dumez and water distributor Societe Lyonnaise des Eaux announced Tuesday that they were discussing a merger which would form an industrial giant with an estimated annual turnover of 60 billion francs (10.7 billion dollars).

The companies said in a statement they were examining the possibility of a merger, but provided no information on the financial arrangements.

Trading in shares of the two companies was suspended Monday on the Paris Bourse, fuelling speculation they were planning a cross-shareholding agreement.

Dumez stock shot up 12 percent at the end of last week.

Financial analysts said Monday that the two companies would likely make a public exchange offer, but did not speculate on its size.

The water group Lyonnaise des Eaux earned 1989 consolidated net profits of 726 million francs while Dumez posted a consolidated net profit of 566 million francs for the year.

Dumez has become the world leader in electricity distribution since it moved into the sector five years ago with the acquisition of the Canadian company United Westburne Industries Ltd.

Both Dumez and Lyonnaise des Eaux have also been turning towards Japan. Japan is the base of operations of Lyonnaise subsidiary, Dic-Degremont, and Dumez is the first European company to win a construction contract in that country.

#90191d4430 07/10/1990 ~French/German News Agency

NEW YORK (JULY 10 (AFP) - Authorities here have arrested a 95-year-old man for allegedly murdering his 88-year-old mistress who he said had attacked him for philandering with a "younger" woman of 86.

Oliver Barre -- the oldest person on record to have been charged with murder here -- allegedly killed Norma Marks by striking her with an iron

rod on June 16, the New York Post reported Tuesday.

Police said Mr. Barre, a World War One submarine officer, claimed he was defending himself against Miss Marks.

He said she had set upon him in a jealous rage when she learned he had been carrying on with a woman who lived on the same floor of their upper west side Manhattan tenement.

He told police Miss Marks, as she attacked him, said the ashes of her late husband had instructed her to kill him.

Mr. Barre's neighbors were not sympathetic; 150 of them signed a petition demanding that he be jailed.

The police released him on his own recognizance.

At last report, the accused had moved in with the other woman.

FREETOWN (JULY 10) - The Liberian government has proposed the creation of an "interim government of national unity" to include all political parties and the National Patriotic Front (NPFL) rebels in a bid to end the country's six-month civil war.

Liberian government delegation leader Tambakai Jangaba announced the proposals here Tuesday during a meeting with Economic Community of West African States (ECOWAS) mediators.

Senator Jangaba said that the interim government "should be led by an individual who will not be a candidate for elective office in the ensuing general elections."

He added that the new government should bring about "an orderly transfer of power," "lay the foundation for a new political, social and economic order" and "lead the nation to an internationally-supervised free and fair elections."

The delegation leader said that to ensure such a government, "a general and comprehensive cease-fire, as previously proposed by the Liberian government, is hereby affirmed."

Such a ceasefire, he stressed, must be guaranteed by an international peace-keeping force, preferably "of Third World origin."

NPFL leader Charles Taylor said in an interview Tuesday with the BBC that

the rebels would send a delegation to the talks taking place here but that "there will be no cease-fire."

"Liberia's agony will be over when I kill, catch or confirm that (Liberian President Samuel) Doe is out of the country," Mr. Taylor said.

He said that an NPFL representative to the ECOWAS-mediated peace talks taking place here should arrive Wednesday.

The rebel leader added that that his forces were moving "cautiously" on Monrovia and were "distributing rice to people and allowing civilians to evacuate."

VIENNA (JULY 10) - Austrian state-owned Voest-Alpine Industrieanlagenbau said here Tuesday it had won a 1.15-billion-schilling (99-million-dollar) order from Saudi Arabia to double the capacity of the seven-year old al-Jubail steel mill.

The contract signed Monday provided for extensions over two years to a Voest-built electric steel plant and continuous casting line that will raise output capacity to two million tons per year.

TOKYO (JULY 10) - Japanese electronics giant Sony Corp. plans to publish annual profits by geographic zone and by sector to give investors a better idea of the firm's performance, company sources said Tuesday.

Sony's plan may be finalized by the end of the current fiscal year April 1 next year, the sources said.

Japanese Finance Ministry rules for firms listed on the Tokyo stock exchange require the breakdown of turnover by geographic zone but not profits.

Local bourse authorities, recently expected to implement the same rule for profits, delayed their decision in the face of opposition from large Japanese firms with big exports, including automobile and electronics concerns.

Sony plans to give results by geographic zone, including Japan, the United States and Europe, and by sector -- separating electronics from leisure activities such as movies and records, the sources said.

JOHANNESBURG (JULY 10) - South African minerals giant Anglo American Corporation (AAC) achieved record earnings in the year to last March 31, boosting profits 20 percent over the previous year's figures, to 1.507 billion rand (570 million dollars), chairman Julian Ogilvie Thompson said Tuesday.

In his 1990 statement, he said the corporation's net asset value had risen by 32 percent to 37.8 billion rand (14 billion dollars), or 163.39 rand (61.89 dollars) a share.

The earnings of one of AAC's major associates, De Beers, from diamond investments rose by 31 percent to 889 million rand (336 million dollars) and its subsidiary Amcoal contributed an increase of 65 percent to generate earnings of 132 million rand (50 million dollars).

Investment in gold prospection in South Africa and Europe had been maintained at about 200 million rand (75 million dollars) annually, while AAC administered gold mining companies still had substantial capital expenditure programmes within their lease areas, Mr. Ogilvie Thompson said.

AAC investments outside South Africa -- in Zimbabwe, Zambia, Botswana, Australia, the Far East and South America -- showed profits, were soundly based and in some cases expanded their activities, the chairman said.

Independence Mining Company, formerly Freeport-McMoRan, is to serve as a springboard for development of gold production in North America, he added.

Independence was acquired recently by Minorco, the corporation's other major associate.

MARSEILLES (JULY 10) - Several major forest fires, fanned by winds gusting up to 120 kilometres (75 miles) an hour, were blazing out of control in France's southern Provence region late Tuesday, firefighters said.

Although one blaze ravaged a brushwood region in the northern suburbs of Marseilles, and another came close to the city of Montpellier, there were no reports of casualties.

Firefighters reported at least 17 blazes across a region stretching from Marseilles on the Mediterranean coast to Aix-en-Provence to the north.

Several hundred people were evacuated from their homes during the day, and a huge pall of red ash-laden smoke hung over Marseilles.

The fires also forced the closure of the local A7 motorway, and every available water-dropping aircraft, including a Hercules C-130, was called in to back up 2,000 firefighters on the ground.

The strong wind, known locally as the Mistral, often made a mockery of the firefighters' efforts, with one blaze springing up as another was quenched, officials said.

Firefighting teams tried without success to use several local roads as fire-breaks, and on one occasion a fire engine was engulfed in flames and destroyed.

Local officials and firefighters agreed that most of the fires appeared to have been deliberately set.

Since the first of the season's forest-fires broke out in the region on June 21, more than 2,000 hectares (5,000 acres) of brushland has gone up in smoke.

Firefighting officials said the strong wind was expected to continue throughout the night.

JERUSALEM (JULY 11) - A meeting planned for next week between U.S. Secretary of State James Baker and Foreign Minister David Levy has been postponed, and no alternative date has been fixed, a source close to the Israeli Foreign Ministry said here Tuesday.

The source cited health reasons for the postponement, saying that Mr. Levy's doctors had ruled out the meeting. The minister suffered a heart attack on June 14.

The Baker-Levy meeting, proposed by the U.S. side, had been scheduled for next Tuesday in Paris. The U.S. administration has been trying to persuade the recently-formed Israeli government, the most right-wing in the country's history, to restart the Middle East peace process.

The Foreign Ministry source said another meeting, between Mr. Levy and the foreign ministers of Ireland, Italy and Luxembourg, had also been postponed, for the same reason.

That meeting had been scheduled for the end of the month. The three countries concerned form a so-called "troika" of states representing the

European Economic Community.

The postponement of the Bush-Levy meeting was also announced by a State Department spokeswoman in Houston, Texas, where a Western summit meeting is in progress.

by MARIUS BOSCH

HOUT BAY, South Africa (JULY 11) - Godfrey Kapape's wooden shack has a one of the most magnificent views in South Africa, overlooking this natural harbour set amid the towering hills of the Cape coast.

The fact that Mr. Kapape, and the 300 other black people with whom he has set up a squatter community on the foreshore of this sleepy fishing village near Cape Town, are getting it all for free infuriates nearby whites, who paid up to 400,000 rands (150,000 dollars) for their luxury beachfront homes.

Confronted by laws which put 87 percent of the land in white ownership, Mr. Kapape and many others like him have decided to appropriate their own space, and they reason that if they are going to break the law they might as well go for some of the best real estate available.

"I like it here and I like the view. I want to stay in Hout Bay all my life," Mr. Kapape told a reporter.

Some of his white neighbours, meanwhile, have threatened to take the law into their own hands if the squatters are not evicted by the white-minority government.

In a bid to take the heat out of the situation, Provincial Affairs and Planning minister Hernus Kriel announced on June 20 that the squatters would be allowed to stay in Hout Bay -- once "suitable" land had been identified.

David Dewar of the Urban Problems Research Unit at the University of Cape Town thinks that such up-market squatting could develop nationwide as South Africa moves towards a complete abolition of apartheid.

According to 1988 figures of the independent Urban Foundation, more than seven million blacks live in informal settlements such as squatter communities.

The foundation noted however that most blacks in Cape Town were housed in locations very different to Hout Bay -- in sprawling squatter settlements

on the windblown Cape Flats.

"The legacy of not planning for black urbanisation has left the city with some unusually harsh informal settlement conditions," a recent Urban Foundation report said.

Already more than 200 shacks in Cape Town's squatter settlements have been made uninhabitable by winter rain, and many shacks are standing in water, the vice-chairman of the Western Cape United Squatter Association, Enoch Maduywabe said Tuesday.

But there is a growing backlash from white residents in areas in South Africa who feel threatened by the squatter settlements.

In Hout Bay, a branch of the rightwing Conservative Party -- the official opposition in the white chamber of South Africa's segregated parliament -- was formed on June 21.

Many at the meeting expressing racist attitudes towards the squatters, an irony inasmuch as several of the whites were foreigners, and as voteless as the black majority.

The foreigners among them got their homes at a 35-percent discount, by using the financial rand for non-residents.

The eviction of squatters from Tokoza and Midrand near Johannesburg earlier this month caused an outcry as churchmen and a judge voiced concern about the eviction of small children into sub-zero temperatures.

Urban Foundation figures show that in the Johannesburg area, the economic hub of South Africa, informal dwellings like free-standing and backyard shacks by far outnumber conventional housing in the black townships, where more than 2.5 million people live in informal settlements.

Observers say that since the Influx Control Act was scrapped on July 1 1986, no provision had been made for the housing of thousands of black people who stream to cities from South Africa's self-governing and nominally-independent homelands in search of money and jobs.

The Urban Foundation director of urbanisation, Ann Bernstein, warned this week that South Africa's population could double in the next 25 years, and that more than a third of the population would be made up of blacks living in city areas.

Annual population growth is fast approaching four percent, while economic growth predictions for 1990 fall under one percent.

HONG KONG (JULY 11) - Wayne Moran's five-year dream, to replicate a 13th century junk and retrace Marco Polo's sea voyage from southern China to Persia, is about to come true.

Using computers and complex navigational equipment, Dr. Moran will attempt to discover the forgotten secrets of Chinese maritime science that guided the medieval explorer in 1292.

"A study of some of the unique features of ancient Chinese boat design may have much to teach us today in terms of the boats we build," the British doctor-turned-sailor said in a recent interview.

Dr. Moran, 37, his wife Teresa, their three children and a volunteer crew of 10 plan to set sail toward China on Friday from Hong Kong.

The boat was constructed from scratch in an old shipyard here using computer-generated dimensions based on Marco Polo's writings, other ancient descriptions and a bit of guesswork.

"We spent four years pushing the ball uphill," Dr. Moran said. "Now it's finally rolling."

The "retracement" voyage is set to begin from the southern Chinese port of Quanzhou in October.

It will take them through the South China Sea, the Strait of Malacca, the Bay of Bengal and Arabian Sea and the Strait of Hormuz before continuing through the Red Sea, the Mediterranean and finally the Adriatic to Venice.

At each port of call, the crew is planning maritime, archeological, botanical and medical studies to make a comparison with Marco Polo's era.

"This will be the research part of the voyage," Dr. Moran said.

Despite more than 150 different translations of Marco Polo's work, there is still confusion about many of the sea ports where he stopped along his voyage, said Dr. Moran, who hopes to clear up some of the trouble spots with new data.

TOKYO (JULY 11) - Three Japanese firms are to set up a retail joint venture with a Czechoslovak bank to help modernize its commercial network to lure more foreign tourists, a Japanese partner said on Wednesday.

The new firm, SSB-Anti Co., will be set up with initial capital of 300,000 dollars, company officials said.

The Czechoslovakian State Savings Bank (SSB) will have a 50 percent stake and the three Japanese partners will hold a combined stake of 37.5 percent, with the remaining 12.5 percent owned by Czech-born American Anton (Anti) Kajlich, the project's coordinator.

The three Japanese companies are Trans Media Resources, Ltd., a Tokyo consultant company, Nexus Co., a Tokyo real estate consultant company, and Sakata Jokaso Center Co., an environment equipment maker in Sakata, northern Japan.

Trans Media officials said the Bratislava-based firm will set up its first outlet, a shipping center, in Prague, with a total floor space of 5,000 square meters (55,555 square feet), designed mainly to attract foreign tourists visiting the country.

The joint venture will later develop hotel and resort chains to lure more foreign travelers, they said.

RIYADH (JULY 10) - Saudi Arabia will work to "guarantee the stability" of the oil market at the forthcoming OPEC conference and halt the drop in prices,

Saudi Oil Minister Hisham Nazir said Monday in a report quoted by the SPA news agency.

The minister made the statement at a weekly government cabinet meeting presided by Crown Prince Abdallah Ibn Abdel Aziz, ahead of the next meeting of the Organization of Petroleum Exporting Countries on July 25 in

Geneva.

"King Fahd is concerned about guaranteeing the stability of the oil market, and the Saudi kingdom will make a strong effort to ensure the success of the next OPEC conference," Mr. Nazir said.

The Geneva ministerial conference will aim to stop the fall in oil prices, after they slumped to 13.8 dollars a barrel in the third week in June. They picked up slightly the following week, reaching 14.19 dollars.

Riyadh has repeatedly called on other OPEC members to respect their quotas, which the organization has allocated in an effort to stop the price drop and protect the interests of member states.

Mr. Nazir recently traveled to Kuwait, the United Arab Emirates, Qatar and Iraq to deliver messages from King Fahd concerning the deterioration of the price for crude oil.

Iraq, for one, has accused Kuwait and the United Arab Emirates of largely exceeding their quotas.

TOKYO (JULY 10) - Nomura Securities Co., the world's largest securities house, is to boost the capital of its key European subsidiaries to cope with an expected rush of Japanese investments, a company source said Tuesday.

Nomura expects Japanese investors to pump funds into Europe ahead of the creation in 1992 of a single European market, German unification and the opening of Eastern Europe to the West.

The capital increase totals 33 billion yen (some 218 million dollars), taking the total capital of Nomura's four European branches in Britain, West Germany, Switzerland and Luxemburg to 58 billion yen (384 million dollars), or 2.3 times the current level.

The British, German and Swiss arms will use the extra capital to raise cash on the European market, while the Luxembourg firm will invest in real estate, the Nomura source said.

The capital will also be used to set up a branch in Berlin, buy a seat on the Berlin bourse and install a new information system in the Swiss firm, the source said.

These capital investments come in the wake of Nomura's recent decision to set up a European headquarters in London to oversee the firm's activities

and consolidate staff functions for the whole of Europe.

The brokerage house also has branches in France, Italy, Belgium and the Netherlands.

MOGADISHU (JULY 10) EFE - More than a hundred people may have died when presidential guards opened fire on the public during a football match in what the Somalian government has described as an "unfortunate soccer incident," diplomats said Tuesday.

The diplomats cited hospital sources as saying at least 65 people had died and more than 100 were wounded, contradicting official figures placing the death toll at three.

The violence occurred Friday before a local match in a stadium in the Somalian capital, when guards fired at the crowd for jeering during a speech by President Mohammed Siad Barre.

Labor Minister Abdi Isaaq said Sunday, "Unfortunate accidents and incidents occur at stadiums in all parts of the world."

A Ministry statement said the guards had fired into the air.

Barre has ruled Somalia, one of the African Horn's poorest nations, since he seized power in a 1969 coup.

BEIRUT (JULY 10) EFE - A mine exploded Tuesday, ripping the leg off a Lebanese child and seriously wounding four others along blast was set off by one of the children when they unwittingly entered into a mined area to play soccer.

Hundreds of children have died in similar incidents since the Lebanese civil war broke out in 1975.

According to a report by United Nations Children's Fund (UNICEF), more than 40,000 children have died in the war, and many more have been wounded or maimed.

Meanwhile in southwestern Lebanon, a man died Tuesday when a bomb placed beneath his car exploded in a village near the port of Tyre, 74 km south of Beirut.

On Monday, three people were killed and five were wounded when rockets fired by pro-Iranian Moslem extremists hit the Christian city of Jezzine, 38 km south of Beirut, controlled by the pro-Israeli South Lebanon Army.

In reprisal, the South Lebanon Army shelled an area of the Bekaa Valley controlled by the Shiite Moslem Hezbollah militia, destroying seven houses but causing no casualties.

#90191e0028 07/10/1990 ~Latin America New Agency

FREETOWN (JULY 10) EFE - Talks aimed at bringing peace to Liberia were delayed Tuesday as negotiators for the rebel National Patriotic Front (NPF) failed to show up at their venue in the capital of neighboring Sierra Leone.

Abbas Bundu, secretary general of the Economic Community of West African States which is mediating in the talks, said the rebels were being held up by transport problems.

Speaking on behalf of President Samuel Doe, Liberian Information Minister Emanuel Bowier said the president was prepared to resign +in principle+, but only if a provisional government was installed, and committed to free elections.

Bowier added that Doe would not give in to +military threats+.

NPF leader Charles Taylor said Tuesday his forces would not attack the capital Monrovia which they surround, declaring, +Monrovia will fall when Doe steps down.+

Water and electricity have been cut off and food and medical supplies are extremely scarce in the Liberian capital, and the outbreak of disease is feared.

#90191e0033 07/10/1990 ~Latin America New Agency

Moscow (JULY 10) EFE - Soviet miners in the Siberian region of Vorkuta have decided to back a 24-hour national strike set for Wednesday, Moscow Radio announced Tuesday.

The closure of pits in the Artic region of Vorkuta will add to those in the main mining regions of Donbass in the Ukraine, Kuzbass in western Siberia, and Rostov in Russia.

The strike is as much a political protest as a demand for an improvement in material conditions.

The miners are demanding the resignation of the government, charging they have failed to act on agreements reached following a strike almost exactly a year ago led by Ukrainian coal workers.

Referring to the government, a miner was quoted in a Ukrainian paper Tuesday as saying "it is incapable of continuing with the radical changes necessary".

The miners are also demanding the de-politicization of the work place, and the removal of the KGB secret police from the Army.

Soviet President Mikhail Gorbachev, in a recent meeting at the 28th Soviet Communist Party Congress with workers delegates, warned against a miners strike, saying it could "unleash a chain reaction with unforeseeable effects".

The only candidate left to contest Gorbachev's position as Soviet Communist Party general secretary is now the leader of last year's miner's strike in Siberia, Teimuraz Avaliani.

The voting began Tuesday.

NAIROBI (JULY 10) EFE - Calm settled over the Kenyan capital Tuesday following three days of violent clashes between police and demonstrators which hospital sources said left nine people dead and hundreds injured.

The demonstrators were protesting the country's one-party system and were demanding the release of former ministers Kenneth Matiba and Charles Rubia who were arrested last week for spearheading a political pluralism movement.

President Daniel Arap Moi claimed that the two leaders were going to have several people killed during a rally they had planned for last Saturday, and then blame the deaths on the police to stir unrest.

The government declared the rally illegal and then arrested the two former ministers.

Shops in the capital reopened their doors Tuesday and public transport, which was paralyzed during the disturbances, was running again.

But the streets were quiet and traffic was slow as many citizens, fearing an new outbreak of violence, decided to stay in their homes.

Government authorities refused to release the number of deaths or injuries and declined to comment on the figures given by the hospital sources.

Moi said the disturbances were caused by hooligans and drug addicts.

Meanwhile, the U.S. Embassy and the embassies of European Community countries in Nairobi advised their citizens living in the capital to avoid traveling within Kenya.

Washington also advised U.S. citizens traveling abroad to steer clear of Kenya as new outbreaks of violence were expected.

BUCHAREST (JULY 10) XINHUA - THE ROMANIAN GOVERNMENT IS SEEKING WAYS TO FURTHER CONTROL THE POLLUTION IN THE COUNTRY CAUSED BY DEVELOPMENT OF HEAVY INDUSTRIES, THE OFFICIAL NEWS AGENCY ROMPRES REPORTED TODAY.

ATMOSPHERE IS SERIOUSLY POLLUTED IN MORE THAN 20 REGIONS OR CITIES

INCLUDING BAIA MARE, PIATRA NEAMT AND SLATINA, ROMPRES SAID.

THE MAJOR POLLUTION SOURCE INCLUDING CHEMICAL FACILITIES, IRON AND STEEL MILLS AND CEMENT PLANTS ARE EXHALING AS MANY AS 138 MILLION TONS OF HARMFUL WASTE MATERIALS TO THE ATMOSPHERE PER YEAR WITH 134 MILLION OF THEM BEING CARBON DIOXIDE.

THE MONOXIDE IN THE ATMOSPHERE OVER BUCHAREST, FOR EXAMPLE, IS MORE THAN FOUR TIMES THE OFFICIAL LEVEL, AGERPRES NOTED.

WATER IS ALSO VISIBLY POLLUTED. ENTERPRISES HAVE DRAINED ABOUT 6.87 MILLION TONS OF POLLUTANTS INTO THE RIVERS AND LAKES, THE NEWS AGENCY SAID. AS A RESULT, A GREAT DEAL OF LIVES IN THE NATION'S 2,800-KILOMETER-LONG WATERWAYS ARE PARISHING SWIFTLY.

TO ARREST THE SITUATION, THE ROMANIAN GOVERNMENT HAS TAKEN URGENT MEASURES AMONG THEM, THE TECHNICAL TRANSFORMATION OF THE POLLUTION-MAKING ENTERPRISES.

TO CLEAR THE AIR IN BUCHAREST, GOVERNMENT DEPARTMENTS HAVE ADVOCATED REDUCING THE NUMBER OF PRIVATE CARS RUNNING ON THE STREETS, THOUGH FINAL PLANS ARE STILL UNDER WAY, AGERPRES ADDED.

KUWAIT (JULY 10) XINHUA - KUWAITI DEPUTY PRIME MINISTER AND FOREIGN MINISTER SHEIKH SABAH AL-AHMED WILL VISIT IRAN AT AN UNSPECIFIED DATE, AT THE INVITATION OF VISITING IRANIAN FOREIGN MINISTER ALI AKBAR VELAYATI.

THE INVITATION WAS EXTENDED DURING THE SECOND ROUND OF TALKS TODAY BETWEEN THE TWO FOREIGN MINISTERS. THE KUWAITI FOREIGN MINISTER ACCEPTED THE INVITATION BUT NO DATE WAS FIXED FOR THE VISIT, SAID THE KUWAIT NEWS AGENCY KUNA.

VELAYATI DELIVERED A MESSAGE FROM PRESIDENT HASHEMI RAFSANJANI WHEN MEETING WITH AMIR SHEIKH JABER AL-AHMED AL-SABAH EARLIER TODAY, SAID KUNA, WITHOUT DISCLOSING THE CONTENT.

THE IRANIAN OFFICIAL WAS ALSO RECEIVED BY CROWN PRINCE AND PRIME MINISTER SHEIKH SAAD AL-ABDULLAH AL-SABAH. HE ARRIVED HERE MONDAY ON A TWO-DAY OFFICIAL VISIT.

DURING TODAY'S TALKS, THE TWO FOREIGN MINISTERS DISCUSSED THE SITUATION IN THE REGION, ISSUES OF MUTUAL INTEREST AND BILATERAL RELATIONS.

THEY AGREED TO BUILD TIES ON THE BASIS OF "GOOD NEIGHBORLINESS AND MUTUAL RESPECT TO PREPARE THE BEST WAY TO BUILD CONFIDENCE AND COOPERATION AMONG

ALL THE REGION'S STATES," SAID A FOREIGN MINISTRY SPOKESMAN.

ON MONDAY, THE TWO SIDES AGREED TO WORK TO RESUME AIR LINKS BETWEEN THE TWO COUNTRIES.

AGREEMENT WAS REACHED TODAY ON THE BASICS OF THE ISSUE DURING TALKS BETWEEN DIRECTOR GENERAL OF THE GULF DEPARTMENT OF THE IRANIAN FOREIGN MINISTRY FOUMENI HA'IRAI AND KUWAITI FOREIGN MINISTRY UNDERSECRETARY SULEIMAN MAJED AL-SHAHEEN.

VELAYATI, THE FIRST IRANIAN FOREIGN MINISTER TO VISIT KUWAIT IN ALMOST A DECADE, WAS SEEKING TO IMPROVE RELATIONS BETWEEN THE TWO COUNTRIES, WHICH DETERIORATED DURING THE GULF WAR WHEN KUWAIT, ALONG WITH OTHER GULF NATIONS, SUPPORTED IRAQ IN FIGHTING WITH IRAN.

EARLIER THIS MONTH, RAFSANJANI PRAISED KUWAIT FOR CANCELING THE TRADITIONAL MOSLEM FEAST CELEBRATION AS A TRIBUTE TO AN ESTIMATED 50,000 PEOPLE KILLED IN AN EARTHQUAKE.

TOKYO, JULY 10 KYODO - A GROUP OF WORLD TRADE NEGOTIATORS HAS DRAFTED A REPORT CALLING FOR PHASING OUT OF ALL CURBS ON TEXTILE TRADE WITHIN SIX YEARS THROUGH ELIMINATING AN AGREEMENT THAT REGULATES TEXTILE IMPORTS.

A COPY OF THE DRAFT WAS OBTAINED BY KYODO NEWS SERVICE TUESDAY. THE REPORT PROPOSES SCRAPPING, ON AUGUST 1, 1991 OR JANUARY 1, 1992, TEXTILE IMPORT QUOTAS AND IMPORT CURBS ON TEXTILE PRODUCTS THAT ARE NOT ALSO BEING MANUFACTURED DOMESTICALLY BY THE IMPORTING NATIONS.

THESE REGULATIONS ARE MANDATED UNDER THE MULTI-FIBER ARRANGEMENT, A SAFEGUARD MECHANISM THAT ALLOWS COUNTRIES TO PROTECT THEMSELVES AGAINST SUDDEN INCREASES IN IMPORTS.

THE MFA, WHICH COVERS ABOUT HALF OF THE WORLD TRADE IN TEXTILES AND CLOTHING, IS DUE TO EXPIRE ON JULY 31, 1991.

THE REPORT ALSO CALLS FOR ELIMINATING OTHER RESTRICTIONS IN SEVERAL STAGES AND SETTING UP A MECHANISM CALLED THE TEXTILE MONITORING BODY THAT WOULD OVERSEE CHANGES IN TEXTILE TRADE RULES EXPECTED UNDER ONGOING WORLD TRADE TALKS KNOWN AS THE URUGUAY ROUND.

THE REPORT WAS INITIATED BY L.P. DUTCIE, WHO CHAIRS THE TRADE NEGOTIATING GROUP HAMMERING OUT RULES ON TEXTILE TRADE UNDER THE URUGUAY ROUND BEING HELD UNDER THE AUSPICES OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT).

THE REPORT IS NEARLY IN LINE WITH PROPOSALS MADE EARLIER BY A GROUP OF TEXTILE EXPORTING COUNTRIES IN THE THIRD WORLD, FOR WHICH THE TEXTILE INDUSTRY IS THE PRIMARY SOURCE OF FOREIGN CURRENCIES.

BUT GATT NEGOTIATORS FROM INDUSTRIAL NATIONS SUCH AS THE UNITED STATES ARE EXPECTED TO OPPOSE THE REPORT WHEN IT IS PRESENTED TO A MEETING OF THE TRADE NEGOTIATING GROUP IN GENEVA STARTING ON JULY 23.

THE UNITED STATES HAS PROPOSED ELIMINATING RESTRICTIONS ON TEXTILE TRADE OVER 10 YEARS AND BRINGING TRADE IN TEXTILES UNDER STRENGTHENED GATT RULES.

ALSO, THE EUROPEAN COMMUNITY (EC) FAVORS SAFEGUARDS AGAINST SUDDEN SURGES OF EXPORTS FROM THIRD WORLD PRODUCERS DESPITE SUPPORTING THE ABOLITION OF THE MFA.

THE REPORT TOUCHES ON SUCH SAFEGUARDS DURING A TRANSITION PERIOD BEFORE THE EXISTING RESTRICTIONS ON TEXITLE TRADE ARE FULLY LIFTED, BUT IT STOPS SHORT OF MAKING CLEAR PROPOSALS ON A SAFEGUARD MECHANISM.

TOKYO (JULY 10) KYODO - SUMITOMO METAL MINING CO. HAS PURCHASED A 21 PERCENT STAKE IN BALLANDE, A LOCAL FIRM WITH THE SECOND LARGEST MINING CLAIM IN NEW CALEDONIA, SUMITOMO OFFICIALS SAID TUESDAY.

SUMITOMO HAS PAID SOME 3.8 BILLION YEN FOR THE DEAL THROUGH A SUBSIDIARY OF INDOSUEZ BANK, A BALLANDE SHAREHOLDER, THE OFFICIALS SAID.

THE MAJOR JAPANESE MINING COMPANY IS AIMING TO SECURE THE SUPPLY OF NICKEL ORES WHICH SUMITOMO HAS IMPORTED FROM BALLANDE SINCE 1952, THEY SAID.

SUMITOMO IS STUDYING THE POSSIBILITY OF SENDING TWO DIRECTORS TO BALLANDE IN THE FUTURE, THE OFFICIALS ADDED.

#90191k0082 07/10/1990 ~Japanese News Agency

TOKYO (JULY 10) KYODO - A JAPANESE BANKING INDUSTRY LEADER INDICATED TUESDAY THAT THE NATION'S MAJOR PRIVATE BANKS ARE READY TO RESUME A LOAN PACKAGE TO CHINA ONCE THE GOVERNMENT GIVES THE GO-AHEAD.

THE GOVERNMENT'S 810 BILLION YEN LOAN PACKAGE FOR FISCAL 1990-1995 WAS PUT ON HOLD FOLLOWING THE MILITARY CRACKDOWN ON PRO-DEMOCRACY DEMONSTRATORS IN BEIJING'S TIANANMEN SQUARE IN JUNE LAST YEAR.

TAIZO HASHIDA, CHAIRMAN OF THE FEDERATION OF BANKERS' ASSOCIATION OF JAPAN MADE THE REMARK AT A REGULAR PRESS CONFERENCE AS PRIME MINISTER TOSHIKI KAIFU WAS ANNOUNCING AT THE SEVEN-NATION ECONOMIC SUMMIT MEETING IN HOUSTON, TEXAS, THAT THE GOVERNMENT INTENDS TO GRADUALLY UNFREEZE THE LOAN PACKAGE.

HASHIDA, ALSO PRESIDENT OF FUJI BANK, EXPRESSED THE HOPE THAT JAPAN'S WILLINGNESS TO LIFT ITS FREEZE ON THE THIRD YEN LOAN PACKAGE TO CHINA WOULD GET UNDERSTANDING FROM OTHER SUMMIT PARTICIPANTS.

HE QUICKLY ADDED, HOWEVER, THAT IT IS IMPORTANT FOR THE BANKING INDUSTRY TO ALSO CONFIRM THE VIEWS OF INTERNATIONAL ORGANIZATIONS LIKE THE WORLD BANK BEFORE TAKING ANY ACTIONS IN CONNECTION WITH LOANS TO CHINA.

ON FINANCIAL ASSISTANCE TO THE SOVIET UNION, ANOTHER MAJOR TOPIC AT THE SUMMIT, HASHIDA STRESSED CAUTION WILL BE NEEDED.

HE SAID IT IS UP TO INDIVIDUAL BANKS WHETHER TO GIVE FINANCIAL LOANS TO THE SOVIETS, ADDING THAT IN ANY CASE A CAUTIOUS RESPONSE WOULD BE REQUIRED WHILE CLOSELY WATCHING DEVELOPMENTS AS THE SOVIETS TRY TO SWITCH FROM A CENTRALLY PLANNED ECONOMY TO A MORE MARKET-BASED ONE.

#90191k0084 07/10/1990 ~Japanese News Agency

KARUIZAWA, NAGANO PREF. (JULY 10) KYODO - FORMER JAPANESE AMBASSADOR TO THE UNITED STATES NOBUO MATSUNAGA ON TUESDAY CALLED FOR A QUICK RESUMPTION OF JAPAN'S BROAD-BASED ECONOMIC AND FINANCIAL AID TO CHINA.

MATSUNAGA MADE THE REMARK AT A SEMINAR SPONSORED BY THE JAPAN PRODUCTIVITY CENTER IN THE RESORT TOWN OF KARUIZAWA, NAGANO PREFECTURE.

IN ADDRESSING THE GATHERING, MATSUNAGA SAID JAPAN SHOULD ACT PROMPTLY TO PREVENT CHINA FROM BEING ISOLATED IN THE INTERNATIONAL COMMUNITY IN ORDER TO INSURE THE STABILITY OF ASIA.

THE FORMER AMBASSADOR WENT ON TO SAY THAT JAPAN SHOULD TAKE THE LEAD IN IMPROVING RELATIONS WITH CHINA.

HE ALSO TOLD PARTICIPANTS THAT HE THINKS CHINA IS KEEPING ITS EARLIER COMMITMENT TO ECONOMIC AND SOCIAL REFORMS, SUGGESTING THE TIME IS RIPE FOR CHINA TO BE GRANTED ASSISTANCE.

#90191k0086 07/10/1990 ~Japanese News Agency

SASEBO, NAGASAKI PREF. (JULY 10) KYODO - DEFENSE AGENCY DIRECTOR GENERAL YOZO ISHIKAWA SAID TUESDAY HE DOES NOT THINK THE MILITARY THREAT FROM THE SOVIET UNION HAS DISAPPEARED IN THE ASIA-PACIFIC REGION.

REFERRING TO JAPAN'S NEXT MIDTERM DEFENSE PLAN, WHICH WILL COMMENCE IN FISCAL 1991, ISHIKAWA SAID IT IS NECESSARY FOR JAPAN TO CONTINUE ITS EFFORTS TO BUILD UP APPROPRIATE MILITARY STRENGTH.

THE NEXT DEFENSE PLAN IS EXPECTED TO COVER A TERM OF THREE TO FIVE YEARS. IT FOLLOWS THE CURRENT 18.4 TRILLION YEN FIVE-YEAR PLAN WHICH WAS BASED ON THE ASSUMPTION THAT THE INTERNATIONAL BALANCE OF POWER EXISTING IN 1985

WOULD REMAIN UNCHANGED.

ISHIKAWA MADE THE REMARKS TO REPORTERS AFTER INSPECTING MARITIME SELF-DEFENSE FORCE PERSONNEL STATIONED IN SASEBO, WESTERN JAPAN.

ON THE DEFENSE BUDGET REQUEST FOR THE FISCAL YEAR STARTING NEXT APRIL, ISHIKAWA HINTED THAT THE DEFENSE AGENCY WILL SEEK AT LEAST A 6 PERCENT HIKE, ADDING THAT THE AGENCY WILL MAKE EFFORTS TO REDUCE DEFENSE SPENDING IN LINE WITH THE TREND OF THE TIMES.

FOR THE 1990 FISCAL YEAR, WHICH STARTED IN APRIL, THE AGENCY AT FIRST REQUESTED A BUDGET INCREASE OF 6.9 PERCENT, BUT THIS WAS FINALIZED AT 6.11 PERCENT, MAKING THE TOTAL DEFENSE BUDGET ABOUT 4.16 TRILLION YEN.

#90191k0094 07/10/1990 ~Japanese News Agency

TOKYO (JULY 10) KYODO - JAPAN'S NINE MAJOR TRADING HOUSES AGREED TUESDAY ON NEW ACCOUNTING RULES DESIGNED TO EXCLUDE GOLD TRADING FROM SALES, COMPANY OFFICIALS SAID.

THE AGREEMENT CAME AT A MEETING OF ACCOUNTING OFFICIALS FROM SUMITOMO CORP., MITSUI AND CO., AND SEVEN OTHER BIG TRADING HOUSES, THE OFFICIALS TOLD KYODO NEWS SERVICE.

THE NEW RULES, SUBJECT TO APPROVAL BY THE FINANCE MINISTRY AND EACH COMPANY'S CERTIFIED PUBLIC ACCOUNTANTS, ARE INTENDED TO MAKE PUBLIC DISCLOSURE OF EARNINGS MORE TRANSPARENT WITHOUT REVENUES FROM GOLD TRADING THEY SAID.

GOLD DEALINGS AT TRADING HOUSES HAVE SWELLED RECENTLY DUE TO THE POPULARITY OF GOLD SAVINGS ACCOUNTS, A FINANCIAL INSTRUMENT DEVELOPED BY BROKERAGE HOUSES.

THE EXPLOSION IN GOLD TRADING BOOSTED SALES AT THE TRADING HOUSES, RESULTING IN A REALIGNMENT OF THEIR SALES RANKINGS. BUT PROFITS FROM SUCH TRANSACTIONS ARE SAID TO BE SMALL BECAUSE THE TRADING HOUSES PLACE BUY ORDERS FOR GOLD ON BEHALF OF BROKERAGE HOUSES AT SLIM MARGINS.

IN THE FISCAL YEAR THAT ENDED ON MARCH 31, MITSUBISHI CORP. WAS THE ONLY MAJOR TRADING HOUSE TO EXCLUDE GOLD TRADING FROM SALES FIGURES.

THE NEW ACCOUNTING CRITERIA ARE INTENDED TO GO INTO EFFECT IN THE SIX MONTHS ENDING ON SEPTEMBER 30, THE OFFICIALS ADDED.

-30- 1452

#90191k0099 07/10/1990 ~Japanese News Agency

TOKYO (JULY 10) KYODO - A TOP-RANKING OFFICIAL AT THE HUNGARIAN CENTRAL BANK SAID HERE TUESDAY THAT HUNGARY IS CONTEMPLATING MAKING ITS CURRENCY, THE FORINT, CONVERTIBLE WITH OTHER CURRENCIES WITHIN THE NEXT FEW YEARS.

SANDOR CZIRJAK, VICE GOVERNOR OF THE NATIONAL BANK OF HUNGARY WHO IS NOW IN TOKYO, EXPRESSED CONFIDENCE THAT THE FORINT CAN RECOVER CONVERTIBILITY, THOUGH THERE ARE SOME CONDITIONS THAT NEED TO BE MET BEFOREHAND.

HE TOLD REPORTERS THAT ADEQUATE FOREIGN CURRENCY RESERVES AND STABILIZATION OF PRICES ARE AMONG THE PREREQUISITES FOR THE MOVE.

KATALIN BOTOS, HUNGARY'S PARLIAMENTARY VICE MINISTER FOR FINANCE, ALSO TOLD THE PRESS CONFERENCE THAT HUNGARY WILL FOLLOW IN THE FOOTSTEPS OF POSTWAR WEST GERMANY AND ADOPT A MIXTURE OF GOVERNMENT CONTROLS AND FREE MARKET PRINCIPLES IN ITS ECONOMIC REFORMS.

-30- 998

#90191k0101 07/10/1990 ~Japanese News Agency

TOKYO (JULY 10) KYODO - THE EUROPEAN COMMUNITY (EC) PLANS TO DEMAND MARKET-OPENING MEASURES FOR A WIDE RANGE OF PRODUCTS AT BILATERAL WORKING-LEVEL TRADE TALKS SET FOR JULY 16 IN TOKYO, GOVERNMENT SOURCES SAID TUESDAY.

IN A DRAFT OF TARGET ITEMS PRESENTED TO JAPAN, THE 12-NATION COMMUNITY URGES STEPS BE TAKEN TO BOOST IMPORTS OF AN ARRAY OF GOODS RANGING FROM PROCESSED FOODS, SHOES, AND OTHER LEATHER PRODUCTS TO NICKEL ALLOY, THE SOURCES SAID.

THE EC ALSO WANTS TOKYO TO RELAX REGULATIONS ON TELECOMMUNICATIONS SO AS TO WIDEN FOREIGN ACCESS TO JAPAN'S TELECOMMUNICATIONS BUSINESS AND THOSE ON LEGAL SERVICES TO ALLOW FOREIGN LAWYERS TO DO BUSINESS IN JAPAN, THEY SAID.

THE EC HAS BEEN PRESSING TOKYO TO OPEN ITS MARKETS FURTHER TO REDUCE ITS TRADE DEFICIT WITH JAPAN, ALTHOUGH JAPAN'S CURRENT-ACCOUNT SURPLUS WITH THE TRADE BLOC FELL BY ALMOST HALF IN 1989, TO 9,875 MILLION DOLLARS.

JAPAN, FOR ITS PART, WILL CHALLENGE THE EC OVER ITS ANTIDUMPING POLICY, SAYING IT PURPORTS TO GAUGE DUMPING IN A WAY WHICH IS UNFAIR, THE SOURCES SAID.

DUMPING IS A PRACTICE IN WHICH PRODUCTS ARE SOLD AT BELOW MARKET VALUE. JAPAN HAS CRITICIZED THE EC'S ANTIDUMPING POLICY BEING CONTRARY TO GATT RULES.

JAPAN ALSO INTENDS TO CITE FRENCH RULES REQUIRING IMPORTS TO INCLUDE INSTRUCTIONS AND RELATED DOCUMENTS IN FRENCH, THEY SAID.

ALSO, TOKYO PLANS TO SINGLE OUT DUTCH IMPORT REGULATIONS ON GOODS FROM JAPAN AND HONG KONG, THEY SAID.

THE JAPAN-EC WORKING-LEVEL MEETING, THE FIRST OF ITS KIND, WAS AGREED ON AT JAPAN-EC MINISTERIAL TALKS IN BRUSSELS LAST MAY.

-30- 1765

#90191m0001 07/10/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 10) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

Rumors of higher interest rates in Japan have driven the Nikkei average down 385.85 to 32,152.43. ... The FT 100 is down 9.2 to 2328.3. ... The DAX index has also fallen, to 1910.67, down 13.19. attempting to purchase the firm announced that five major banks had expressed interest in lending the $4.4 billion necessary. ... The FEDERAL RESERVE says consumers took on $3.9 billion more debt than they paid off in May for an annual growth rate of 6.5%. That was higher than expected and 10 times the April figure. ... SAUDI ARABIA signs a $3.1 billion deal to buy 315 M-1 tanks and support equipment from GENERAL DYNAMICS. ... U.S. SPRINT announces an agreement establishing the first commercial, international video-conferencing service in the Soviet Union.

WHAT'S AHEAD:

OMB director RICHARD DARMAN will testify at 10 a.m. EDT before the House Judiciary Committee on a constitutional amendment requiring a balanced budget. ... Budget negotiations resume at 10 a.m. EDT. ... The PHILADELPHIA STOCK EXCHANGE says that beginning Sept. 16 it will extend its trading day in foreign currency options by 6 1/2 hours to coincide with afternoon trading in the Far East and Pacific Rim countries. The new hours will run from 7 p.m. overnight through 3:30 p.m. ... EASTERN AIR's talks with its pilots are at an impasse and the union plans to send strike ballots to its members. ... REVLON owner RONALD PERELMAN plans to sell up to $182.1 million in NATIONAL HEALTH LABORATORIES stock, in a move to repay bank debt and highlight the value of Revlon's assets.

FROM THE BULLS:

"An aging bull ... not a raging bull," says FRED GORDON at the "Plain Talk Advisor." From a fundamental perspective, Gordon says today's market is a tough call. But he believes "the bull remains in command and the prevailing trend is up ... Too many have written off this bull too early

and too often." (CNBC "World Business", 7/10)

"I think the scenario through the month of July will be further indications of lower interest rates down the road and reasonable corporate earnings," says JIM AWAD, president of BMI CAPITAL. Both of these "should be important factors in moving stock prices higher." (CNBC "Market Wrap-Up", 7/9)

Editor DAVID KLEINMAN of the "Callard Report" believes the stage remains set for significant profits in stocks. "[It's] quite clear we should see 3100 before year's end." (CNBC "World Business", 7/10)

FROM THE BEARS:

"I don't like the interest rate scenario," says perpetual bear PETER GRANDICH, chief market strategist for AFM INVESTMENTS. "We've gone, in about a year's time, from the general mood that they're just coming around the corner, now we heard today that they're down the road a bit, and the way its going, its going to need a plane to get there in about six months." He says that because the U.S. is a debtor nation, we must draw in capital, and therefore, interest rates must stay high, hurting the stock market. His firm is under 10% stocks, their lowest level since August 1987, just before the crash. (CNBC "Market Wrap-Up", 7/9)

STOCK MARKET:

"Nobody wants to be a hero and step up to the plate before we see those earnings reports," says HUGH JOHNSON, chief investment officer at FIRST ALBANY CORP. Investors are nervously awaiting the onslaught of second-quarter earnings reports and watching how the bond market responds to its new supply. (WSJ, 7/10)

Will the falling bond market start to weigh on stocks? "It hasn't so far " says SHEARSON's MICHAEL BENSON. "Every so often the stock market and the bond market manage to divorce themselves and this is one of the cases " says Benson from London where the falling dollar has hurt overseas trading in U.S. stocks. (FNN "World Business Update", 7/10)

Buying in selected blue chip issues and light futures-related buy programs nudged sleepy U.S. stocks slightly higher at the close. Stocks traded in a tight range most of the day. "It's like watching paint dry on the wall," says WILLIAM RAFTERY, technical analyst at SMITH BARNEY. "People are playing a nice, safe game. They're keeping it safe and close to the vest." PHIL ROTH, chief technical analyst at DEAN WITTER, says, "When people are confused about the economy, that's when they buy the blue chips." (Reuters, 7/9).

HILDEGARD ZAGORSKI of PRUDENTIAL-BACHE SECURITIES INC. says the lack of

volume is probably attributable to "summer doldrums," but adds that "it's a little to early to say that volume has completely dwindled." She predicts that volume will pick up now that the holiday is past, and that the market will stay within a narrow trading range. (CNBC "Market Wrap-Up", 7/9)

"Everybody is just waiting for a move in interest rates," says S.G. WARBURG chief trader KEN DUCEY. "The market probably will be lackluster until it sees something definitive to trigger it." ("USA Today", 7/10)

"Program buying in the last hour made the difference between a relatively unchanged day and an up day," says TRUDE LATIMER of JOSEPHTHAL & CO. After an encouraging first hour opening, "the market slowed down to a snail's pace. It got back on track in the last hour, helped by some program trading." (UPI, 7/9)

"The market's action was encouraging considering interest rates rose and there was a no news background," says RAO CHALSANI of PRESCOTT, BALL & TURBEN INC. "The only disappointment was the low volume, which may be due to a summer lull following a holiday-shortened week." Chalsani thinks there are individual stocks that will do well, but overall, he believes the market will not move much over the long-term. "There's not enough cash or interest to push the entire market up," says Chalsani. ("Investor's Daily", 7/10)

STOCK TIPS:

NIKE INC. shareholders received a pleasant surprise yesterday when it was announced that its fiscal fourth quarter profit was higher than even the company had predicted, and that orders scheduled for delivery in the next several months are up 42% from last year. FRED ANSCHEL of DEAN WITTER REYNOLDS says, "They continue to surprise you on the upside and at this point, it looks like they have at least a couple of good years ahead of them." He had predicted earnings of $7.45 per share this year, but now says that may be too conservative. "Given their earnings momentum and strong finances, the price-to- earnings ratio still has more than ample room to expand," says Anschel. ("Investor's Daily", 7/10)

The "Heard on the Street" column in "The Wall Street Journal" reports that analysts are raving about the new management at DU PONT. "The management is working hard to change the culture and the cost structure," says LESLIE RAVITZ, a chemical analyst at SALOMON BROTHERS. PAUL LEMING of MORGAN STANLEY says, "You've literally seen a generational shift from an old guard to the new guard." GEORGE KRUG of OPPENHEIMER put Du Pont on his buy list in May because it is undervalued compared with other big industrial companies. He says shares are selling at about 10 times his estimate of the company's 1990 earnings, a multiple that is about 40% less than the earnings multiple for stocks in the S&P 500 index. (WSJ, 7/10)

CROWN CORK & SEAL CO. jumped 2 1/4 to 63 1/4 after the death of the firm's chairman, JOHN F. CONNELLY, whose family controls 18% of the outstanding shares. Many speculators felt that the family was likely to sell the stock, making Crown Cork a takeover target, but TIMOTHY BURNS of PRESCOTT, BALL & TURBEN INC. says, Connelly's family "will hold the stock because there is too much going on," such as the acquisition of some of CONTINENTAL CAN CO.'s U.S. operations. Burns estimates 1990 earnings to be around $3.70 per share, but says they may jump as high as $5.50 per share in 1991. ("Investor's Daily", 7/10)

OAKWOOD HOMES is a high momentum stock that's bucking the downtrend in the housing industry, says DAVID KLEINMAN of the "Callard Report." He also recommends PHILIP MORRIS AMERICA TRUST SCORES. (CNBC "World Business", 7/10)

"There are signs we're stumbling forward toward a deal" for UAL unions to buy UNITED AIRLINES, says SAMUEL BUTTRICK of KIDDER PEABODY. "I still feel it's an uphill battle for them to get financing," says JOHN MATTIS of SHEARSON LEHMAN HUTTON. "It's a positive step for them [the unions], but I don't see that this puts them over the hump yet." Both analysts were commenting on a report in "Crain's Chicago Business" that five banks have agreed to aid the $4.4 billion buyout bid. UAL stock jumped 4 3/8 to 157 1/8 yesterday on the news. ("USA Today", 7/10)

TEXAS INSTRUMENTS is suing five U.S. competitors, charging them with infringing on a 13-year-old patent for making integrated circuits. "The companies being sued are big enough to make it a significant amount of money," says MEL PHELPS, an analyst at HAMBRECHT & QUIST. The five being sued are DEVICE TECHNOLOGY INC., ANALOG DEVICES INC., CYPRESS SEMICONDUCTOR CORP., LSI LOGIC CORP. and VLSI TECHNOLOGY INC. ("USA Today" 7/10)

Retail analyst MONROE GREENSTEIN says the newest tenant to Trump Tower, GALLERIES LAFAYETTE, may be the solution to his financial struggles. "One they do have a major tenant, a AAA credit rating in the prime retail space within Trump Tower. Secondarily, this tenant should increase the traffic within Trump Tower. This will make the other retail properties more valuable." ("Nightly Business Report", 7/9)

"Stock prices [of banks] have really been pushed down while the values are still pretty reasonable," says CHUCK VINCENT, analyst at PROVIDENT NATIONAL BANK in Philadelphia. He likes smaller banks that avoided risky merger and real estate loans in the 1980s, but says large banks will rebound at some point because of their strong consumer franchises. ("USA Today", 7/10)

#90191m0002 07/10/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (JULY 10) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

Since March 21, the pound has climbed 14% against the dollar and 10% against the mark. Though profit-taking in coming days may briefly interrupt the pound's climb, "most people still feel there's room for it [sterling] to go further" up in value, says PETER SPENCER of SHEARSON LEHMAN HUTTON SECURITIES in London. (WSJ, 7/10)

"We still believe the Federal Reserve is going to ease, although we don't think it's going to be immediately," says PRUDENTIAL-BACHE SECURITIES' HILDEGARD ZAGORSKI. She predicts that the fed funds rate will be down to 8% by the end of the summer. "Right now, the Fed is still fighting the good fight against inflation," says Zagorski. (CNBC "Market Wrap-Up", 7/9)

"The employment report was a big disappointment" to the bond market, says LACY HUNT, economist at CARROLL McENTEE & McGINLEY INC. Supply is also a major concern of the bond market currently, especially with Refcorp 30-year bond auction today. "Refcorp is a very difficult issue," says Mr. Hunt. "It's a different type of animal and there is some concern" about how it will fare. (WSJ, 7/10)

"On Wednesday of last week, we were priced for an imminent Fed easing," says JOE LIRO, a vice president and money market economist at S.G. WARBURG SECURITIES INC. "But after Friday's number, people have reconditioned themselves to the thought that the Fed won't ease anytime soon, even though the economic news may continue to be soft. Now we have supply coming, with no reason for retail investors to be involved." (NYT, 7/10)

Investing in longer-term bonds "was right for this quarter, and lower quality funds also worked," says A. MICHAEL LIPPER, president of LIPPER ANALYTICAL. "We're back to normality." (WSJ, 7/10)

AFM INVESTMENTS' chief market strategist, PETER GRANDICH, is bearish on the bond market because he says demand is falling. "Last week, Japanese money managers stated that they're de-emphasizing U.S. treasuries, concentrating on West Germany and France," says Grandich. "They've been a major, major player." While he acknowledges that U.S. investors played the largest role in the last Treasury refunding, Grandich points out, "the Street doesn't have the buying power that the Japanese [and] Great Britain have had." He says yields may have to go up to attract investors. (CNBC "Market Wrap- Up", 7/9)

RALPH NORTON, editor of "The Muni Bond Fund Report," says the effects of a potential tax increase are not fully reflected in municipal bond prices, although prices are starting to rise and have outperformed comparable Treasury issues for the last four days. "Whenever there are rumors of a tax increase, municipal bonds become more valuable," says Norton. ("USA Today", 7/10)

IAN MacKINNON, head of VANGUARD GROUP's fixed-income department, dubs the past six months the "era of the coupon," with investors earning the yield on their bonds but not enjoying or suffering much in the way of capital gains or losses. Mr. MacKinnon says he anticipated the becalmed bond market back in June 1989, when the yield on long Treasuries was about 8.5%. "We thought rates wouldn't go much one way or the other. At the time, we figured inflation was around 4% to 4.5%, and that a real rate of interest of 4% to 4.5% was a reasonable rate of return. Our outlook hasn't really changed. I would say that market timing will not prove a lucrative endeavor over the next 12 months, just as it hasn't been over the past six months." (WSJ, 7/10)

SAL SERRANTINO of CALIFORNIA RESEARCH GROUP expects the rates at the upcoming 30-year bond auction to go up, "and as we see the rates go up, we expect the Japanese to take a portion of what they would normally take," says Serrantino. He says that competition from West German and French bonds will limit Japanese interest in U.S. bonds. "We're not the only game in town anymore," says Serrantino. (FNN "Marketwrap", 7/9)

THE ECONOMY:

Boosted by a strong increase in retail and bank card borrowing, consumer credit grew at a 6.5% annual rate in May. "I don't think this month's [May's consumer credit] increase is enough to say anything has changed," says DAVID BERSON of the FEDERAL NATIONAL MORTGAGE ASSOCIATION. "If you look at the average over the past five months, the average is $1.6 billion per month ... consumer borrowing has slowed, not increased since last year." Mr. Berson found the latest figures to be encouraging because they show that consumer borrowing is appropriate for the current expansion rate of the economy. "Since we are very close to full employment ... the economy needs to grow a little less slowly to fight inflation. Too much borrowing now would almost certainly lead to inflation." (WSJ, 7/10)

"Consumers are not dying," says GILBERT BENZ, an economist with the SWISS BANK CORPORATION in New York. "Perhaps they're a little more cautious, definitely slowing, but by no means do we have a recession scenario." (NYT, 7/10)

The current slow growth in the economy of 1.5% per year is just what the Fed wants to bring down inflation, says STANLEY SHIPLEY, senior economist with SHEARSON LEHMAN HUTTON. "I don't think [Alan Greenspan] is going to

have interest rates come down immediately as long as he's getting what he wants." Shipley sees the economy continuing to grind itself down, but skirting recession when the Fed finally does lower rates. "He'll have to lower rates to prevent the economy from sliding into recession ... [but] we're not close enough yet." (CNBC "World Business", 7/10)

"We haven't seen the end of this real-estate cycle," says RON MANDLE, bank analyst at SANFORD C. BERNSTEIN. "It will get much worse before it gets better." ("USA Today", 7/10)

IN WASHINGTON:

SALOMON BROTHERS' STEPHEN BELL, commenting on the politics of new taxes, says, "I think [Congress] made a pretty good tactical decision: floating lots of things, committing to nothing and seeing what stays up and what falls down." ("Nightly Business Report", 7/9)

On Thursday, Treasury Secretary NICHOLAS BRADY will go before the Senate Banking Committee to testify on a Bush Administration proposal to put regulation of stock index contracts from the Commodity Futures Trading Commission to the Securities Exchange Commission. JOSEPH HARDIMAN, president of the NATIONAL ASSOCIATION OF SECURITIES DEALERS is hopeful about the prospects of achieving the change. He says, "If we get a strong measure of support out of Senate Banking we could move for a vote in 10 days." Others are not so optimistic. "If it came to a vote today, I think it would be defeated," says BILL SEALE, president of the NATIONAL ASSOCIATION OF FUTURES TRADERS, and ALAN SOBBA, of the NATIONAL CATTLEMEN'S ASSOCIATION agrees, saying, "Brady is stalling for time. He doesn't have the votes yet." ("Investor's Daily", 7/10)

#90191p2901 07/10/1990 ~PR Newswire

ST. LOUIS (JULY 10) PR NEWSWIRE - The government of Saudi Arabia has signed an agreement to purchase 315 General Dynamics Corp. (NYSE: GD) M1A2 Abrams main battle tanks, with deliveries to occur over a three-year period beginning in 1993, the company announced today. The sale paves the way for continued production of Abrams tanks by the General Dynamics Land Systems Division.

Signing of a letter of offer and acceptance (LOA) by the governments of Saudi Arabia and the United States, which calls for sale of fully assembled tanks, will generate approximately $1.8 billion of direct and indirect income to the United States and about 57,000 man-years of work. The United States will also derive other economic benefits from the sale of ammunition, lifetime spare parts and tools, training support and auxiliary equipment.

"This is a particularly important transaction," said Robert W. Truxell, vice president of General Dynamics and general manager of Land Systems. "At a time of declining U.S. requirements, international sales will play a key role in our efforts to maintain a warm M1A2 production base during the 1990s, and at production volumes that will allow competitive costs for additional international sales and U.S. Army requirements that may develop."

For the United States, the benefits extend beyond additional revenue and employment. "The Saudi Arabia M1A2 program supports the national security interests of the U.S. and Saudi Arabia, while helping to preserve the M1A2 production base in the United States," said Truxell.

General Dynamics is currently competing with three other international companies for a contract to build a replacement for the aging fleet of British Chieftain tanks. A decision is expected on that program before the end of 1990. The company is also holding discussions with representatives from the United Arab Emirates, Sweden, Kuwait, Pakistan and Canada about their possible purchase of Abrams tanks.

The M1A2 is the next step in the largest armored vehicle research development effort in the free world. Electronic upgrades and the advanced technical design of M1A2 armament and armor provide dramatic improvements that will make the Abrams tank more lethal and more survivable.

#90191p2902 07/10/1990 ~PR Newswire

LANSING, MI (JULY 10) PR NEWSWIRE - Oldsmobile Division of General Motors has announced an increased consumer rebate to $1,250 on its Silhouette multi-purpose minivan, beginning July 10 and continuing through Aug. 2 under the current "New Generation Sell-A-Bration III" program.

All other consumer rebates including $2,500 for 1990 Toronado models and $1,000 on Cutlass Ciera models also continue through Aug. 2. Dealers may continue to offer consumers special GMAC finance rates previously announced in lieu of the consumer rebate. Oldsmobile also is continuing to provide dealers cash back on most of its other car lines.

#90191p2908 07/10/1990 ~PR Newswire

WATERTOWN, MA (JULY 10) PR NEWSWIRE - Summit Technology, Inc. (NASDAQ:

BEAM) announced today that the U.S. Patent and Trademark Office has awarded Summit a patent titled Surface Erosion Using Lasers, 4,941,093, concerning the use of excimer laser technology and its applications. This patent contains 42 claims covering essential and fundamental aspects of the design and use of excimer lasers in performing corneal sculpting (PRK). The patent includes claims such as:

"A corneal reprofiling system for modifying the surface of a cornea of an eye, the system comprising ... a beam dimension control means disposed along the path, including a beam-forming optical means for optically varying an area over which the laser light is incident while maintaining a substantially constant energy per unit area during each pulse."

The company believes that this patent is a significant addition to its intellectual property portfolio and further secures Summit's postion as the leader in the medical excimer laser industry.

Summit Technology, Inc. has established the leadership position in designing, manufacturing and marketing medical excimer laser systems. A major focus of the company's business is in ophthalmology where applications have been developed for the treatment of common vision disorders such as near-sightedness, far-sightedness, astigmatism and certain superficial diseases of the cornea. Summit is the only company using an excimer laser in multiple medical specialties and has received six approvals from the F.D.A. for clinical trials with its excimer laser systems. To date, over 600 patients have been treated both domestically and internationally for all procedures.

ALEXANDRIA, VA (JULY 10) PR NEWSWIRE - General Motors Technical Staffs Group of Warren, Mich., will receive the National Society of Professional Engineers' (NSPE) President's Special Recognition Professional Development Award.

The award, presented annually, is made on the basis of the employer's professional career development and special employment practices. NSPE President E. Walter LeFevre, P.E., will present the plaque to Edward R. Alef, director of the GM Technical Education Program on July 17, 1990, during the Society's Annual Meeting in Norfolk, Va.

The purpose of the General Motors Technical Education Program is to keep the GM engineering staff technically up to date and enhance the academic character of the engineering profession. The GM Technical Education Program offers on-site technical course work for engineers, engineering managers, and engineering technicians. The program involves 50 different institutions from across the country and offers five different degrees. The program currently has 3,100 enrollees, including 570 individuals pursuing degrees.

The National Society of Professional Engineers, headquartered in Alexandria, represents more than 75,000 registered engineers, land surveyors and engineering students in all technical branches of the profession. The society works to achieve high standards of professionalism among practicing engineers.

CONTACT: Dave Sloan of General Motors Corporation, 313-986-5719; or for information about the NSPE award, Kelly Cunningham of the National Society of Professional Engineers, 703-684-2800.

#90191p2918 07/10/1990 ~PR Newswire
BARCELONA, SPAIN (JULY 10) PR NEWSWIRE - The European pharmaceutical industry group, EuroAlliance, today announced the addition of a fourth partner, Lacer, S.A., a privately held pharmaceutical company based in Barcelona. Lacer will represent the Iberian Peninsula, including Spain and Portugal, joining original EuroAlliance founders Laboratoire L. Lafon (France/Belgium); Merckle (Germany/Austria/Switzerland); and Alfa-Schiaparelli-Wasserman (Italy).

Viewed by many as a strategic alignment effort in anticipation of the 1992 European Unification Act, EuroAlliance was established to jointly fund, develop and commercialize selected compounds while allowing each company to maintain its own autonomy. The alliance will also in-license compounds from U.S., European and Japanese companies seeking to optimize the

development and launch of new products throughout Europe.

Specializing in the development and manufacturing of prescription gastrointestinals, cardiovasculars, and OTC dermatological and oral care products, Lacer is rapidly growing, having launched five new products in 1989. As a member of EuroAlliance, the company will participate in a group with combined annual sales in excess of US$500 million. Total pharmaceutical sales in Europe are currently estimated to be US$30 billion representing approximately 18 percent of the worldwide market.

EuroAlliance Signs Pact with U.S. Pharmaceutical Company In a related development, EuroAlliance announced its first U.S. licensing agreement with Mission Pharmacal (San Antonio, Texas), to develop and market Slow Fluoride(R), for the treatment of spinal osteoporosis; and Citracal(R), a calcium supplement for the prevention of bone loss. Terms of the agreement were not disclosed, however, each EuroAlliance partner will be responsible for the development and marketing of the products in their respective countries.

Citracal, which was introduced to the U.S. market in 1986, is a unique, patented, aluminum-free, calcium citrate formulation, available in a special ultra-dense tablet. The product was developed by Mission Pharmacal and a leading osteoporosis researcher at a major medical center in Dallas.

Slow Fluoride, presently under review at the U.S. Food and Drug Administration, was also developed by Mission through the same industry/university/National Institutes of Health collaboration, which has introduced three orphan drugs and three diagnostic products over the past seven years. Slow Fluoride is distinguished from conventional fluoride preparations by its favorable side effect profile and its ability to grow new bone with enhanced structural integrity.

MILFORD, OHIO (JULY 10) PR NEWSWIRE - Structural Dynamics Research Corporation (NASDAQ: SDRC) today reported record earnings and revenue for the second quarter ended June 30, 1990.

Net earnings for the second quarter of 1990 increased 55 percent to $3,065,000 compared to $1,983,000 for 1989's second quarter. Revenue rose 24 percent to $28,610,000 compared to $23,146,000 for the same period last year. Earnings per share were 22 cents compared with 15 cents per share for the same period in 1989. Common shares outstanding, including

equivalents, were 13,901,000 and 13,254,000 for 1990 and 1989, respectively. All share and per share data have been adjusted to reflect the two-for-one stock split effective on April 27, 1990.

Earnings before income taxes for the second quarter increased 54 percent to $4,786,000 compared to $3,105,000 for 1989's second quarter.

Net earnings for the six-month period ended June 30 increased 56 percent to $5,476,000 compared to $3,519,000 for the same period in 1989. Revenue rose 22 percent to $53,768,000 compared to $44,088,000 for the same period last year. Earnings per share were 40 cents for six months compared to 27 cents per share for the same period in 1989. Common shares outstanding, including equivalents, were 13,760,000 and 13,202,000 for 1990 and 1989, respectively.

Earnings before income taxes for the six-month period increased 55 percent to $8,562,000 compared to $5,521,000 for the same period in 1989.

Ronald J. Friedsam, SDRC chairman and chief executive officer said, "Earnings have now increased in each of the last 16 consecutive quarters when compared to each of the prior years' quarters. Revenue from our software products division grew significantly, increasing by 33 percent over the second quarter of last year."

During the second quarter, SDRC announced that its shareholders approved a two-for-one stock split and an increase in the number of authorized shares of the company's Class A common stock from 25 million to 50 million shares. The record date of the stock split was April 27, 1990. In addition, first customer shipments of the new release of I-DEAS(TM) software, the company's industry leading product for mechanical computer-aided engineering, began in April. "Our strong financial performance along with the availability of our new release of I-DEAS software positions us well for the future," said Friedsam.

SDRC is a leading international supplier of mechanical computer- aided engineering software and engineering services used by automotive, aerospace, and industrial manufacturers for the design, analysis and testing of sophisticated mechanical products. The company's products and services significantly reduce product development time and cost, and result in superior product quality by enabling customers to optimize product designs prior to production. SDRC employs more than 900 people and has 36 offices in 12 countries throughout North America, Europe and the Far East.

#90191p2921 07/10/1990 ~PR Newswire

BOCA RATON, FL (JULY 10) PR NEWSWIRE - Innovet Inc. (NASDAQ: IVET) today announced it has successfully developed the first antibiotic formulation using time - release Microdroplet Technology for veterinary drugs. Testing is being conducted utilizing this unique process on the three most commonly used veterinary antibiotics. Innovet's technology is expected to have an important impact on the worldwide market for veterinary antibiotics, which is estimated to exceed $750 million.

"Until the advent of this advancement in drug delivery," said Jesse Houdeshell, D.V.M., president of Innovet, "it was necessary for the practitioner to inject an animal several times during the course of treatment to curb an infectious disease. This is stressful for the animal labor intensive and wasn't always consistent over the course of treatment. Phase III testing is now underway on one product and we anticipate submission of a New Animal Drug Application in 1991."

Microdroplet Technology creates beadlets 1/80th the size of a red blood cell which, when injected, easily circulate throughout the body. The antibiotic beadlets are formulated to be absorbed into the system up to four days for sustained treatment. In addition, some antibiotics cause irritation to the tissue around the injection site and scarring frequently occurs when dosages are repeated. In cattle, such scarring results in waste during meat processing. Innovet's technology surrounds each antibiotic particle with a safe coating, which is non-irritating to the animal. Antibiotics formulated to date include Oxytetracycline, Erythromycin and Ampicillin.

Based in Florida, Innovet is a development stage company dedicated to

innovative animal healthcare products. The company's patents in Molecular Encapsulation and Microdroplet Technology hold promise in revolutionizing the way in which pets, livestock and eventually humans may be treated for disease.

CONTACT: John T. Boone of Innovet Inc., 407-394-0621; or Bruce H. Wolk of Carl Thompson Associates Inc. for Innovet, 303-494-5472.

HOUSTON (JULY 10) PR NEWSWIRE - Continental Airlines today announced it has cut fares by as much as 65 percent for travel during the next two weekends to or from its four mainland U.S. hub cities -- Cleveland, Denver Houston and Newark/New York-LaGuardia. The sale fares range from $29 to $129 each way. For instance, the fare from San Francisco to Denver will be $79 each way, versus a regular low fare of $140 each way, offering a savings of 44 percent.

The fares apply to travel that begins July 12-14 and returns July 14-16; or travel that begins July 19-21 and returns July 21-23. Round-trip travel must occur on the same weekend.

"Although we continue to experience heavy traffic this summer, we were able to identify 10 dates when seat availability permits us to offer this sale," a Continental spokesman said. "This is a limited- term, targeted fare promotion that will save millions of dollars for tens of thousands of consumers."

Seats are limited, and tickets must be purchased by July 11 and within 24 hours of making a reservation. A round-trip purchase is required, and tickets are nonrefundable. The sale applies to most Continental Express routes as well as Continental jet flights.

Sample Fares
Continental Weekend Sale

Sample Route	Sale Fare Each Way	Regular Low Fare	Savings Percent
Cleveland-Orlando	$ 59	$ 99	40 pct.

IRVINE, CA (JULY 10) PR NEWSWIRE - I-Flow Corp. (NASDAQ: IFLO) announced today that Donald M. Earhart, who was recently appointed president and chief operating officer of the company, has been appointed to the post of chief executive officer and has joined the board of directors.

Earhart, former president of the Optical Division of Allergan Inc., a major eye care products manufacturer, commenced his duties as president and chief operating officer at I-Flow June 4, 1990. Dr. John H. Abeles, I-Flow's chairman, said they and allowed Earhart a short transition time before taking on the permanent positions of chief operating officer and board member. "With his depth of experience and proven leadership abilities, combined with his operating skills in business, Don represents a dynamic asset for the company in his new position," said Abeles.

"We are entering an exciting period of development at I-Flow, with our Multi-Drug(R) Infusion System expected to be completed this year," said Earhart. I-Flow has developed a multi-channel drug infusion system for use in intravenous administration of drugs, nutrients and medical treatments. The system incorporates four independently programmable fluid delivery channels, each capable of delivering separate solutions according to its own infusion timing schedule.

Earhart, who holds a bachelor of engineering degree from Ohio State University and a master of business administration, has over 18 years experience in the medical products industry. Prior to Allergan, he was corporate vice president of Bausch & Lomb and was operations manager for Abbott Laboratories. He has also served as an engineering consultant at Peat, Marwick, Mitchell & Co., and as an engineer with Eastman Kodak.

I-Flow Corp. is designing at Multi-Drug Infusion System which will deliver four different treatment solutions intravenously, through four separately programmable infusion channels on a wearable pump. The system is designed for chemotherapy, antibiotic and pain management treatment for patients suffering from such diseases as cancer and AIDS.

ATLANTA (JULY 10) PR NEWSWIRE - SunTrust Banks Inc. (NYSE: STI) today reported that net income of the regional banking company in the 1990 second quarter was $88.5 million, compared with $85.9 million for the 1989 second quarter. On a per common share basis this was $0.69 this year, an increase of 4.5 percent over $0.66 in the same period last year.

For the first six months of the year, net income was $176.4 million or $1.38 per share, compared with $169.9 million or $1.31 per share for six months last year. This was an increase of 5.3 percent in earnings per share over the same period of 1989.

Through June 30, the annualized return on average assets was 1.17 percent, compared with 1.19 percent for the first six months of last year. The annualized return on common shareholders' equity was 16.66 percent this year, compared with 17.67 percent through six months of 1989.

During the second quarter, the Office of the Comptroller of the Currency conducted a special targeted examination of commercial real estate loans at the company's five largest national banks. The results of the examination were annouced by the company in a special news release issued June 28, 1990.

In the second quarter, the provision for loan losses was $24.8 million more than the 1989 second quarter and $26.6 million more than the 1990 first quarter. The negative effect of the additional provision on second quarter earnings was lessened by two unrelated purchase accounting adjustments on earlier acquisitions aggregating approximately $19 million.

Additional details on credit quality are shown on the following financial highlights.

As of June 30, 1990, total assets of SunTrust were $31.3 billion, an increase of 6.7 percent from mid-year 1989. In other year-to-year comparisons, loans increased 3.4 percent to $21.4 billion; total deposits increased 5.0 percent to $25.1 billion, while total shareholders' equity increased 10.2 percent to $2.2 billion. SunTrust owns and operates 53 full service commercial banks with more than 600 banking locations in Florida, Georgia and Tennessee.

DEARBORN, MICH. (JULY 10) PR NEWSWIRE - Paul A. Edwards has been appointed manager of Ford Motor Company's Lima (Ohio) Engine Plant.

He succeeds Bill N. Landers, who has been appointed general manufacturing manager of Ford's Casting Division.

Edwards previously was manufacturing manager at Ford's Essex (Ontario) Engine Plant, a position he had held since last March. Before that, he had been manufacturing manager at the Lima Engine Plant.

Edwards began his Ford career in 1961 at Ford's Nashville Glass Plant. In 1963, he joined the Engine and Foundry Division and served in a number of positions in the Product Engineering Office before being appointed production supervisor at the Dearborn Engine Plant in 1966.

In 1969, Edwards came to the Lima Plant as a general supervisor of production. He later was appointed production superintendent there, and, over the next few years, held manufacturing positions at several other plants.

He returned to the Lima Plant in 1986 as an area manager of V-6 operations and in December 1987, he was named manufacturing manager.

Ford's Lima plant produces 2.3L, 2.5L, 3.0L, 6.1L and 7.5L V-6 and V-8 engines for Ford cars and trucks. The plant employs over 2,500 people.

COLUMBUS, OH (JULY 10) PR NEWSWIRE - Rax Restaurants, Inc. (NASDAQ: RAXR) is enlisting the expertise of science teachers across the country in an unprecedented effort to promote science education in elementary schools this fall.

The "Discovery Club" will be introduced by the National Science Teachers Association (NSTA) and Rax Restaurants to elementary schools located near Rax's 500 fast food stores in the chain's 29-state system on Aug. 7.

"According to education studies on this global issue, U.S. students are falling short in science achievement, and through a grassroots effort in our restaurants' communities, we hope to help reverse this science literacy crisis," said Ira A. Hermann, who majored in microbiology in college and now is president and chief executive officer of Rax Restaurants, Inc.

"The Discovery Club program is designed to motivate elementary school students to discover and recognize science as an exciting course of study and an essential part of our daily lives.

"We're especially pleased the National Science Teachers Association has pledged support for the Discovery Club program. NSTA's involvement will assure the program activities and materials are presented accurately and will effectively aid teachers in introducing their students to the wonders of science."

Phyllis Marcuccio, publications director, National Science Teachers Association, said: "NSTA is looking forward to participating in the Rax Restaurant science education program. Attracting children to science, giving them opportunities to experience discovery, and perhaps motivating them toward a career choice in science and/or technology are important goals. We are particularly excited about the added dimension of the Rax program to involve parents, making learning about science a family activity."

Introduced this fall for the 1990-91 school year, the Discovery Club is a teacher designed and administered, classroom-based program that rewards students for science achievement at home and in the classroom.

Through the program, teachers will be provided with certificates to recognize students upon their completion of science discovery activities (e.g., participation in classroom activities, satisfactory grades on science tests and self-initiated science projects). Teachers will determine the criteria for awarding the certificates and have the option of including coupons for free Rax meals with the certificates.

COLUMBUS, OH (JULY 10) PR NEWSWIRE - Lawrence A. McLernon, chairman and chief executive officer of LiTel Communications, Inc., announced today the signing of an agreement for the acquisition of One Call Communications, Inc.

One Call, a major long distance telecommunications carrier, is headquartered in Indianapolis and offers a full range of telecommunications services in selected cities in Indiana and Michigan. One Call will be one of four operating subsidiaries of LiTel Communications, Inc.

The transition will begin immediately, according to Allen Sims, executive vice president of One Call. "We expect this to go very smoothly, with no interruption in services for any of our One Call customers.

"Our immediate plans call for a continuation of the fine quality service that has made us successful, along with the introduction of a broader base of new services for all of our customers. The number one priority will continue to be providing the highest quality long distance service at competitive prices, coupled with One Call's personalized service," said Sims.

One Call's large and growing customer base currently provides service to approximately 13,000 customers, the majority of which are commercial or business users.

The three other subsidiaries operating under LiTel are LiTel Telecommunications Corporation and Charter Network, both based in Columbus Ohio, and Afford-A-Call Long Distance, based in Lima, Ohio.

"The acquisition of successful companies like One Call, Charter and Afford-A-Call are the most effective and economical means for us to expand our market share while benefitting the current customer base of each company. These companies have grown in areas which complement LiTel's presence in the market, so this type of acquisition makes excellent business sense for us as we continue to grow," said Larry E. Wolfe, LiTel chief financial officer.

LiTel was founded in 1983 by Lawrence A. McLernon. LiTel is a founding member of the National Telecommunications Network (NTN), the first operational coast-to-coast, all-digital fiber optic network in the U.S. Through NTN, customers have access to nationwide long distance fiber optic service for voice, data and video transmission services.

CONTACT: Jim Fette of LiTel Communications, Inc., 614-433-9272; or Allen Sims, executive vice president of One Call Communications, 800-876-1300, or 317-843-1300.

VIENNA, VA (JULY 10) PR NEWSWIRE - Washington Mortgage Acquisition, Inc. has purchased 100 percent of Washington Mortgage Group, Inc. (WMG) from Washington Bancorporation (NASDAQ-NMS: WWBC).

The purchaser, which is composed of Washington Mortgage Group management and private investors, is affiliated with the StoneLeigh Financial Group, an international financial services company. The seller is the holding company that owns The National Bank of Washington (NBW).

Concurrent with the management-led buy out, Washington Mortgage Group also announced that it has received approval from the Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) as a lender under the multifamily Delegated Underwriting and Servicing (DUS) Program.

DUS is an exclusive designation enjoyed by only 28 other lenders throughout the country. The program effectively grants a franchise to WMG to sell its multifamily loans to Fannie Mae with delegated underwriting and superior pricing.

"The DUS designation from Fannie Mae proves what we've said all along," noted Shekar Narasimhan, Washington Mortgage Group's president and chief executive officer. "We have a solid company, excellent staff and promising prospects for profitable transactions. Now that we're independent, we have the freedom to take advantage of our strengths and pursue our opportunities."

To that end, Narasimhan added, WMG is finalizing plans for expansion into the Southern California market and increasing its focus on managing participating funds for foreign investors.

Washington Mortgage Group manages over $500 million in mortgage servicing assets. Loan originations in 1989 totaled $261 million in multifamily and commercial real estate and single family housing. The company maintains offices in Vienna, Va.; Atlanta; and New York.

StoneLeigh Financial has offices in Boston; Riyadh, Saudi Arabia; Seoul, South Korea; and Vienna, Va. StoneLeigh is considering further acquisitions in the financial services area.

HARTFORD, CT (JULY 10) PR NEWSWIRE - Northeast Savings, F.A. (NYSE: NSB) today announced that it is now in compliance with the current capital requirements specified by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA).

This announcement follows last Friday's special stockholder meeting in which stockholders approved the formation of a holding company, Northeast Federal Corp., whose sole function will be to hold 100 percent of the stock of Northeast Savings, F.A. The holding company reorganization was finalized on Monday, July 9, 1990, following endorsement by the Office of Thrift Supervision (OTS) of Articles of Combination.

George P. Rutland, chairman and chief executive officer, commented, "This marks a major milestone for Northeast Savings. Achievement of the new capital requirements has been our number one priority for the past year, and we believe that achieving this goal places us even more firmly in the ranks of those thrift institutions that will not only survive but prosper in the coming years. The steps we have undertaken in the last year not only put Northeast Savings in capital compliance, but we believe form a solid foundation for earning a return for the stockholders of the holding company."

Northeast's reorganization was in accordance with the capital plan the company submitted to the OTS in January, and approved by them in April.

Following the holding company reorganization, the holders of the capital stock of Northeast Savings became holders of the capital stock of Northeast Federal Corp.; no exchange of stock certificates is required. The holding company's stock will continue to trade on the New York Stock Exchange under the symbols NSB for the common stock and NSB PrA for the preferred stock.

Northeast Savings is one of the largest thrifts based in New England, with retail branches in Connecticut, New York and Massachusetts, and mortgage offices in California, southern Connecticut, and Long Island, N.Y.

CONTACT: George P. Rutland, chairman of the board, president and chief executive officer, 203-280-1100, or Kirk W. Walters, senior executive vice president and chief financial officer, 203-280-1183, both of Northeast Savings.

NEW YORK (JULY 10) PR NEWSWIRE - H. Nicholas Verey has been appointed

chairman of S. G. Warburg & Co. Inc., the U.S. arm of the leading international investment banking and asset management firm, S. G. Warburg Group plc. He will succeed David Brooke who has retired from the firm.

Since 1987, Verey, who is 47, has been a member of the board of S. G. Warburg Group plc and has had responsibility for corporate development and planning. He is a director of S. G. Warburg Securities, the worldwide securities sales and trading arm of the group.

The group's business in the United States is one of the largest and most broadly based of any non-U.S. firm. In a period marked by significant change in corporate activity and ever-increasing interest on behalf of investors in international markets, Verey will be active in developing all areas of S. G. Warburg & Co. Inc.'s domestic and international business.

Nicholas Verey was educated at Eton College, England, In 1961, he joined Rowe & Pitman, one of the four firms which merged in 1986 to form S. G. Warburg Group. He was made a partner of Rowe & Pitman in 1970. From 1975, while head of U.K. institutional equity sales, he was responsible for coordinating the sale of foreign securities to U.S. institutions. In 1980 he joined the corporate finance division with responsibility for major client relationships, a role which he retained until his appointment as chairman of S. G. Warburg & Co. Inc.

#90191p2954 07/10/1990 ~PR Newswire

HOLYOKE, MA (JULY 10) PR NEWSWIRE - Affiliated Banc Corporation (NASDAQ: ABCV) today announced its financial results for the second quarter ended June 30, 1990.

On June 20, 1990, the company announced that loan charge-offs and additions to loan loss reserves by its wholly owned subsidiary, Vanguard Savings Bank, would probably result in a loss for the quarter of up to $3.5 million. It was also announced at that time that the Board of Directors voted to suspend indefinitely the cash dividend to shareholders to preserve capital until such time as earnings return to an acceptable profit level.

The actual net loss for the second quarter was $3,450,000 or $.93 per share. These results compared with a net loss of $875,000 or $.23 per share a year earlier. The net loss for the six months ended June 30, 1990 was $2,932,000 or $.79 per share, compared with net income of $279,000 or $.07 per share for the first half of 1988. Assets totaled $565,668,000 at June 30, 1990, compared with $567,090,000 a year earlier.

Loans outstanding at the end of the quarter were $497,002,000, a decrease of 2.8 percent from the year earlier total of $511,356,000. Deposits totaled $512,179,000 compared with $472,306,000 for the same period a year ago, an increase of 8.4 percent.

Stockholders' equity was $41,337,000 compared with $43,856,000 a year ago. Book value at June 30, 1990, was $11.18 per share, compared with $11.83 a year earlier. The company had 3,698,850 shares outstanding at the end of the quarter, compared with 3,707,350 at June 30, 1989.

During the second quarter, Jeffrey A. Lalonde, chairman and president, said that the bank added $5,221,000 to its existing loan loss allowance of $5,568,000. Loans totalling $2,139,000 were charged off, leaving an allowance for loan losses of $8,650,000 at June 30, 1990, compared with $3,454,000 a year earlier.

Lalonde said, "The loss during the second quarter was within the range expected by management. Planned additions to the allowance for loan losses were made to recognize existing loan portfolio problems in order to acknowledge current conditions in the New England real estate market."

Affiliated Bank Corporation is the parent company of Vanguard Savings Bank a state-chartered savings bank insured by the FDIC. Headquartered in Holyoke, Mass., the bank is a full-service financial institution with eight banking offices.

FAIRFIELD, CT (JULY 10) PR NEWSWIRE - Susan M. Walter has been appointed General Electric's (NYSE: GE) vice president for state government relations. The appointment is effective immediately.

Ms. Walter, who had been manager of state government relations, is based in Washington. According to Frank P. Doyle, GE senior vice president, "Ms. Walter's appointment is recognition that state and local governments have an increasing impact on company operations and that they also represent significant market opportunities for company products and services."

Before joining GE in 1982, Ms. Walter held positions in state government, including special assistant for transportation and environmental issues to Florida Governor Reubin Askew. She is the coauthor, with Pat Choate, of America in Ruins, a pioneer analysis that raised the awareness of public

infrastructure problems in the United States.

#90191p2960 07/10/1990 ~PR Newswire

DETROIT (JULY 10) PR NEWSWIRE - The City of Detroit Department of Health announced today a $150,000 grant from AT&T to help teen-age parents finish school.

The two-year grant will fund the Detroit Young Parents Resource Network. The network will assist young mothers and fathers in two Detroit neighborhoods to overcome obstacles to completing high school and caring for their children, using resources already available in the community.

In making the announcement, Dr. Richard A. Levinson, director of the Department of Health, commented that "Combining school and parenthood can be very difficult. Parenthood creates a lot of dropouts. And dropping out often leads to poverty of opportunity both for the teen-age parent and for the child. We expect that the Detroit Young Parents Resource Network will interrupt that sequence and lead to genuine opportunity for both parent and child."

The program is based in the Detroit school-based Adolescent Health Centers in Northern and Northwestern high schools and serves their neighborhoods. The health centers are funded by the City of Detroit, the State of Michigan, and the Robert Wood Johnson Foundation.

Dr. Levinson explained that advocates have been placed in the two schools to identify and locate teen-age parents, both those in school and those who have dropped out. The advocates will evaluate their clients' needs for services such as child care, transportation, food stamps, health care, counseling, job training and training in parenting skills. They will then locate agencies or services to satisfy those needs. They will advocate for their clients, if need be, with providers of services. And they will follow up regularly with their clients to make sure that the fixes stay fixed and that new problems are handled.

Experience with a parallel project in Chicago has shown that teen- age parents encounter repeated obstacles, according to Mark Trierweiler, field operations director of public relations for AT&T in Detroit.

"Some are major, some seem minor -- but aren't -- and any of them can be discouraging enough to cause the young person to drop out of school," he said. "For example, in Chicago, one of our advocates matched a young mother with a day care center only a mile from her home. The mother missed

the first appointment, and the second. Thoughtful questioning revealed that the girl was nervous about catching the right bus and getting off at the right stop. So the advocate paired her with another young mother going to the same place, and together they learned to cope with the bus system. The child entered day care, and the mother re-entered high school."

CHICAGO (JULY 10) PR NEWSWIRE - Con-Way Central Express, which in 1989 logged nearly 10 million miles on Illinois highways, has been honored as one of the state's safest motor carriers by the Illinois Trucking Association.

Con-Way Central Express won the award in an annual competition sponsored since 1952 by the ITA, Trailmobile and the Illinois Safety Management Council. CCX competed in the fleet safety category, which ranks the safe driving performance of large freight carriers statewide. The award recognizes companies and their employees for outstanding safety accomplishments.

CCX, which employs nearly 500 people in Illinois, operates a fleet of 300 tractors and 725 trailers through 11 service centers in the state. The company posted a safe driving record of only 1.98 accidents per million road miles driven in Illinois. By comparison, the United States Department of Transportation estimates the average safety ratio for commercially licensed vehicles is 9.5 accidents per million miles driven, while automobiles average 19 accidents per million miles.

"We are extremely proud to be recognized as one of Illinois' safest motor carriers," said Gerald L. Detter, CCX president. "This award is a tribute to the hard work and dedication CCX people bring to their jobs. Our drivers are professionals in every sense of the word, demonstrating their commitment to safety every day, sharing the road safely with the motoring public."

Each year the ITA conducts an extensive audit of each company's driving safety and accident records in developing its award program. The program's goal is to promote safe highway driving by all trucking companies, and to give recognition to those that achieve improvement and reach high standards in fleet safety.

As one of Illinois' largest less-than-truckload regional motor carriers, CCX specializes in next-day delivery of commercial and industrial

shipments. With a network of 116 service centers across 11 midwestern states, CCX operates a fleet of 1,366 tractors and 3,316 trailers. On an average day, CCX drivers travel some 300,000 miles system-wide. Through June 1990, the company's service performance has exceeded 98 percent on-time for delivery on next-day freight shipments.

CCX, founded in May 1983, is one of five regional overnight trucking units of Con-Way Transportation Services (CTS), a trucking and intermodal freight services company based in Palo Alto, Calif.

NEW YORK (JULY 10) PR NEWSWIRE - The Great Atlantic & Pacific Tea Co., Inc. (NYSE: GAP) announced today that earnings for the first quarter ended June 16, 1990 were $51,007,000 or $1.33 per share, an increase of 12 percent over the corresponding quarter of fiscal 1989. Sales for the quarter were $3,402,690,000, compared with $3,439,591,000 for the same period of the previous year.

James Wood, chairman, president and chief executive officer, announced the first quarter results at the company's annual stockholders meeting today in New York City.

Commenting on the company's performance, Wood said, "Our first quarter profitability remained strong, with net profit margin achieving another record of 1.5 percent, on total sales that were slightly lower than last year.

"First quarter sales were affected by having 13 fewer stores in operation during the first quarter of 1990 and also a sluggish sales climate in several regions that should improve as the year goes along," he said.

Wood said that the company's investment in Isosceles PLC has a net cost of seven cents per share in the first quarter and that A&P was carefully evaluating the current situation as Isosceles developed plans to restructure its financing.

He said that the company's record capital improvement program that will total nearly $300 million in 1990 was well underway with 17 new supermarkets opened and 26 remodeled or enlarged during the first quarter.

HOUSTON (JULY 10) PR NEWSWIRE - Chiles Offshore Corporation (AMEX: CHC), a Houston-based offshore drilling contractor, today announced it has entered into three separate Bareboat Charter Agreements with the owners of the mobile offshore jackup drilling units Johnnie Hoffman, Penrod 96, and Penrod 97. These three independent leg, cantilever type units are capable of operating in up to 250 feet of water and are currently located in the U.S. Gulf of Mexico.

The charters are for terms of three years unless earlier terminated by the owners as a result of default, casualty loss or sale of the unit. These charters are at relatively low fixed rates and provide for profit sharing arrangements of 75 percent to Chiles and 25 percent to the owners after Chiles has recouped all direct and indirect costs of operating the units, including the fixed rate fees.

Chiles also has the option to purchase all three rigs "en block" at an agreed price on or before Nov. 30, 1990. Should Chiles not exercise the option, the charters give the company the right to match any third- party purchase offers received by the rig's owner after Nov. 30, 1990. In the event a unit is sold to a third party and Chiles fails to exercise its right to match the third-party offer, the owner must pay Chiles a charter cancellation fee.

Chiles expects to take possession of the rigs at various times between July 15 and Aug. 15, 1990. Chiles plans to continue operating the rigs in the Gulf of Mexico in the near term, but will explore alternative markets in other parts of the world.

The Johnnie Hoffman, built in 1982, was the first fully "zero- discharged"

unit constructed specifically for deep gas drilling in environmentally sensitive areas. Penrod 96 and Penrod 97 were also built in 1982.

Chiles is engaged in the drilling and workover of offshore oil and gas wells on a contract basis for major and independent oil and gas companies. The Chiles fleet of ten jackup rigs is currently operating in the U.S. Gulf of Mexico. In addition to its fleet, Chiles manages a self-contained platform rig owned by Conoco Inc. which set the water depth record for production operations last year in 1,760 feet of water.

#90191p2967 07/10/1990 ~PR Newswire

GAITHERSBURG, MD. (JULY 10) PR NEWSWIRE - Oncor, Inc. (NASDAQ: ONCR) announced today that it has submitted a Pre-Market Approval (PMA) application to the U.S. Food and Drug Administration (FDA) for its Human Papillomavirus (HPV) Analysis System.

Stephen Turner, Oncor's chairman and chief executive officer, stated, "The Oncor HPV Analysis System represents a significant improvement over the traditional Pap smear procedure for detecting cervical cancer. There are 40 million Pap smears performed a year in the U.S. and the rate of false negatives is estimated at 20 percent. The Oncor test utilizes specific probes that do not show cross hybridization to other HPV types, thus it significantly simplifies interpretation of results and minimizes the potential for false positives.

"Six percent or roughly 2.4 million of all Pap smears look suspicious and require further testing for HPV. This is where the Oncor test will initially be very useful since there are no HPV tests currently approved by the FDA as a cancer screen. However, given some of the shortcomings of the Pap smear, we believe DNA-based HPV testing will be a broad screening regimen for cervical cancer in the not so distant future," Turner said.

The Oncor HPV Analysis System is a DNA probe-based test which identifies the presence of those strains of HPV which have been associated with causing cervical cancer in women. The test allows for the simultaneous detection and typing of the major genital HPV types to determine whether or not cancer causing strains are present.

The test has been shown to detect HPV types 6, 11, 16, 18, 31, 33 and 35. The presence of HPV types 16 or 18 places the individual in a "high risk" for development of cervical cancer, while other types are generally confined to benign genital warts and lesions or indicate intermediate risk.

According to the American Cancer Society, cervical cancer was responsible for the deaths of approximately 7,000 women in the U.S in 1988, and the rate of cervical cancer and the aggressiveness of its onset are on the increase.

International marketing of Oncor's Human Papillomavirus Analysis System will be developed by Medscand AB (Malmo, Sweden), Oncor's marketing partner.

Oncor has filed for a U.S. patent covering its HPV probes and anticipates final FDA market approval for the test in late 1990 or early 1991, according to Turner.

WASHINGTON (JULY 10) PR NEWSWIRE - Atlantic Coast Airlines/United Express a division of Fresno, Calif.-based WestAir Holding, Inc. (AMEX: WAH), announced today that it will soon undertake its most aggressive expansion since operations commenced.

The airline will add New Bern, N.C.; Greenville, N.C.; Charleston, S.C.; and Columbus, Ohio, to its route system.

"We continue to be pleased by our passengers' acceptance of our United Express product. We're confident our service to these four additional cities will be as well received as it has been in all of our markets to date," said Kerry Skeen, president of Atlantic Coast Airlines.

United Express will begin service from Washington-Dulles International Airport to New Bern Aug. 15, Greenville Aug. 20, Charleston Sept. 5, and Columbus Sept. 5. Also, starting Aug. 1, the airline will begin one daily roundtrip in the Asheville-Raleigh-Durham, N.C., market.

In addition to today's announcements, United Express previously announced

that it will begin non-stop service to both Shenandoah Valley, Va., and Stewart/Newburgh, N.Y., July 15 and Aug. 1, respectively. These additions, combined with today's announcements, will bring the number of cities the airline serves from Washington-Dulles to 20, and the total number of flights offered every business day to 156.

United Express will serve the new markets with its fleet of new, 30-passenger Embraer Brasilia and 19-passenger British Aerospace jet-props. Both state-of-the-art aircraft offer passengers pressurized comfort in two of the most technologically advanced aircraft in regional airline service today.

As a marketing partner with United Airlines, United Express offers its customers many United Airlines benefits, including worldwide reservations, advance seat selection and boarding passes. Members of United's popular Mileage Plus frequent flier program earn a minimum of 500 miles on all United Express flights, and senior citizens may participate in United's Silver Wings program, which offers a variety of travel-related discounts.

Atlantic Coast Airlines/United Express is a division of WestAir Holding, Inc., headquartered in Fresno, Calif. WestAir Holding, Inc. is the largest regional airline company in the United States, operating over 850 daily flights to 58 cities in 13 states and the District of Columbia. In early 1989, the company was named "Regional Airline of the Year" by Air Transport World Magazine.

DETROIT (JULY 10) PR NEWSWIRE - Comerica Bank-Detroit President James R. Waterston sent the following letter to Detroit City Council members:

The question has arisen of Comerica's willingness to share with Council any renderings or models of the Cesar Pelli-designed building proposed for the site of the Ford Auditorium. Just to set the record straight, we would be more than willing to share such renderings or models if they existed. However, they do not exist. Final design plans represent a substantial investment which would not be prudent to make until it is resolved whether Comerica will be permitted to build on the desired site.

All that has been prepared to date are the site plans and very preliminary representations of the building's mass, which have been shared with City Council. The drawings of the site plans were used by our representatives in their discussions with you about the "footprint" of the new building relative to the Ford Auditorium. These drawings demonstrated that public

access on the site will be significantly enhanced by the Comerica headquarters development.

We will be eager to share with Council's planning staff Mr. Pelli's design for the building as it evolves. Mr. Pelli is planning to make a statement at the City Council public hearing on July 16.

CONTACT: David O. Taylor of Comerica, 313-222-3384.

#90191p2975 07/10/1990 ~PR Newswire

EXETER, NH (JULY 10) PR NEWSWIRE - Tyco Laboratories, Inc. (NYSE: TYC) announced today that its sales and earnings for the fiscal year ended May 31, 1990, reached their highest-ever levels.

Net income rose 31 percent to an all-time high $119.1 million over the $91.3 million earned last year. Earnings per fully diluted share were a record $2.90 compared to $2.26 a year earlier. Sales for the year reached $2.1 billion, vs. $1.97 billion reported for the previous year.

Net income in the fourth quarter was $35.2 million, a 41 percent increase over the $25.1 million reported for the same quarter last year. Earnings per share increased from last year's 61 cents to 86 cents, the highest quarterly earnings in Tyco's history. Sales in the quarter were $556 million.

Each of Tyco's business segments contributed to this outstanding performance. Sales and earnings at Grinnell's Fire Protection and Flow Control operations again reached record levels, with strong performances in the fourth quarter. This area continues to benefit from the growth of Grinnell's Fire Protection Systems unit as North America's largest supplier of automatic sprinkler fire protection systems.

Allied's pipe products, which are now distributed through Grinnell's U.S. and Canadian Flow Control product distribution system and Mueller water works product lines which were acquired in September 1988, made major profit contributions.

Tyco's Packaging Materials Group achieved its highest-ever level of earnings. Ludlow's technical papers, industrial packaging and woven fabrics divisions recorded excellent results as Ludlow profits were at an all-time high. Armin's polyethylene films operations also made major contributions to the Packaging Groups record performance.

The company's Electrical and Electronic Components Group also contributed to Tyco's fine performance. Simplex Wire and Cable reached a new high in deliveries of undersea fiber optic telecommunications systems for

installation in oceans throughout the world. Tyco's Printed Circuit Group had higher sales and earnings than in the prior year, although there was continued weak demand in the computer industry.

The company also announced that on June 29, 1990, the shareholders of Wormald International Limited, voting in Sydney, Australia, overwhelmingly approved the acquisition by Tyco of all of Wormald's operating assets. The combination will create the world's largest Fire Protection Group. It is expected that the transaction will be completed by the end of July.

#90191p2980 07/10/1990 ~PR Newswire

CINNAMINSON, NJ (JULY 10) PR NEWSWIRE - DNA Plant Technology Corporation (NASDAQ-NMS: DNAP) was awarded a U.S. patent for a genetic engineering method for protecting crops from certain fungi, including those responsible for post-harvest rotting of fruits and vegetables.

The patent (U.S. 4,751,081) covers the transferring into various food plants of the gene for chitinase, an enzyme which breaks down chitin, a structural component of many fungal pathogens that attack fruits and vegetables. DNAP scientists have successfully introduced the gene and expressed chitinase in tomatoes, potatoes, lettuce and sugarbeets, among other species.

Currently, the control of harmful fungi is limited to chemical fumigation of the soil, or the treatment of plants and harvested fruit with fungicides. Use of such fungicides exceeds a billion dollars annually worldwide. Untreated, infested fruits and vegetables suffer substantial degradation between harvest and sale to the consumer, even when stored under refrigerated conditions.

"The method we have developed is analogous to endowing plants with an enhanced immune system," said Dr. John R. Bedbrook, executive vice president and director of science at DNAP.

"Plants naturally produce chitinase as a self-defense mechanism against soil-borne pathogens, but the timing and degree of this response is ordinarily insufficient to protect the plant from the infecting disease.

"By conferring on major crop plants the ability to produce this enzyme at the right time and at the right levels, we have developed a promising method for preserving the freshness of produce without reliance on chemical treatments.

"Extending the 'shelf life' of various fruits and vegetables is a

principal focus of DNAP's branded produce program," Dr. Bedbrook said. "Products based on this technology could reach the market by the mid-1990's."

The effectiveness of chitinase in suppressing fungal pathogens in the soil was first identified nearly 30 years ago. In 1983, DNAP scientists first isolated the gene responsible for the production of the chitinase protein from a natural bacterial strain.

Methods for introducing the gene into tomatoes and other species and regenerating the plants were then developed, enabling the plants naturally to inhibit chitinase-sensitive fungi. Initial field testing of transformed plants is expected to be completed by early 1991.

DNA Plant Technology Corporation is a leading agricultural biotechnology firm, applying a spectrum of technologies for the commercial development of products and processes for industrial and consumer markets.

AKRON, OHIO (JULY 10) PR NEWSWIRE - Joseph. M. Clapp, chairman and president of Roadway Services, Inc. (NASDAQ: ROAD) announced today that the company's board of directors elected J. T. (Tom) Topping as vice chairman, effective July 15.

Topping, 55, has served as president of Roadway Express, the company's principal operating subsidiary, since 1987 and a director of Roadway Services since 1988. He joined Roadway Express in 1959 and served as a division vice president from 1972 through May 1987. He was elected executive vice president in May 1987 and president in November 1987.

"Given this expanded role at the parent company, we expect to more broadly utilize Tom's years of experience and talent for developing personnel," said Clapp.

Daniel J. Sullivan, vice president and group executive, with responsibility for the national carrier group consisting of Roadway Express and Roadway Package System, announced that Michael W. Wickham has been named to replace Topping as president of Roadway Express.

Wickham, 43, has served as executive vice president-administration and finance of Roadway Express since January. He joined Roadway Express in 1967, served as a division vice president from 1981 through 1988, and vice president-administration and finance from 1988 to 1989.

"Mike has implemented new management systems that have improved the quality and performance of Roadway Express' marketing, sales and administrative functions," said Sullivan.

"His leadership and extensive 'field' experience have prepared him to assume the responsibilities for Roadway Express' growth and profitability in the decade," added Sullivan.

Roadway Services also owns Roadway Package System, Inc., a carrier serving shippers in the small package market; Spartan Express, Inc., a regional carrier serving the Central and Southern regions; Viking Freight, Inc., a regional carrier serving the Western region; Roberts Express, Inc., a critical shipment carrier; and Roadway Logistics Systems, Inc., a company providing integrated logistics services.

NEW YORK (JULY 10) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today announced the sale of its Sable Oaks property development near Vero Beach, Fla. to Westinghouse Treasure Coast Communities, Inc.

The Sable Oaks property consists of approximately 300 acres of land zoned for residential use, including 43 improved lots. The property is located in the community of Indian River Shores and adjacent to Johns Island, an upscale residential community.

The parcel was acquired in 1980 by a subsidiary of Turner Development Corporation, a wholly owned subsidiary of The Turner Corporation. The sales transaction was in accordance with the company's plan and valuation for this property, and generated net cash proceeds of $4.5 million to Turner.

In announcing the sale, A.T. McNeil, chairman of The Turner Corporation, said, "This transaction is an important step in our plan to reduce our real estate portfolio in an orderly manner and continue to concentrate on our profitable core construction business."

Based in New York, The Turner Corporation, through Turner Construction Company and other construction subsidiaries is the nation's largest diversified builder of commercial, industrial, hospital and healthcare, institutional, government building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad.

During 1989, The Turner Corporation completed $3.6 billion of construction.

SUGAR LAND, TX (JULY 10) PR NEWSWIRE - Henley International, Inc. (NASDAQ: HINT) announced today that it has agreed to acquire certain assets of the custom procedural tray operations of the White Knight Health Care division of Work Wear Corporation, Inc. White Knight's custom procedural trays are used in surgical applications in hospitals throughout the United States.

In announcing the acquisition, Kenneth W. Davidson, chairman and president said, "Acquiring the White Knight custom tray assets fits a strategic desire to expand our hospital products division.

This is the company's smallest division and the one we believe has the largest market potential. While we expect division sales to more than double due to this acquisition, we must make a number of changes to improve operating efficiencies of the acquired business."

Henley International, Inc. is a Sugar Land, developer, manufacturer and distributor of physical therapy, pain management, and disposable specialty hospital products.

MIAMI (JULY 10) PR NEWSWIRE - The effective use of new technology to help in the fight against both the constant influx of drugs from the cartels and the use of plastic explosives by terrorists is now a step closer.

Contraband Detection International (CDI), headquartered in Miami, has recently been appointed the sole distributor for the CONDOR Contraband Detection System in the United States. CONDOR, developed by the British Aerospace Systems and Equipment Security Systems group at Bristol, England is a state-of-the-art Tandem Mass Spectrometer based system with extremely high sensitivity and selectivity.

According to CDI president, Joel Weiss, "CONDOR has proven to be far superior to other systems in speed, accuracy and versatility."

CONDOR works dramatically faster than any other technology. CONDOR conducts 64 analyses simultaneously and only requires trace amounts of vapor or particles in order to detect their presence and identify their molecular "fingerprints." So when drug carriers or terrorists think that their conveyance is "clean" to the naked eye, it won't be able to get past CONDOR.

When the FAA launches top priority research on better ways to find plastic explosives as suggested in the findings of the President's Commission on Aviation Security and Terrorism, they shouldn't have to look far. CONDOR has been extensively field tested in the Far East and has shown numerous advantages over Thermal Neutron Analysis devices (TNAs). CONDOR can detect nanogram amounts of plastic explosive (compared to pounds) with an extremely low false alarm rate of less than 1 percent (compared to upwards of 30 percent when TNAs are set for smaller quantities).

KALAMAZOO, MI (JULY 10) PR NEWSWIRE - The Upjohn Company (NYSE: UPJ) has launched a new advertising campaign for Rogaine Topical Solution specifically targeting the Hispanic market.

Rogaine Topical Solution (two percent minoxidil) is the only medication scientifically proved effective for the treatment of androgenetic alopecia (male pattern baldness). It was cleared for marketing by the U.S. Food and Drug Administration (FDA) in August 1988.

Created entirely in Spanish, the ads will run in three markets - Los Angeles, Miami, and New York - through September. Ads were first broadcast on Spanish radio and television on June 18 and will appear in Hispanic newspapers starting July 25.

The 30-second TV and radio spots do not mention the name Rogaine. They were designed to create a general awareness about hair loss among Hispanic males. Both feature a toll-free number that consumers can call for more information about hair loss.

The newspaper ads do mention the name of the product and indication and comply with FDA guidelines by containing the package insert information; they also display a toll-free number. Guidelines by the FDA require the prescribing information to be included in brand-specific ads, which contain both the product name and indication.

The Upjohn Company is a worldwide, research-based provider of human health care products and services, animal health products, agronomic and vegetable

seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

#90191p2990 07/10/1990 ~PR Newswire

METAIRIE, LA. (JULY 10) PR NEWSWIRE - Chemfix Technologies Inc. (CTI) (NASDAQ: CFIX) today reported earnings of $1.25 million, or 17 cents per share, on revenues of $19.3 million for the nine months ended May 31, as compared to earnings of $49,258, or 1 cent per share, on revenues of $18.2 million in fiscal year 1989.

Earnings per share for the nine months period were computed on 7,292,958 shares for 1990 and 6,761,906 shares for 1989.

Third quarter earnings for the period ended May 31 were $392,423, or 5 cents per share, on revenues of $5.55 million as compared to earnings of $152,312, or 2 cent per share on revenues of $5 million for the same period last year. Earnings per share for the third quarter were computed on 7,547,522 shares for 1990 and 6,763,284 shares for 1989.

Daniel N. Silverman III, president and chief executive officer, stated that the Analytical Operations performed well, showing a revenue growth in the third quarter of 49 percent over the same period of fiscal year 1989. He further stated that Renewable Earth Products, the company's joint venture with Air and Water Technologies Corp., contributed $290,000 in equity earnings during the third quarter.

The weighted average number of shares reflect a significantly greater number of shares outstanding than were outstanding a year earlier as the company reports earnings per share on a fully diluted basis. Silverman stated that "the effects of restructuring certain short-term debt in the third quarter, the conversion of $1.5 million Preferred Stock to Common Stock, and the recent rise in the price of the stock combined to increase the weighted average of outstanding shares. The rise in the price of the company's common stock required the inclusion of options and warrants in the number of shares used in the earnings per share calculation, thereby lowering the reported per share earnings." He went on to add that "the recent call of the common stock purchase warrants by the company will not be dilutive."

Chemfix Technologies Inc. is an environmental services company that provides analysis and treatment of hazardous and nonhazardous waste materials for industry and government. The Chemfix(R) process chemically fixates and solidifies hazardous solids and sludges, municipal sewage sludges, oil and gas waste, and many other types of waste, converting them

into environmentally safe solid, claylike materials that can be reused in many cases.

#90191p2994 07/10/1990 ~PR Newswire

PETERBOROUGH, NH (JULY 10) PR NEWSWIRE - Investments totaling well over $50 million by parent company Minebea Co., Ltd. in New Hampshire Ball Bearings, Inc. (NHBB) have paid off in rising sales, productivity, quality improved customer service and expanded product lines, according to NHBB President Michael R. Samide.

Modernized plant facilities, state-of-the-art manufacturing technologies, and the continuing infusion of technical assistance and training from Minebea have helped make NHBB a leader in the revival of the American bearing industry since Minebea's 1985 acquisition of NHBB, Samide said.

NHBB employs 1,150 in its New Hampshire facilities, and nationwide employs 1,400 people with an annual payroll of about $43 million. Its combined revenues for domestic operations are expected to hit close to $100 million in FY 1990. This is a 67 percent increase from pre- acquisition revenue levels at NHBB.

Minebea heads a group of 52 subsidiaries and 14 affiliates in a dozen countries with more than 25,000 employees and an annual sales revenue of almost $1.75 billion. In fiscal 1989, Minebea's operating income was approximately $250 million. Minebea's assets total nearly $5 billion.

Founded in Japan, the Minebea Group now is a multi-national manufacturing enterprise with 47 plants worldwide: in Thailand, Singapore, Taiwan, Japan and the United Kingdom. Thirteen manufacturing facilities operate in the United States alone. Sales are handled by 187 offices located all around the world. Having taken the lead among the Japanese companies in creating a worldwide manufacturing network, Minebea Group now produces over half of its shipment value outside of Japan.

NHBB is one such manufacturing affiliate with plants in Peterborough and Laconia, N.H., and Chatsworth, Calif. No Minebea subsidiary or affiliate anywhere in the world has ever defaulted on a financial or business obligation, the company said.

'Predatory Practices' Charge Refuted Samide refuted the Pacamor/Kubar suit charging injury by alleged illegal predatory practices of NHBB. "The allegations are false and completely unfounded. The record shows Kubar's problems stemmed from its own failures and not because of unfair competitors," Samide said.

Kubar, a manufacturing subsidiary of Pacamor, an importer of Japanese bearings, began production in February, 1985. Augustine J. Sperrazza Jr., president of Kubar, in a statement filed with the U.S. Bankruptcy Court of the Northern District of New York, Oct. 19, 1987, said: "Through June 30, 1985, a total of only 14,000 bearings were produced, or about one and one half day capacity output. By late November, 1985 both Pacamor's and Kubar's ... resources were exhausted and both companies were in default to their major lenders."

NHBB sells its ball bearings rod ends, and spherical bearings to industrial concerns across the United States that use the precision equipment manufactured by NHBB in a wide variety of industrial applications. NHBB also sells its precision products to the defense and civilian sectors.

#90191p2997 07/10/1990 ~PR Newswire

BALTIMORE (JULY 10) PR NEWSWIRE - PharmaKinetics Laboratories, Inc. (NASDAQ-NMS: PKLB) today announced that a contract dispute between the company and Bolar Pharmaceuticals (AMEX: BLR) has resulted in the receipt of notification of termination by Bolar of an agreement under which PharmaKinetics has been providing clinical development services for two drugs manufactured by Bolar.

The company has previously asserted that Bolar is in material breach of the contract including but not limited to the non-payment of past due amounts of approximately $1,500,000. According to Bolar, PharmaKinetics has failed to adequately perform its duties under the contract and Bolar is alleging multiple breaches by PharmaKinetics. PharmaKinetics denies these allegations and intends to vigorously enforce its rights under the contract.

The contract calls for payments by Bolar to PharmaKinetics of approximately $3,500,000 for services to be performed over the next six months. In its notice of termination, Bolar stated its intention to seek reimbursement for its costs associated with PharmaKinetics' alleged breaches.

Bolar accounted for approximately 37 percent of the company's revenue during the quarter ended March 31, 1990, down from 50 percent of revenues during the fiscal year ended June 30, 1989, the company said.

The decline in the percentage of revenues reflects in part the company's

success in expanding its client base as a result of the acquisition of International Bio Research in West Germany and continued marketing efforts of all company services, the company said.

Nonetheless, the company said, until the company is able to offset this decline in revenue from the Bolar contract, revenues from the Clinical Development Division will decline sharply from the levels achieved in fiscal 1989.

Management and the board of directors are currently reviewing available financing alternatives should the company be unable to collect past due amounts under outstanding invoices to Bolar. The company will need to seek an infusion of capital or other financing to satisfy near-term cash flow and working capital requirements should these invoices not be paid.

PharmaKinetics Laboratories, Inc. is a leading drug development company providing services to pharmaceutical and biotechnology firms seeking new drug approvals in the United States and Europe.

#90191p2999 07/10/1990 ~PR Newswire

NEW YORK (JULY 10) PR NEWSWIRE - Hong Kong-based Wardley Investment Services Limited (WISL) announced that it has completed its 80 percent acquisition of Marinvest Inc. from Marine Midland Banks Inc., which will retain the remaining 20 percent share. In April 1990 WISL and Marine Midland had announced an agreement in principle to combine the two firms.

With the addition of Marinvest, an investment advisor headquartered in New York, WISL now has local asset management capabilities in North America, the Pacific Basin and Europe, representing all three of the world's major market regions. Following the acquisition of a controlling interest in Marinvest, assets totalling US$10 billion are now under discretionary management in the WISL Group.

According to Nigel S. Tulloch, WISL's chief executive officer, Marinvest will continue to manage its fixed income, cash management and equity products, including the Mariner family of mutual funds, under its own name and current management. Tulloch commented that, with the addition of Marinvest, WISL can be considered one of the world's leading global investment advisory organizations, based on its representation in the world's major financial centers, assets under management and research capabilities.

"Our goal," said Tulloch, "is to continue to increase our share of the

accelerating flows of global portfolio capital. Marinvest's strong performance record, particularly in the management of money market and fixed income portfolios, will be actively marketed outside the U.S.A. The awareness, in the U.S.A., of WISL's international equity management resources, particularly its unrivalled capability in the Pacific region, is certain to be enhanced following the integration of the two firms."

Wardley Investment Services Limited is the investment management arm of the HongkongBank group and was named the top international manager of 1989 in a survey published by Barron's. WISL provides domestic and international investment products to institutional and individual investors and maintains investment advisory offices in Hong Kong, Tokyo, London, Singapore, Melbourne, New York, in addition to client service offices in Taipei, Luxembourg, Dubai and Jersey (Channel Islands).

FORT LAUDERDALE, FLA. (JULY 10) PR NEWSWIRE - Telematics International, Inc. (NASDAQ: TMAX) announced today that Robin E. Yount has joined the company as vice president of customer service. In this new position, Yount will be responsible for the development of an expanded worldwide customer service oganization, implementation of an enhanced customer satisfaction program and management of the corporate product support functions. He will report to Lawrence A. Cattell, senior vice president of marketing.

"Robin Yount brings more than 16 years of results-oriented experience to the Telematics management team, including a proven history of successful achievements in senior management positions with Mitel, Siemens/Tel Plus and Tel-A-Com Hawaii. Under Robin's leadership, Telematics will be able to accelerate the achievement of its corporate customer service goals," Cattell said.

Yount joins Telematics from Mitel Inc., Boca Raton, Fla., where he participated in a major acquisition of Mitel's first direct sales and service organization. As a member of the mergers and acquisitions team, Yount was responsible for the evaluation, due diligence and transitioning of operations and administrative functions. During the same period of time he also developed and implemented Mitel's national Customer Satisfaction program.

Prior to Mitel, Yount was vice president and general manager for Siemens/Tel Plus Communications, Inc., where he reorganized five U.S. operating companies, 29 offices and over 700 employees into one of three corporate regions and centralized administrative and dispatch functions

covering 24 states.

Founded in 1982, Telematics designs, manufactures and markets computer systems and software products designed specifically for voice and data communications applications and networks. The company's products include a full range of programmable packet switching systems, low-end protocol converters and switches, T1 multiplexers, and frame relay switches. Telematics has approximately 400 employees worldwide. Headquartered in Fort Lauderdale, Fla., Telematics also has facilities in Calabasas and San Mateo, Calif.; Herndon, Va.; Basingstoke, England; Paris; Frankfurt, Germany; and Tokyo.

#90191p3006 07/10/1990 ~PR Newswire

PHILADELPHIA (JULY 10) PR NEWSWIRE - ExecuFirst Bancorp Inc. (NASDAQ: FXBC), parent company of First Executive Bank, today reported that net income for 1990's second quarter totaled $18,844 or $.02 per share, compared to a net loss of $170,499 or $.14 per share in 1989's second quarter.

For 1990's first six months, the company reported that it earned $25,787 or $.02 per share, compared to a loss of $314,326 or $.26 per share for 1989's first half.

Zvi H. Muscal, ExecuFirst chairman and First Executive Bank president and chief executive officer, attributed the significant year- to-year improvement in earnings to a 63 percent increase in second- quarter net interest income after provision for loan loss and a 69 percent rise in net interest income after loan loss provision for 1990's first six months. He said that net interest income rose in response to the bank's strong loan and deposit growth.

Net loans at June 30, 1990, totaled $43.2 million and deposits totaled $47 million, representing increases of 70 percent and 45 percent respectively from levels for the same period in the preceding year. Also at June 30, 1990, the company's assets totaled $57.7 million, up 34 percent from June 30, 1989.

Muscal said he was pleased with the company's continuing growth in profitability. "Compared to 1990's first quarter, earnings were up 171 percent, reflecting the higher level of earning assets," he noted. "This growth has been achieved despite strong competition and a weak national and regional economy."

Muscal reported that First Executive Bank has established a Medical Professional Loan Group within the bank. "This new organization will enable First Executive to build upon its growing success in financing medical practices and serving the banking needs of doctors, dentists and other medical professionals," he explained.

First Executive Bank opened for business in November of 1988. Located at 1513 Walnut St. in Center City Philadelphia, it is a state- chartered bank and a member of the Federal Reserve System. Its deposits are insured by the Federal Deposit Insurance Corp. (FDIC).

#90191p3008 07/10/1990 ~PR Newswire

WASHINGTON (JULY 10) PR NEWSWIRE - Slightly more than 3 percent of American transportation workers tested positive for illegal or abused drugs under the new federal program that requires testing of airline and railroad employees, bus drivers and others in "safety-sensitive" transportation jobs, SmithKline Beecham Clinical Laboratories announced today in releasing the first results from the program.

Harry Groome, president of SmithKline Beecham Clinical Laboratories, the largest drug testing firm in North American, said SmithKline Beecham's tests of more than 100,000 workers and job applicants showed that 3.1 percent of some 65,000 currently employed in transportation jobs tested positive for one or more of five substances. Of the 53,000 applicants also tested by the company, 4.2 percent were positive.

The substances tested for are marijuana, cocaine, amphetamines, opiates like morphine and codeine and the hallucinogenic tranquilizer phencyclidine (PCP).

SmithKline Beecham Clinical Laboratories has tested more than 3 million people for drugs since 1987, Groome said, and announced that the SmithKline Beecham Drug Testing Index will be issued every six months to track results of governmental-mandated and industry drug testing programs.

Other finds from the Drug Testing Index:

-- Combined, workers and applicants for transportation jobs were 3.6 percent positive.
-- In the general workforce, in the first half of 1990, 13.8 percent of nearly 1 million job applicants and workers, tested positive for one or more of 10 substances, a substantial decline from 1987 when 18.1 percent tested positive.
-- Marijuana and cocaine were the most commonly detected drugs among

applicants and workers in all industries.
-- Among transportation workers and applicants, the highest percentage of those testing positive live in the Northeast (4.2 percent) and the lowest in the Southeast (3.4 percent).
-- In the general workforce, the highest percentage of those who tested positive for drugs live in the Northeast (17.3 percent); the lowest, in the Southeast (12.6 percent).
-- Abuse of "ice," a crystalline form of methamphetamine spreading from Hawaii is, most prevalent on the West Coast.

"Drug abuse has created an ongoing challenge to America's safety," Groome told a press conference today, adding, "but it is encouraging to conclude from the first six months' data available that in the critical area of public transportation, where millions of lives hang in the balance every day, drug use is less prevalent than in other parts of society."

The new federal program mandates testing of workers regulated by the Department of Transportation (DOT). The Drug Testing Index announced today was compiled from SmithKline Beecham's first 100,000 tests of an estimated 4 million workers in the airline, railroad, trucking, shipping and mass transportation industries.

SmithKline Beecham Clinical Laboratories, with drug testing facilities in 18 of its 26 laboratories, has performed more drug testing than any other company in the United States.

CHICAGO (JULY 10) PR NEWSWIRE - Sears Merchandise Group today announced plans for full implementation of Electronic Data Interchange (EDI), linking Sears with more than 5,000 primary suppliers. EDI is an electronic method of communicating business documents between companies.

Michael Bozic, chairman and chief executive officer, said Sears plans to aggressively expand EDI "because the benefits are so important to both Sears and our suppliers. We believe that EDI will help Sears and all its trading partners become more efficient, reduce transaction costs and improve customer service.

"Our commitment to EDI is so strong that we will provide special training and software packages without cost to our suppliers," he said.

Assistance to suppliers will include availability of a fully staffed

implementation center to help guide Sears suppliers through EDI installation and use.

The software package allows suppliers to receive and send EDI transmissions of business transactions in the standard format of the American National Standards Institute. It also will enable integration of EDI information into existing vendor systems. In addition to connecting with Sears, the software package can be enhanced to allow interconnecting with other networks and retailers.

Sears has been exchanging electronic documents with vendors for more than 20 years, using proprietary formats. Sears EDI program using industry standards has already has been implemented with more than 300 suppliers through Sears Communications Company, a subsidiary of Sears, Roebuck and Co.

#90191p3013 07/10/1990 ~PR Newswire

FORT LAUDERDALE, FLA. (JULY 10) PR NEWSWIRE - Reporting improved fourth quarter operating results while providing for a non-recurring reserve for prior years' income taxes, Burnup & Sims Inc. (NASDAQ: BSIM) today reported earnings for the fiscal year ended April 30, 1990, of $0.8 million, or $.08 per share, on revenues of $192.7 million, compared to $9.2 million, or $.90 per share ($.34 per share from real estate

transactions), on revenues of $178.4 million a year ago.

Results, compared to the same period last year, increased $.11 per share for the final quarter of fiscal year 1990 (excluding the special income tax reserve, real estate transactions and National Beverage's contribution). Reserves for income taxes were increased by $2.1 million due to potential prior years' income tax assessments. The company felt it was prudent to increase these reserves prior to the proposed reorganization to minimize the possible impact on future earnings. While increased volume on telephone contracts contributed to the revenue increase in 1990, competitive pressures within the market place and increased interest costs related to the company's stock repurchase contributed to this year's earnings decline. National Beverage's contribution for the year was affected by increased ingredient costs and by the demand for increased promotional spending in the soft drink industry.

Continuing their efforts to maximize value potential by separating the two corporations, Burnup & Sims and National Beverage have filed a joint request for rulings with the Internal Revenue Service and are working together to complete the reorganization. Upon receipt of a favorable ruling from the Internal Revenue Service (the IRS cannot indicate when a ruling will be issued), the company will proceed to finalize negotiations of share exchange ratios and other material terms of the merger and to seek approvals from shareholders and regulatory agencies.

Burnup & Sims, a leading national telecommunications service company, has diversified interests in real estate, movie theatres, printing and the soft drink beverage industry. With 12 bottling facilities throughout the United States, National Beverage Corp. owns and bottles Shasta, Faygo and Spree All Natural beverages, a Sante water and various private label soft drink brands.

Burnup & Sims Inc.
Consolidated Results for the Years Ended

ATLANTA (JULY 10) PR NEWSWIRE - Norman R. Proulx, who took Wilkinson Sword from the fringe to a competitive role in the North American shaving market, has resigned as president and chief executive officer. He will be succeeded by Fred E. Hiller who has been Wilkinson Sword vice president finance, since 1986. The announcement was made by parent company, Swedish Match, B.V., Nyon, Switzerland.

Proulx indicated his future plans would be made known at a late date. The 43-year-old Proulx had been president and CEO at Wilkinson Sword since 1985.

Fred Hiller, 50, will have management responsibility for Wilkinson's Shaving and Cricket Lighter divisions. During the past several years Hiller was credited with playing a key role in Wilkinson's increased product sales, market shares and gross margins, substantially improving the company's operating results.

Prior to 1986 Hiller served Trans Global Films, Inc. as vice president, business and finance, and, earlier, Columbia Pictures Industries, Inc. as corporate controller.

He is married, the father of two children and resides in Dunwoody, Ga.

MOUNT VERNON, N.Y. (JULY 10) PR NEWSWIRE - Micro Bio-Medics, Inc. (NASDAQ: MBMI) president, Bruce J. Haber, today announced that financial results for the second quarter and six months ended May 31, 1990, "were impacted by investment spending related to several acquisitions made during the past six months which enabled us to enter new territories, and by an international shift in strategy away from sales to lower margin hospital customers toward the higher margin, more profitable alternate care market. This adjustment has led to a slight decline in sales for the second quarter."

However, Haber added, "gross profits on sales for the six months increased from 23.2 percent to 24.3 percent, a significant increase by industry standards and an indication as to where we can see future profits coming from as we make this important transition. We are confident that with this new strategy in place and with the costs of integrating our newly acquired operations into our existing facilities behind us, we will be

able to get back on track toward achieving record sales and earnings for the remainder of this year."

For the second quarter ended May 31, 1990, the company had sales of $9,687,476 compared with sales of $9,710,529 for the same three month period a year ago. Net income for the quarter was $30,344, or $.01 per share, versus net income of $95,175, or $.02 per share, for the same period last year.

For the six months ended May 31, 1990, sales were $18,241,593 against sales of $17,614,400 for the same six months in 1989. Net income for the six month period was $19,339, or $.00 per share, compared with net income of $83,821, or $.02 per share, for the comparable six months in 1989.

Micro Bio-Medics, Inc., is a leading supplier of thousands of medical and pharmaceutical products to doctors in their offices, nursing homes, hospitals and government agencies. In addition, the company is the nation's largest distributor of sports medicine supplies to professional sports teams, schools and colleges.

HOUSTON (JULY 10) PR NEWSWIRE - Garnet Resources Corporation (NASDAQ: GARN) today announced test results from two wells drilled in the Putomayo area of Colombia.

Garnet said that its previously announced Linda No. 1 oil discovery produced 28 degree gravity oil at an average daily rate of 1,340 barrels on a 72 hour commingled pumping test of the Villeta "U", Villeta "T" and Caballos sands in the gross interval between 8,750 feet and 9,100 feet. The Linda No. 1 discovery is located on a separate geologic prospect approximately 2.5 miles southeast of Garnet's Toroyaco No. 1 oil discovery which tested 1,660 barrels per day on pump.

Garnet stated further that its Toroyaco No. 2 test well, which was drilled as a confirmation well approximately 1.2 miles southwest of the Toroyaco No. 1, tested water from both the Villeta "U" and "T" sands and will be suspended.

Garnet also announced that the drilling rig currently on the Toroyaco No. 2 will be moved to the Linda No. 2 location, which will be a confirmation test to the Linda No. 1 discovery. Additionally, crews are now building a location for the Mary No. 1, a rank wildcat located approximately 6 miles northeast of the Linda No. 1 discovery. Drilling on both of these new test wells is expected to commence before Aug. 1, 1990.

Garnet is engaged primarily in international oil and gas exploration activities. Its exploration and production activities in Colombia are being carried out by Argosy Energy International, Garnet's wholly owned subsidiary, in association with Ecopetrol, the Colombian national oil company.

ANAHEIM, CALIF. (JULY 10) PR NEWSWIRE - The radiation-hardened integrated circuits in the guidance systems of the 50 U.S. Air Force operational Peacekeeper intercontinental ballistic missiles have compiled a total of more than 4.2 billion operational hours with a reliability rate that is 28 times better than the goal set for them.

The amazing performance record equates to one failure every 476,000 years -- and the clock is still running. The guidance systems in which the radiation-hardened circuits are used run on an around-the-clock basis to ensure Peacekeeper ICBM readiness.

Rockwell International Corp.'s (NYSE: ROK) Autonetics Strategic Systems Division provides the Peacekeeper guidance and control system under contract to the Air Force Systems Command's Ballistic Missile Organization. The division is part of the company's Defense Electronics business.

More than 4,500 integrated circuits are in the guidance system's Autonetics-built missile electronics and computer assembly, and the inertial measurement unit (IMU). Autonetics and the Northrop Corp. provide the IMU.

The same integrated circuits are planned for use in the IMU for the Air Force Small ICBM program.

A joint Autonetics and Northrop team directed the design, development, test and qualification of the integrated circuits. The parts are produced primarily by Texas Instruments and Harris Corp., and also by Silicon General.

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

WASHINGTON, (JULY 10) PR NEWSWIRE - Adjustments to the Federal Housing Administration's (FHA) single-family mortgage insurance program can be made to keep the program fiscally sound without severely curbing its accessibility to low- and moderate-income borrowers, according to the National Association of Realtors.

NAR President Norman D. Flynn discussed proposed legislative changes to FHA today during a hearing before the housing subcommittee of the House Banking Committee. NAR recommends alternatives to the FHA program that differ from the changes being advocated by the U.S. Department of Housing and Urban Development (HUD). Many of HUD's proposals were included in the housing bill passed by the Senate in June.

According to Flynn, the alternatives NAR supports would fulfill the goal of raising capital for FHA's Mutual Mortgage Insurance Fund (MMIF), from which claims filed against FHA-insured foreclosures are paid. However -- unlike the Senate and HUD proposals -- the measures NAR supports would not deter FHA use by significantly raising out-of-pocket closing costs for borrowers.

"The inability to come up with the cash needed to cover down payment and closing costs on a home is the single greatest barrier keeping tens of thousands of Americans from purchasing a home. The administration and subsequent Senate proposals make the situation even worse. It turns a barrier into a blockade," Flynn said. "Changes in FHA are needed, but not at the expense of the future home buyers of America who need FHA to buy their homes."

In addition to raising closing costs, HUD is proposing to raise the FHA mortgage insurance premium (MIP) charged to buyers making a down payment of less than 10 percent. The change would increase the current 3.8 percent fee to as high as 7.5 percent of the loan amount. The highest premiums would be charged to those making the smallest down payment. NAR estimates that such a change would shut out as many as 100,000 borrowers a year who can now use the program.

An alternative NAR supports will be offered to the House housing bill, the Housing and Community Development Act of 1990, by Reps. Bruce Vento (D-Minn.), and Thomas Ridge (R-Pa.). The Vento-Ridge proposal would restructure the MIP collection, resuming a "pay-as-you-go" system used by HUD before 1983.

It would include the collection of an upfront, non-refundable fee of 1.35 percent of the loan amount, which the borrower could finance and pay to HUD at closing from the loan proceeds. In addition, an annual renewal fee of 0.5 percent would be charged. This fee could either be paid in cash by the borrower, or placed in an escrow account and collected for HUD by the lender as each monthly payment is made.

Collection of the MIP in this manner would begin following a two-year phase-in period. During the first two years, the upfront MIP, which could be financed, would fall from 3.70 percent to 2.60 percent, and the annual renewal fee for those years would rise from 0.2 percent to 0.4 percent. Phasing in the restructured premium collection over two years, ultimately making the upfront amount 1.35 percent and the annual renewal fee 0.5 percent, would be necessary because of federal budget requirements.

For a $65,000 home, a borrower's out-of-pocket closing expenses would be $4,939 under the HUD proposal. The Vento-Ridge proposal would hold those expenses to $4,115 -- a difference of $824.

According to Flynn, restructuring the insurance premium collection using this method would meet HUD's objective of lowering the total amount borrowed. Currently, HUD allows the entire MIP, which is 3.8 percent of the loan amount, to be financed, which often results in loans that exceed the home price.

In addition to changing the MIP collection, NAR also supports

recalculating FHA's method for determining whether to pay distributive shares from the MIP to mortgagors who have paid off their mortgages. Such shares are being paid to mortgagors who obtained mortgages before 1980, because in years prior to that date, the premiums collected in each year exceeded MMIF losses.

The method for paying shares to mortgagors should be based on FHA's total insurance in force, not analyzed on a yearly basis, Flynn said. Since the bulk of FHA's insurance in force was written after 1980, an analysis of the total premium collection against losses would show that the payment of distributive shares should be stopped until the MMIF starts taking in more than it pays out, he said.

NAR also supports the elimination of rebates for the MIP collected upfront from borrowers who later prepay FHA-insured mortgages.

In addition to the FHA reforms in the Vento-Ridge proposal, NAR will continue to press for a locally-based adjustment to the program's mortgage insurance limit, Flynn noted. Specifically, NAR supports adjusting the FHA mortgage insurance limit to 95 percent of an area's median price.

This localized index would be subject to a national cap equaling 85 percent of the individual mortgage limit purchased by the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corp. (Freddie Mac). Since the current Fannie Mae-Freddie Mac limit is $187,450 the FHA insurance cap would be about $159,300.

"FHA maximum mortgage limits have not kept pace with increases in home prices in many areas," Flynn said. The current limit, $124,875, does not make FHA a viable financing tool in high-cost areas, he noted. The restrictive insurance cap has resulted in the program being concentrated in lower-priced markets, leaving FHA more vulnerable to local economic downturns than if it were insuring loans in a wider variety of markets, Flynn explained.

In conjunction with the locally-based limit, NAR would support a slight increase in FHA down payment requirements for loans exceeding $125,000. The association would support a down payment requirement of 3 percent for the first $25,000 of a loan amount; 5 percent for the amount between $25,000 and $125,000; and 10 percent for any portion exceeding $125,000.

"Raising the mortgage limit will improve the financial position of the MMIF by broadening the usage of the program, in terms of serving borrowers in more areas, and, in terms of the range of borrowers who would buy homes that could qualify under the program. Consequently, FHA will be able to obtain a more diversified portfolio of loans to minimize risk (to the MMIF)," Flynn said.

MIAMI (JULY 10) PR NEWSWIRE - David Baines, former national warranty manager of BMW of North America, Inc., has been appointed Sterling Motor Cars national warranty manager.

Baines will be responsible for implementing Sterling's national warranty program and will report directly to Rainer Freuchnicht, service director.

According to Freuchnicht, "With his experience in managing successful warranty programs at BMW and Subaru, David will greatly aid Sterling in meeting our dealers' and customers' needs."

Baines served as national warranty manager for BMW NA from 1987 to 1989. There he oversaw the $180 million warranty account, through a network of seven regions and 425 dealers.

With Subaru of America, Inc., he went from national warranty manager to national field operations manager.

Sterling Motor Cars markets the Sterling line of luxury automobiles including the 827S, 827Si, 827SL, 827SLi, and the limited-production Oxford Edition.

HOUSTON (JULY 10) PR NEWSWIRE - Paramount Petroleum Co., Inc., Jackson, Miss. and Houston and Dallas-based Monticello Acquisition Corporation have merged their oil and gas operations, effective today. Heading the new entity, are noted financiers William E. Simon, former Secretary of the Treasury of the United States and Alvin V. Shoemaker, former chairman of the board of the First Boston Corporation.

The new company and its partners will have budgets for the first year of $45 million for exploration and $12.5 million for equity participation in acquisitions.

The merger joins Paramount, the leading exploration company in the southeastern United States and Monticello, a highly capitalized company whose major shareholders are Simon and Shoemaker. The new company will retain the Paramount name with Shoemaker serving as chairman.

Officers of the new company's exploration division will include Robert H. Chaney as president and Robert D. Schneeflock Jr. as chief operating officer. The company's acquisition division will be headed by C. William Pollock as chief executive officer and Michael F. McGehee as president. John L. Faulkinberry will serve as the company's chief financial officer.

ABBOTT PARK, IL (JULY 10) PR NEWSWIRE - Abbott Laboratories (NYSE: ABT) today reported record sales and earnings for both the second quarter and first half ended June 30, 1990.

Worldwide sales for the second quarter were $1.503 billion, up 14.0 percent from $1.318 billion in the second quarter of 1989. Earnings per share for the quarter increased 14.6 percent to 55 cents. Net earnings were up 13.0 percent to $240 million.

Chairman and Chief Executive Officer Duane L. Burnham said: "While results for the quarter were gratifying, even more significant were the initial international launches of two new anti-infectives, clarithromycin and tosufloxacin, and the first automated allergy diagnostic system, Abbott Matrix."

The improved earnings, Burnham said, were primarily the result of continued productivity improvement, higher volume, and better product mix. He said Abbott expects to achieve record sales and earnings for the 19th consecutive year in 1990. During the second quarter, Abbott:

- Launched clarithromycin, a new generation macrolide antibiotic licensed from Taisho Pharmaceuticals Co. of Japan, in Italy; and tosufloxacin, a new quinolone anti-infective, which is the result of a cross-licensing collaboration with Toyama Chemical Co., in Japan.

- Introduced a new, cost-effective diagnostic system, Abbott Matrix, which facilitates accurate diagnosis of allergies from a single blood sample. The instrument is compact, automated and well-suited for laboratories in hospitals, clinics or physicians' groups. Abbott Matrix can run several assays simultaneously on a single blood sample.

The first application for the new technology will be for allergies, and future capabilities will include testing for AIDS, hepatitis and HTLV I. The system has been launched for in vitro allergy testing in France, and will be available soon in Italy.

- Launched Forane, a leading inhalation anesthetic, in Japan. Forane is marketed outside the U.S. and Canada.

- Received U.S. Food and Drug Administration approval for a broader claim for Calcijex, Abbott's injectable form of calcitriol. Calcijex raises calcium levels and prevents bone loss in hemodialysis patients.

- Introduced a brain tissue assay specific for Alzheimer's disease. The assay, which was the subject of a major study recently published in the Journal of the American Medical Association, is used primarily at autopsy, and represents a significant step toward development of the first commercial diagnostic test for Alzheimer's.

MINNEAPOLIS/ST. PAUL (JULY 10) PR NEWSWIRE - Mesaba Aviation, Inc., today reported that it flew 18.3 million revenue passenger miles during the month of June, an 18.2-percent increase over 15.5 million revenue passenger miles flown during the same month last year (one revenue passenger flown one mile equals one revenue passenger mile).

The airline said it carried 87,217 passengers in June, an increase of 20.7 percent over 72,263 passengers carried last June. Mesaba's load factor during the month was 51.9 percent, compared to 61.7 percent last year.

The company said that its reduction in load factor during the month continued to reflect both the extra capacity added to its system over the past year and lower-than-anticipated traffic demand. In the prior year,

the company's load factor was unusually high as it entered many of its new Detroit markets short of capacity with its smaller size aircraft.

Mesaba operates as Northwest Airlink under an airline marketing agreement with Northwest Airlines at the Minneapolis/St. Paul, Detroit and Milwaukee airports. The regional carrier currently provides scheduled airline service to 36 airports in the 11 states of Illinois, Indiana, Iowa, Ohio, Michigan, Minnesota, Nebraska, North Dakota, Pennsylvania, South Dakota, and Wisconsin.

Mesaba Aviation, Inc, is the wholly owned subsidiary of AirTran Corporation. AirTran's common stock is traded on the NASDAQ national market system under the symbol ATCC.

MIAMI (JULY 10) PR NEWSWIRE - Maxell Corporation of America, and TDK Electronics Corporation, a unit of TDK Corp. (NYSE: TDK), two of the world's largest marketers of computer diskettes, audio and video tape and other magnetic media, have been charged with serious violations of federal antitrust laws in a suit brought against the companies today in the U.S. District Court for the Southern District of Florida.

The suit, which could have a multi-million dollar impact on the two corporations, alleges that both companies engage in discriminatory pricing practices, as well as discrimination in paying or granting advertising, sales and other promotional allowances or discounts to wholesalers of the firms' consumer products.

Maxell has also been charged with soliciting kickbacks of portions of the promotional allowances it pays, said antitrust attorney Stephen E. Nagin, senior partner of Nagin & Green, the Miami law firm which filed the suit here today on behalf of Micro Computer Supply, Inc., a Miami-headquartered wholesaler of computer diskettes and other computer supplies and accessories.

"Maxell and TDK may be required to change their marketing and pricing

practices and to pay millions of dollars in damages as a result of the verdict and court judgement we are seeking," Nagin said.

Under federal antitrust law, he noted, Maxell and TDK can be required to pay triple the amount of the jury verdict, as well as the plaintiff's attorneys' fees, and costs.

Dwight Sullivan, who is of counsel with Nagin & Green, is co-counsel in the Maxell/TDK litigation. On behalf of Florida Power & Light, Sullivan handled the massive uranium lawsuit against Westinghouse, which resulted in a settlement in excess of $100 million.

Washington, D.C. attorney Stephen Rubin is another member of the legal team representing Micro Computer Supply, Inc. in the case.

Nagin & Green specializes in complex and protracted business litigation. Stephen E. Nagin, senior partner in the firm, is widely known as an antitrust litigator. Nagin & Green is credited by "Inside Litigation" (published by Prentice & Hall) with winning the 17th largest verdict in the nation last year.

GERMANTOWN, MD. (JULY 10) PR NEWSWIRE - Fairchild Space, a division of Fairchild Space & Defense Corporation, has been awarded one of Phase I Integration Study contracts for the Shuttle Pallet Satellite (SPAS) III by the Strategic Defense Initiative Organization's (SDIO) Sensor and Interceptor Directorate.

Fairchild will support SDIO in the design of the SPAS III mission -- now planned for an early 1993 space shuttle flight -- and the detailed planning and scheduling of the refurbishment of the reusable spacecraft. The award is a cost-plus-fixed-fee contract.

At the end of its six-month study, Fairchild will provide SDIO with a proposal for refurbishment and integration of the SPAS III, the payload accommodations process, and the system implications of the SPAS III mission profile. SDIO then will hold closed competitions to select one of the two integration study contractors to perform the actual refurbishment and integration.

The SPAS was developed for use as a deployable pallet applicable for sortie missions with the space shuttle. The primary structure was flown as SPAS I on STS 7 and STS 11. The system carried several in-bay experiments and, during its deployed stage, a television system to study

external characteristics of the orbiting shuttle.

The SPAS II is scheduled for a shuttle flight early in 1991. The SDIO's Infrared Background Signature Survey (IBSS) will be carried on the SPAS II structure, which will be released from the shuttle and later retrieved during the seven-day flight.

Fairchild Space is an innovative, high-technology company specializing in the design, development, manufacture, and test of spacecraft and spacecraft subsystems for scientific, military and commercial applications. For the past decade, Fairchild has specialized in the design and manufacture of serviceable, recoverable and reusable spacecraft.

Fairchild Space is a division of Fairchild Space & Defense Corporation, a U.S. space and defense electronics company based in Germantown, with operations in Manhattan Beach, Calif. The corporation has annual revenues of approximately $230 million and a workforce of 2,000.

HOUSTON (JULY 10) PR NEWSWIRE - Tenneco Inc. today announced an increase of four cents in its quarterly common stock dividend, effective with the third quarter of this year.

Tenneco's board of directors voted to raise the dividend from 76 cents a common share to 80 cents. The new annual rate is $3.20 compared with a previous annual rate of $3.04. The dividend is payable Sept. 11 to stockholders of record at the close of business on Aug. 10.

James L. Ketelsen, Tenneco chairman and chief executive officer, said, "This dividend increase is confirmation of Tenneco's successful restructuring and reflects the confidence we have in the prospects for our businesses in 1990 as well as the opportunities we think will be available for earnings growth in 1991."

The board also declared a dividend of $1.85 per share on Tenneco's issue of $7.40 cumulative preferred stock. The preferred stock dividend is payable on Sept. 30 to those who are holders of stock at the close of business on Aug. 24.

Tenneco Inc. (NYSE: TGT) is a Houston-based, diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

LAS VEGAS, NV (JULY 10) PR NEWSWIRE - American Pacific Corp. (NASDAQ, NMS: APFC; PSE: APFP), Las Vegas, announced today that it has executed definitive cooperation agreement with Dynamit Nobel A.G., a German firm, for the design, construction and operation of a new 1,000 metric ton sodium azide plant to be located in Iron County, Utah. The plant will be based on Dynamit Nobel's advanced technology and knowhow, the product of 80 years' experience in the production of sodium azide, and will be designed for timely and economic expansion to 2,000 tons capacity.

The estimated capital cost of the Utah plant, to be owned and operated by American Azide Corp., a wholly owned subsidiary of American Pacific in formation, is in the range of $20 million. Dynamit Nobel has licensed its technology and knowhow for the new plant to American Pacific exclusively in North America, will provide technical support for the design, construction and startup of the plant, and has the option to purchase 30 percent of the common stock of American Azide Corp.

Fred D. Gibson Jr., chairman and president of American Pacific, noted that "Dynamit Nobel's obligation to proceed with the project beyond the first phase of engineering is subject to American Pacific obtaining the required financing. Although there can be no assurance that financing will be obtained, the company has had preliminary discussions with a number of financing sources and is optimistic that satisfactory financing arrangements will be made."

American Pacific also announced the conclusion of a contract for performance of project engineering and other services with the Stearns Roger Division of United Engineers and Constructors Inc., a division of Raytheon Company, which has commenced preliminary work. Detailed engineering will follow, and is expected to be completed by early 1991. Construction is planned for the spring of 1991, with plant startup in the last calendar quarter of 1991.

This project is prompted by the rapidly escalating demand for sodium azide which results in turn from increasing demand for automotive air bag systems. Sodium azide is the main chemical used to inflate automotive air bags. There is no U.S. producer of sodium azide.

American Pacific's principal business activities consist of the production of ammonium perchlorate, the oxidizer utilized in composite solid rocket propellants employed in a large number of space and military systems. Through direct and indirect subsidiaries, the company is engaged in the manufacture of chlorate and perchlorate chemicals, the design and

manufacture of electrolytic systems and electrodes, the design and manufacture of pollution control systems, and industrial real estate development.

#90191p3047 07/10/1990 ~PR Newswire

DALLAS (JULY 10) PR NEWSWIRE - Grace Energy Corporation (NYSE: GEG) today announced that non-recurring items will cause earnings per share to decline to the 5-to-10-cent range, down from 26 cents earned in the second quarter of 1989. However, its second-quarter operating profit, principally due to strong results from its energy services businesses, is expected to continue the growth experienced in the first quarter.

As previously reported, Grace Energy's first quarter 1990 operating profit (before depreciation, interest and taxes) was 35 percent ahead of the first quarter of 1989. That growth rate, excluding the non- recurring items, should continue into the second quarter, with all energy services contributing to the operating increase, reflecting both volume growth and margin improvement.

Non-recurring items include the well-publicized bankruptcy of a long-term customer of Colowyo Coal Company and the previously reported inability to allocate a portion of the losses of the company's Grace Drilling Company subsidiary to the former minority interest, as well as certain non-recurring income items in the 1989 second quarter.

For the full year 1990, earnings per share from operations are expected to be at least 50 cents per share favorable compared to 1989. Because of high operating leverage in Grace Drilling and in the company's oilfield services operations (Homco), anticipated improvements of 12-15 percent in 1990 active onshore rigs, active offshore rigs and active well servicing rigs will have a major positive effect on Grace Drilling and Homco.

As in the second quarter, however, the items described above are expected to cause full year earnings per share to dip below 1989 levels. A range of 70 to 80 cents per share is now expected.

Grace Energy Corporation, headquartered in Dallas, is a diversified energy holding company whose subsidiaries are engaged in supplying services and equipment to the petroleum industry; in the exploration for and development of natural gas; and in coal mining.

MEMPHIS, TN (JULY 10) PR NEWSWIRE - Eighteen Holiday Inn hotels have recently opened or are under development in the Holiday Inn hotel system's Western Region.

The development projects in the Western Region, which include new hotels and conversions of other hotel brands, represent some 3,000 additional guestrooms for the Holiday Inn hotel brand.

"We're extremely pleased to strengthen our presence in the Western Region because we see tremendous potential for the Holiday Inn hotel system in this area of the country," says Bob Massey, development director for Holiday Inns' Western Region.

Five of the new hotel projects in California are being developed by Daniel Tsai and Sam Lee of Land Connection, Inc. in Arcadia, Calif. They include the recently opened 72-room Holiday Inn-San Clemente hotel, and four properties currently in the design stage: a 130-room property in La Verne, a 130-room hotel in Temecula, a 180-room hotel in Bakersfield and a 200-room property in Otay Mesa.

Three hotels, converting from other brands, are set to open during July. A 148-room, three-story property will open in Barstow, Calif., following a product improvement plan to bring it up to Holiday Inn hotel standards. Formerly a Super 8 hotel, it is owned by Super 8 Lodging V, Ltd.

Also joining the Holiday Inn system in July is a 204-room independent property in Monterey, Calif., which previously operated as a Hilton hotel. The hotel is owned and operated by California

An additional July opening includes the 246-room, five-story Holiday Inn-Dallas/Garland hotel, which was formerly a Sheraton hotel and most recently operated as an independent. The property is undergoing a $2.5-million renovation of its guestrooms, public areas and exterior. It is jointly owned by United Federal Savings in Jonesboro, Ark., the Bank of England-Old Colony in Providence, R.I., and Railroad Savings Bank of Kansas.

Opening in August is a 100-room independent hotel in Nacogdoches, Texas, which formerly operated as a Ramada hotel. The property is owned by Collecting Bank N.A. of Houston and managed by Metro Hotels Inc. of Dallas.

Scheduled to join the Holiday Inn system in the fall is The Desert Inn in Palm Springs, Calif. The property is undergoing a major renovation including an addition of 40 rooms, giving the hotel a total of 120 rooms. The hotel is owned and operated by William H. McWethy, Jr. of San Diego.

New hotels scheduled to break ground this year include a 165-room hotel in Federal Way, Wash., and a 225-room property in Flagstaff, Ariz., near Northern Arizona University. Six Holiday Inn Hotels Open in the West

Holiday Inns, Inc., a Bass PLC company, is the world's largest hotel chain with more than 1,575 hotels in 51 countries or territories.

HOUSTON (JULY 10) PR NEWSWIRE - Seagull Energy Corp. (NYSE: SGO) today announced its participation in a natural gas and condensate discovery at Ship Shoal Block 105 offshore Louisiana in the Gulf of Mexico.

Seagull said its exploration and production subsidiary holds a 25 percent working interest in the Cockrell No. 2 well, which is in federal waters 35 feet deep approximately 110 miles southwest of New Orleans.

The successful exploratory well encountered five productive zones, one of which was tested. It flowed at a rate of 5.5 million cubic feet of natural gas and 331 barrels of condensate per day through perforations at a depth of 12,822 to 12,844 feet on a 12/64-inch choke with a flowing tubing pressure of 4,979 pounds per square inch.

Cockrell Oil Corp. of Houston is the operator and a 37.5 percent working interest owner in the discovery. Hall Houston Oil Co., also of Houston, holds the remaining 37.5 percent interest.

Development plans for the discovery will be finalized upon completion of a siesmic program.

In addition to its exploration and production activity, Houston-based Seagull is engaged in the transportation, distribution and marketing of natural gas, liquids products and petrochemicals, and natural gas processing.

ANN ARBOR, MI (JULY 10) PR NEWSWIRE - Republic Bancorp Inc. (NASDAQ-NMS: RBNC) today announced increased earnings for the bank holding company for the second quarter and first six months of 1990.

Net income for the second quarter of 1990 was $294,000, an increase of 110

percent over the $140,000 reported for the same period in 1989. These are the highest profits ever recorded in the second quarter for the company. Net income for the first six months of 1990 was $507,000, an increase of 59 percent over the $318,000 reported for the first half of 1989. The increases result from an improvement in net interest income, which was up 18 percent over both the second quarter and first half of 1989. The company's total assets as of the current quarter end were $469 million, vs. $452 million reported one year ago.

Republic Bancorp Inc. is a registered bank holding company with headquarters in Ann Arbor. The company owns seven subsidiaries: Republic Bank, with offices in Flint Township, Grand Blanc and Owosso; Republic Bank Ann Arbor; Republic Bank-Central, with five offices in the Lansing area; Republic Bank-North, with four offices in the Traverse City area; Republic Bank S.E. in Bloomfield Hills and Grosse Pointe Farms; Premier Bancorporation, Inc., with eight offices in the Jackson area; and Republic Bancorp Mortgage Inc. of Farmington Hills, Mich. Republic Bancorp Mortgage Inc. has four offices in Michigan and originates and services residential mortgage loans, primarily within the State of Michigan.

Republic Bancorp Inc. common stock is traded in the over-the-counter market and quoted on the NASDAQ National Market System under the symbol RBNC.

EDISON, NJ (JULY 10) PR NEWSWIRE - Engelhard Corporation (NYSE: EC) said today it will not sell its worldwide gold and silver businesses to Degussa AG as previously announced on March 15, 1990. Instead, the company will move ahead with a plan that includes the sale of certain North American operations and retention of its European operations which produce products based on gold and silver.

"It was our intent to sell a group of businesses to a single buyer," said Orin R. Smith, president and chief executive officer. "However, since we were unable to reach acceptable terms with Degussa, we will continue to operate those gold and silver product and refining businesses that complement our existing worldwide platinum group metal fabrication operations. Our strategy is to capitalize on the opportunities to achieve a decisive competitive advantage in select product lines and geographic markets through cost reduction, more focused marketing and technology development."

Smith noted that the plan is in keeping with the company's current restructuring efforts aimed at improving near- and long-term financial performance and strengthening its competitive position in the global marketplace. The chief executive emphasized that he expects those gold and silver businesses being retained to reach a level of financial performance consistent with the company's goal of attaining a 15 percent return on shareholders' equity.

The chief executive said Engelhard will move quickly to sell its North American electrical contacts, metal joining and jewelry operations in Plainville and Mansfield, Mass., Warwick, R.I., and Aurora, Ontario. Smith added that the cost of selling these operations was provided for in the fourth quarter of 1989. Engelhard will continue to serve the North American market with its electronic and decorative chemicals, platinum group metal products and precious metals refining.

"In Europe, Engelhard is a leading manufacturer of electronic and decorative chemicals and jewelry products, as well as a major refiner of precious metals," Smith said, "and we are now committed to improving that position." "At the same time," he added, "we will continue to grow our platinum group metal products business in Europe and throughout the world."

Engelhard Corporation is a world-leading provider of specialty chemical products, engineered materials and precious metal management services.

DETROIT (JULY 10) PR NEWSWIRE - Franchised dealers of U.S. truck manufacturers sold 391,744 units in June, according to a preliminary report issued today by the Motor Vehicle Manufacturers Association (MVMA).

Retail sales for June ran 0.5 percent behind the 393,726 units sold for the month a year ago.

June sales were at a seasonally adjusted annual rate of 4,302,000, an increase of less than 1 percent from the June 1989 seasonally adjusted rate of 4,270,000.

Sales for the 1990 calendar year were down 2.1 percent from the same six-month period of 1989.

#90191p3081 07/10/1990 ~PR Newswire

CHARLEVOIX, MICH. (JULY 10) PR NEWSWIRE - Consumers Power Company's Big Rock Point nuclear plant has received a new "report card" from the U.S. Nuclear Regulatory Commission (NRC) and it gives the plant good grades, with improvements noted in two areas and no rating decline.

The report card is the NRC's Systematic Assessment of Licensee Performance (SALP) -- a document which rates seven areas of plant regulatory performance over a 16-month period from Jan. 1, 1989, to April 30, 1990.

Three of the seven areas covered in the report received the NRC's highest rating -- category 1 -- indicating, "Licensee management attention and involvement are readily evident and place emphasis on superior performance of nuclear safety or safeguards activities, with the resulting performance substantially exceeding regulatory requirements." The three areas receiving the NRC's top grade were plant operations, emergency preparedness and maintenance-surveillance, which improved from the previous reporting period.

The remaining four areas received category 2 ratings, indicating,

"Licensee management attention to and involvement in the performance of nuclear safety or safeguards activities are good. The licensee has attained a level of performance above that needed to meet regulatory requirements." The areas that received these good grades include safety assessment-quality verification, which was noted to be on an improvement trend, security, engineering-technical support and radiological controls. While the radiological controls rating is unchanged from the previous report card, the NRC noted a decline and said additional management attention is appropriate in this area.

No areas received a category 3 rating, indicating, "Licensee management attention to and involvement in the performance of nuclear safety or safeguards activities are not sufficient."

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

LOS ANGELES (JULY 10) PR NEWSWIRE - Trust Company of the West (TCW) has added two new members to its Latin American Investment Group. Komal S. Sri-Kumar has been named as senior vice president, Economist and Paul Wargnier as vice president, Equity Investments.

Sri-Kumar's career spans more than 15 years of financial management experience. Prior to joining TCW, he was executive vice president of DBL Americas Development Association, L.P. and senior vice president of Drexel Burnham Lambert based in Beverly Hills, Calif.

He previously served as president of Country Risk Consulting Service and vice president of Marine Midland Bank in New York. Sri- Kumar began his career as an economist with Citibank in New York and later worked as a senior international economist for Chase Econometrics.

He holds a Ph.D. degree in international finance from Columbia University and a master of arts degree in economics from Delhi School of Economics. An expert on Latin American financial markets, he has published numerous articles on the subject, appeared on CNN's "Moneyline" and spoken at several conferences sponsored by the Council of the Americans. He will provide economic input to all Latin American activities of TCW and assist with the Mexican Sovereign Bond Fund to be established later this year.

Prior to joining TCW, Wargnier was vice president and director of research

of the D.A. Campell Company. His prior experience also includes merger and acquisition analyses, asset valuation and project profitability studies for Exxon Corp.

He holds a master of business administration in finance from the University of California at Los Angeles and a bachelor of science degree in chemical engineering from the University of California at Davis. He is a member of the Association for Investment Management and Research. Wargnier will oversee TCW's Mexican Equity Securities Fund.

Trust Company of the West, headquartered in Los Angeles, is among the West's largest independent trust companies, with approximately $18 billion currently under management.

#90191p3083 07/10/1990 ~PR Newswire

SAN FRANCISCO, (JULY 10) PR NEWSWIRE - The U.S. Department of Labor today announced its continued crackdown on alleged child labor law violators in California had found children as young as three and four harvesting onions outside Fresno.

Wage and Hour Division investigators said they found four youngsters engaged in the onion harvest in apparent violation of the law including a three-year-old and two four-year-old toddlers placing yellow onions in a bucket after their parents had cut off the tops. A fourth youngster also was part of the 200 workers in the field although he is 12-years-old and should have been in school. Minors must be at least 12-years-old to work in agriculture, but they cannot be employed during school hours.

Investigators cited Guillermina Vesques, operator of G.V. Labor Service of Fresno, for four violations of the child labor regulations and proposed a $1,200 penalty. The parents and farm owner were not cited. The harvest was at an onion farm some seven miles north of Huron on Highway l45.

The youngsters were spotted June 6 during a one-day national strikeforce of Wage and Hour compliance officers who visited employment sites across the nation looking for child labor law abuses. The Labor Department also had spent three days in March in the first child labor strikeforce.

Herb Goldstein, deputy regional administrator of the Wage and Hour Division here who directed the two crackdowns, said "the child labor laws are quite clear on the proper ages for minors to be employed in both agricultural and in mainstream employment."

"We will continue to operate unannounced sweeps of employment sites,

including farms, until we are convinced the unlawful employment of young boys and girls has ceased," Goldstein said.

Goldstein also released a fourth list of results of the strikeforce actions. Today's list shows 238 minors were found working in apparent violation of the law and employers received proposed penalties totaling nearly $75,000. The bulk of the alleged violations was found during the March 12-14 crackdown and were concentrated in the fast food industry and involved working l4- and l5-year-old youngsters more hours that are allowed.

Civil money penalty assessment letters were sent to the following employers. Firms cited can appeal the findings seeking to have them overturned or reduced, or pay the fine assessed.

Alameda: La Val's Pizza, 891 Island Dr., 8 violations, 5 minors, $2,200 penalty.

Berkeley: La Val's Pizza, 1834 Euclid Ave., 2 violations, 2 minors, $300 penalty and La Val's Pizza, 2516 Durant St. 6 violations, 6 minors, $l,600 penalty.

Carmichael: Burger King, 5100 Fair Oaks Blvd., 38 violations, 38 minors, $10,800 penalty; Price Less Drug Stores, Inc., 7223 Fair Oaks Blvd., 11 violations, 6 minors, $1,800 penalty; Round Table Pizza, 5800 Jameson Ct., 2 violations, 1 minor, $960 penalty; and Your Creations, a fabric crafts store, at 6456 Fair Oaks Blvd., 1 violation, 1 minor, $180 penalty.

Citrus Heights: Little Caesars, 6976 Sunrise Blvd., 11 violations, ll minors, $5,760.

Elk Grove: Burger King, 8637 Elk Grove Blvd., 11 violations, 10 minors, $2,280 penalty.

Fair Oaks: Pay N' Pack Home Centers, Inc., 1 violation, 1 minor, $600; Round Table Pizza, 4400 San Juan Ave., 2 violations, 1 minor, $600 penalty; and Your Creations, 8525 Madison Ave., 9 violations, 9 minors, $2,160.

Folsom: Round Table Pizza, 691 E. Bidwell St., 4 violations, 4 minors, $720 penalty.

Fresno: G-V Labor Service, 2244 E. Princeton St., 4 violations, 4 minors, $1,600.

Placerville: CRG Plastering, 1 violation, 1 minor, $420 penalty; and Pizza Factory, 14570 Pleasant Valley Rd., 4 violations, 3 minors, $l,020.

Rancho Cordova: Price Less Drug Stores, Inc., 24 violations, 20 minors, $6,780; and Round Table Pizza, 10375 Folsom Blvd., 3 violations, 3 minors, $540 penalty.

Sacramento: Burger King, 7218 Stockton Blvd., 19 violations, 19 minors, $4,800 penalty; Burger King, 1915 Arden Way, 44 violations, 44 minors, $12,525; Burger King, 4320 Watt Ave. 6 violations, 6 minors, $l,800 penalty; Round Table Pizza, 398 Florin Rd., 2 violations, l minor, $600 penalty; Round Table Pizza, 4403 Elk Horn Blvd., 1 violation, 1 minor, $180 penalty; Round Table Pizza, 9138 Kiefer Blvd., 7 violations, 4 minors $1,980 penalty; Round Table Pizza, 2311 Northgate Blvd., 4 violations, 2 minors, $1,320 penalty; and Round Table Pizza, 3291 Truxel Ave., 2 violations, 1 minor, $600 penalty.

Petaluma: Burger King, 211 N. McDowell, 18 violations, 9 minors, $5,400 penalty.

#90191p3085 07/10/1990 ~PR Newswire

HOUSTON (JULY 10) PR NEWSWIRE - Republic Waste Industries Inc. (NASDAQ: RWIN) announced it has entered into an agreement to acquire Anderson Solid Waste Inc., a California corporation. Anderson Solid Waste operates a class III solid waste landfill located on approximately 1,200 acres in Anderson, Calif. The property currently has approximately 17 million cubic yards of remaining permitted airspace.

The transaction involves a combination of RWI stock and cash being paid to the shareholders of Anderson Solid Waste Inc. Completion of the transaction is subject to the execution of a definitive agreement, completion of due diligence and the approval of the board of directors of Republic.

Republic's president, James D. Lee, stated, "The acquisition of Anderson Solid Waste Inc. is consistent with our growth plans and is an important entry into the Northern California market. We feel that this acquisition fits very well within our strategy to consolidate primary regional companies into a strong national solid waste management company."

Since the beginning of 1990, Republic has acquired seven regional companies located in Texas, Michigan, Ohio and Oregon. Included in these acquisitions are six permitted sanitary landfills. Republic has recently announced an agreement in principle to acquire G.I. Industries Inc., a significant rubbish collection company located in Southern California.

Republic Waste Industries Inc. is a waste management company specializing in the collection, processing and disposal of solid waste. The company's common stock is traded over-the-counter under the NASDAQ symbol RWIN.

SAN DIEGO (JULY 10) PR NEWSWIRE - Humphrey Inc. (NASDAQ: HUPH), announced today it has received a contract from Beech Aircraft Corp., Wichita, Kan., amounting to approximately $410,000, for free gyroscopes. Deliveries are scheduled to start in January 1991 and be completed in the second quarter 1991.

The gyroscopes are for the AQM-37, a high-altitude (100,000 feet), high-speed (Mach 4), target drone. Two Humphrey gyros per missile are used for the guidance and control system. This is the second contract award for this gyro, following one for more than half a million dollars completed in 1989.

Beech Aircraft Corp. is a subsidiary of Raytheon Co. (NYSE: RTN). Humphrey Inc. is a leading supplier of gyroscopes and electromechanical devices to the aerospace and defense industries with sales and representation worldwide.

PROVIDENCE, R.I. (JULY 10) PR NEWSWIRE - Textron, (NYSE: TXT) announced that it has split off HR Textron's filter and filtration systems business into a separate division called Textron Filtration Systems Inc.

B.F. Dolan, Textron's chairman and chief executive officer, said the change is designed to more accurately reflect Textron's growing importance in advanced filtration products for aerospace and industrial markets. "The creation of Textron Filtration Systems will also stimulate growth within both divisions by increasing managements' focus on specific markets " he said.

He said Richard J. Millman will continue as president of HR Textron Inc., headquartered in Valencia, Calif. Jan O. Johnson, vice president and general manager of filter operations of HR Textron, has been named president of Textron Filtration Systems Inc., which is based in Newbury Park, Calif.

HR Textron has substantially strenghtened its efforts in the high-technology filtration field in recent years. It acquired Purolator Technologies Inc. in 1984 and the hydraulic filter products business of CanFlo Corporation in 1985.

HR Textron is an industry leader in high-technology aerospace controls, including flight control actuators, servovalves, fuel system controls and automatic test equipment.

Textron is a multi-industry company with operations focused in three business sectors -- Aerospace Technology, Commercial Products and Financial Services.

WASHINGTON (JULY 10) PR NEWSWIRE - The Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) today reported net income for the 1990 second quarter of $74 million, up 18 percent over net income of $62.5 million for the 1989 second quarter and 4 percent over net income of $71 million in the 1990 first quarter.

Earnings per common share were 72 cents for the 1990 second quarter, up 16 percent from 62 cents in the 1989 second quarter and 4 percent from 69 cents in the 1990 first quarter.

Net income for the six months ended June 30, 1990, was $145.1 million, or $1.41 per common share, compared to net income of $123.7 million, or $1.22 per common share, for the first six months of 1989.

"Sallie Mae's strong earnings performance in the second quarter continues to reflect the steady growth of our student loan assets," said Edward A. Fox, president and chief executive officer of Sallie Mae. Fox also noted that Sallie Mae has been able to fund its 1990 student loan purchases at attractive spreads.

At June 30, 1990, total assets were $39.3 billion, up 27 percent over June 30, 1989, and 6 percent over March 31, 1990. Student loan purchases for the 1990 second quarter totaled $1.2 billion, compared to $1.1 billion in

the 1989 second quarter and $1.4 billion in the 1990 first quarter. Total student loans owned at the quarter's close were $17.3 billion, up 21 percent from June 30, 1989, and up 3 percent from March 31, 1990. Warehousing advances outstanding at the quarter's close were $9.7 billion, up 28 percent from June 30, 1989, and 7 percent from March 31, 1990. At the quarter's end, forward commitments outstanding, the pipeline for future asset growth, were $12.2 billion, including $10.2 billion for the purchase of student loans.

During the quarter, Sallie Mae borrowed $1.9 billion in the capital markets. Most of Sallie Mae's loan assets are tied to the 91-day Treasury bill auction rate, so the corporation ties the cost of most of its liabilities to the T-bill as well. To expand the market for its T-bill-related liabilities -- and taking advantage of recent favorable spreads to the T-bill in international markets -- Sallie Mae in June extended its offering of six-month Short Term Floating Rate notes to the Eurodollar market, as well as the domestic market.

During the quarter, Sallie Mae repurchased approximately 220,000 shares of its common stock.

Sallie Mae, a federally chartered, stockholder-owned corporation, is the major financial intermediary serving the education finance market. By buying insured student loans and providing other financial services to financial and educational institutions, Sallie Mae replenishes local supplies of student credit. The corporation owns nearly 30 percent of all guaranteed student loans outstanding today.

NEW HYDE PARK, N.Y. (JULY 10) PR NEWSWIRE - Uniforce Temporary Personnel, Inc. (NASDAQ: UNFR), has converted to the Uniforce system five independent temporary personnel services operations, it was announced today by John Fanning, president of Uniforce Temporary Personnel, Inc.

The involved companies are: VIP Personnel Services in Raleigh and Garner N.C.; Tri-Star Corporate Temporaries in Durham, N.C.; AWA Temporary Services, Inc., in Hayward, Calif.; Aim Support Services, Inc., in Washington, D.C.; and Metropolitan Top 'N Temps in Syracuse, N.Y.

Combined annual volume for the five offices reached $5 million in 1989. These offices provide skilled temporary personnel in all office job categories.

Fanning stated, "These five acquisitions reflect our strong pursuit of converting independent temporary services into the Uniforce franchise system. These new acquisitions, coupled with our strong support for our existing national franchise network, help continue to shape our aggressive expansion strategy for the remainder of 1990."

Uniforce Temporary Personnel, Inc., is the parent company of Uniforce Temporary Services, a national network of 110 predominantly licensed offices providing temporary personnel for the general and automated office light industrial, marketing, accounting and technical service categories.

NEW YORK (JULY 10) PR NEWSWIRE - By combining two radically different approaches to diamond-making, GE scientists have grown unique gem-quality crystals with unexpected and previously unattainable physical properties - including the ability to function as by far the world's best conductors of heat.

At a press conference here this morning, scientists from the GE Research and Development Center in Schenectady, N.Y., displayed a collection of their unique gem-quality crystals-the first diamonds to be comprised almost totally of the isotope Carbon-12.

At room temperature, these "isotopically-pure" crystals can conduct heat up to 50 percent more efficiently than natural diamond-the material that, until now, has reigned as the unchallenged heat-transmission champion. Compared with copper, the crystals are 850 percent more efficient at carrying away heat. In addition, they are 1,000 percent more resistant than natural mined diamond to damage from high-power lasers.

At the press conference, GE Superabrasives, headquartered in Worthington, Ohio, announced plans to manufacture and market this isotopically pure diamond initially to manufacturers involved with three of the nation's most important technologies: electronics, lasers, and communications. All three technologies face a need to carry off large amounts of unwanted and potentially destructive heat.

Potential size of the market for GE's new diamond crystals, which range up to one carat in weight, is estimated at between $50 million to $100 million annually. GE has been the world leader in diamond technology since its scientists announced in 1955 the laboratory creation of nature's hardest material.

Dr. Walter L. Robb, GE senior vice president for corporate research and development, said today: "The secret to the unparalleled heat- transfer performance of these unique crystals is that they contain almost none of the Carbon-13 isotope that subtracts from natural diamond's heat-transfer properties."

Diamonds consist basically of two isotopes of carbon, Carbon-12 and Carbon-13, the GE research director explained. The Carbon-13 is an impurity that slows heat transmission, even though it occurs in only small amounts in natural crystals. The best natural diamond heat conductors are comprised of 99 percent Carbon-12. In GE's special crystals, by contrast, the Carbon-12 concentration exceeds 99.9 percent.

#90191p3101 07/10/1990 ~PR Newswire

BRISTOL, VA. (JULY 10) PR NEWSWIRE - Charter Federal (NASDAQ: CHFD) today announced that it has discovered an embezzlement scheme involving one or more former employees.

Charter Federal is presently investigating to determine the full extent of the embezzlement and has referred the matter to the F.B.I. for possible criminal prosecution.

The scheme involved the misappropriation of funds solely at the Jefferson

Street Branch of Charter Federal in Roanoke, Virginia.

As the investigation now stands, it appears that at least $1.2 million has been embezzled. The scheme apparently involved the diversion of funds deposited over time by a small number of customers, principally in certificates of deposit.

E.L. Byington, Jr., the Chairman of the Board and Chief Executive Officer of Charter Federal, assured all of its depositors that their funds were secure and that the embezzlement would not affect Charter Federal's repayment of deposits to the customers whose accounts have been tampered with in the course of the scheme. Mr. Byington said, "the Board of Directors and officers of Charter Federal want to emphasize that this unfortunate situation will have no effect on Charter Federal's commitment to its depositors to honor all legitimate deposits as we have always done. Our employees will investigate any account discrepancies to assure that our depositors receive all funds to which they are entitled."

Charter Federal will also institute civil litigation to attempt to recover its losses from the prepetrator or perpetrators of the scheme. In addition claims for the losses will be filed with Charter Federal's insurers, although litigation over the insurer's responsibility is anticipated. There was a change in Charter Federal's fidelity bond company within the last year, and both its previous and current bonding companies have declined to accept coverage for the losses. Mr. Byington commented, however, that, "Any denial of bonding coverage will be vigorously resisted and Charter Federal will pursue every reasonable avenue to minimize its losses as a result of this embezzlement. We have retained counsel to pursue our legal remedies. We will aggressively protect the interests of our shareholders just as we are doing for the interests of our depositors."

Charter Federal, which began operation in 1920, is a federally-chartered stock Savings Bank headquartered in Bristol, Virginia, with 34 branch offices throughout Southwest and Southside Virginia and East Tennessee.

BLUE BELL, PA (JULY 10) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) said today that Edward A. Blechschmidt has been appointed president of its Pacific Asia Americas Division (PAAD), responsible for marketing, sales, training and service for 19 subsidiaries and distributors in 18 countries, and for joint ventures in Japan, India, and Thailand.

As vice president, Japan Operations, and president, Unisys Japan Limited, Blechschmidt has been responsible for all Unisys interests in Japan and has served as the corporation's primary interface to its Japanese joint venture since January 1988. He will continue to serve on the board of directors of both Nihon Unisys Limited, the Unisys joint venture with Mitsui & Company Ltd., and of Oki Unisys Limited, a Unisys manufacturing joint venture company. Blechschmidt will continue to report to Unisys executive vice president Reto Braun who had been PAAD president and was recently given additional responsibilities including U.S. computer marketing and sales and Unisys Corporate Marketing.

PAAD encompasses more than 30 countries, including Japan and Pacific Rim markets, Central and South America, Mexico and Canada. The division accounted for more than $2 billion in consolidated revenue to Unisys last year and employs approximately 7,500 people.

Blechschmidt, 37, joined the corporation in 1975. He has been president, Memorex Media Products Group; president, Burroughs Business Forms Division; executive assistant to the president and secretary to the corporation's Management Committee.

Blechschmidt holds a bachelor's degree in Business from Arizona State University and a MBA from San Diego State University.

NEW YORK (JULY 11) PR NEWSWIRE - The trustees of Mellon Participating Mortgage Trust, Commercial Properties Series 85/10 (NASDAQ: MPMTS), today announced a second quarter dividend of 17 cents per share for the quarter ended June 30, 1990.

The dividend is payable Aug. 10, 1990, to shareholders of record at the close of business July 31, 1990.

As of June 30, 1990, approximately 97 percent of the net proceeds of the trust were invested in seven permanent real estate investments, secured by 47 properties located in 19 states. Five of the seven investments representing 83.5 percent of the portfolio assets are current and performing as expected. One investment, Peachtree Business Center in Atlanta, representing approximately 3 percent of total assets, was converted to equity ownership through a deed-in-lieu foreclosure in April 1990. Legal action involving the Hall Street Industrial Complex project, representing approximately 13.5 percent of total assets, continues and the trust is seeking a successful resolution to the situation.

Mellon Participating Mortgage Trust, Commercial Properties Series 85/10, is a finite-life real estate investment trust, which invests in participating, shared appreciation, convertible and fixed-rate mortgages and joint venture financing secured by office, retail and research development facilities located throughout the United States.

STERLING, VA (JULY 10) PR NEWSWIRE - Star Technologies, Inc. (NASDAQ: STRRC) today announced that its stock symbol will be restored to STRR on the National Association of Securities Dealers' Automated Quotations System (NASDAQ), effective July 11, 1990.

Star's stock has been listed as STRRC since May 18, 1990 as a result of a temporary exception from the capital and surplus requirement granted by the National Association of Securities Dealers (NASD). Star will continue to trade under the exception until the Company files its Quarterly Report on Form 10-Q with the Securities and Exchange Commission and the NASD for the three months ended June 30, 1990. However, the NASD has agreed to restore Star's trading symbol in advance of the filing date with the expectation that Star will exceed the NASD's capital requirement as a result of the recently completed recapitalization.

The recapitalization, announced June 6, 1990, consisted of a private preferred stock placement of $14.75 million with three major investors, including GE Capital Corp. This enabled the company to retire its $11 million subordinated debt and has provided additional working capital. With this additional equity Star significantly exceeds NASDAQ's capital and surplus requirement.

"The recapitalization significantly strengthens Star's financial condition " said Robert C. Compton, Star's president and chief executive officer. "Not only does it enable Star to substantially improve its capital structure through reduced debt, but it also provides us with the capital necessary to bring new products to market."

Star Technologies, Inc. is a leading manufacturer of high- performance computing products, including compute servers, array processors and real-time image generators. Star products offer clear price/performance advantages over supercomputers and standalone graphics workstations for many high-performance applications in signal and image processing, simulation and training, computational chemistry, advanced scientific research and design automation. Star is headquartered at 515 Shaw Road, Sterling, Va., 22170.

#90191p3114 07/10/1990 ~PR Newswire

SAN FRANCISCO (JULY 10) PR NEWSWIRE - Levi Strauss Associates Inc., the privately-held parent company of Levi Strauss & Co., today reported strong second quarter sales, compared to the second quarter 1989, as a result of higher overall unit sales and higher average unit selling prices, led largely by its international business.

For the second quarter ending May 27, 1990, net sales were $1.0 billion, reflecting a 14 percent increase over the $879.4 million reported for the same period a year earlier. Year-to-date net sales also increased 14 percent to $1.9 billion, up from $1.6 billion reported for the first six months of 1989.

Second quarter net income decreased 2 percent to $56.5 million versus $57.7 million for the second quarter of 1989, due principally to an extraordinary loss, net of tax, of approximately $7.6 million arising from the early retirement of debt. Excluding the extraordinary loss, net income in the current quarter would have been 11 percent over 1989 second quarter results. Net income for the first six months rose to $101.9 million compared to $93.9 million a year earlier.

Despite the increase in sales, second quarter operating income increased only slightly to $158.7 million, up from $156.4 million in the second quarter 1989 reflecting higher advertising and administrative costs, both domestically and internationally, and increased domestic inventory markdowns. Year-to-date operating income increased 10 percent to $296.4 million versus $269.6 million reported in the comparable 1989 period.

The company attributed its overall strong sales to the increased market demand for its Dockers(R) family of products, as well as the overall market demand for its basic denim jeans.

The company said it has repurchased, so far this year, $104.0 million of its subordinated notes and replaced the notes with bank borrowings at a more favorable interest rate.

Levi Strauss & Co. is the world's largest brand-name apparel manufacturer. The company designs, manufactures and markets jeans and casual apparel for men, women and children, including slacks, shirts, jackets and skirts. It employs more than 31,000 people worldwide.

GREENVILLE, S.C. (JULY 10) PR NEWSWIRE - Mack I. Whittle, Jr., President of Carolina First Corporation (NASDAQ: CAFC), announced today that the company's second quarter 1990 profits were 20 percent higher than the earnings in the second quarter of 1989. He stated that net income for the quarter had been $305,000 or $.18 per share, compared to the $254,000 or $.15 per share earned in the same period last year. For the six months, earnings were $548,000 or $.32 per share compared to $496,000 or $.29 per share in 1989. Assets at June 30, 1990 were $210,651,000, an increase of 27 percent from the 1989 level of $165,783,000. During the past twelve months Carolina First's deposits have grown 30 percent to stand at $190,513,000 at the end of the second quarter of 1990.

Loans at June 30, 1990 were $149,811,000, up over $44 million or 42 percent from the June 30, 1989 level of $105,344,000. Growth in consumer loans has been especially strong, increasing over ten million dollars in the past twelve months to stand at $14,733,000 as of the end of June. President Whittle went on to state, "While we are pleased with this increase in loans, it has not been done by sacrificing quality. The Bank's non-accruing loans and loans greater than 30-days past due constituted less than .40 percent of total loans at the end of the quarter."

Mr. Whittle went on to state that other areas of the Bank are performing well with both the branch at Litchfield and the Trust Division operating profitably. Assets under management in the Trust Division were almost $30 million at the end of the quarter, while deposits at the Litchfield Branch were over $15 million.

Mr. Whittle said, "The merger with First Federal of Georgetown is on schedule for completion in mid-August. After the merger, Carolina First will be a $330 million financial institution with strong market share and expansion potential in two of the fastest growing areas of the state. In addition, the combined companies will have a financially sound capital structure that will allow us to utilize opportunities for expansion into other growth markets."

Carolina First Corporation is the parent of Carolina First Bank, a state-chartered bank, headquartered in Greenville. The Bank is a full-service, community-oriented bank offering a broad range of commercial

and consumer banking services emphasizing personalized attention to customers. It operates four offices in Greenville and one in Litchfield. The Bank opened for business in December, 1986 following an October initial public offering of stock. Through this offering, $15 million in capital was raised, earning Carolina First the distinction of being the largest bank created in South Carolina.

#90191p3130 07/10/1990 ~PR Newswire

KENILWORTH, NJ (JULY 10) PR NEWSWIRE - Schering-Plough HealthCare Products, Inc. has announced that Schering-Plough's leading antifungal prescription medication, clotrimazole 1 percent, will be made available direct to consumers beginning this July for athlete's foot indications.

The nonprescription product, called LOTRIMIN(R) AF, marks the biggest over-the-counter conversion in the company's history.

Nonprescription LOTRIMIN AF is for the self-treatment of common fungal infections -- athlete's foot, jock itch and ringworm. The product's unique ingredient is clotrimazole, the broad-spectrum antifungal agent proven to work against the most common fungal pathogens causing athlete's foot.

Available in cream and liquid forms, LOTRIMIN AF will compete in the $136 million U.S. antifungal medication market. Trade shipments began in May; the product will be available to consumers beginning this month at drugstores, pharmacies and food stores nationwide.

Introduced to physicians and patients in 1975, LOTRIMIN is the leading single ingredient antifungal medication prescribed by doctors, with more than 33 million prescriptions written for the brand since its introduction. It ranked among the 80 most prescribed drugs in the United States in 1988, according to Medical Advertising News. LOTRIMIN will remain available by prescription for other indications.

The nonprescription antifungal segment has been growing at a rate of 10 percent over the last four years. In 1989, total sales for this segment reached $136 million.

The category's growth is attributed to an increased involvement in fitness activities among Americans over the last decade, a trend that has exposed more people to the most common fungal infection -- athlete's foot.

Marketing support for LOTRIMIN AF began in late June. Print and

television advertising, couponing and point-of-purchase promotions will be used for consumers. Professional support will include advertising in professional journals, as well as direct-mail, sampling and detailing programs.

LOTRIMIN AF is the fifth brand to be made available directly to consumers by Schering-Plough. It joins Afrin(R) (a nasal decongestant introduced in 1976), Chlor-Trimeton(R), (an antihistamine product introduced in 1976), Drixoral(R) (a combination cold product made available in 1982) and Tinactin(R) (currently the leading nonprescription antifungal medication, made available in 1971).

Schering-Plough Corporation (NYSE: SGP) is a worldwide, research-based pharmaceutical company. It was formed in 1971 with the merger of Schering Corporation, an international, research-based pharmaceutical manufacturer, and Plough, Inc., a major consumer products company. Schering-Plough today has more than 23,500 employees in 135 companies worldwide. Its pharmaceutical headquarters are located in Kenilworth, N.J., while the consumer division, Schering-Plough HealthCare Products, Inc., is headquartered in Liberty Corner, N.J.

COLUMBUS, GA. (JULY 10) PR NEWSWIRE - Synovus Financial Corp. (NYSE: SNV) the $2.8 billion asset Columbus, Ga.-based multi-financial services company, today announced record second quarter earnings for 1990 of $8,566,000, up 14.9 percent over net income of $7,455,000 for the second quarter of 1989.

On a per share basis, net income amounted to $.26, up 13.0 percent over net income per share of $.23 for the second quarter of 1989.

For the first six months of 1990, net income was $16,915,000, up 13.9 percent over the $14,857,000 earned during the same period of 1989. Net income per share amounted to $.50 compared to $.45, up 11.1 percent.

Commenting on the company's performance, James H. Blanchard, chairman of the board of Synovus Financial Corp., stated: "We are pleased with our record earnings performance in the first six months of 1990. Continued improvements in fundamental earnings and the strength of our balance sheet promise an excellent year and a very favorable comparison with the top performers in our industry."

Synovus Financial Corp. is a multi-financial services company composed of 20 banks, Total System Services Inc., a bankcard data processing company, and Synovus Securities Inc., a full service brokerage firm.

Synovus Financial Corp. stock is traded on the New York Stock Exchange under the symbol "SNV." Synovus owns approximately 82 percent of Total System Services Inc., whose shares of common stock are traded on the New York Stock Exchange under the symbol "TSS."

LOS ANGELES (JULY 10) PR NEWSWIRE - Mercury Air Group Inc. (AMEX: MAX) today announced its acquisition of the fueling contract for the U.S. Naval Air Facility in Washington D.C. The Los Angeles- based air services company reported that the 16-month contract for fueling equipment and manpower will begin July 16, 1990.

The Naval Air Facility is one of 15 U.S. Government sites operated by Maytag Aviation Corp., a wholly owned Mercury Air subsidiary based in Colorado Springs with aggregate government contracts of about $8 million per year.

"The acquisition of this contract and additional expansion of our air fuel operations is part of a growth plan for all Mercury Air divisions, including cargo handling and fixed-base operations. We expect to report new Mercury Air operations in key U.S. cities and other sites over the next few months," said Seymour Kahn, the company's chairman of the board.

Mercury Air Group Inc. provides refueling, cargo handling, and ground support for commercial, military and general aviation aircraft. These services are handled through the company's main operations at Los Angeles International Airport, five fixed-base operations in Nevada and California and 15 U.S. military bases in America and abroad.

PHILADELPHIA (JULY 10) PR NEWSWIRE - Maritrans Operating Partners L.P., operator of the nation's largest independent marine transportation fleet transporting petroleum, has restructured its internal operations management, announced Craig N. Johnson, president and chief operating officer, and James H. Sanborn, executive vice president-operations.

"Safety is a two-step process," explained Sanborn. "The first step is to ensure that our internal organization reflects management's commitment to environmental focus, safety consciousness and excellence in daily operations. The second is to strengthen participation and commitment from our seagoing crews, whose ultimate accountability it is to operate our fleet safely and responsibly 365 days a year. We believe this restructuring will leave us in a better position for even greater environmental responsibility in the decade of the 90s and beyond."

Johnson added, "I am particularly enthusiastic about this reorganization. We know Maritrans is a leader in our industry, but we cannot assume our lead can be maintained without continued effort, nor can we be satisfied with our current excellent level of performance. There is a tremendous amount of talent in this organization which we will tap, challenge and

develop to meet opportunities."

Two new positions have been created and three departments have been reorganized as part of Maritrans' commitment to safety and environmental preservation.

Howard B. Hile has been named vice president-operations, contingency management and environmental officer. Hile has been with the company since 1977, with his most recent role being assistant vice president- marketing. In this new role, he will lead oil spill contingency planning, including media relations, and customer and governmental relations.

Appointed to the new position of vice president-operations and safety officer is David C. Buchanan. Buchanan has been employed by Maritrans and its predecessors for the past 38 years. In his new assignment, he will head up the crucial functions of safety, training and professional development, in addition to directing Maritrans' vessel operations audit and corrective action programs.

Royal D. Joslin has been named senior vice president-operations, and assumes responsibility for the daily operations of all Maritrans' vessels. Joslin joined the firm in 1979 and served most recently as vice president-eastern operations. Joslin's Gulf Coast management team -- headquartered in Tampa, Fla. -- includes George L. Grunthaner, vice president-southern operations; Sal Litrico, operations manager; and James A. Kuly, maintenance manager. The East Coast management team -- based at Maritrans' Eastern Fleet Center in Philadelphia -- includes Jeffrey E. Parker, operations manager and Johnnie B. Padgett, logistics manager.

Responsibility for major engineering and maintenance work has been centralized. A.M. "Marty" Martinson has been promoted to vice president-engineering services, and is supported by major projects manager, Eugene R. Russel; engineering manager, E. Carl Dittrich and principal naval architect John Van Buskirk.

John J. Burns Jr. has been named director of marine personnel and is assigned the challenge of hiring and training the highest quality new employees for seagoing positions. Working with him is Jeffrey King, manager-East Coast personnel; Bruce A. Austin, manager-Gulf Coast personnel, and Nicholas Grassia, manager of training and employment.

Maritrans Partners L.P. (NYSE: TUG) is a master limited partnership formed in 1987 to purchase and operate, through Maritrans Operating Partners L.P. a fleet of tugboats and oceangoing tank barges along the U.S. Gulf and Atlantic coasts.

#90191p3147 07/10/1990 ~PR Newswire

NEW YORK, (JULY 10) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) has proposed $61,000 in penalties against two New Jersey firms for failing to file Toxic Chemical Release Inventory reports under Section 313 of the Emergency Planning and Community Right-to-Know Act. The EPA is proposing a penalty of $51,000 against Nabisco Brands Inc., Grocery Division, of Pennsauken, N.J., and a $10,000 penalty against Colonial Chemical Company of Tabernacle, N.J. The penalties are included in administrative complaints issued by the EPA.

"The Toxic Release Inventory is being used by citizens and groups to learn more about the chemicals in their community," said EPA Regional Administrator Constantine Sidamon-Eristoff. "EPA is also using the information in its enforcement program. The failure of these facilities to report their emissions violates the intent of the act and undermines EPA's ability to use this data."

Under Section 313, facilities with 10 or more employees that manufacture, process or use more than "threshold" amounts of certain chemicals were required to report their chemical emissions into the environment during 1987 and 1988 to the EPA and their states by July 1 of the following year. The deadline for reporting chemical emissions into the environment during 1989 was July 1, 1990.

During an EPA inspection of the Nabisco facility, the EPA determined that the firm did not file the required forms for calendar year 1987 for ammonia and for calendar years 1987 ad 1988 for sodium, hydroxide.

An EPA inspection of the Colonial Chemical Company in Tabernacle found that the firm did not file the required forms for calendar years 1987 and 1988 for sulfuric acid.

Since the inception of the act, EPA Region 2 has issued complaints to 51 companies and proposed more than $1.6 million in penalties.

The Emergency Planning and Community Right-to-Know Act, also known as Title III, was passed in 1986 as part of the Superfund Amendments and Reauthorization Act (SARA). The law encourages and supports emergency planning for responding to chemical accidents and provides local governments and the public with information about chemicals in their community.

TAMPA, FLA. (JULY 10) PR NEWSWIRE - Southnet Corp. announced today that it has signed an agreement with Metro Communications LTD. of London, England, to be the primary distributor of its newly unveiled "World Card" international long-distance calling product.

"'The World Card' is a revolutionary answer to the need for calling card services designed for the international business traveler who resides outside the United States," stated Robert J. Zradicka, chairman and C.E.O. of Southnet. "In the United States, we are accustomed to low calling card rates, itemized detail of calls, and high quality phone connections. But for those who reside outside the United States, these have been unavailable until now. Southnet's 'World Card' is the answer to the needs of all travelers. It provides a universal dialing plan, low calling rates,

worldwide connectivity and state-of-the-art quality and speed. The initial product offering allows access from the United Kingdom, France, Italy, Greece, Switzerland, Denmark, Sweden, Singapore, Hong Kong, Japan, Belgium, Netherlands, Israel and Australia as well as the United States. Callers may place a call to any worldwide destination point. Southnet will handle the call in the language of the originator and bill the call in the currency of the origination's country. They will receive a monthly itemized statement of every call including originator, destination time and date, duration and cost."

Southnet has been undergoing a test of the new "World Card" product since April of this year. "Our results," said Zradicka, "is that, on average, we see two calls per month per distributed card. Our goal is to distribute 500,000 cards within the next 12 months." On international calls, Southnet is able to gross $24 per call average revenues with $7.20 profit per call. According to Zradicka: "We believe that the international sector is worth more to Southnet than all the business we have done to date. We are already working hard to backfill the current orders of cards applied for through the Metro Communications marketing effort. Southnet has ended its phase of being a 'me-too' telephone company. 'World Card' is our initial offering of Southnet, the 'follow-me' worldwide long distance carrier. In the near future we will be announcing additional enhancements to our product including advanced business service and elite status memberships."

Southnet Corp. is headquartered in Tampa, Fla., and is publicly traded on the Philadelphia Stock Exchange under the symbol SN. For additional information call Southnet World Headquarters at 800-277-0055.

WASHINGTON (JULY 10) PR NEWSWIRE - Communications Workers of America Vice President James Irvine today denounced AT&T's (NYSE: T) plans to lay, off some 2,500 workers at its Network Services Division.

He charged that "once again the company is kneeling at the alter of technology and profits" at the expense of its customers and workers.

"It's time to take the word 'service' out of AT&T's Network Services Division," Irvine suggested. "Service is what separates AT&T from its competitors. If the company is going to continue to decimate its front-line workforce, the quality of service to its customers will continue to suffer."

The Network Services Division handles all of AT&T's switching. Currently, if a customer has a problem they would talk to an AT&T employee in their own geographic area. With these layoffs (as a result of changes in technology) customers may now be dealing with AT&T representatives thousands of miles away.

"We welcome technological change -- when it benefits customers and workers " Irvine said. "But this is a case of changing technology with no direct benefit to the customers. That is repulsive. It is dead wrong.

Since the break-up of the old Bell System in 1984, AT&T has eliminated more than 100,000 front-line jobs, while the ranks of its managers have continued to swell.

"Our members are the ones who stand behind the AT&T network. We are the ones who do the work that makes AT&T go. We are the ones who have made AT&T not only competitive in the new telecommunications environment -- we have made the company excel," he said. "But the simple fact is that AT&T's workers nationwide are demoralized by wave after wave of layoffs. There isn't a worker in this company who feels secure in his or her job. People cannot be expected to work that way. Customers are paying the price."

CWA, the nation's largest telecommunications union, represents 135,000 AT&T employees.

MIAMI (JULY 10) PR NEWSWIRE - Eastern Airlines said it had a 61.41 percent passenger load factor in June and 61.59 percent for the first six months of the year.

The airline flew 1.44 billion revenue passenger miles last month, compared with 252.47 million in strike-affected June 1989 when operations were sharply curtailed.

Available seat miles, or capacity, in June were 2.35 billion. The comparable year-earlier figure was 407.5 million because of the virtual grounding of the airline when three unions struck on March 4, 1989.

For the January-June period, Eastern flew 9.08 billion revenue passenger miles, against 4.96 billion for the same six months of 1989. This, too, reflects the strike's impact.

Capacity was 14.75 billion available seat miles, up from the prior year's 8.49 billion.

Passenger boardings in June were 1.8 million, sharply higher than the 263,000 a year ago. For the first half, Eastern carried 11.3 million passengers, compared with 5.9 million in January-June 1989.

The 61.41 percent June load factor compared with 61.95 percent in June 1989 when there was a much smaller traffic and operations base. The latest six-month load factor of 61.59 percent compared with 58.46 percent through the first half last year.

CHERRY HILL, N.J. (JULY 10) PR NEWSWIRE - SAI Group Inc. (OTC) announced today that its board of directors had accepted an offer from Proteq Verzekeringe Beheer N.V., a Dutch insurance company, to acquire all of the outstanding shares of the company for $.0625 (six and one quarter cents) per share and merge the company into a wholly owned subsidiary of Proteq.

Proteq is an affiliate of Hooge Huys Verzekeringen N.V., the beneficial owner, directly and through its ownership of SAI's Series A Convertible Note, of a 13 percent interest in the company. The company said that the board of directors, in considering the offer, had received a letter from its investment banking firm, Howard, Lawson & Co., to the effect that the price was fair from a financial point of view.

The board of directors also fixed Sept. 13, 1990, as the date of a special meeting of shareholders to vote on the proposed merger and Aug. 3, 1990, as the date for determining shareholders entitled to vote at the meeting.

SAI Group is an insurance direct marketing organization operating in its own name in the United States and as a consultant to insurance companies primarily in other countries in Western Europe.

AUGUSTA, GA (JULY 10) PR NEWSWIRE - Merry Land & Investment Co. Inc. (MERRY LAND) (NASDAQ: MERY) has purchased Sommerset Place Apartments, a 144-unit apartment community in Raleigh, N.C., for $4.6 million.

Peter S. Knox III, chairman of the board of Merry Land, reported that the company closed the purchase on June 29. The seller, a life insurance company, provided financing for five years at 9 percent interest. Sommerset Place is located on Six Forks Road in the fast growing northwest quadrant of Raleigh.

Knox said he was very pleased that Merry Land continues to find attractive properties for sale at reasonable prices, and hopes to make further acquisitions during 1990. Since October of 1989, Merry Land has bought five apartment communities containing 1,014 rental units at a cost of $34.0 million. The company now owns 2,482 apartment units, with a total cost of $83.4 million, located in Raleigh, High Point, and Charlotte, N.C.; Augusta and Savannah, Ga.; and Charleston, S.C. Knox said that at June 30, the company's overall apartment occupancy was 97 percent.

Merry Land is a Real Estate Investment Trust which invests in real estate and marketable securities. The company is headquartered in Augusta, Ga. Its stock is traded in the over-the-counter market under the symbol MERY.

PEAPACK, NJ (JULY 10) PR NEWSWIRE - Fedders Corporation (NYSE: FJQ) today announced it plans to acquire Emerson Quiet Kool, the room air conditioner division of the Jepson Corporation, which is a subsidiary of Great American Management and Investment, Inc. (NASDAQ: GAMI).

The acquisition is subject to certain regulatory approvals. Details were not disclosed.

Fedders Chief Executive Officer Sal Giordano, Jr. said the acquisition will enable the company to "compete more effectively in the global market for room air conditioners." He also noted that the acquisition will have "no significant effect on Fedders' 1990 sales" since the transaction is expected to be completed later this summer, after manufacturers have shipped most room air conditioners for the 1990 selling season.

Fedders will acquire the EMERSON QUIET KOOL brand name in the transaction. Emerson operates two plants, which are located in Woodbridge and Dover, N.J. The two facilities produce room air conditioners, dehumidifiers and recreational-vehicle air conditioners. Emerson's 1989 sales of the three product lines approximated $120 million.

Fedders currently produces room air conditioners in Effingham, Ill.; Columbia, Tenn.; and Orangeville, Ont. The company also manufactures air conditioning compressors in Frederick, Md. Fedders Corporation is headquartered in Peapack. The company's other U.S. operations include its international headquarters, located in New York City, and Latin America headquarters, based in Miami.

SACRAMENTO, CA (JULY 10) PR NEWSWIRE - McLaren Environmental Engineering Corporation, headquartered in Sacramento, has entered into a merger agreement with New York-based Hart Environmental Management Corporation, creating a new top 10 national firm in environmental engineering and management.

The new firm, McLaren/Hart, will be headed by Frederick R. McLaren, chief executive officer and president. Fred C. Hart, founder of Hart Environmental Management, has been named executive vice president of the new firm. Both firms provide environmental engineering and design services that range from environmental management studies to design of pollution control facilities.

"McLaren's principal strength is in the West, and Hart's is in the Northeast and Midwest," said Hart. "Our clients today are increasingly looking for high-quality technical and management support in all aspects of their business that are affected by environmental, health and safety regulations. They want a firm with nationwide coverage and a solid track record and reputation. From that vantage point, we couldn't hope for a better fit."

Both firms were founded during the mid-1970s and are roughly the same size yet developed serving different industrial sectors and different geographic markets. The new firm will be organized into three regions -- East, Central and West -- through integration of the McLaren and Hart offices, and will have 650 professionals located in 17 primary offices nationwide.

"This merger will allow us to expand and diversify our services to our clients on a national scale," said McLaren. "We intend to continue our strategic plan, which focuses on providing consulting services primarily to industrial and commercial clients in the private sector."

Hart, with 10 full-service operating offices, principally in the East and Midwest, specializes in environmental management studies, environmental audits, site characterization investigations, landfill siting and engineering design of pollution control facilities.

McLaren also provides environmental engineering and design services and specializes in remedial planning, analytical laboratory services, design and construction management services for groundwater and soil cleanup and bioremediation projects.

It has seven operating offices primarily in the West and Midwest. McLaren is also known for its ChemRisk Division's expertise in health risk assessment and toxicology services.

Sandoz Corporation, the parent company of McLaren/Hart is the U.S. affiliate of Sandoz International Ltd. of Switzerland.

ATLANTA, (JULY 10) PR NEWSWIRE - For the fourth day this year, the state's hot, humid weather once again contributed to Georgians establishing a new record for electricity consumption in a one-hour period late this afternoon.

Power usage exceeded the previous record mark of 15,717,000 kilowatts set Monday, according to Georgia Power Co. officials. A final record number and the time demand peaked will be known later this evening.

The continuing trend toward increased demand from a growing customer base, also contributed to the new record. In the last 12 months -- from June 1, 1989 to May 31, 1990 -- Georgia Power had added 29,028 new customers.

In additon to Georgia Power's customers, this record peak includes power supplied to consumers of Oglethorpe Power Corp., the Municipal Electric Authority of Georgia and the city of Dalton.

DALLAS (JULY 10) PR NEWSWIRE - Kaneb Services Inc. (NYSE: KAB) announced that its adjourned annual meeting of shareholders was held today in Richardson, Texas. The meeting was adjourned from June 26, 1990, to allow sufficient time for beneficial holders to instruct their brokers regarding three management proposals to amend the company's Certificate of Incorporation and a non-qualified stock option plan. The proposals required and received the approval by holders of a majority of the company's 31.5 million shares of common stock outstanding.

According to the company, the proposals adopted by shareholders increased the number of authorized shares of Class A Preferred Stock, no par value, from one million to five million, eliminated common stock voting rights with respect to future charter amendments that affect only the rights of the holders of a series of Class A Preferred and increased the common stock available for grant under the option plan from 1 million to 2 million shares.

#90191p3200 07/10/1990 ~PR Newswire
BUFFALO, NY (JULY 10) PR NEWSWIRE - First Empire State Corporation (AMEX:

FES) ("First Empire") today reported second quarter 1990 per share earnings of $2.02, up 13 percent from $1.78 in the comparable period last year. Net income for the quarter was $13.8 million, an improvement of 7 percent from the second quarter of 1989. For the first six months of 1990, net income rose to $26,570,000, or $3.87 per share. Excluding the cumulative effect of a change in accounting principle recognized last year six-month 1989 earnings were $25,345,000 or $3.50 per share.

Average loans and leases, net of unearned discount, reached $4.81 billion in the 1990 second quarter, up 19 percent from last year's comparable period. The higher loan levels and increases in core deposits helped boost taxable-equivalent net interest income 18 percent, to $58.9 million. Net interest income benefited from a higher net interest margin which, expressed as an annualized percentage of average earning assets, rose to 3.75 percent in this year's second quarter, up from 3.61 percent a year ago.

Reflecting a weaker economic environment and the prospect of uncertain real estate markets, the provision for possible credit losses in the second quarter of 1990 was increased to $6,527,000 from $3,357,000 in the 1989 quarter. Net charge-offs, however, were $2,320,000 in the recent quarter, little changed from $2,213,000 in the second quarter of 1989. The larger provision raised the allowance for possible credit losses to $65.8 million at June 30, 1990, up from $54.9 million a year ago. As a result, the ratio of the allowance to total loans, net of unearned discount, at June 30, 1990 was unchanged from the year earlier's 1.34 percent. Nonperforming loans totaled $37.7 million or .77 percent of loans outstanding at June 30, 1990, compared with $33.5 million or .82 percent a year earlier.

Other income in 1990's second quarter, aided by $1.4 million of gains from the sale of lease residuals, rose 18 percent to $15.1 million. The increase was broadly-based as all major fee income categories showed improvement. Other expense totaled $42.9 million in the recent quarter, up 13 percent from a year ago. The expense increase was mainly attributable to the additional operating costs of M&T Bank's Monroe division.

First Empire State Corporation is a bank holding company whose subsidiaries include M&T Bank, The East New York Savings Bank and The First National Bank of Highland.

#90191p3201 07/10/1990 ~PR Newswire

BEVERLY HILLS, CA (JULY 10) PR NEWSWIRE - Hilton Hotels Corp. (NYSE: HLT)

announced today that its second quarter net income declined 9 percent from the comparable 1989 level.

For the three months ended June 30, 1990, net income totaled $38.2 million or $.79 per share compared to $42.0 million or $.87 per share in the comparable 1989 period.

Total income contribution for the 1990 quarter was $73.8 million, 8 percent lower than the 1989 level. Hotel income contribution improved 3 percent to $44.8 million, while gaming results declined 21 percent to $29.0 million. Hotel occupancy was 73 percent in both the 1990 and 1989 periods, with average room rates increasing 6 percent. Nevada gaming occupancy was 87 percent in both 1990 and 1989, with average room rates increasing 2 percent.

Net interest expense, corporate expenses and the effective income tax rates were approximately equal between periods.

Barron Hilton, chairman and president, commented on the results: "It was an uneven operating quarter. On the hotel side in New York and in Chicago we earned mixed results. One hotel in each location showed improvement, while another property declined. The Hilton Hawaiian Village again had excellent results, but the San Francisco Hilton still hasn't fully recovered business lost from last fall's earthquake. While occupancies at our newer hotels have not yet reached stabilized levels, these properties generally showed good operating improvement during the period.

"On the gaming side we also had mixed results. The Flamingo Hilton-Las Vegas benefited from its latest guestroom tower addition, which was completed this March. Occupied room nights there improved 15 percent against last year, and income contribution there was up nicely. Results at the Las Vegas Hilton declined 56 percent from the 1989 level. The property had exceptional results in the 1989 period, and we recognized the quarterly comparison would be further challenged by the increased competition in Las Vegas. Income contribution at the Flamingo Hilton-Reno benefited from last year's renovation program and our enhanced marketing concept."

Net income for the six months ended June 30, 1990 was $63.3 million or $1.31 per share, up 15 percent from net income of $55.1 million or $1.14 per share in 1989.

DALLAS (JULY 10) PR NEWSWIRE - Southmark Corp. (NYSE: SM) today announced

that unsecured creditors and preferred shareholders voted to approve the company's Plan of Reorganization, according to preliminary tabulation reports. Final results are expected to be made public tomorrow at a bankruptcy court hearing to confirm the Plan. The deadline for submitting ballots was 5:00 p.m., Friday, July 6.

If the Plan is confirmed by the court, Southmark could emerge from Chapter 11 later this month, just one year after its original bankruptcy filing. As previously reported, the Plan of Reorganization provides for distribution to senior creditors of $75 million in cash, secured notes, and preferred and common stock of the reorganized company. Holders of subordinated debt will receive consideration including preferred and common stock of the reorganized company. Southmark's current common and preferred shareholders will receive a portion of new common stock to be issued pursuant to the Plan.

The Plan also includes an agreement with federal thrift regulators to recapitalize Southmark's San Jacinto Savings Association and to settle claims that might have been asserted by the thrift or its regulators.

Southmark Corp., headquartered in Dallas, is a real estate and financial services company operating under Chapter 11 of the United States Bankruptcy Code.

LOS ANGELES (JULY 10) PR NEWSWIRE - First Executive Corp. (NASDAQ: FEXC) announced today that it has entered into an agreement with Rosewood Financial Inc., the general partner of Rosewood Financial Partners, the holder of approximately 10 percent of the company's outstanding common stock, that Rosewood will vote in favor of the board's present nominee for director at the July 30th stockholders meeting. The nominee is Albert G. Handschumacher, who has been a director of First Executive since Nov. 24, 1969.

The agreement states that First Executive's board will endeavor to increase the number of directors by electing persons whom the board determines are not affiliated with the company and are otherwise qualified to serve the interests of the company and its stockholders.

The agreement also provides that the company will provide Rosewood with certain non-public operational and/or financial information in order for it to determine the feasibility of its participation in any possible recapitalization or restructuring of the company.

No assurance can be given that a proposal regarding any such transaction will be made, or if a proposal is made, that any transaction will be consummated.

ALPHARETTA, GA (JULY 10) PR NEWSWIRE - Digital Communications Associates Inc. (DCA) (NYSE: DCA) said today its board of directors has authorized the company to repurchase up to $25 million in shares of its own common stock over an indefinite period of time.

"Having nearly completed the $25 million stock repurchase program authorized in April 1990, we continue our commitment to using our strong cash position in ways we hope will improve shareholder value," said Garry Betty, DCA president and chief executive officer. "Repurchasing our stock is one possible means of achieving this goal."

During the year ended June 30, 1990, DCA repurchased a total of 1,736,800 shares of its common stock at an average price of $21.26 per share, under both the April 1990 authorization and DCA's first stock repurchase program which was a $25 million authorization announced in September 1988. As of June 30, 1990, approximately 13.5 million shares of DCA common stock were outstanding.

DCA also announced that Joseph A. Sciulli, president and chief executive officer of Telecommunications Techniques Corp. (TTC), Germantown, Md., has been elected to DCA's board of directors.

Sciulli, a native of Pittsburgh, founded TTC in 1974 following over 10 years of experience in the satellite communications field. TTC, a subsidiary of Dynatech Corp., Burlington, Mass., is a manufacturer of diagnostic test instruments for the telecommunications industry.

DCA also said that Frank A. Bonsal Jr., general partner, New Enterprise Associates L.P., an investment limited partnership based in Baltimore, has resigned from its board of directors. Bonsal had served on DCA's board of directors since 1981.

Based 30 miles north of Atlanta, DCA designs, manufacturers and markets products that enhance the productivity of personal computer users.

SAN ANTONIO (JULY 10) PR NEWSWIRE - Datapoint Corp. (NYSE: DPT) today announced a reduction in force of 91 employees, effective immediately.

Fifty-four of those laid off were employed at the company's San Antonio location; 37 others were part of a nationwide sales force.

In announcing today's action, the company said it was necessitated by a continuing depressed sales performance by Datapoint in the United States, generally sluggish market conditions in the computer industry, and

recognition of "an obvious need to stem our losses." For nine months of its fiscal year 1990, Datapoint had announced a net loss of $30.9 million on worldwide sales of $194.7 million.

According to the company, it will continue to service domestic customers by focusing its effort through a combination of headquarter sales and value-added resellers.

With the workforce adjustment announced today, Datapoint said its San Antonio-based operations will assume an increased responsibility for support of the U.S. sales effort as well as for the company's successful international operations.

Following the reductions announced today, Datapoint will employ 278 in San Antonio and about 1900 worldwide.

The company said those affected by today's announcement will receive severance based on job classification and seniority, and medical benefits for the next 90 days.

Datapoint will provide an outplacement office and access to telephones, word processing, and resume writing assistance.

Further, the company will facilitate filing for unemployment benefits through the Texas Employment Commission (TEC) and work with TEC to assist individuals in other appropriate ways.

Datapoint Corp. develops, manufactures, and markets computer and communication products for integrated network systems worldwide.

#90191p3244 07/10/1990 ~PR Newswire

LOS ANGELES (JULY 10) PR NEWSWIRE - Santa Fe Pacific Pipeline Partners L.P. (NYSE: SFL) announced second quarter 1990 net income of $18.0 million or $0.93 per unit, 2 percent above net income of $17.6 million, or $0.91 per unit, for the same period last year.

For the six months ended June 30, net income of $30.7 million, or $1.59 per unit, was 8 percent above net income of $28.5 million, or $1.47 per unit for the six months ended June 30, 1989.

The partnership previously announced on June 28 that it will increase its cash distribution for the second quarter from $0.60 per unit to $0.65 per unit. The distribution will be paid on August 14, 1990, to holders of record of its preference units and common units on July 31, 1990.

John P. DesBarres, president and chief executive officer of Santa Fe Pacific Pipelines Inc., the general partner, noted that the improvement over 1989 was particularly gratifying considering the outstanding results achieved during the second quarter last year.

Second quarter revenues of $49.8 million were up $1.5 million or 3 percent over the same period in 1989. Factors leading to the higher revenues included a 2 percent increase in volumes transported as a result of increased product demand and a December 1989 rate increase on movements from the San Francisco Bay area to Reno, Nevada. Operating expenses, excluding depreciation, approximated the prior year quarter with increased field operating expenses offset by lower power costs. Increased depreciation of $0.5 million is related to new facilities added during 1989 and early 1990. Interest expense increased $0.6 million due to less capitalized interest during the 1990 quarter.

Revenues for the six months ended June 30, were up 5.2 million or 6 percent over the 1989 period as a result of increased volumes and higher tariffs. Operating expenses were up $1.9 million or 4 percent due to increased depreciation and field operating expenses partially offset by

decreased power costs.

Capital expenditures for the second quarter and the first six months were $6.0 million and $12.6 million respectively, of which DeBarres said approximately 45 percent was for expansion projects. Capital expenditures during the second half of the year are expected to be approximately $19 million.

Santa Fe Pacific Pipeline Partners L.P. is one of the largest independent pipeline common carriers of refined petroleum products in the United States. It is the largest in the western United States in terms of product deliveries, barrel miles transported and pipeline mileage. The partnership serves six western states with approximately 3,300 miles of pipeline and 14 truck loading terminals.

PARK RIDGE, NJ (JULY 10) PR NEWSWIRE - The following is a statement released by Sony:

"We believe that the lawsuit filed yesterday on behalf of various music publishers and composers to block the sale of digital audio tape recorders (DAT) is totally without merit.

"DAT is the latest development of a product that has been widely used in the U.S. for more than 30 years -- the home tape recorder. The long-time, unchallenged sale of home taping devices supports the consumer's well established right to private, non-commercial home recording. Yesterday's lawsuit seeks to hold this newest digital technology hostage and threatens to deny its benefits to American consumers.

"The American public has already shown strong interest in DAT. As the leader in digital audio technology, Sony will meet their demands by continuing to make DAT products available."

PANAMA CITY, Panama (JULY 10) UPI - The pilot of a twin-engine plane that was hijacked to Colombia by people claiming to be Colombian and Peruvian rebels returned safely to Panama, one day after being freed.

The Twin Otter 300, an Aeroperlas airliner on a 20-minute commuter flight from Colon to Panama City, disappeared Thursday and was not heard of until the next day when the co-pilot, Sergio Ortiz, and three passengers were found by Colombian authorities trying to make their way by bus to Medellin.

The pilot, Warren Lam, was kept by the five hijackers - two women and three men - who told the co-pilot he would be freed within three days.

Lam returned from Colombia on a special government flight Monday ,

accompanied by legal advisor for the presidency, Jaime Jacome.

Lam declined to speak to reporters and Panamanian authorities said they would reveal details of the hijacking following investigations.

Police sources in Colombia, where Lam was released Sunday, said the hijackers were probably members of the Colombian Revolutionary Armed Forces (FARC) and of Peru's ''Shining Path'' guerrilla organization.

The hijackers kept the aircraft.

Lam told Colombian authorities that one of the eight passengers aboard the flight donned a mask and ordered him to fly to Colombia and land on a rural landing strip.

The hijackers told Lam they needed the plane for the revolution, police sources said.

#90191u0211 07/10/1990 ~United Press International

(JULY 10) UPI - A spokeswoman for the French delegation to the Houston economic summit said Monday it is important for the gathering's participants to announce that economic aid to Moscow is of ''importance.'' It appears as if that much will be accomplished during the three-day event. But as West German officials said, specific aid decisions will most likely be postponed until studies on the effect of the assistance are completed.

Liberian rebels announced Monday over their radio frequency they are willing to accept a cease-fire call by President Samuel Doe. The rebels also said they will sit down at the bargaining table Tuesday with government negotiators. Despite the announcement, fighting was reported near the Liberian capital and reporters witnessed government troops execute a man they claimed was a rebel.

The man said by many to be the most vocal champion of the homeless will be laid to rest Tuesday in Washington, D-C. And true to his living days, Mitch Snyder... though dead... will make a political statement. His supporters plan to carry his coffin in a horse-drawn carriage to the building that houses the D-C city council, the scene of a political defeat for Snyder last week.

Lawmakers in the nation's capital are being approached by environmentalists who want to toughen a proposed farm bill. A spokesman for the Center for Resource Economics said Monday that environmentalists have sparked ''enormous interest'' among senators and representatives in their bid to have the measure include regulations that force farmers to

document all pesticides used and ban the export of pesticides NOT allowed domestically.

#90191u0215 07/10/1990 ~United Press International

(JULY 10) UPI - A Brazilian official said Monday the government may impose a so-called state of defense in Rio de Janiero to deal with a recent spate of kidnappings of businessmen. The move would limit some civil rights, such as the right to assemble. But Bernardo Cabral indicated imposing the measure could be difficult. He said the governor in Rio opposes the action. A police official says the kidnappings stem from restrictions which allow bank withdrawals of only 700 dollars. He blames the abductions on cash-starved drug gangs.

University of Pittsburgh researchers say they found a ''striking'' difference in the mortality rate between diabetic woman who smoke and those who doN'T smoke. Their study of 550 diabetics says a diabetic woman who smokes is twice as likely to die prematurely than a diabetic woman who doesN'T smoke. They say that means smoking diabetic women face a death risk 20 times higher than the general population.

#90191u0290 07/10/1990 ~United Press International

HOUSTON (JULY 10) UPI - President Bush and his economic summit partners were in pursuit of face-saving compromises Tuesday that would duck hard decisions on what had threatened to be divisive issues of aid to the Soviet Union and global trade.

Within only hours of the formal opening ceremonies of the 16th annual economic summit at Rice University, confident talk of compromise circulated through the U.S. and foreign delegations and top aides worked through the night to craft statements showing a unified allied stand in the face of a new world order.

Braving punishing hot temperatures and humidity, Bush opened the session Monday by pressing the leaders of Great Britain, France, Italy, Japan, Canada and West Germany on the most fractious political issue before them: the U.S. call for a world trade system free of farm subsidies.

The conflict, pitting the United States and Canada against Western Europe, threatens efforts by the 97-nation General Agreement on Tariffs and Trade to rewrite global trade rules before the current round of negotiations ends in December.

Later, over dinner, the focus shifted to Bush's effort to win common ground on aid to the Soviet Union.

U.S. officials laid out a three-point proposal for the joint communique that will conclude the summit Wednesday, which in essence would paper over clear differences between the United States and European allies.

Bush appeared headed for success in his bid to hold the official summit line at ''technical economic assistance'' for the Soviets, and White House press secretary Marlin Fitzwater confidently predicted ''general agreement'' would be won on ''the major issues.''

''There are differences to be sure, in the sense that each country has slightly different priorities,'' Fitzwater said. ''But on the larger issues - certainly economic, environment, political change - there will be general agreement.''

''The fact is we all want the same thing,'' he added.

On the second of three days of talks, the leaders were to turn again to the East-West economic relationship with the collapse of communism in Eastern Europe before debating what was likely to be another general effort to protect the global environment.

Secretary of State James Baker also was to put forward the first evidence of consensus, delivering a broad message of support for the reform efforts of Soviet President Mikhail Gorbachev - a precursor for the summit's closing communique.

In the joint political statement, the summit partners were also expected to call for a restoration of human rights in China without taking a position on whether to renew full economic relations with Beijing that were severed in the wake of the Tiananmen Square massacre.

The U.S. proposal on assistance to the Soviet Union offered a vote of confidence for the embattled Soviet leader's economic reforms, recommended guidelines for future Western aid and proposed sending experts to the Soviet Union, under the auspices of the seven summit nations or even the World Bank, to assess its problems and aid its transition to a market economy.

The approach brushed over differences with European allies who want a commitment of substantive Western assistance they see as essential to Gorbachev's survival and would leave each country free to pursue its own lending and aid policies.

Elizabeth Guigou, an adviser to French President Francois Mitterrand, made it clear Tuesday that such a unified general approach would be acceptable. Mitterrand and West Germany's Helmut Kohl have spearheaded the Western direct-aid effort, proposing an immediate infusion of $15 billion in food

aid, credits, loans and other assistance to buttress Gorbachev.

''What is important is to take a decision on the importance of aid to the Soviet Union,'' said Guigou.

But, added Mitterrand's official spokesman Hubert Vedrine late in the evening as aides continued work on the final language, ''We must not put it off too long.''

The United States insists Western aid could be wasted without reforms in place, including a redirection of funds the Soviets now spend on the military and aid to totalitarian regimes.

On the trade issue, despite European resistance to ending the subsidies, fears for the outcome of the GATT talks provided formidable impetus for a statement of common purpose.

''Our concern,'' said Fitzwater, ''is that if the summit does not proceed to endorse these goals and to urge their continued consideration, that we would see this question die.''

The European resistance fueled a push for milder commitments to trade reform that could rescue Bush from defeat. The question was how far they would go in charging GATT negotiators to tackle agricultural trade reform, but a recent report by Aart de Zeeuw, chairman of the GATT agricultural working group, emerged as a basis for compromise.

The de Zeeuw report accommodates the U.S. demand for commitments to phase out subsidies but would allow the Europeans to carry out that unpopular change in a selective, gradual manner.

''We could negotiate within that,'' said U.S. Trade Representative Carla Hills.

#90191u0310 07/10/1990 ~United Press International

BATON ROUGE, La. (JULY 10) UPI - A bill passed by the Louisiana Legislature would become the nation's toughest abortion law even if Gov. Buddy Roemer ignores it, but it would likely be challenged even before a woman demanded an abortion.

Roemer said Monday he would not decide immediately whether to sign or veto the compromise bill that would ban abortions except in the case of rape, incest or if the mother's life was endangered by the pregnancy.

The hastily passed bill contained several possible grounds for constitutional challenges, including the penalties, which could be too

severe for a misdemeanor.

If Roemer took no action on the bill, it would become law without his signature in the second week of September, but because there was a question about whether the action taken to pass the bill Sunday was legal it could be challenged before it was actually broken.

The bill was passed after Roemer vetoed another abortion bill that contained no provisions for abortions performed in cases of rape and incest, and proponents said it would ban 98 percent of the abortions in the state.

''Being told by the bulk of those (anti-abortion) representatives they could not tolerate my position, to have them flip-flop as the did yesterday, was quite a shock,'' Roemer said at a news conference Monday.

The new abortion bill, which passed as an amendment to a misdemeanor bill concerning flag burning, included long prison sentences and stiff fines, penalties that could be too strict for anything short of a felony.

''There are several questions,'' Roemer said. ''Representatives of the attorney general's office called ... to say they'd like us not to act quickly either way until they had a chance to examine the constitutional question.''

He also said he was uncomfortable with the way the rape and incest exceptions were written. Under the bill, a woman would have seven days to report either crime and receive an abortion.

Roemer had wanted a 90-day period for those exceptions.

''Their (anti-abortion lawmakers) first pitch was 72 hours,'' he said. ''I thought that was just patently nonsense. I thought a more reasonable period of time would accomodate common sense and justice.''

The latest action on the bill began Sunday when the Senate tabled work on overriding Roemer's veto of the earlier measure that banned all abortions except where a mother's life were threatened by the pregnancy.

The House, just hours after Roemer's veto on Friday, had voted to override that action. But the more liberal Senate on Saturday could not find the two-thirds majority needed to take the same action.

Moments after the Senate tabled that measure, Sen. John Saunders, a Democrat, stunned colleagues by asking them to amend an unrelated bill to reduce to $25 the penalty for beating people who desecrate the American flag with abortion language that included the rape and incest exceptions.

Saunders's amendment stripped out all the flag language and substituted the compromise abortion language.

The original bill on the beating of flag desecrators had been titled ''The Crime of Simple Battery''; its new title is ''The Crime of Simple Battery of Abortion.''

But simple battery is a misdemeanor, and many senators said the penalties under the abortion measure - up to 10 years in prison and fines of up to $10,000 for the abortionist - might be too severe for a misdemeanor under the state constitution.

The Senate approved the measure 32-7, sending it to the House for concurrence. Within an hour the House, using procedural shortcuts, gave it final legislative approval with a vote of 83-22 and sent the bill to Roemer.

#90191u0317 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - Neil Bush, the president's son, defended his role as head of a failed Denver thrift as well as his acceptance of a $100,000 loan from an investor he did not have to repay, The Washington Post reported Tuesday.

Bush, 35, who faces a hearing this fall before federal savings and loan regulators, responded to allegations that while a director of Silverado Savings and Loan he violated conflict-of-interest rules by voting to approve loans to individuals with whom he had a business relationship.

Silverado's failure is expected to cost taxpayers an estimated $1 billion and Bush has become a central figure in the collapse of the S&L industry, the most expensive financial scandal in U.S. history.

Bush acknowledged in an interview that he received ''an incredibly sweet deal'' in 1984 when Denver investor Kenneth Good lent him $100,000 and then forgave the debt. Bush, who was not a member of the board when he received the loan, also said he would report that payment on his 1990 taxes.

Bush insisted that that loan was ''totally unrelated'' to his work for Silverado and that other charges against him were political ''opportunism'' and ''press sensationalism.''

The federal Office of Thrift Supervision, which is overseeing the bailout of the savings and loan industry, proposed a decree in January banning Bush from the banking industry because of his actions. Bush refused to accede and the decree proposal was withdrawn.

Bush said he decided to fight regulators ''because I know I haven't done anything wrong,'' noting that his troubles could provide Democrats with campaign fodder for the November congressional and state elections.

After keeping his own counsel for months, Bush has decided to go public. ''I've been kind of like a little caged-in animal in an unsanitary zoo,'' he said. ''Now my cage is open and I'm telling people ... what my side of the story is. And I feel good about it.

''I know I'm a better person for it,'' said Bush. ''I am stronger ... I'm eating better, drinking fruit juice. I feel like I'm warming for a fight.''

In his response, Bush said the September disciplinary proceeding against him ''is unprecedented.'' He noted that thrift regulators have not previously pursued such charges against a person who is no longer involved in banking. Bush quit the Silverado board in the summer of 1988.

Bush also challenged regulators' contention he violated regulations by voting to approve Silverado loans to Bill Waters, a Denver developer who had invested in Bush's oil company. Bush said there was no conflict of interest in his votes because other bank officials knew of his ties to Waters.

The president's son also discussed dealings between Silverado and Good, who forgave the $100,000 loan a year before Bush became a director of the now bankrupt thrift.

Bush said the loan was to be repaid only if the money returned a profit on investment. Bush said the invested money did not return a profit so the loan was forgiven.

The newspaper said bank records showed that Bush did not vote when Silverado's board approved loans to Good. But thrift regulators charged that Bush personally proposed to his fellow board members that they grant Good a $900,000 line of credit, which they did.

#90191u0330 07/10/1990 ~United Press International

NEW YORK (JULY 10) UPI - One of the worst cases of oil pollution in the nation's history was targeted for a massive cleanup aimed at stopping oil seepage into a Brooklyn neighborhood.

Mobil Oil Corp. has agreed to recover 14.5 million gallons of petroleum products sitting in an underground pool beneath its oil terminals and residential houses in the Greenpoint neighborhood.

Mobil signed a consent order late last week with the state Department of Environmental Conservation that requires the company to speed up the efforts to clean up the fuel oil, gasoline and naphtha - a distilled petroleum product - that it began in 1981.

That operation, conducted with the Amoco Oil Co., the city and the Coast Guard, has recovered about 2.5 million gallons of petroleum products, said Benjamin Marvin, a spokesman for the state Department of Environmental Conservation.

The underground pool, known as a ''plume,'' stems from petroleum leaks dating back to at least World War II. First discovered by accident in 1950 the pool was estimated in 1978 at 17 million gallons, making it one of the worst cases of oil pollution in the nation's history, Marvin said.

That figure exceeds by about 6 million gallons the amount of oil that gushed from the Exxon Valdez when the tanker grounded on Bligh Reef off Alaska on March 24, 1989, spilling about 11 million gallons of heavy crude. The Exxon Valdez disaster was the worst tanker oil spill ever in U.S. waters.

''The citizens of Greenpoint are entitled to a removal of this underground pool, and have been for decades,'' DEC Commissioner Thomas Jorling said in a statement. ''We are encouraged that Mobil has finally accepted its responsibility to expedite the full cleanup.''

For years, Greenpoint residents have complained to state officials about the pool of oil, which sits above an underground acquifer that is not used for drinking water.

''So long as it's there, it presents a threat to the environment,'' Marvin said, adding that officials have received numerous letters from neighborhood residents worried about ''sitting on top of a time bomb.''

Leakage from the pool has knocked out a nearby sewage treatment plant three times in the past few years.

Mark Cohen, a Mobil spokesman, said it was unclear how much the cleanup would cost or how long it would take.

He said the company would undertake an extensive study, involving the installation of new monitoring wells, to determine the extent of the spill and the best way to recover the petroleum products.

''Mobil looks forward to working together with the DEC and the local communities to effectively implement the remediation plan which will result from this agreement,'' Cohen said.

''We recognize, and are sensitive to, the concerns of the area residents '' he said. ''We are hopeful that the steps we are taking under this agreement will have a significant impact on this situation.''

Mobil will assume responsiblity over the cleanup operation, but may seek participation or contributions by Amoco or other potentially responsible parties, Marvin said.

In February, Mobil signed a consent order with the DEC and subsequently paid a $500,00 civil penalty for failing to report immediately a 50,000-gallon underground spill from a reconditioned kerosene tank in Greenpoint.

#90191u0343 07/10/1990 ~United Press International

(JULY 10) UPI - Iran's state radio again is suggesting that one or more Western hostages in Lebanon soon will be freed. Iranian sources in Damascus, Syria, tell U-P-I that Irishman Brian Keenan is the hostage to be freed. Sources in Beirut say plans are being finalized for Keenan's release sometime soon.

Nicaraguan President Violeta Chamorro has ordered the army to help police restore order in Managua following strike-related violence. Clashes between strikers and pro-government workers left at least one person dead and dozens injured yesterday. The government has declared the week-long strike illegal.

NASA officials say more tests are needed to determine what's causing a hydrogen leak that has grounded the shuttle Columbia. Engineers are focusing on a critical Teflon seal as one possible reason, but officials say NOTHING has been ruled out. The shuttle fleet will remain grounded until the problem is corrected.

Two veteran shuttle commanders have been removed from their upcoming shuttle missions for violating flight safety rules. Robert ''Hoot'' Gibson was involved in a collision during a weekend air race in Texas that left the second pilot dead. Astronaut David Walker also has been disciplined, but in his case, it's NOT clear why.

A New York newspaper reports the life of Washington, D-C, Mayor is going to be made into a television movie. The report says the embattled politician, who is on trial on drug and perjury charges, has sold the rights to his life story. The deal reportedly does NOT include the participation of Barry's wife, Effi.

#90191u0350 07/10/1990 ~United Press International

SAN ANTONIO (JULY 10) UPI - A television reporter who has been jailed for nearly two weeks for refusing to turn over his notes in a murder case has agreed to comply after his sources voluntarily revealed themselves, officials said.

KMOL-TV reporter Brian Karem said he planned to surrender his notes Tuesday and confirm the confidential sources who helped him obtain a telephone interview with accused cop-killer Henry David Hernandez.

Karem, 29, and his attorney were scheduled to meet Tuesday morning with state District Judge Pat Priest. Karem's attorney, Larry Macon, said he expected the reporter to be released following the meeting.

''I am very hopeful that this is the end of a very tragic event,'' Macon said. ''Brian was only doing what he promised to do.''

The three sources stepped forward while Karem was in jail on the contempt charge. One source, who said she set up the interview between the reporter and Hernandez, said she had not requested confidentiality.

Hernandez, 25, along with his brother Julian, 28, was charged in the slaying of San Antonio patrol officer Gary Lee Williams, who was shot to death while making a traffic stop.

In the March 1989 telephone interview with Karem, Hernandez reportedly admitted pulling the trigger but said he acted in self-defense when the officer became aggressive.

The 5th U.S. Court of Appeals in New Orleans on June 26 denied Karem's request for a stay of Priest's ruling that he surrender his notes or face six months in prison.

Karem, who was jailed June 27, said he had promised to keep confidential the name of the source who arranged the jailhouse interview.

The U.S. Supreme Court Monday rejected by a 7-2 vote Karem's request to be freed pending his appeal of the contempt order. Justices William Brennan and Thurgood Marshall dissented in the vote.

Karem said he decided to comply with authorities Monday night following a telephone conference call in which a woman revealed that she helped him set up the interview with Hernandez.

The conference call included attorneys representing Karem and Hernandez, an assistant district attorney and Hernandez's cousin, Debora Ledesma.

Ledesma confirmed during the call that she helped set up the interview,

but denied she sought confidentiality from Karem, attorneys said.

''She said she did not ask for confidentiality,'' Macon said. ''She said she did not realize she was the source.''

In a telephone interview with reporters for the San Antonio Light Monday, Karem repeated his contention that Ledesma had requested anonymity.

''I know what was said between me and her,'' Karem said. ''I know the promise I made to her. Whatever she says now doesn't matter to me. She can couch it whatever way she wants. I didn't go to jail for nothing.''

Bexar County Sheriff's Deputy Charles Reid and Chief Deputy Alex Ramirez previously admitted they were Karem's other two sources.

Assistant District Attorney Beth Taylor said she was eager to get back to working on Hernandez's prosecution.

''Hopefully, this case will now go on as planned in November,'' Taylor said. ''I welcome anything that can be done to speed this up. I am quickly getting tired of all the attention. Brian Karem made this.''

#90191u0383 07/10/1990 ~United Press International

CHARLESTON, WV (JULY 10) UPI - Former Gov. Arch Moore lost a last-minute effort to withdraw a guilty plea and instead stand trial on corruption charges, admonished by a judge that he could not ''play fast and loose with the judicial system.''

Moore was to be sentenced Tuesday on five felony counts for allegedly shaking down a coal operator after U.S. District Judge Walter Hoffman rejected the former Republican governor's request Monday to throw out the plea agreement.

''There is no fair or just reason why I should permit now the withdrawal of the pleas of guilty, which were made voluntarily and under oath by Mr. Moore," said Hoffman, who is known for his strict application of judicial protocol. ''He wishes now to change his pleas. I think he's too late.''

''You cannot play fast and loose with the judicial system,'' the judge said.

Moore, 67, pleaded guilty May 8 to tax evasion, obstruction of justice, extortion and mail fraud, but argued at the hearing Monday that he was pressured to do so by federal prosecutors. He faced a maximum penalty of 36 years in prison and as much as $1.25 million in fines.

If sentenced to prison, Moore would become the state's second former governor to be jailed for a felony conviction.

W.W. ''Wally'' Barron, who was West Virginia's governor in 1961-65, served 46 months of a 12-year prison term for bribing the jury foreman in his 1968 trial, where he was acquitted of accepting kickbacks in state contracts. Barron, a Democrat, was paroled in 1975 from an Eglin, Fla., prison.

The state attorney general's office released a victim impact statement Monday to be included in Moore's pre-sentencing report. It seeks $4 million in restitution to the state and $2.2 million, plus interest, for a black lung refund Moore approved in 1985 to coal operator Henry Paul Kizer.

The state also wants repayment of Moore's salary while serving his third term. Moore was paid $288,000 in the four years and the state wants the salary plus interest.

A team of prosecutors led by U.S. Attorney Mike Carey brought charges against Moore and a host of other political figures in a continuing corruption case. Moore was charged for actions in his 1984 and 1988 campaigns for a third and fourth term as governor, and while he was in the executive office.

The five-count indictment alleged Moore extorted more than $500,000 from a coal operator, failed to report the money on his tax returns and tried to conceal the facts from federal investigators.

In addition, he pleaded guilty to violating federal mail law as it relates to vote-buying during his successful 1984 gubernatorial campaign. Moore was defeated in his quest of a fourth term in 1988 by Gov. Gaston Caperton.

Moore, a decorated World War II veteran who dominated West Virginia's political scene more than two decades, pleaded guilty after signing a plea agreement on April 12. In late June, his lawyer, William Hundley of Washington, D.C., filed a motion seeking to withdraw the pleas, arguing that Moore was under intense pressure to enter the pact.

Hoffman refused Hundley's request to let Moore testify why he felt coerced by prosecutors. Hundley said Moore does not believe himself guilty of the extortion, mail fraud or tax evasion charges and does not challenge the obstruction of justice charge.

''Nobody was forcing him to plead guilty,'' Hoffman said. ''All you had to do is tell Mr. Moore to plead not guilty and put the show on the road.''

''It was my fault,'' Hundley responded. ''I was trying to save the plea. I thought it was in the best interest of my client. I substituted my

judgment for my client's.''

Hundley said he advised Moore to plead guilty in April after listening to tapes prosecutors had of conversations between Moore and his 1988 campaign chairman John Leaberry. The conversation, used to press the obstruction of justice charge, occurred in a Parkersburg parking lot earlier this year.

Three days before a grand jury indicted Moore on the five charges, prosecutors played the tapes to Hundley, and the former governor entered into the plea agreement with the government.

''If this is your fault, didn't your client know it at the time?'' Hoffman asked. ''Why didn't you tell me all this on May 8?''

Since he denied a request to conduct an evidentiary hearing before issuing his ruling, Hoffman wished Hundley good luck in pressing an appeal in the Fourth U.S. Circuit Court of Appeals in Richmond, Va.

Moore, accompanied at Monday's hearing by his wife and three children, displayed no emotion at Hoffman's ruling. He left the courtroom and ignored reporters' questions.

#90191u0404 07/10/1990 ~United Press International

MANILA, Philippines (JULY 10) UPI - Communist rebels were seeking more than $200,000 in ransom for a Japanese technician kidnapped in the central Philippines, the armed forces chief said Tuesday, but no demand has been made for a Peace Corps volunteer also abducted by the guerrillas.

Japanese rural aid worker Fumio Mizuno, 36, and Timothy Swanson, 26, of Cheyenne, Wyo., are being held on the island of Negros by the communist New People's Army.

Mizuno, training director of the Tokyo-based Organization for Industrial, Spiritual and Cultural Advancement, was kidnapped May 29. Swanson was abducted June 13 on Negros, 300 miles south of Manila.

''It is only on the case of Mizuno that they (rebels) were attempting to ask for ransom (of about $217,000),'' Gen. Renato de Villa said in an interview on radio station DZXL. ''For Swanson, we have not heard of any demands for ransom. I have not seen any report or any indication that they have asked for ransom in the case of Swanson.''

De Villa said the two hostages have been brought together under the custody of high-ranking officials of the outlawed Communist Party of the Philippines' regional committee, headed by former Roman Catholic priest Frank Fernandez.

He said the hostages were being held somewhere in the towns of Murcia and Kanlaon. ''But they have the capability to move them around surreptitiously and we do not discount the fact that they may have been moved somewhere else.''

De Villa last week ordered a halt to all military operations in the area to allow civilians to negotiate with the guerrillas of the 19,000-strong NPA, which has been waging a 21-year insurgency in the Philippines.

Washington pulled out its 261 Peace Corps contingent in the the Philippines June 27, suspending the 29-year-old program in its former colony, after receiving information guerrillas were planning to kill or kidnap the volunteers.

The rebels, who have been blamed for the killing of 10 Americans over the past three years, have vowed more attacks on U.S. nationals if the United States does not dismantle its huge military bases in the country.

#90191u0429 07/10/1990 ~United Press International

(JULY 10) UPI - Relentless heat baked the Southeast and Atlantic states Tuesday, while fog shrouded the California coast and parts of New England.

The National Weather Service said occasional thunderstorms provided the only relief for hot, humid weather in the East Coast and Southeast. High pressure floating over the Southern states blocked any relief from heat that has endangered pets and made life uncomfortable for their owners.

Temperatures across the South and East hovered mainly in the 70s overnight warming up to highs in the 90s and 100s by afternoon. Hot weather also persisted Tuesday in the Plains, where scattered thunderstorms were reported.

Blustery thunderstorms swept across Colorado overnight, and a tornado was spotted about 10 miles northeast of Denver's Stapleton Airport. The storms moved across northeastern Colorado with winds gusting to 70 mph that downed power lines and may have spawned additional tornadoes, the NWS said.

Fog covered the California coast Tuesday and high pressure sent temperatures soaring over the century mark in the Central Valley.

To the north, fair weather continued over the Pacific Northwest with temperatures ranging up to the 90s inland and cooler by the coast.

Fog crept in over southeastern New England Tuesday morning. In Maine and Vermont, skies were partly or mostly cloudy, but clearer weather was

reported in New Hampshire.

The utility that serves Baltimore and the surrounding counties in Maryland had just met record demand for electricity during a hot, muggy afternoon Monday when powerful thunderstorms rumbled through the area.

High winds knocked down tree limbs, cutting power to about 77,000 people and leaving 20,000 in the dark early Tuesday while crews worked to restore power, said Art Slusark, a spokesman for Baltimore Gas & Electric Co.

''It's been a very busy summer. We got the storms and the heat and it's only the beginning of July,'' Slusark said.

The storms hit Monday evening after a day of 90-degree temperatures and high humidity, a repeat of which was expected Tuesday in the mid-Atlantic states.

#90191u0450 07/10/1990 ~United Press International

(JULY 10) UPI - Economic summit seeks compromise on trade and aid... Louisiana Governor considers tough anti-abortion bill... Albanian emigres arrive in Prague... and Congress prepares for civil rights debate. U-P-I has it all, next:

Day Two of the annual economic summit opens this morning in Houston... with the East-West economic relationship and the collapse of communism in Eastern Europe at the top of the agenda.

Top aides already are working to craft statements showing a unified allied stand in the face of a new world order.

President Bush yesterday opened the session by pressing the leaders of Great Britain, France, Italy, Japan, Canada and West Germany on the most fractious political issue before them- a world trade system free of farm subsidies.

The conflict pits the United States and Canada against Western Europe... and threatens efforts by the 97-nation General Agreement on Tariffs and Trade to rewrite global trade rules before the current round of GATT talks ends.

U-S officials also laid out a three-point proposal for the joint communique that will conclude the summit tomorrow... which in essence papers over the glaring differences between the United States and European allies.

As for aid to Moscow, Bush appears to be successful in his bid to hold the

official summit line at ''technical economic assistance'' for the Soviets.

The U-S proposal on assistance to the Soviet Union offered a vote of confidence for Soviet President Gorbachev's economic reforms. It also recommended guidelines for future Western aid and proposed sending experts to the Soviet Union.

The fate of a strict abortion bill passed by the Louisiana legislature remains undecided.

Louisiana Governor Buddy Roemer yesterday said he needed time to study the measure before he decides whether sign it or NOT.

The new bill would ban all abortions except in the case of rape, incest, or if the mother's life was in danger. Roermer said he was uncomfortable with the way the rape and incest exceptions were written.

Under the bill, a woman would have seven days to report either crime and receive an abortion. Roemer had wanted a 90-day period for those exceptions.

The governor has until the second week in September to enact the bill, but even if he ignores it, it probably would be questioned before a woman demanded an abortion.

The hastily passed bill contains several possible grounds for constitutional challenges, including the penalties, which may be too severe for a misdemeanor.

-30- 2723
#90191u0469 07/10/1990 ~United Press International
(JULY 10) UPI - 51 Albanians are in Prague, Czechoslovakia, after being allowed to leave Europe's last orthodox communist state.

The Albanians, 49 men and two women, flashed ''V-for-victory'' signs and some shouted the name of Czechoslovakian President Vaclav Havel, as they boarded buses that would take them to a hotel.

Czechoslovakia's Deputy Foreign Minister Vojtech Wagner says the Albanians were allowed to leave their country after a week of difficult negotiations. He says- ''We were probably allowed to be the first to take the refugees out because we were the first to land a plane bringing humanitarian aid.''

The Albanians left behind about six-thousand other refugees, all holed up in foreign embassies in the capital city of Tirana . The rush to foreign embassies began July 1st amid reports of clashes between demonstrators and

security forces in the capital.

There are indications that Albanians in refuge at the French and Hungarian missions also will be allowed to leave Albania.

Civil rights advocates will be paying close attention today when the Senate meets to discuss proposed civil rights legislation.

The Civil Rights Act of 1990 would reverse six Supreme Court decisions that were handed down last year. Civil rights supporters say the rulings undermined safe-guards against on-the-job discrimination.

Several weeks of debate concerning the measure has NOT satisfied White House concerns that the package will require racial quotas.

But Democratic Senator Edward Kennedy of Massachusetts says the high court decisions- quote- ''left major gaps in the federal laws banning job discrimination.'' Kennedy adds the rulings have made it more difficult for victims of bias to find justice in the courts.

The new civil rights bill is at the top of a long list of issues Congress must address before its August vacation. To deal with time constraints, Senate Democratic leader George Mitchell of Maine may cut a week from the recess.

#90191u0484 07/10/1990 ~United Press International

CATLETT, Va. (JULY 10) UPI - A 20-car Amtrak train collided with a police cruiser at a rural railroad crossing, killing a sheriff's deputy and cutting his vehicle in two, authorities said Tuesday. None of the train passengers was injured.

Fauquier County Sheriff's Deputy Charles Murray was killed when the Amtrak Crescent slammed into his cruiser about 8:15 p.m. Monday, said Lucy Caldwell, a spokeswoman for the Virginia State Police.

''Apparently the Amtrak struck the vehicle just behind the right front passenger door, cutting the vehicle in two,'' she said. ''The front end went down an embankment and the body was thrown clear. The rear end of the vehicle was pushed 3,725 feet down the track attached to the front of the locomotive.''

Murray, 27, of Goldvein, Va., was serving papers about 5 miles west of Catlett when the accident occurred, Caldwell said. The railroad crossing was marked by a sign but did not have guardrails or lights, she said.

The train was carrying about 350 passengers but no injuries were reported

and damage to the locomotive was minimal, authorities said.

The accident occurred about 3 miles from the site of a similar crash last Sept. 28, when a fire truck was struck by the Amtrak Crescent, killing two firefighters and injuring scores of other people.

Investigators said the driver of the Catlett Volunteer Fire Department truck, responding to an emergency call, failed to stop at an unmarked railroad crossing.

Amtrak officials said the train from New York to New Orleans was traveling in a zone where speeds can average about 70 mph at the time of Monday's collision. The train resumed its journey about 11 p.m., officials said.

Authorities said the cause of the accident was under investigation.

#90191u0488 07/10/1990 ~United Press International

NEW YORK (JULY 10) UPI - Twin surveys conducted in Japan and the United States show American apprehension over Japan's economic strength is increasing as Japanese resentment of the United States softens, The New York Times said Tuesday.

Large majorities in both countries, in answering matched public opinion polls conducted in early June by the New York Times and CBS News in America and the Tokyo Broadcasting System in Japan, pointed at each other when asked to identify the major economic competitor of their nations, the Times said.

Sixty-four percent of Americans said they believe Japanese investment in the United States poses a threat, up from 45 percent in a similar New York Times survey taken in 1987, the Times said.

At the same time, only 37 percent of Americans expressed apprehension at European investment in the United States, despite the fact there are more European holdings here.

The disparity prompted many Japanese respondents to suspect a racist attitude by Americans toward Japan's trading success, the poll said.

On the other hand, the Japanese, while retaining some resentment of Americans, are softening somewhat on trade issues, with only 3 percent of respondents in Japan saying their country should greatly restrict American imports.

Curiously, respondents in both countries took a brighter view of the other nation's prospects in the coming century.

When asked which country will be the dominant economic power in the world in the year 2000, 50 percent of Americans - but only 39 percent of Japanese - answered Japan.

By contrast, 32 percent of Americans and 42 percent of Japanese said they expected America to be the top-ranked nation economically in the year 2000 the Times said.

Despite economic tensions, large majorities in both nations expressed admiration of each other's citizens and culture, the Times said.

Tetsuya Tsukushi, an anchor for the Tokyo Broadcast System, told the Times his colleagues were struck by American ambivalence.

''We are a little bit surprised so many people do not want to have Japanese investment,'' Tsukushi said. ''It's much more of a protectionist flavor. At the same time, much more than we expected, Americans have high regard for Japanese ability and Japanese people.''

In the United States, the poll was conducted with 1,084 adults in telephone interviews between June 5 and June 8. In Japan, personal interviews were conducted with 1,468 adults between May 31 and June 7.

The survey had an error margin of 3 percentage points, the Times said.

-30- 2788

#90191u0497 07/10/1990 ~United Press International

NEW YORK (JULY 10) UPI - Police have launched an intensive manhunt for a gunman who targets his victims according to astrological signs in efforts to head off a fifth shooting.

The last three attacks by a man known as the Zodiac killer have occurred 21 days apart, leading police to believe another attack may come Thursday morning.

Police were protecting a witness who spoke to a man believed to be the killer, and a published report said detectives were studying a mystical book looking for clues as to what may be motivating the gunman.

The witness, identified only as a woman in her 20s, told police she spoke to a man who approached her in a subway station near Central Park two days before the gunman shot a homeless person in the park and asked her birthday, police officials said.

Police have come up with a third sketch of the man believed to be the Zodiac killer based on the woman's description, said Suzanne Trazoff, the

deputy commissioner for public information.

Trazoff said police have placed the woman under protection because she inadvertantly made herself a possible target by lying about her birthdate.

The gunman, who has vowed to kill one person for each of the 12 astrological signs, has shot four men since March 8. Three victims survived the attacks and a 78-year-old Brooklyn man later died from complications.

The victims' birthdates have corresponded to the astrological signs Scorpio, Gemini, Taurus and Cancer. The woman, a Taurus, gave her birthdate as Aug. 8, making her a Leo - the sign expected to be hit next.

The woman told police she was approached in the Columbus Circle subway station June 19 by a man matching the description police have put together from accounts by victims, the New York Post said.

The Daily News reported that detectives were studying a 1904 book, ''The Law is For All.'' In what the author calls the ''21st revelation,'' he suggests that nature weeds ''out the weak.''

The passage is significant because of the 21-day separation between strikes and because police considered the victims to be defenseless because of physical circumstances. Two victims walked with a cane and one was shot while drunk.

The suspected hit man is believed to be a medium-built black man in his mid-30s with a mustache and short beard.

Police have said only the last victim recalled being asked his birthday by the gunman.

-30- 2620

#90191u0501 07/10/1990 ~United Press International

REDWOOD CITY, CA (JULY 10) UPI - A lawyer for accused rampage slayer Ramon Salcido said he would ask an appeals court for a two-month delay in the winery worker's multiple-murder trial after the trial judge refused.

Salcido, 29, charged with killing his wife, two of his three small children, his mother-in-law, two of his wife's sisters and a co-worker in a stabbing-and-shooting rampage in California's wine country more than a year ago, appeared Monday in a courtroom where his trial is scheduled to start.

Sonoma County Public Defender Marteen Miller, Salcido's attorney, sought to delay the trial until September so he could further prepare his defense

but was refused by Superior Court Judge Reginald Littrell.

Miller said he needed the time to explore a psychiatric defense and obtain documents Salcido said he signed in Mexico City when he was arrested there after he fled California. Miller argued the documents waived rights to an extradition hearing for Salcido, a native of Mexico.

Miller said he would immediately ask the state Court of Appeal to order a delay. Otherwise, jury selection was expected to get under way next Monday.

Salcido is accused of going on the stabbing-and-shooting rampage April 14, 1989 after a night of drinking and drug taking.

In a confession taped by police during his flight back to California, Salcido said the April 14, 1989, rampage was fueled by alcohol and drugs and followed an argument with his wife the previous night over child support papers he had been served from a previous marriage.

Attorneys said it could be six weeks before a jury is seated due to widespread publicity in the case, which prompted movement of the trial from Sonoma County to San Mateo County.

A pool of 500 jurors, an unprecedented number in San Mateo County, has been formed for the trial, which could cost as much as $500,000, Sonoma County officials have said.

Salcido has been held in a one-person maximum-security cell in the county jail since last month when he was moved from a similar cell in Santa Rosa in Sonoma County.

His only visitor, except for attorneys, has been a 28-year-old Los Angeles woman who said she fell in love with Salcido after writing to him in jail.

#90191u0508 07/10/1990 ~United Press International

BANGKOK, Thailand (JULY 10) UPI - A six-man U.S. military team headed to Hanoi Tuesday, ending two months of delays in technical talks to improve cooperation in resolving the fates of more than 1,600 Americans missing in Vietnam, a U.S. Embassy spokesman said.

The U.S. delegation was set to start three days of talks soon after their arrival in Hanoi, spokesman Neil Klopfenstein said.

''These meetings are aimed at improving and increasing cooperation between the United States and Vietnam to accelerate results in accounting for missing Americans,'' he said.

Hanoi officials have said the meeting, originally planned for April, was delayed by U.S. refusal to set a date for the talks.

U.S. officials have said they needed more time to assess the results of previous joint efforts to find evidence of the fates of the 1,678 Americans lost in Vietnam. Another 644 American servicemen are missing elsewhere in Indochina.

Earlier this month Vietnam also expressed irritation at renewed charges by a senior U.S. military intelligence official that some of the remains that Vietnam has returned have been stockpiled in a warehouse for years.

Klopfenstein declined to comment on the charges or the cause of the delay in holding the talks.

He said the six-man U.S. team, led by Lt. Col. Joe Harvey, commander of the military's Joint Casualty Resolution Center in Hawaii, ''will focus strictly on the MIA-POW issue.''

No joint field operations were planned, but the team would consider making a survey if one were offered, he said.

''They will discuss specific steps to accelerate the results, U.S. expectations, results to date and other technical matters,'' he said.

The issue of accounting for the missing Americans has been the most emotional issue between Vietnam and the United States, but U.S. officials say the main obstacle to improved relations is the conflict in Cambodia.

The United States would like Vietnam to help work out an acceptable political settlement to Cambodia's civil war before it will consider ending an economic blockade and normalizing diplomatic relations.

Vietnam invaded Cambodia in late 1978 and ousted a Khmer Rouge regime that was blamed for the deaths of 1 million Cambodians. Vietnam withdrew the bulk of its troops last year, but Cambodia's Hanoi-installed government still battles a three-part resistance coalition.

#90191u0511 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - People whose lives were touched by Mitch Snyder - from the homeless to celebrities - gathered at a Washington shelter Monday to pay their last respects to the man who dedicated his life to the downtrodden.

One by one mourners, who had formed a line around the corner of the Community for Creative Non-Violence shelter Snyder risked his life to

create and where he died, filed inside past a simple wooden coffin surrounded by flowers for Snyder's wake. His funeral is scheduled for Tuesday.

''I sometimes just get the urge to cry because I just don't believe he's gone,'' said Kenya Smith, entering the shelter she has called home for six years.

Smith and others said they believe no one can replace Snyder, the nation's most vocal champion for the homeless.

He secured the city's largest homeless shelter when he staged a 51-day hunger strike in 1984 that forced President Reagan to turn over a once vacant federal building. Further fasts helped secure the funds needed to turn it into a 1,300-bed shelter Snyder called a model for the nation.

Snyder, 46, was found hanged Thursday in his third-floor room at the shelter in what police said was a suicide. A note indicated he took his life over a failed love relationship with longtime companion and fellow homeless activist Carol Fennelly.

Among mourners Monday was actor Martin Sheen, a close friend of Snyder's who portrayed him in a 1985 television movie, ''Samaritan: The Mitch Snyder Story.''

Sheen, scheduled to deliver a eulogy at Snyder's funeral, said he believed Snyder didn't mean to kill himself.

''I think he struggled,'' said Sheen. ''I don't think he intended to do what he did. I think he was hoping someone would come in or the phone would ring.''

''He just went so far and he couldn't get back, but I promise you he tried to get back,'' he said. ''He was trying to say he had been hurt.''

Snyder's death came just days after a major defeat in the City Council, which voted to overturn the city's Initiative 17, a landmark 1984 voter-mandated law guaranteeing emergency shelter for anyone in need.

Snyder had been instrumental in the passage of the law, and had vowed to get it put back on this fall's ballot.

After his funeral Tuesday outside the shelter, Snyder's coffin was to be taken in horse-drawn carriage to the District Building, which houses City Council chambers. Homeless activists have vowed to fight to reinstitute Initiative 17 as a legacy to Snyder.

''Maybe now people fighting against us will come closer together. Maybe

they will bend a little,'' said Gary Morris, 46, who has lived at the shelter 60 days.

Fennelly, dressed in black, declined to answer questions about her relationship with Snyder.

''I am just running as fast as I can run away from the grief,'' said Fennelly, who worked 13 years with Snyder. ''Mitch is irreplaceable. He was a magical moment in time, and we can't bring him back.''

#90191u0516 07/10/1990 ~United Press International

NEW YORK (JULY 10) UPI - Photographs of the bloody Central Park scene where a jogger was raped and beaten showed she had been dragged about 40 feet across the grass before she was left to die in a mud puddle, a detective testified in the trial of three youths accused in the attack.

In testimony Monday afternoon, detective Robert Honeyman, a 17-year police veteran assigned to the unit that examined the area where the jogger was found, identified the woman's bloody shirt and discussed two dozen colored photographs he took of the crime scene.

The photographs depicted blood stains on the 102nd Street Transverse and a 15-inch by 18-inch wide mark apparently left by the jogger being dragged for about 40 feet over grassy ground.

He also identified the black jogging tights the woman was wearing and were pulled off by her attackers.

The trial was scheduled to resume Tuesday morning.

Earlier in the day, a detective testified that one of the teenagers broke down and wept on his mother's shoulder as he was taken to the station house for questioning.

Testifying as the trial of the three youths entered its third week in state Supreme Court in Manhattan, detective Jose Rosario was closely questioned by the efense and the prosecution on the behavior of 16-year-old Antron McCray the day after the attack.

The 29-year-old Wall Street investment banker, whose name has not been revealed because of the nature of the crime, was found lying in a mud puddle, bound, gagged and naked following a ''wilding'' rampage by about 30 youths in the park April 19, 1989.

She was gang-raped and so severely beaten that doctors gave her little chance to live.

Rosario said he went to McCray's home and asked that the youth report to the station and answer some questions.

Cross-examined by defense attorney Michael Joseph, Rosario was asked if McCray was ''laughing and joking'' on his way to the station house.

''No,'' he replied.

''In fact, didn't Antron have his head on his mother's shoulder and was crying?'' Joseph asked.

''Yes,'' Rosario said.

Under questioning by prosecuting attorney Elizabeth Lederer, Rosario said as he drove them to the Central Park Precinct, he told McCray's parents ''to tell Antron to tell the truth no matter how bad it was ... to tell them how much he loved them and that they will still love him no matter how bad the truth is.

''I observed tears in his eyes,'' Rosario said. ''He put his head on his mother's shoulder and was crying.''

On trial with McCray is Yusef Salaam, 16, and Raymond Santana, 15. All three are charged with 13 criminal counts, including attempted murder, rape and sodomy, and claimed their confessions to police were coerced.

If convicted, each faces a maximum sentence of five to 10 years imprisonment. All three were juveniles at the time of the attack. Other youths face similar charges and are awaiting trial.

In a related development, WNYW-TV reported that another defendant, Yusef Salaam, passed a lie detector test in which he said that he was not with the ''wilding'' gang when the woman jogger was attacked.

The station said the youth's family and attorney, Robert Burns, hired a certified polygraphist to question Salaam.

''It is true. He (Yusef Salaam) took the test and he passed it insofar as that female is concerned,'' Burns said. The test was performed by Nat Laurendi, a retired city police detective.

BEIRUT, Lebanon (JULY 10) UPI - A child playing soccer in a minefield set off an anti-armor landmine Tuesday, wounding himself and four other children at the demarcation line of the divided Lebanese capital, police

said.

Police said the incident occurred when a group of children entered the mined area along the Green Line between the Moslem neighborhood of Shiyah and the Christian-populated Ain El Rummaneh quarter to play soccer.

The child who stepped on a mine lost his leg and four of his friends were badly wounded in the incident along the line dividing Christian east from Moslem west Beirut, police said.

According to statistics by international organizations, more than 135,000 people, among them 40,000 children, have died since the Lebanese civil war erupted in 1975. Many others were wounded or crippled for life.

In southern Lebanon, a man was killed Tuesday when a bomb placed under a parked car in the village of Ghaziyeh north of the port city of Tyre, 46 miles from Beirut, blew up.

Police said three people were killed in the Christian town of Jezzine, 23 miles south of Beirut, during artillery exchanges between the Israeli-backed South Lebanon Army and Hezbollah extremists late Monday.

WASHINGTON (JULY 10) UPI - Pope John Paul II has accepted the resignations of bishops in Atlanta and San Diego and named a new bishop of Yakima, Wash., the U.S. Catholic Conference announced Tuesday.

Monsignor Rino Passigato, charge d'affaires at the Apostolic Nunciate in Washington, announced that the pope accepted the resignation of the Rev. Eugene A. Marino from the governance of the Archdiocese of Atlanta for personal reasons and ill health. The pope appointed Cleveland Auxiliary Bishop James P. Lyke as apostolic administrator of Atlanta.

The pope also has accepted the resignation of Bishop Leo T. Maher of San Diego, who recently turned 75. Maher is succeeded by the coadjutor bishop of San Diego, the Rev. Robert H. Brom.

Francis E. George, coordinator of the Cambridge Center for the Study of Faith and Culture, Cambridge, Mass., was named bishop of Yakima, Wash., to succeed Rev. William S. Skylstad who was named bishop of Spokane last April 17.

Lyke was born in Chicago, Feb. 18, 1939, and was ordained a priest June 24 1966. He was ordained auxiliary bishop of Cleveland Aug. 1, 1979.

Marino was born in Biloxi, Miss., May 29, 1934, and was ordained June 9, 1962. He was named auxiliary bishop of Washington, D.C., July 15, 1974, and named archbishop of Atlanta on March 15, 1988.

Brom was born in Arcadia, Wis., Sept. 18, 1938, and was ordained a priest on Dec. 18, 1963, in Rome for the diocese of Winona. He was named bishop of Duluth, Minn., March 25, 1983, and coadjutor bishop of San Diego on May 9, 1989.

Maher was born in Mount Union, Iowa, July 1, 1915, and was ordained as priest Dec. 18, 1943. He was ordained as the first bishop of Santa Rosa, Calif., April 5, 1962, and was named bishop of San Diego Oct. 4, 1969.

George was born in Chicago, Jan. 16, 1937, and ordained a priest Dec. 21, 1963, in Chicago. In 1973 he was elected provincial of the Central United States Province of the Oblates of Mary Immaculate in St. Paul, Minn.

ROCK HILL, SC (JULY 10) UPI - Vernon Grant, the illustrator who created the Kellogg's Rice Krispies characters Snap, Crackle, and Pop, died at the age of 88. Grant died Monday at Westminster Towers, a health care center, where he was being treated for a lung infection.

Snap, Crackle, and Pop are pixie-like characters with turned-up noses and pointed ears that have graced Rice Krispies boxes since the 1930s. Grant drew them after hearing a Rice Krispies jingle on the radio and took them to the N.W. Ayer agency in Philadelphia, which was handling the Kellogg's campaign. The agency snapped up the drawings, and Grant landed himself a job working for Kellogg's.

Over the next ten years the characters, which Grant referred to as "my children," earned him about $250,000.

But in the 1940s he lost his job with Kellogg's and a subsequent court battle over the rights to the characters, and with it the possibility of making a fortune through animation rights to the characters, which went on to be featured in dozens of television advertisements, right up to the present.

After World War II, Grant moved with his wife, Lib, and their two children, Chip and Kay, to a 670-acre farm just outside Rock Hill. There he continued his work as an illustrator, helping sell products for Gillette, Hershey, Eveready, General Electric, Oscar Mayer, Wrigley's, and Mennen.

Although Snap, Crackle, and Pop were the hallmarks of his long career, Grant remained active in his latter years, creating Glen the Frog, a green mascot featured at Rock Hill's annual Come See Me Festival. Funeral arrangements are incomplete.

#90191u0799 07/10/1990 ~United Press International

BEIJING (JULY 10) UPI - China reported expanded industrial production and an improved foreign trade balance Tuesday for the first half of this year, and the state press cited the figures as evidence of economic recovery after months of austerity-induced slowdown.

But the reports, carried by official newspapers, acknowledged the country remains troubled by the lasting impact of a nationwide austerity program imposed nearly two years ago to rein in record inflation and regain control of the economy.

The official Xinhua news agency said industrial production climbed 5.9 percent in June over the same month last year, although output for the first six months averaged out to the equivalent of $196.9 billion, only a 2.2 percent increase.

''The June growth rate, the highest monthly figure this year, is another indication that industrial production, which had declined earlier this

year, is recovering steadily,'' Xinhua said.

The China Daily newspaper reported that customs figures showed overall foreign trade dipped 3.1 percent in the first six months from the same period in 1989, but on the strength of a sharp decline in imports, improving the balance in China's favor.

Trade totaled $48.74 billion, with exports jumping 15.4 percent to $25.65 billion and imports plunging 17.7 percent to $23.09 billion, for a surplus of $2.56 billion.

The surplus was nearly double, $4.54 billion, when items such as foreign aid and imports for foreign investment are excluded, the General Administration of Customs report said.

The austerity-induced drop in imports, while contributing to poor growth, has also made China's foreign exchange reserves healthier after months of uncertainty following Western economic sanctions imposed after the June 1989 crackdown on the pro-democracy movement.

Domestically, the squeeze was eased this year as the government injected funds into the economy and loosened credit to pump-prime production. Factories had been forced to restrict production or shut down, idling millions of workers and increasing domestic debt.

''Since March, the government has readjusted macro controls, provided more operating funds for industry and tried to solve the problem of interlocking debts between enterprises,'' Xinhua noted.

After less than 1 percent industrial growth in January and February, output has risen steadily each month since, including in key industries such as iron and steel, textiles and consumer goods.

However, the reports said industry remains troubled by slow sales and thin profits. The China Daily said profit and tax revenue ''continues to plummet and production cost overruns are rampant,'' and that inventory ''continues to bulge.''

Further, the reports noted, foreign-funded enterprises, rural enterprises and private business provided virtually all the recovery strength while medium and large sized state-owned industries lagged far behind, with less than 1 percent average growth.

The trade figures, while in Beijing's favor, have sparked concern that other countries may consider trade action against China, whose economy is still heavily subsidized by the government, if their trade deficits with China continue to expand.

Chinese exports increased to eight of its 10 leading trading partners during the first half, including the United States, while imports fell from seven.

Direct exports to the United States rose 20.1 percent while imports of American-made goods dropped 15.1 percent during the first half, but the Chinese figures do not include U.S.-bound shipments exported through Hong Kong. Two-thirds of Chinese exports to the U.S. market are shipped through the British colony.

#90191u0808 07/10/1990 ~United Press International

ATLANTA (JULY 10) UPI - The school board fired controversial school Superintendent J. Jerome Harris because of a lack of ''mutual trust'' but agreed to pay his $112,500 annual salary until his contract ends in 1992.

The action Monday night apparently caught Harris by surprise. Sources said he did not know he was about to be fired until shortly before the board went into executive session.

Harris had little comment as he left the meeting.

''I came here to stand up like a man and I leave the same way,'' he said.

Harris, who was hired from the New York City school system to replace Alonzo Crim Aug. 1, 1988, had been at odds with many board members for some time. Some teachers also complained that he was arrogant and harsh.

The board last December fired Associate Superintendent Ronald Lewis after reprimanding Harris for concealing charges of plagiarism against his aide. It also scolded Harris for failing to renew his state superintendent's certificate and ordered him to do so or lose his job. He promptly complied.

In March, Harris was criticized for spending $400,000 on consultant fees during a six-month period.

The school board, in a prepared statement after the meeting, said it had voted to relieve Harris immediately of his duties as head of the district's 60,000 students.

''The board regrets the need to take this action but has concluded a change in leadership must be made,'' the statement said.

''During the period of nearly two years while Dr. Harris has been superintendent, the school system has not had the sense of teamwork which is necessary to achieve and sustain progress and there has not been a good working relationship between the board and the superintendent based on

mutual trust and cooperation,'' the board said.

The statement said the problems must be corrected for the school system to perform its mission for the benefit of students and community.

School board President D.F. Glover said a search committee would be appointed soon to seek a permanent successor to Harris.

Harris's special assistant, Lester W. Butts, the first principal of Douglass High School, was named temporary superintendent.

TOKYO (JULY 10) UPI - All Nippon Airways said Tuesday it plans to purchase about 30 medium-sized aircraft worth about $3.3 billion, starting around 1995.

''An expert commission will be inaugurated Wednesday to select the aircraft to be purchased,'' said a spokesman for the airline.

Among the aircraft to be reviewed will be the Boeing 777, currently under joint development by the Seattle-based aircraft maker and Japanese heavy industry companies, the McDonnell-Douglas' MD11 and the A330/A340 of Airbus Industries of Europe, said the official, who declined to be identified.

''We expect the commission to finalize the review and come up with a proposal in about three or four months,'' the official said.

ANA, Japan's top domestic airline, is expanding into international routes, and expansion of its fleet is aimed at meeting growing demand for air traffic in the mid-1990s, the official added.

Japan's three major airport construction and expansion projects are scheduled to be completed around 1995. They include construction of a new international airport in Osaka, Japan's second largest city and business center about 250 miles west of Tokyo, expansion of the New Tokyo International Airport at Narita, about 40 miles east of Tokyo, and expansion of Haneda International Airport in downtown Tokyo.

ANA said in March it would purchase a total of 20 MD11s between 1993 and 1998.

CAIRO, EGYPT (JULY 10) UPI - Syrian President Hafez Assad plans to visit

Egypt for the first time in 13 years, arriving in Cairo Saturday for two days of meetings, Egyptian officials said Tuesday.

A spokesman for the Egyptian Foreign Ministry said Assad would meet with Mubarak on Sunday to discuss developments in the Arab world, peace-making efforts in the Middle East and bilateral relations between Egypt and Syria.

It will be Assad's first visit to Egypt in 13 years, Egypt's Middle East News Agency said.

Mubarak made an official visit to Syria in early May and returned to Damascus May 30, on his way back from the Iraqi capital of Baghdad, to brief Assad on the outcome of the emergency Arab summit meeting held there late May.

Assad boycotted the summit because he believed the agenda was not extensive enough.

In December, Syria and Egypt restored full diplomatic ties, which were broken 12 years ago when former Egyptian President Anwar Sadat visited Jerusalem.

(JULY 10) UPI - Officials in San Antonio, Texas, say a television reporter who was jailed for nearly two weeks for refusing to turn over his notes in a murder case has agreed to comply. Reporter Brian Karem agreed after his sources voluntarily revealed themselves. Karem says today he'll confirm the sources who helped him obtain a telephone interview with accused cop-killer Henry David Hernandez.

Communist rebels in the Philippines are demanding more than 200-thousand dollars in ransom for a Japanese technician kidnapped on a central island. But so far there's been NO ransom demand for kidnapped American Peace Corps volunteer Timothy Swanson. The Japanese technician was kidnapped May 29th on the island of Negros, 300 miles south of Manila. Swanson was taken June 13th.

Rebels in the African nation of Liberia say they will attend peace talks today in neighboring Sierra Leone. Rebel radio says guerrillas of the National Patriotic Front are willing to accept a cease-fire call by President Samuel Doe and attend the talks. Despite the report, gunfire and rockets echoed through a suburb of Paynesville, six miles from Doe's seaside mansion.

In San Francisco, a lesbian couple's ordinations as Lutheran ministers are the focus of a church disciplinary hearing. The Lutheran church says

homosexuals can be pastors as long as they do NOT practice their sexuality. 42-year-old Ruth Frost and 32-year-old Phyllis Zillhart told the panel they represent homosexual pastors who are still ''in the closet.''

TOKYO (JULY 10) UPI - Japan's sales of used cars in the first half of 1990, excluding minicars, reached a record high of 2,617,256 units, up 5.1 percent over a year ago, the Japan Automobile Dealers' Association said Tuesday.

The previous record of 2,489,951 was set in the 1989 first half. The association attributed the brisk sales to robust personal spending.

The association added sales of passenger cars grew 5.9 percent to 2,199,726 units. Sales of compact cars accounted for 148,344 units, up 29.2 percent, while those of subcompact cars grew 4.6 percent, it said.

Sales of trucks rose a modest 0.4 percent to 383,354 units while those of buses fell 4.3 percent to 6,906 units, the association said.

SLIDELL, La. (JULY 10) UPI - City Council President Bob Callahan has decided if flag burning cannot be outlawed, it should be taxed.

Callahan planned to propose a Criminal Code amendment Tuesday to require anyone who burns a United States flag to obtain a $100 permit before doing so. Without the permit, the burner could be hit with a 90-day jail sentence and a $500 fine.

''I decided if they want to desecrate the flag, let them pay for it,'' said Callahan, a veteran of World War II and the Korean War. ''I feel very strongly about the protection of the flag.''

A public hearing on his proposal will be held at the Aug. 14 council meeting.

RANGOON, BURMA (JULY 10) UPI - The Burmese Communist Party, riven by dissension, has virtually collapsed after nearly 40 years of futile military struggle, said a senior party leader who surrendered recently.

''The BCP now has only nine central committee members (out of more than 30) and its fighting force is negligible,'' said former central committee member Sai Aung Win.

Sai Aung Win, 53, told reporters at a press conference arranged by the military government that he surrendered on June 29 because he was thoroughly disenchanted with the party's policies and leadership.

He said the party's fortunes began to wane in 1968 when its founder and leader was assassinated in a jungle hideout north of Rangoon.

The party, formed in 1939, began armed struggle against the government in 1948 with support from China and from ethnic minorities fighting domination by the central government.

GENEVA (JULY 10) UPI - English soccer clubs will be allowed back into European club competition this fall after being banned for five years for the violent behavior of their fans, the sport's European governing body said Tuesday.

The ban still applies to Liverpool, whose fans' reputation for hooliganism is unabated.

British Sports Minister Colin Moynihan, backed by Prime Minister Margaret Thatcher, had recommended that English clubs be readmitted to European club competition under strict controls.

The decision to allow the English clubs to compete in upcoming Cup competitions was made after three hours of discussion by executives of the UEFA, European soccer's governing body, in a lakeside hotel in Geneva.

''We decided that Aston Villa and Manchester United are back in business again,'' UEFA President Lennart Johansson told reporters.

English clubs were banned from European club competition in 1985 after Liverpool fans went on the rampage at Brussel's Heysel stadium during the European Champions Cup final against Juventus of Italy. Thirty-nine people were killed.

Sources said Moynihan suggested a cautious return to an initial two of the three yearly UEFA competitions - Cupwinners Cup, Champions Cup and UEFA Cup.

Moynihan's report urged strict conditions on the readmission of English clubs to Europe, including bans on pre-game sales of alcohol, pre-sales of

all tickets, segregation of fans and close police cooperation between the countries involved in each match.

Johansson said English clubs would be ''under the same rules and regulation regarding security as all other clubs. We are sure the English Football Association will take proper measures.''

#90191u0896 07/10/1990 ~United Press International

(JULY 10) UPI - Stock prices tumbled Tuesday on the Tokyo Stock Exchange, with the market's main indicator losing a little more than 1 percent of its value.

Dealers said the loss, in very thin trading, resulted from rumors about a rise in Japanese interest.

The 225-share Nikkei Stock Average ended the day down 385.28 yen at 32,152.43. It had gained 93.16 yen Monday.

The broader-based Tokyo Stock Price Average, or TOPIX, dropped 24.64 points to end at 2,337.77. TOPIX lost 1.79 point Monday.

Volume was a small 350 million shares, down from 401.67 million Monday.

Elsewhere in Asia, stock prices rose sharply on the Hong Kong Stock Exchange, breaking through the 3,400-point level to set the fifth post-1987 crash high in seven sessions.

The Hang Seng Index gained 23.01 points to close at 3408.16. The rise followed an increase of 27.54 points Monday.

Volume was a moderate 2.151 billion units, compared with Monday's turnover of 1.846 billion units.

Share prices closed lower on the Singapore Stock Exchange with investors adopting a wait-and-see stance as the market remained without clear direction.

The Straits Times Industrial Index fell 9.04 to 1,523.46,.

The All Singapore Index edged up 0.56 to 434.26.

Volume was a modest 59.70 million units.

Share prices closed lower on the Sydney Sharemarket, with the attention focused on media giant News Corp. in otherwise quiet trading.

The All Ordinaries index lost 5.6 points to close at 1,581.2. Volume was 101.1 million shares.

#90191u0908 07/10/1990 ~United Press International

BOSTON (JULY 10) UPI - A Boston museum director, in an attempt to ward off controversy surrounding an upcoming Robert Mapplethorpe photography exhibit, said the show has wide support among art lovers.

Institute of Contemporary Arts Director David Ross said membership at the museum has swelled by 50 percent in recent weeks and city officials have also indicated they will not interfere with the exhibit, "Robert Mapplethorpe: A Perfect Moment."

Among the exhibit's 120 works are several graphic homoerotic photographs that have provoked demonstrations in some stops of a six-city tour and led to attacks in Congress on the National Endowment for the Arts, which funded development of the exhibit, though not the ICA showing. The Mapplethorpe exhibit visits the ICA from Aug. 1 to Oct. 4, concluding a seven-city tour.

"Our membership, which has always been at about 2,000, is now at 3,000 and membership is increasing every day," Ross said. "People are voting their support with their checks and showing they are willing to support art regardless of controversy." Ross said groups including the Coalition for Freedom of Expression plan to hold support rallies to counter expected demonstrations against the exhibit.

When the exhibit visited Cincinnati, the Contemporary Arts Center and its director, Dennis Barrie, were indicted April 7 on obscenity charges. A trial has been set for September.

Ross said he refused to remove some of the exhibit's more controversial photos, which include black and white male nudes in intimate scenes and nude children, both in defense of freedom of expression and as a personal promise to Mapplethorpe. The photographer helped select some of the works as he lay dying of AIDS at New England Deaconess Hospital in early 1989. "He's an artist who deserves to be seen in his totality. To edit this exhibit would be an egregious act," Ross said.

Former Boston Mayor John Collins and the Catholic League for Religious and Civil Rights have called on Mayor Raymond Flynn to ban the exhibit, since the ICA is housed in a city-owned building. League Director Philip Lawler said the exhibit would amount to a "taxpayers' subsidy of obscenity." But Flynn's adviser on the arts, Bruce Rossley, said last week that he did "not think the city will be taking any position" on the issue.

#90191u0960 07/10/1990 ~United Press International
BEIJING (JULY 10) UPI - The wife of a Chinese intellectual arrested as a leading ''black hand'' in last year's ill-fated democracy movement proclaimed her husband's innocence Tuesday and begged the government to grant him an open trial.

Hou Xiaotian, 27, wife of jailed dissident Wang Juntao, also planned a trip on Wednesday - Wang's 32nd birthday - to Beijing's maximum-security Qincheng Prison to deliver summer clothes and a birthday card to her husband, who she last saw in May 1989.

"I don't know anything about his conditions - not even if he is dead or alive,'' Hou said in an interview. She said she has only second-hand confirmation of his imprisonment at suburban Qincheng, China's leading political prison.

Hou wrote a lengthy and detailed appeal to China's government and it was delivered to government officials Tuesday. It was the first open display of dissent since three prominent dissidents issued an open letter on the eve of the June 4 anniversary of the deadly crackdown on peaceful protesters in Beijing's Tiananmen Square. Their letter sought freedom for prisoners held since last year.

A copy of Hou's 15-page appeal was obtained by United Press International. It quotes extensively from Wang's published writings, meticulously establishing his belief in Communist-led reform and conciliation and imploring officials to grant him an open trial.

Wang, a prominent social scientist and editor who published frequent analyses of the student-led democracy movement through last spring, was arrested Oct.24 in southern Guangdong province when authorities infiltrated an ''underground railroad'' through which fugitive dissidents were fleeing to Hong Kong.

Wang's name led a nationwide arrest warrant listing alleged leaders of the pro-reform movement, and official reports label him a behind-the-scenes ''black hand'' and ''chief criminal instigator, organizer and commander of the counterrevolutionary rebellion.''

China has announced the release of hundreds of prisoners detained in last year's crackdown but acknowledges that more than 300 still are held in Beijing alone awaiting processing. Thousands of others are believed to have been sentenced to prison or are awaiting trial in other cities.

Wang's wife was detained in November and was among 211 movement participants freed on April 23. She had only three hasty visits with her husband in the month preceding the June 4 crackdown and has not seen him since.

She insists her husband is a Chinese patriot who through words and actions consistently opposed violence while advocating peaceful negotiations between student leaders and Communist Party officials.

''He always had a glorious hope: that the students and the government could solve their problems through reason and compromise,'' she said. ''He never supported turmoil and never took part in any conspiracy, much less organize a counterrevolutionary rebellion.

''They've characterized it as a counterrevolution so they need counterrevolutionaries,'' she said. ''But I have faith and I hope that the Communist Party and the people will treat their own son justly.''

Hou said all June 4 prisoners should be freed immediately but at the same time fretted about the fate of those still behind bars.

''The more people who are freed, the more dangerous it is for those remaining inside,'' she said.

Hou said she was stunned last month when Beijing allowed dissident astrophysicist Fang Lizhi and his wife to end their yearlong refuge at the American Embassy and go into exile.

''Why is my husband not out? I don't understand,'' she said. ''Fang Lizhi is so much more famous and they let him go. What legal basis is there for freeing Fang but not Wang Juntao?''

She wrote that her husband feared for his life but went underground only ''to avoid the irrational time that followed June 4" and had no plan to flee China.

''He knew that he would be imprisoned but insisted on not going into exile '' she wrote. ''If he were not such a committed son of his country, would he have acted so stupidly?''

''I appeal for fair and just treatment of Wang Juntao and all other innocent intellectuals,'' she wrote, saying she had no choice but to speak out on Wang's behalf and calling him "a caged tiger ... whose voice no one

can hear."

''Wang Juntao was always reasonable. The more you arrest reasonable people like him, the more unreasonable people there will be in society and the more unstable elements will emerge.

#90191u0985 07/10/1990 ~United Press International

TEHRAN, IRAN (JULY 10) UPI - Iran's state radio suggested again that one or more Western hostages in Lebanon may soon be freed and sources in the Lebanese capital said the parties involved were finalizing details of the release.

The Iran radio report Monday was the second hint from Iran that a hostage held by pro-Iranian Shiite radicals in Lebanon might be released soon. The official Islamic Republic News Agency Saturday quoted sources in Beirut as saying a Western hostage, probably a European, would be released soon.

In Damascus, Syria, however, Foreign Minister Farouk Sharaa told reporters Tuesday he did not expect any developments during the day on the hostage situation. ''Nothing today,'' he said.

Iranian sources in the Syrian capital earlier told United Press International that Irishman Brian Keenan, an English teacher at the University of Beirut, was the hostage selected for release. They said they expected he would be released within days. Western analysts in Tehran also said they believe Keenan was the hostage to be freed.

A pro-Syrian Moslem militia source said Monday the parties involved in the release were ''finalizing the practical details of the release.''

Sources in Syria said they expected Anglican Church Envoy Terry Waite would be next the next captive to gain freedom after Keenan.

No group claimed responsibility for the captures of Keenan or Waite, and Hezbollah has denied involvement in hostage-taking. But Walid Jumblatt, the Druze militia leader who had provided security for Waite, charged publicly that the church envoy was being held by Hezbollah.

Sixteen Westerners are being held as hostages in Lebanon, among them six U.S. nationals, four Britons, two West Germans, two Swiss, an Irishman and an Italian.

Keenan, 39, a Belfast native who holds dual Irish and British citizenship, was an English teacher at the American University of Beirut when abducted April 11, 1986, in Moslem west Beirut on his way to work.

Waite was abducted in west Beirut Jan. 20, 1987, while attempting to negotiate the release of other hostages.

Captors usually notify the media in advance of a hostage release through statements to the press, sometimes accompanied by a photograph of the hostage expected to be freed.

Over the past two days, Iranian officials in Tehran have remained silent, on and off the record, on the possibility of a Western hostage being released in Lebanon.

Last week, Iranian President Akbar Hashemi Rafsanjani said Iran would respond favorably toward the West for the kindness shown by Western countries toward victims of the June 21 earthquake that killed tens of thousands in northern Iran. ''When kindness is shown, naturally it is effective,'' he said.

Iran said it played a role in securing the release of two U.S. hostages in April, but Tehran's efforts appeared to wane after its call for a reciprocal show of good will from Washington produced no tangible results.

According to British press reports, Ireland was the first country to fly relief supplies into Iran after the earthquake. And three Irish parliamentarians who visited Tehran recently demanded the release of 300 Lebanese Shiite prisoners held by the South Lebanon Army, Israel's ally in southern Lebanon.

Release of 300 Arabs imprisoned by the SLA in southern Lebanon is one of the hostage-holders' major conditions for release of detainees. The Hezbollah official in Beirut said one-third of the detainees held by the SLA at Khiam Prison in southern Lebanon are Hezbollah members.

In Dublin, a Foreign Ministry spokesman said preparations were under way for Keenan's possible release but emphasized his freedom was not guaranteed.

''We have no confirmation that it is to be Keenan, but we are working in the hope that it will be. We have no firm foundation on which to say 'go ''' spokesman Michael Forbes said.

Keenan's sisters, Brenda Gillham and Elaine Spence of Belfast, said Sunday they had been advised by the Irish Foreign Office to be ready to fly out of Ireland on a moment's notice. They said the government told them a plane is on standby waiting to take them to Damascus.

#90191u0993 07/10/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 10) UPI - Two veteran shuttle commanders were grounded and stripped of their commands for violating flight safety rules, an unprecedented move that sends a stern message to NASA's elite astronaut corps.

"I guess there are two messages here," chief astronaut Daniel Brandenstein said Monday. "One is we have policies and they're there for a purpose and we expect them to be followed. The other message that we hope to come out of this is people can make a mistake and recover from it and continue their career."

The disciplinary action came after shuttle skipper Robert "Hoot" Gibson, 43, was involved in a collision during a weekend air race in Texas that left a second pilot dead and raised questions about the enforcement of rules banning high-risk activity by expensively trained astronauts.

Donald Puddy, director of flight crew operations at the Johnson Space Center, said in a statement that Gibson and veteran shuttle skipper David Walker, 46, had been removed from their upcoming missions, scheduled for 1991.

Gibson also was barred from T-38 jet trainer flights for one year while Walker was grounded for 60 days. Neither pilot will be eligible for reassignment to a shuttle mission until they are back on T-38 flight status.

The weekend air show crash was cited in Gibson's case but NASA refused to discuss what Walker did to warrant such discipline. Sources, however, said Tuesday that Walker was grounded for repeatedly flying his T-38 jet trainer in violent weather.

On at least two occasions, the shuttle commander returned his jet with hail and lightning damage, the sources said. Walker also was involved in a close encounter with a commercial airliner in 1989 while flying a T-38 near Washington but officials said that was not the reason for the disciplinary action. Puddy's move marks the first time astronauts assigned to flight crews have been grounded for other than medical reasons.

Walker will be replaced by veteran shuttle skipper Frederick Gregory. A replacement was not immediately named for Gibson, who had been in training for a December 1991 flight aboard the shuttle Discovery to carry two European science satellites into orbit. Walker, a veteran of two shuttle flights, was in training to command the shuttle Atlantis during a secret military flight set for a March 1991 takeoff.

The astronauts violated a rule established June 21, 1988, in a memo written by Puddy that clearly banned shuttle pilots named to upcoming missions from participating in high-risk activities. "Without backup

flight crews, NASA's responsibility is to preserve the health and safety of existing, named crews," the memo said.

Astronauts named to shuttle crews were ordered not to participate in high-risk recreational activities that could "expose crew members to major or fatal injuries." Such activities include "automobile, boat, airplane, and motorcycle racing, parachute jumping, and snow skiing," the memo said.

Gibson's air race was a "clear violation of the policy," NASA's statement said Monday. As for Walker, officials said he was grounded for "infractions of the Johnson Space Center aircraft operating guidelines."

NASA's astronaut safety regulations came in sharp focus June 17, 1989, when astronaut S. David Griggs, veteran of a 1985 shuttle flight, was killed in Arkansas while practicing acrobatic maneuvers in a World War II-vintage fighter. Griggs had been in training to serve as co-pilot of Discovery for a military mission last November. He was replaced by veteran shuttle flier John Blaha.

Gibson, veteran of three shuttle flights including the second post-Challenger mission, is one of NASA's most popular astronauts. He is married to fellow astronaut Rhea Seddon, also a shuttle flight veteran in training for an upcoming flight.

But during an air show race Saturday in New Braunfels, Texas, Gibson's plane and a Formula-1 single-seat aircraft piloted by Henry "Rocky" Jones of Newport News, Va., were involved in a collision.

Jones and Gibson were racing with five other planes in the "Aerofest '90" air show when their planes bumped, police said. Jones was killed instantly after spiraling into a cornfield, but Gibson maintained control of his aircraft and was not injured.

Gibson served as co-pilot of the shuttle Challenger during his first space flight in February 1984 and as commander of Columbia in January 1986, the last mission before the Challenger disaster. Gibson's third flight came in December 1988 when he served as commander of the shuttle Atlantis for a military flight.

Walker's first flight came in November 1984 when he blasted off as co-pilot of the shuttle Discovery for a daring satellite rescue mission. He later served as commander of Atlantis for the Magellan mission.

#90191u1029 07/10/1990 ~United Press International
VIENNA (JULY 10) UPI - Albania was admitted as an observer Tuesday to preparatory meetings for the Nov. 19 Paris summit on European security amid warnings to the Stalinist Tirana government to respect human rights.

It was the second time the tiny Balkan country was allowed to sit in on sessions of the Conference on Security and Cooperation in Europe, which includes the United States, Canada and all European nations except Albania.

Tirana, breaking with its long tradition of isolation, was admitted in June as an observer to a CSCE conference in Copenhagen and has asked to become a full member of the 35-nation body.

The decision to admit communist Albania was made at the opening round of a series of planning meetings for the CSCE summit in Paris, which is to address the basic architecture of Europe in the post-Cold War era.

But several delegations, including the United States', said Tirana must show dramatic improvements in human rights if it is to become a full member.

''While we welcome the interests of Albania in becoming an observer to this conference - and we understand that interest as being an important step by Albania toward rejoining the family of European nations - (this) also has implications for the repsponsibilities of Albania with respect to its policies and practices,'' said John Maresca, the U.S. ambassador to the talks.

''In agreeing to admit Albania as an observer we do not condone the Albanian government's policies or recent actions by the government of Albania,'' Maresca said.

Maresca was referring to Tirana's slow response to the crisis sparked by the storming of foreign embassies last week by thousands of Albanians seeking asylum. Albania permitted 51 refugees to leave the country, but the fate of about 6,000 others remained uncertain.

#90191u1032 07/10/1990 ~United Press International
(JULY 10) UPI - The word around Houston today is ''compromise.'' Aides to President Bush and his economic summit partners meeting in Houston are hammering out a statement displaying a unified stand in the face of a new world order. U-S officials laid out a three-point proposal to the leaders of the world's most powerful democracies. In essence, it would paper over differences between Washington and the European allies on economic aid to

the Soviet Union.

The Senate begins debate today on a key civil rights bill that would protect minorities in the work place against job discrimination. The legislation would reverse a series of U-S Supreme Court decisions last year that one senator called an ''onimous retreat'' from the high court's historic role in protecting minorities.

Soviet President Gorbachev gave a thorough tongue-lashing to conservative critics of the 28th Communist Party Congress today. He said anyone who disagrees with the way he's running things should quit the party. Gorbachev reminded delegates that the Communist Party NO longer has a monopoly on power.

#90191u1047 07/10/1990 ~United Press International
BRUSSELS, BELGIUM (JULY 10) UPI - Soviet Foreign Minister Eduard Shevardnadze has asked the Warsaw Pact to devise a united response to the olive branch offered at last week's NATO summit, East Germany's foreign minister said Tuesday.

Markus Meckel said Shevardadze wrote to other Warsaw Pact foreign ministers ''in order to organize a response'' to the landmark London Declaration issued by the 16 NATO leaders last Friday.

The initial Soviet reaction to NATO's peace offering was ''very positive '' said Meckel, who met for two hours with NATO officials at the Western alliance's headquarters.

Meckel declined to disclose details of the Shevardnadze letter, saying Warsaw Pact countries must discuss it first.

NATO Secretary General Manfred Woerner will deliver the 23-paragraph summit declaration to Soviet President Mikhail Gorbachev in Moscow on Saturday.

Among other things, the declaration offers to accredit Warsaw Pact delegates to NATO and calls for the two military alliances to issue a joint policy of non-aggression.

Meckel, who appeared at a news conference with Woerner, said the declaration was ''a clear step toward greater transparency'' for NATO.

However, he said there are ''strong anxieties in East Germany about membership in NATO, so it has to be made clear very convincingly what this means for East Germany and the Soviet Union.''

The London declaration, which outlined sweeping strategic changes in NATO, was intended to help win Soviet acceptance of a unified Germany in the

Western alliance.

''We have to explain to the public in the eastern part of Germany what NATO is, that this is an alliance that is completely defensive,'' Woerner said.

Meckel said he told NATO ambassadors he favored a troop ceiling of 300,000 in a united Germany as part of the conventional forces in Europe (CFE) talks in Vienna.

''I had the impression that this might be acceptable to NATO, too,'' he said.

Woerner interjected that Meckel's ''impression'' was not based on his meeting Tuesday with NATO ambassadors.

''We all know that this matter has to be decided by the Germans, by all Germans, and that means a united Germany, so nobody commented on that,'' said NATO's top official.

Although some West German officials have mentioned a figure of 300,000 troops in a united Germany, others have suggested a figure closer to 400,000. The consensus within West German Chancellor Helmut Kohl's government seems to be somewhat higher than 350,000.

NATO leaders in London said they were prepared to give a commitment on German troop levels as part of the CFE talks. Previously, West Germany resisted any negotiations that ''singularized'' German troops.

NEW YORK (JULY 10) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 72.00-73.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 131.60 c-lb.

Lead, common, U.S. primary producers 48.00-50.00 c-lb.; U.S. non-primary (secondary) producers 49.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.23-$4.45 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $115.00-118.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $483.50-$487.00; dealer-approx., $482.00-$486.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $102.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $106.13 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 283.00 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 87.00-87.75 c-lb.

SAINT-GERVAIS, FRANCE (JULY 10) UPI - Thierry Claveyrolat of France won the 10th stage of the Tour de France cycling classic Tuesday but Ronan Pensec took the leader's yellow jersey for the first time, surpassing Steve Bauer in the mountainous 70.5 miles from Geneva to Saint Gervais, organizers said.

Claveyrolat finished first with an unofficial lead of 1 minute 53 seconds over Uwe Ampler of East Germany, who placed second, followed by Charley Mottet of France, who finished third.

Claveyrolat's countryman Pensec took the ''yellow jersey'' standings lead after outstripping previous standings leader Bauer of Canada, who had difficulty completing the final grueling 3 miles of the stage.

(JULY 10) UPI - President Bush and other Western leaders are trying to put to bed the contentious issues of Soviet financial aid, global trade reforms and the question of relations with China. It is Day Two of the economic summit in Houston. President Bush told reporters as the session begin that things are- his words now- ''close to a resolution.''

Iran's state radio reports that the parties involved are completing details for the release of a Western hostage in Lebanon. Iranian sources in the Syrian capital say the captors have chosen to free Irishman Brian Keenan within the next few days. 16 Western hostages are believed to be on the waiting list.

The first of some six-thousand Albanian refugees are tasting freedom today after 51 of them arrived by plane in Prague, Czechoslovakia. The Czechoslovak news agency reports that only two of the political refugees have asked to remain in Czechoslovakia... the rest want to go to the United States, Canada or Australia.

Rumors that the Kenyan military is under orders to shoot pro-democracy demonstrators on sight have quelled widespread rioting in Nairobi. But scattered fighting continues in the countryside. Unconfirmed reports say that as many as 10 people have died during protests against the nation's one-party system.

A U-S military team headed to Hanoi today for talks to improve co-operation on resolving the fates of about 16-hundred Americans missing in Vietnam. A U-S Embassy spokesman in Bangkok, Thailand, says three days of negotiations are scheduled to begin soon after the six-man team arrives in Hanoi.

#90191u1189 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - A French doctor who has worked extensively with the controversial abortion pill RU-486 said Tuesday women prefer the method to surgical abortion because it is gentler, ''more natural'' and less intrusive.

Dr. Elisabeth Aubeny of the Broussais Hospital in Paris said nearly one of every three abortions now performed in France is induced by the RU-486 and prostaglandin method, a synthetic hormone that causes uterine contractions and resembles a heavy menstrual period.

''Most of the women found RU-486 to be a 'gentler' alternative to surgical abortion, which they described as 'physically aggressive' or 'intrusive ''' she said. ''They described the RU-486 and prostaglandin method as 'more natural' than surgical abortion.''

Aubeny made her comments at a news conference called by the Reproductive Health Technologies Project that is pushing for more public awareness of RU-486 and calling for increased U.S. scientific research and testing of the pill.

The pill was developed in France by the pharmaceutical firm Roussel-Uclaf but the firm has been reluctant to seek marketing permission in the United States because of the volatility of the abortion debate and threats by opponents of legal abortion to boycott other products and because of the maze of product liability laws that could subject the company to suits.

In 1983, the Food and Drug Administration issued a testing permit to the non-profit Population Council for research on the drug. About 300 women have received RU-486 at the University of Southern California.

In France, the drug is taken near the beginning of pregnancy - around the seventh week - under strict supervision. Taken orally as a pill and followed two or three days later with an injection of prostaglandin,

French testing has found the method to be about 96 percent effective.

''RU-486 is very tightly controlled in France,'' Aubeny said. ''It is not available by prescription. It can only be administered in authorized clinics and hospitals.

''In fact, it is easier to get morphine than RU-486,'' she said.

Aubeny also said indications from the French testing suggest that women who choose to use the RU-486 method of aborting emphasize ''the high level of personal responsibility its use requires.''

''RU-486 requires that the woman become an active participant in the process,'' she said. ''With RU-486 and protaglandin it is the woman who monitors the progress of the miscarriage. She observes the expelled tissue and she determines when the abortion has occurred.''

Dr. Joseph Speidel, president of the Population Crisis Committee, predicted the drug would eventually be available in the United States despite the protests of the anti-abortion movement.

''I don't think you can stop a scientific breakthrough,'' Speidel said. ''But I don't think it is going to happen very soon.''

Speidel also suggested that the drug could be introduced into the United States for other uses than abortion. It has been looked at as a possible treatment for Cushing's Syndrome, a sometimes fatal disease resulting from an excess production of cortisone. Some research also suggests it could aid in the treatment of breast cancer, glaucoma and infertility.

But he stressed the political climate - both the debate over legal abortion and product liability law - would make Roussel-Uclaf ''very cautious'' about entering the U.S. market despite the profits to be made.

Marie Bass, co-director of the Reproductive Health Technologies Project, said the group now is simply trying to raise the issue and that ''women's voices and those of the mainstream medical establishment ... will demonstrate that public opinion is on their (Rousell-Uclaf) side.''

#90191u1210 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - A congressional report Tuesday criticized the Justice Department for trips Attorney General Dick Thornburgh and FBI Director William Sessions took on planes the FBI seized from drug smugglers.

The report prepared for a House panel by the General Accounting Office,

the investigative arm of Congress, said the Justice Department sidestepped government rules by not determining if the trips could have been made on commercial flights or with chartered aircraft.

In the report the Justice Department said it used the FBI planes - three among the 84 the FBI owns - to provide security for Thornburgh and Sessions because there had been numerous threats on their lives. In addition, it said it did not consider using commercial planes or charter services because the trips were for inherently governmental functions and government flight rules allow an exception in that case.

The report did not suggest that any trip was improper. And it noted that in cases where the wives of either official went along, or in cases where the travel was personal, the government was properly reimbursed.

The GAO said that although the Justice Department did not compare costs of using the planes to commercial or charter services, Office of Management and Budget guidelines say that air transportation of personnel is an activity that should be compared to commercial services to see whether the trip can be made cheaper commercially.

The report said that while the GAO agreed that the security needs of the attorney general and FBI director may not be met on regularly scheduled airlines, those needs could be met with charter services.

''Thus, Justice officials responsible for the executives' security should determine whether such services are satisfactory. If they are, private aircraft services should be used according to (OBM guidelines) if they are less expensive than using government aircraft,'' the report said.

The report said the FBI did not have cost data on its planes in part because the Justice Department concluded that use of the aircraft was not subject to the OMB requirement to check operating costs against the commercial market.

The OMB rules declare that flights that are ''inherently governmental'' may not be contracted out.

In response to the report, Justice Department spokesman Dan Eramian said, ''The bottom line here is we saved money by using aircraft which had been seized from criminals. If we had gone out and leased aircraft, we would have taken a large dose of criticism for wasting the taxpayers' money.''

The FBI does not own any aircraft able to make an unrefueled transcontinental trip, and when Thornburgh or Sessions travel out of the country they take commercial or military flights.

Shortly after he became attorney general in 1988 Thornburgh cut back on

Justice Department employee travel. Last year he came in for criticism for a trip he and five aides made to Hawaii aboard an otherwise empty Boeing 727 owned by the government. That flight was defended as the cheapest that could be made on a government plane that could travel the distance and also was available.

The report examined 75 trips the two men took between them from August 1988 to July 1989. Most were to give speeches, attend meetings or visit field locations. Thornburgh made 39 trips and Sessions made 36 trips.

Rep. Robert Wise, D-W.Va., head of the House Government Operations subcommittee on government information, told Thornburgh and Sessions in a letter that if the planes are not needed by the FBI, they could be sold and nearly $3 million could be added to a government drug proceeds forfeiture fund, money that could pay for extra agents.

Alternatively, he said, the planes could go to the Immigration and Naturalization Service or the Drug Enforcement Administration.

It identified one of the planes as a 24-year-old Sabreliner, a twin-engine jet often used in the business community. The makes of the other two planes, one a seven-place turboprop and the other a five-place turboprop, were not identified for security reasons.

#90191u1213 07/10/1990 ~United Press International

PORTLAND, Ore. (JULY 10) UPI - The Army will close 50 ROTC units on university campuses nationwide as part of long-range reductions in the budget and the demand for new officers, Secretary of the Army Michael Stone said.

The demand for new officers will decrease in coming years as the Army reduces its size and changes its role in American life, Stone said Monday in a speech to the World Affairs Council of Oregon.

''We can't afford to keep them open any more because we don't need the officers in the smaller service,'' he said.

An announcement on the reductions is expected later this week.

Stone did not indicate which schools' programs would be cut but after the speech, he said the cuts will affect every state with Reserve Officer Training Corps programs. He said some reductions involve consolidating extension centers on smaller campuses into the larger host programs on larger campuses.

Stone outlined the role the Army will have in the years ahead as the

budget and the military threat from other countries are pared down.

''The world is changing and changing for the better,'' he said. ''It's changing the role and the mission of the U.S. Army and all the services.''

But Stone warned that the Soviet Union has not yet substantially cut its arms production and that American cannot let down its guard.

The Army's new missions will include environmental restoration and tracking the drug trade, Stone said.

The Army now has 764,000 people on active duty, according to a study released Monday by the Congressional Budget Office. Stone estimated that number will drop to between 500,000 and 600,000, while the 400,000 civilian employees probably will drop by about 58,000, or 15 percent.

-30- 1929

#90191u1217 07/10/1990 ~United Press International

DETROIT (JULY 10) UPI - General Motors Corp. sweetened buyer incentives Tuesday on its trio of new minivans in efforts to take advantage of Chrysler Corp. as it idles its minivan plants this summer for month-long changeovers.

GM's Oldsmobile division raised the customer rebate on its Silhouette minivan from $1,000 to $1,250 under a program that expires Aug. 2.

Its Pontiac division raised the rebates on its similar Trans Sport to $1,250, under an offer that expires Sept 26., or the end of the model year. A Pontiac spokesman said buyers can get discounts of up to $1,500 through dealer participation offers.

On Monday, GM's Chevrolet division upped the rebate on its Lumina APV minivan from $900 to $1,250, under an offer that also expires Sept. 26.

GM may be raising the rebates on its new front-drive minivans introduced last fall to gain an advantage on Chrysler, which has had a stronghold on the minivan market with its Dodge Caravan and Plymouth Voyager models since they bowed for 1984.

The No. 3 carmaker is currently switching its Windsor, Ontario, plant over to all new 1991 models, with production slated to resume the week of July 30. Its Fenton, Mo., plant will be closed from July 27 through Aug. 27 for a similar changover.

However, the $600-million changeovers will not allow Chrysler to regain full production at those plants until January 1991.

Industry sources said that while inventory levels of those models would suggest some kind of incentive is needed, GM has also been increasing stockpiles to gain share during the Chrysler changeover - as well as brace for the possibility of a labor strike this fall.

As of June 30, GM's Lumina APV posted a 96-day supply, with the Trans Sport at 114 days and the Silhouette at 118 days, all considerably above normal levels.

Despite overtime production, Chrysler's Voyager had a 91-day supply, while its Caravan supply stood at only 73 days as of June 30.

Late last week Ford Motor Co. cut the rebate on its rear-drive Aerostar van from $700 to $600. Its supply was equal to 50 days as of June 30.

On Monday Ford announced extensions and amendments to previous buyer incentive programs on selected cars. It extended offers on most 1989 and 1990 models through Aug. 8, and on all Lincoln luxury cars to Sept. 26.

The only change to Ford's car incentives was the elimination of 2.9 percent financing on 12- to 24-month loans for 1989- and 1990-model Escorts. The new program offers 7.9 percent financing on loans up to 48 months or a $1,000 cash rebate.

No dealer or customer incentives are being offered on Ford's new 1991-model Escort and Tracer subcompact cars, Ford spokesman Bill Carroll said.

GM's Chevrolet division also added a $1,000 rebate on its 1991-model 4-door Blazer sport utility vehicle, and raised the rebate on its 1991-model Camaro coupe from $750 to $1,000.

#90191u1239 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - New York City has been chosen to host the 1992 Democratic National Convention, beating out New Orleans at least in part because of a tough anti-abortion bill passed by the Louisiana Legislature, sources said Tuesday.

The gathering - at which the party will nominate its 1992 presidential candidate - is to be held in the newly renovated Madison Square Garden.

It will mark the fifth time the Big Apple will host a national political convention. All of the previous four conventions held in the city have been for Democrats, the last two of which - in 1976 and 1980 - nominated Jimmy Carter.

Democratic National Chairman Ron Brown planned to make the announcement Wednesday in Washington. The papers sealing the deal were also to be signed Wednesday.

At least part of the reason for choosing New York was because of the recent passage by the Louisiana Legislature of the toughest anti-abortion bill in the nation, said sources connected to the party. Louisiana Gov. Buddy Roemer, a Democrat, has not said whether he will sign the measure.

However, sources added that while Brown had come under some pressure from abortion rights groups, other reasons - including the support services and hotel rooms available in New York - were equally important in his decision to hold the convention there.

National party aides refused to officially confirm that New York had been chosen, noting only that Brown had ''made a decision on a site'' and would make the announcement Wednesday.

But there has been talk for weeks - even before the abortion legislation passed - that Brown wanted the convention to go to the Big Apple, where he was raised.

Brown is also a close personal friend of New York Mayor David Dinkins and there has been speculation Brown was attracted to the city because it is a large fund-raising base for the party.

In New York, city officials planned a Wednesday celebration at City Hall to welcome the announcement.

National political conventions are generally sought by cities because of the attention and business that they draw. Aides to Dinkins told the New York Times they estimated the convention would attract 25,000 people and bring in $100 million to the city and polish the Big Apple's image.

The city has promised to spend over $20 million on construction at the Garden, which is in the middle of its own renovation, and on police protection outside. About 20,000 hotel rooms have been set aside for the convention, the Times reported.

Originally, seven cities were in the running for the convention, but the field soon was narrowed to between New York and New Orleans.

Republicans have not yet chosen a site for their convention but they are considering a list of cities, including New York, Cleveland, Houston, San Diego, New Orleans, Miami, Anaheim, Calif., and St. Petersburg, Fla.

#90191u1284 07/10/1990 ~United Press International
INDIANAPOLIS (JULY 10) UPI - People, especially those in the advanced cultures, have irresponsibly and immorally taken the world's environment to ''the brink of disaster,'' leaders of the Seventh-day Adventist Church said Tuesday.

''We call upon local, national and international governments and authorities to enact such appropriate measures as would ensure the safety and well-being of an environment of the brink of disaster,'' they said in a position statement released during their 55th World Conference in the Hoosier Dome.

''The environmental crisis is not simply economic and political,'' they said. ''It is also moral and spiritual for it impinges on our relationship to our creator as stewards of His creation.''

The statement prepared by church leaders claimed that the present society, more than any other, has ''pillaged the resources of our planet in an insatiable hunger for material comfort, gadgets and new technologies.

''In our greed for more, we have wantonly exploited the Earth as though its bounties were inexhaustible,'' the statement read. ''We have in the process created hazardous products that defy safe disposal.''

The church leaders said humans have used the ocean as a garbage dump, treating it as a ''bottomless pit capable of absorbing unlimited refuse and sewage.''

They said acid rain is slowly killing off the fish stock and microscopic vegetation vital to the ecosystem.

''Our forests are dying. Our air is polluted. The protective ozone layer is threatened,'' the statement said.

''Many advanced societies not only squander their own resources but draw from less advanced cultures, depleting their national wealth, jeopardizing their futures and creating economies dependent on the exploitation of diminishing resources.''

''We have misused it (Earth) for the sake of our own profit motive and selfish creature comforts. Our behavior is not only irresponsible, it becomes even immoral.''

Meanwhile, the delegates to the conference were told the church has shipped more than $440,000 in aid to victims of the recent earthquake in Iran.

The church said an additional $300,000 in goods and funds from European sources are awaiting shipment by the Adventist Development and Relief Agency to the devastated region.

#90191u1294 07/10/1990 ~United Press International

HOLLYWOOD (JULY 10) UPI - "Die Hard 2" blasted its way into first place over "Days of Thunder" in the race for summer box-office supremacy, taking in $21.7 million over the weekend to finish No. 1.

The Bruce Willis action sequel has grossed $35.6 million during its first six days of release, including $3.7 million in advertised "previews" on

July 3. The three-day weekend gross from "Die Hard 2," shown on 2,507 screens, was the fourth-largest this year, trailing "Total Recall," "Teenage Mutant Ninja Turtles" and "Dick Tracy."

The Tom Cruise stock car drama, "Days of Thunder," stayed near the front of the pack in its second week, roaring along with a $10.7 million take in 2,307 theaters, posting a decline of only 31 percent from its opening week. "Days of Thunder," which also started off with a mid-week opening, has brought in an impressive $40.5 million in 12 days of release.

"Dick Tracy" fell 34 percent in the process of falling from second to third place with $6.6 million. The comic-strip spectacular, playing on 2,209 screens, has totaled an arresting $81.7 million during its four weeks of release.

Hanna-Barbera's "Jetsons: The Movie," the big-screen version of the 1960s animated TV show, orbited into fourth place with a moderate opening weekend of $5 million in ticket sales at 1,562 screens.

"Total Recall," the top grosser so far among the crop of summer movies, dropped from fourth to fifth place with $4.2 million, a 30-percent decline at 1,787 screens. The adventures of Arnold Schwarzengger on Mars has drawn $99.7 million in six weeks and will easily top the $100 million box-office benchmark this week.

Eddie Murphy's buddy-action-cop sequel, "Another 48 HRS," dropped a notch from fifth to sixth, down 25 percent with a gross of $4.1 million at 1,850 turnstiles. It has pulled in $66.1 million in five weeks.

"Robocop 2" continued to be the biggest disappointment among the major summer movies, plunging from third to seventh for a 43-percent decline with a $3.6 million at 1,806 screens. The ultra-violent futuristic cop drama has totaled $32.6 in three weeks and clearly will not become the big hit that Orion Pictures had hoped for.

"Ghost Dad," starring TV star Bill Cosby, also performed poorly after being hit by horrific reviews, falling 34 percent for $3.2 million at 1,221 theaters. In two weeks, "Ghost Dad" has scared up $10.9 million in business.

With the summer season well under way, the top ten films all earned at least $2.5 million. "Gremlins 2" fell from seventh to ninth with a take of $2.6 million at 1,810 screens.

"Pretty Woman" continued its remarkable performance with $2.5 million in ticket sales. The romantic comedy has become the year's top box-office grosser so far, with $153.6 million after 16 weeks of release.

The weekly box-office gross in 23,000 North American theaters did not compare with the huge gross of a year ago. Last week's total take was $141 million versus $209.4 million for the same week last year, when "Lethal Weapon 2" opened and mega-hit "Batman" began its third week.

The gross for the year to date is $2.406 billion versus $2.423 billion to the same point a year ago. The top ten, last week's gross, total gross, weeks in release:

1. "Die Hard 2," $21.7 million, $35.6 million, 1 week.
2. "Days of Thunder," $10.7 million, $40.5 million, 2 weeks.

ADDIS ABABA, ETHIOPIA (JULY 10) UPI - Former U.S. President Jimmy Carter Tuesday appealed to African leaders to open talks with rebel movements to end six civil wars raging on the continent.

''My plea is that there be a concerted effort made ... by leaders involved in these conflicts to attempt to find a way to begin peace talks, initiate cease-fires and move people towards freedom from oppression,'' Carter said addressing the second and final day of a summit meeting of the Organization of African Unity in the Ethiopian capital.

Civil wars are currently raging in Ethiopia, Uganda, Liberia, Sudan, Somalia, Angola, Mozambique and Morocco. All, except Morocco, are members of the 51-nation OAU, a body set up in 1963 to promote unity and cooperation across the continent.

Of countries striving to improve their citizens' quality of life in Africa Carter said: ''Quite often those countries are also finding that a major part of their nation's budget goes to purchase weapons not medicine, to the distribution of armies, not food.''

Carter, who has previously acted as mediator in two of the continent's most intractable wars - in Sudan and Ethiopia - said the biggest obstacle to lasting peace talks was that independent international organizations or uninvolved countries were prohibited or deterred by African governments from contacting insurgent groups.

The urgent need to solve regional conflicts and get Africa back on sound socio-economic ground was one of the major themes of the 26th annual OAU heads of state summit.

''Africa is at the crossroads between possible greater marginalization and an opportunity for self-assertion,'' said OAU secretary general Salim Ahmed Salim of Tanzania.

But ''development efforts, which Africa should of necessity deploy, will be severely hamstrung as long as Africa is torn by conflicts,'' he said. ''Africa cannot afford the continuation of such disastrous conflicts.''

Julius Nyerere, the OAU founding father and one-time leading advocate of African socialism, was equally frank.

''Africa is the most recently independent, the most fragmented, the weakest and the least developed of the continents,'' he said. ''It is the most vulnerable to international and economic stability.''

The U.N.'s Economic Commission for Africa estimated in May that total African external debt stood at $256.9 billion in 1989, a quarter of which was owed to international institutions such as the International Monetary Fund.

The only way for the continent to get back on its feet, secretary general Salim argued, was for it to join the world tide of increasing democratization.

reedom ... is a universal aspiration,'' he said, and ''the logical consequence of the struggle carried out by the African people for freedom and dignity.''

He warned, however, against accepting off-the-shelf democracy.

''Like revolutions which cannot be exported, democracy must be home-grown '' he said. ''Africa must guard against notions of standard prescriptions of democratic practices.''

Many countries across Africa have seen movements spring up demanding multi-party democracy in the past six months. Most governments, however, have been hostile to the idea of Western donors making aid conditional on development of democratic institutions.

The African presidents were expected to close their two-day summit Tuesday night with a further discussion of regional conflicts and the continent's massive refugee problem. There are about 5 million refugees in Africa, and 12 million displaced persons.

LUSAKA, ZAMBIA (JULY 10) UPI - Mozambican anti-government guerrillas killed seven Zambian civilians and wounded 20 in a cross-border raid aimed at avenging recent military action by Zambian military forces, officials said Tuesday.

Guerrillas of the right-wing Mozambique National Resistance Saturday ambushed seven trucks and set them alight near the town of Nyimba, some 250 miles east of Lusaka and near the border with Mozambique, police and hospitals in the region said.

Twenty Zambian riders in the vehicles reportedly were injured and seven Zambians were killed in the attack, officials said.

''The bullets went right through the metal, through the people. ... People blocked the doors trying to get out,'' one survivor told the Zambian press.

Officials said the MNR left leaflets at the ambush scene saying they were avenging the killing by Zambian troops of a number of intruding rebels over the past several months.

The MNR, which has been waging a war against the socialist Mozambican government in Maputo since the country's independence from Portugal in 1975, is regularly reported to retreat into Zambia and Zimbabwe to regroup or loot villages for supplies.

Maputo has given the two countries permission to launch retaliatory raids into its territory against guerrilla positions, which dot western and northern Mozambique.

Zambian officials would not say if any action will be taken against the MNR following the ambush.

(JULY 10) UPI - President Bush and his six economic summit partners sat down at Rice University in Houston for a second round of talks today. One French official says a communique to be presented this afternoon will include, ''in one form or another,'' a plan by Bush to give technical assistance to Moscow.

The leaders also addressed the thorny issue of relations with China. Western nations sharply curtailed relations with China after the brutal suppression of the pro-reform movement last year. Japan's Prime Minister Kaifu offered language for the summit leaders to consider on ties with China. Japan plans to go ahead with a five-point-four-BILLION-dollar, six-year loan deal with Beijing .

Soviet Foreign Minister Eduard Shevardnadze reportedly wants the drifting Warsaw Pact nations to respond in unison to an olive branch extended last week by NATO leaders. East German Foreign Minister Markus Meckel says Shevardnadze wrote to him and other Warsaw Pact ministers to organize a collective response to NATO's landmark decision to use nuclear weapons only as a last resort.

Syria's foreign minister says he does NOT expect any Western hostages in Lebanon to be freed today. Iranian sources in Damascus earlier told United Press International that Irishman Brian Keenan was the hostage selected for release. They anticipated Keenan's release within days. Sources in Syria also say they expected Anglican Church envoy Terry Waite would be the next captive set free after Keenan. Iran's state radio suggested yesterday that one or more Western hostages in Lebanon may be freed soon.

CHANDIGARH, INDIA (JULY 10) UPI - Sikh militants in northern Punjab state killed at least 11 people, including a former state finance minister who was gunned down in downtown Chandigarh, police said Tuesday.

Police said Balwant Singh, the former Punjab state finance minister, was returning home in his car with two bodyguards and his driver after visiting a friend when the attack occurred.

Three militants armed with automatic rifles, who apparently had been following Singh, jumped out of a van and opened fire when Singh's car stopped at an intersection in downtown Chandigarh Tuesday afternoon, police said.

Singh, the driver and his two bodyguards were dead on arrival at a hospital.

Militants apparently suspected that Singh had been involved in the planning of the June 1984 army assault on the Golden Temple of Amritsar to flush out Sikh militants from the shrine.

The attack, known as ''Operation Blue Star,'' killed more than 700 Sikhs and outraged the Sikh community. Four months later, Prime Minister Indira Gandhi, who ordered the temple assault, was assassinated by two of her Sikh security guards.

About 10,000 people have been killed in separatist violence since 1983, when Sikh extremists launched a bid for an independent state of Khalistan, or Land of the Pure, in Punjab.

Militants claim a separate nation for India's 16 million Sikhs is necessary to allow the minority community to escape alleged discrimination by the Hindu-dominated central government in New Delhi.

At least seven other people were killed by militants in a spate of attacks around the strife-torn state Monday night and early Tuesday, police said.

In one incident, militants riding in a vehicle opened fire with AK-47 assault rifles on a tea shop in Ludhiana, about 60 miles east of Chandigarh, police said.

The owner of the shop and an auto-rickshaw driver were killed in the attack, police said.

In Jeowal, about 140 miles northeast of Chandigarh, three militants entered a Sikh temple and gunned down a Sikh identified as Karnail Singh, police said.

They said three other people were killed in as many incidents around Punjab late Monday after militants entered private homes and opened fire.

Police gave no motive for the killings but militants routinely assassinate people they believe to be police informers.

Also, at about 4 a.m. Tuesday, police said three armed militants shot and killed Randhir Singh, a police officer on duty in the town of Amar Kot, northeast of Chandigarh.

PITTSBURGH (JULY 10) UPI - Organ transplant pioneer Dr. Thomas Starzl, on the verge of a heart attack Sunday, was released from a Pittsburgh hospital Tuesday.

The 64-year-old surgeon who performed the world's first successful liver transplant 23 years ago, underwent surgery to clear a severe narrowing of a coronary artery on Sunday.

Dr. Bruce Wilson performed an angioplasty, inserting a balloon-tipped catheter in the artery, shortly after the Starzl admitted himself to the hospital.

''There was a severe narrowing of a coronary artery,'' Wilson said. ''The chest pain he had at home (while climbing stairs) was quite severe, but it was OK when he rested.''

Starzl was on the verge of having a heart attack, he said.

Wilson said the angioplasty reduced from 99 percent to at least 30 percent the blockage of one of three main arteries leading to Starzl's heart. The blockage likely stemmed from Starzl's chloresterol level and past tobacco smoking, Wilson said, adding a change in diet will be recommended.

''He's doing just fine,'' the heart specialist said Monday.

Among his numerous achievements, Starzl performed the first successful liver transplant in 1967. He also headed the medical team that developed

the anti-rejection drug FK-506, derived from soil fungus.

Starzl, who heads the transplantation unit at the University of Pittsburgh Medical Center, also has performed a series of groundbreaking liver transplants, overseeing the world's first combined heart-liver transplant in 1984.

The patient, Stormie Jones of White Settlement, Texas, is now 13 years old and was released Saturday from Children's Hospital in Pittsburgh after two days of testing to monitor her recovery from hepatitis.

Wilson described Starzl as a ''good patient'' who was reluctant to enter the hospital after calling him Sunday to discuss the chest pain. Only a few days earlier, Starzl was hiking in the mountains of the Hawaiian island Kauai, Wilson said.

WASHINGTON (JULY 10) UPI - Deaths related to motor vehicles, household products and alcohol consumption are rising, signaling a need for more regulatory action and responsible personal behavior, a coalition of health and safety groups said Tuesday.

The Coalition for Consumer Health and Safety, which is providing its first report on the status of the nation's health and safety to federal and state officials, comprises 37 consumer, health and insurer groups.

''Particularly discouraging is the recent rise in motor vehicle and household product deaths, and the two most dangerous products - cigarettes and alcohol - still take horrendous toll,'' said Stephen Brobeck, coalition chairman and executive director of the Consumer Federation of America.

''Federal agencies must increase their roles in each of these product areas. To do so, they must be adequately funded,'' he said, adding people's behavior can reduce many injuries and deaths, especially those associated with tobacco and alcohol.

Using the most recent available data, the coalition said motor vehicle deaths rose from 46,087 in 1986 to 47,093 in 1988. Associated costs in 1988 were $89 billion, the coalition said. Motor vehicle-related injuries also increased from 5.3 million in 1986 to 5.5 million in 1988.

The coalition found that 15.4 percent of all motor vehicle fatalities involved passengers in light trucks or vans, with 11,178 such fatal accidents in 1986 and 12,611 in 1988.

The number of people killed on motorcycles dropped, from 4,480 in 1986 to 3,641 in 1988.

''These numbers could be significantly reduced through creation of strong safety standards, the installation of air bags on all motor vehilces and the passage of motorcycle helmet laws and safety belt laws,'' said Sally Clary, assistant vice president of the Alliance of American Insurers.

The coalition said 49.6 percent of all 1988 motor vehicle fatalities involved alcohol, with 24,050 such deaths in 1986 and 23,352 in 1988.

Deaths from accidents in the home rose from 21,700 in 1986 to 22,500 in 1988; disabling injuries rose from 3.1 million to 3.4 million; and associated costs increased from $16 billion to $17.4 billion.

Residential pool drowning deaths for children under 5 also went up, with 260 deaths in 1984 and 330 deaths in 1986.

''If society has neglected one area, it is home safety,'' Brobeck said, noting the Consumer Product Safety Commission's budget is 50 percent less than its budget in 1974, when the agency opened.

The coalition found that per capita alcohol consumption dropped from 2.61 gallons in 1985 to 2.05 gallons in 1987. But alcohol-related deaths in those years rose from 89,415 to 90,991.

Patricia Taylor of the Center for Science in the Public Interest, said alcohol deaths cost society last year $130 billion.

''Alcohol has gotten the short-shrift (in the federal budget),'' Taylor said. ''This legal drug costs our society far more than all other drugs combined.''

The coalition also said the number of smokers has sharply declined over the past two decades, but there were still an estimated 390,000 smoking-related deaths in 1985 - caused in large part, Brobeck said, to past bad habits.

In 1987, 31.2 percent of all adult men smoked, a 40 percent drop from 1965. As for adult women, 26.5 percent smoked in 1987, a 21 percent drop from 1965. The coalition said there were 49 million American smokers in 1987.

#90191u1403 07/10/1990 ~United Press International

PHILADELPHIA (JULY 10) UPI - The leaders of 1.5 million Catholics in Philadelphia and southern New Jersey defended Tuesday their right to speak

out on moral issues and instruct Catholics, including public officials, on how to behave.

But Catholic public officials would not be excommunicated for espousing views opposed to that of the church, including abortion, Camden, N.J., Bishop James McHugh said.

''We will not use excommunication in the political debate about abortion '' McHugh told a joint news conference with Philadelphia Archbishop Anthony Bevilacqua at the rectory of the Cathedral of SS. Peter and Paul.

The two prelates said they will deny use of church facilities as a forum for anyone who opposes the church's position.

''We haven't threatened or condemned any Catholic official,'' McHugh said. ''A Catholic cannot go out, reject the teachings of the church and still have the approval of the church.

''We are not silencing opposition to the church but you cannot use our pulpits to oppose it,'' McHugh said.

The bishops called the news conference to express their outrage at a July 1 Philadelphia Inquirer editorial that questioned the church's policy of pressuring Catholic officials to uphold the church's teachings.

The editorial, signed by Editorial Page Editor David Boldt, ''... American Catholic bishops seem to have taken it upon themselves to attempt to lead America, banners flying, backward into that darker era in the American past.''

Boldt further went on to call the Catholic Church an ''un-American institution'' for ''its views on due process and the status of women, to name just a couple of key issues.''

The editorial also defended a political cartoon in an earlier issue of the Inquirer portraying McHugh as a towering giant in church vestments ordering a diminutive New Jersey Gov. James Florio, who is Catholic, ''Thou shalt take our doctrine on abortion and shove it down the throats of all thine constituents.''

Bevilacqua called the editorial evidence of a ''widespread attack on the church in the media.''

''We are talking about an attack on our right to speak freely,'' Bevilacqua said. ''The word 'un-American' in the minds of people means 'anti-American.'

''Is he trying to excommunicate us from America as if we are not real

Americans?'' Bevilacqua said.

Boldt disagreed with the bishops interpretation of the editorial.

''Anyone who read the column knows of the carefully limited context in which I used that term,'' Boldt said. ''The bishops are latching on to this term to avoid the main issue this column raises.''

An editorial opposing Boldt's view already appeared in the newspaper July 8 and Boldt said he would consider printing a church response to his editorial.

Boldt also accepted the bishops request for a meeting with the newspapers managers.

The rancor spawned by the cartoon and editorial have propelled the debate into the newspaper's top 10 most controversial issues, according to Boldt, who has been an Inquirer editor for 17 years.

Bevilacqua and McHugh said they received a large amount of angry mail concerning the Inquirer editorial.

HOUSTON (JULY 10) UPI - First lady Barbara Bush has revealed that a rat was swimming in the White House pool with her several months ago, but the president came to her rescue.

Mrs. Bush said in an interview with the Houston Post that the rat ''just went by in front of me'' while she was swimming in the pool wearing a swimming mask.

''Fortunately, George Bush was there,'' she added. ''It was horrible.''

''I was out of that pool so much faster than I thought I could,'' she related.

She revealed the incident in recalling some of her best and worst memories since she moved into the White House.

#90191u1437 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - Drug tests found 3.1 percent of airline pilots, railroad engineers and other transportation workers abused illegal substances, a rate much lower than in the general workplace, a major laboratory said Tuesday.

The tests of 100,000 workers, also including truckers, bus drivers, airline mechanics and pipeline crews, were conducted by SmithKline Beecham Clinical Laboratories under a federal program that took effect in 1989.

Of the 53,000 applicants for jobs in the transportation industry who underwent the screening between Dec. 21, 1989 and June 30, 1990, an estimated 4.2 percent tested positive for illegal drugs.

''Drug abuse has created an ongoing challenge to America's safety,'' said Harry Groome, president of the company headquartered in King of Prussia, Pa.

Dr. Donald Macdonald, a former White House drug adviser and a consultant to SmithKline Beecham, said the tests ''have a deterrent effect on drug use.''

The screening was ordered following the Jan. 17, 1987, collision of an Amtrak passenger train and a Conrail locomotive northeast of Baltimore that killed 16 people and injured 125. The Conrail engineer ran a series of signals after smoking marijuana.

Appearing at a news conference to report his company's findings, Groome said that traces of marijuana and cocaine appeared most frequently in the tests of the transportation workers.

But the findings are ''well below those testing positive in the general workplace,'' said Groome, who also noted that ''it appears drug abuse in the workplace is trending downward.''

According to tests conducted by the SmithKline Beecham - the largest drug tester in the government program - 13.8 percent of workers and applicants for jobs in the general workplace tested positive for illegal drugs in the first half of 1990 vs. 18.1 percent in 1987.

Even counting transportation workers along with job applicants, the evidence of abuse stood at only 3.6 percent.

By region, the Northeast experienced the highest incidence of drug abuse by transportation workers - 4.2 percent - followed by 3.6 percent in the central states, 4.0 percent in the West and 3.4 percent in the South, SmithKline Beecham said.

Of the drugs detected, marijuana was detected 43.6 percent of the time, followed by cocaine, which includes crack, at 25.2 percent; opiates, which include heroin, 20 percent; amphetamines, including ''ice,'' at 6.9 percent, and PCP or angel dust, at 4.3 percent, the company said.

Citing the confidentiality of its findings, SmithKline Beecham declined to identify the breakdown of abuse detected among the different types of jobs subject to the urine testing.

#90191u1453 07/10/1990 ~United Press International

SAN ANTONIO (JULY 10) UPI - Barbara Bush Tuesday entertained the spouses of four world leaders on a whirlwind tour of Texas history with stops at a mission, a restored theater and the Alamo.

The first lady said she chose to tour San Antonio because she wanted to give her guests a look at ''the flip side of the coin of Texas from Houston.''

President Bush meanwhile was all business back in his adopted hometown where he played host to the leaders of the industrialized countries at the Economic Summit.

Mrs. Bush led Sachiyo Kaifu of Japan, Danielle Mitterrand of France, Mila Mulroney of Canada and Livia Andreotti of Italy on tightly scheduled visits of some of her favorite spots in the city nestled in Texas' famed Hill Country.

Denis Thatcher, husband of British Prime Minister Margaret Thatcher, opted against the San Antonio tour and was believed to have gone instead to Dallas to visit his son, daughter-in-law and grandson. Hannelore Kohl of West Germany also did not attend.

The first stop for the women was the Mission San Jose, established in 1720 by the Franciscans, to be followed by visits to the newly restored Majestic Theater and the Alamo in the afternoon.

''No matter what you may have learned at the movies, the first Texas cowboys were Indians,'' said tour guide Henry Guerra, a San Antonio broadcast personality who served as tour guide at the mission.

The spouses sat briefly inside the mission while Monsignor Lawrence Stuebben told them about the history of the structure.

''Bless you for coming,'' Stuebben said.

The women then posed for a group picture outside ''Rosa's Window,'' a clear window considered to be one of the finest pieces of Spanish Colonial ornamentation in the United States. As the women left the mission, sightseers waving small Texas flags cheered and yelled Barbara's name.

The spouses attended the opening ceremony of the 16th annual economic

summit with their partners Monday but then spent the rest of the day by themselves while the world leaders discussed global trade and aid to the Soviet Union. Mrs. Bush held a reception and private dinner for the group Monday night.

They were to rejoin their spouses Tuesday evening for a dinner featuring quail breasts and such southwestern dishes as empanadas, lump crabmeant in green chile salsa and jalapeno cornbread.

#90191u1454 07/10/1990 ~United Press International

VIENNA (JULY 10) UPI - Fifty-one Albanian refugees savored their first taste of freedom Tuesday after an early morning flight to Czechoslovakia, and diplomats said Albania was expected to allow thousands of others to leave the country by the week's end.

A U.N. special envoy continued talks with Albanian authorities in Tirana amid renewed optimism for the imminent release of up to 6,000 refugees sheltered in foreign embassies in the capital.

''We are extremely hopeful and have reason to be confident that they will be allowed to leave over the weekend,'' a West German Foreign Ministry spokesman said.

The spokesman said U.N. envoy Stefan De Mistura, who traveled to Tirana Sunday, was working for a ''solution for all the Albanians in the embassies.''

The 49 men and two women who arrived in Prague, the capital of Czechoslovakia, early Tuesday were the first Albanian refugees to win permission to emigrate from one of the world's harshest and most closed societies since the rush to the embassies began last Sunday.

Although all 51 had sought asylum in Prague's Tirana embassy, only two of the refugees asked to remain in Czechoslovakia. The others wanted to emigrate to the United States, Canada or Australia, the Czechoslovak news agency CTK reported.

Czechoslovak Deputy Foreign Minister Vojtech Wagner told the news agency he expected the embassy would be overrun with refugees again as soon as police barricades are withdrawn from the embassy district.

In Vienna, several delegations to the 35-nation Conference on Security and Cooperation in Europe added to international criticism of Albania's human rights record, citing particularly Tirana's slow response to the plight of the refugees.

Despite the criticism, Albania was admitted as an observer to prepatory meetings for the Nov. 19 CSCE summit in Paris. It was the second time Tirana was allowed to sit in on sessions of the CSCE, which includes the United States, Canada and all European countries except Albania.

''In agreeing to admit Albania as an observer, we do not condone the Albanian government's policies or recent actions by the government of Albania,'' said John Maresca, the U.S. ambassador to the talks.

The Tirana government, in a dispatch carried by the official Albanian Telegraphic Agency, said the evacuation of refugees to Czechoslovakia was ''done in compliance'' with recent decrees easing restrictions on travel.

It did not set a timetable for when the other refugees - including 3,000 asylum-seekers in the West German Embassy - would be allowed to leave.

In a separate dispatch, ATA dismissed as ''malicious inventions'' an Italian television report that a large number of people were killed or wounded in clashes between police and demonstrators in several Albanian cities.

''They (reports) are the most banal slanders. Such a thing has not occurred in Albania,'' the news agency said.

The rush to foreign embassies began July 1 amid reports of clashes between demonstrators and security forces in the capital. By late July 2, more than 200 Albanians were being sheltered in about a dozen embassies. Some of them had been shot by police while trying to scramble over fences into the embassy compounds.

#90191u1464 07/10/1990 ~United Press International

KATMANDU, NEPAL (JULY 10) UPI - King Birendra gave up the right to issue laws Tuesday, moving Nepal farther from absolute monarchy toward democracy a palace announcement said.

Birendra suspended 40 articles and sub-clauses of the constitution on ''his own initiative and on the recommendation of the prime minister'' to strengthen democracy, the announcement said.

The suspensions ended royal rights to issue ordinances and other structures of the monarchist panchayat government that has ruled Nepal for 29 years.

Word of the constitutional changes came six months after the start of a democracy movement that led to the king's acceptance of multi-party politics, an end to the party-less panchayat system and installation of an

interim government headed by the Nepali Congress party and various communist parties.

The palace announcement reiterated that all legislative powers have been given to the interim government.

The latest move was seen as an attempt to placate communists in the government, who have demanded that the entire constitution be suspended and be replaced by an interim government act, a move rejected by the Nepali Congress party.

''We are not confident that the king will continue to act as a constitutional monarch - he still has powers and there is no guarantee that he will continue to act as a constitutional king,'' said Radha Krishna Mainali, a senior leader of the Nepal Communist Party.

The Nepali Congress party, the leading constituent of the new interim government, said it is satisfied that the king already has agreed to act as a constitutional monarch and the interim government is the strongest in memory.

''The multi-party system which has been restored after 29 years will be consolidated,'' said Girija Prasad Koirala, the party's secretary-general. ''There are problems. Reactionary elements committed to the old system and extreme communists are trying to destabilize the new democracy.''

#90191u1468 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - The Senate, opening debate on the major civil rights bill of the session, ran into a sharp split Tuesday when a key Republican charged the legislation would lead to racial quotas in the workplace.

Sen. Orrin Hatch, R-Utah, said supporters of the bill were seeking an edge ''under the guise of civil rights to force businesses to go to proportional hiring - which is quotas.''

Sen. Edward Kennedy, D-Mass., floor manager for the legislation, said the charge was ''spurious,'' adding, ''It is a mockery of civil rights and the fundamental principles of equal justice under the law for opponents ... to raise the false hue and cry of quotas.''

The deep division over the explosive issue of quotas came in the opening moments of the debate on the Civil Rights Act of 1990 that would roll back Supreme Court decisions handed down last year. Supporters of the bill claim the rulings undermined anti-discrimination laws in the area of employment.

President Bush said May 17, ''I want to sign a civil rights bill but I will not sign a quota bill'' but two months of steady discussions between sponsors and the White House failed to produce a compromise bill.

Kennedy aides said White House chief of staff John Sununu failed to reply to overtures during last week's recess, a point disputed by Hatch who said that Sununu had made a new proposal Monday afternoon.

In an effort to meet administration objections, Kennedy changed language in the bill but Hatch, irate he had not seen the revisions until late Monday night, said they only made the bill ''more onerous and burdensome on the employer.''

Most of the attention was fixed on the Supreme Court's overruling of a 1971 decision that Kennedy called the ''cornerstone of efforts to guarantee equal opportunity for minorities and women in the workforce.''

The 1971 ruling involved so-called disparate impact cases where job practices adopted without discriminatory intent still have the effect of excluding qualified women and minorities.

Last year, however, the court shifted a key burden of proof from employers to employees making it more difficult and expensive to challenge discriminatory practices.

Hatch said Sununu told him Monday that the White House would support an intact restoration of the 1971 decision, adding that the standards and criteria added in the Kennedy proposal would force employers to prove their innocence on the basis of sex and race statistics.

''It is almost an impossible standard to meet,'' Hatch said, adding that businesses will feel compelled to hire by quotas just to avoid the problems.

''This is a dramatic change,'' Hatch said. ''I don't like discrimination if its in reverse gear or in forward gear.''

In his speech, Kennedy said last year's Supreme Court rulings ''left large numbers of citizens without adequate protection from discrimination in the workplace.

''It is up to Congress to restore the broad principle in the law that prejudice and bigotry are wrong, and that our civil rights laws must be strong enough to protect employees from discrimination in the workplace,'' Kennedy said. ''It is essential for this Congress to send a clear message to the country that retreat on civil rights is unacceptable.''

Hatch said Kennedy's compromise ''fails to resolve the serious, fundamental problems in the bill'' and ''again fails to resolve the quotas issue.''

SRINAGAR, INDIA (JULY 10) UPI - Separatist violence in the strife-torn Kashmir region left at least 12 people dead, including six militants killed by Indian security forces early Tuesday near the Indo-Pakistan border, police and government officials said.

The latest violence came as Jammu and Kashmir state Gov. Girish Saxena told reporters there was a ''sharp escalation'' in Pakistani involvement in militancy in the state, the Press Trust of India news agency reported.

''The militants on the other side are feeling deterred in crossing over but Pakistani authorities are pushing them through,'' the news agency quoted the governor as saying.

Saxena said enough security forces were deployed in border areas to block illegal access routes into India from Pakistan, the Press Trust said.

A government spokesman said about 15 militants tried to cross into India about 6 a.m. Tuesday. When the group ignored orders to halt, Indian security forces opened fire, killing six militants and wounding two others the spokesman said.

The rest of the group escaped, he said.

India has repeatedly accused Pakistan of arming and training Moslem militants engineering a violent separatist movement in India's Kashmir region. Pakistan denies it but admits providing moral support to the movement.

The movement was quietly under way for about two years until security forces fired on demonstrators in mid-January, killing at least 35 people and transforming the drive into a popular uprising against Indian rule.

Since then, more than 500 people have been killed in near-daily violence. Tens of thousands of troops and paramilitary forces have been deployed to the region but have failed to crush the uprising.

Many countries, including the United States and the Soviet Union, have expressed concern the crisis could spark a fourth Indo-Pakistan war. The two superpowers and numerous other countries have publicly and privately urged the rival neighbors to settle the dispute peacefully.

Kashmiri militants say they need a separate state because of years of discrimination against the region's 4 million Moslems by successive Hindu-dominated governments in New Delhi.

In other violence Tuesday, police said militants gunned down a state policeman identified as Shiban Krishan in Kunzar, about 15 miles west of Srinagar.

Gunmen also shot dead a Kashmiri Moslem outside his home in Srinagar, although no militant group has yet claimed responsibility, police said.

In the border town of Handwara, 45 miles north of Srinagar, militants shot dead two suspected police informers at the local market, police said.

At least two other people were killed in separatist violence, police said.

#90191u1483 07/10/1990 ~United Press International

CHARLOTTE, N.C. (JULY 10) UPI - Sen. Jesse Helms probably doesn't appreciate it but he has something in common with a dead skunk - both are featured in the works of a North Carolina songwriter.

The Charlotte Observer reported Tuesday that Helms, R-N.C., is featured in the offbeat lyrics of songwriter Loudon Wainwright III, whose recording ''Jesse Don't Like It'' is scheduled for release July 23.

Wainwright, who hails from Durham, N.C., hasn't had a hit since 1973 when his song ''Dead Skunk,'' about a dead skunk in the middle of a road, made the Top 20 charts.

''Jesse Don't Like It'' rails against Helms for his conservatism, especially his opposition to the use of taxpayer-supported National Endowment for the Arts funds for what the senator considers obscene works.

''If Jesse says it's dirty, it don't get any funds.

''They use that taxpayers' money on tobacco and guns.

''And your freedom of expression is being denied.

''But if you're not sure what you like, just let Jesse decide,'' the song goes.

The record, featuring a jacket that shows Helms punching his fist through a Picasso painting, will be released by Hannibal-Carthage Records of New Jersey, but radio stations across North Carolina are likely to receive it as early as this week.

Program director Robb Stewart, of WMIX Radio in Charlotte, said he's trying to get a copy of the record and plans to play it ''if it doesn't slam-bang anybody too bad.''

But at WRFX radio, which prides itself in outrageous programming, early morning talk show host John ''John Boy'' Isley said he will play the recording as soon as he receives it.

''You got a forecast on when hell freezes over?'' he roared when asked whether anything was too offensive for WRFX. ''Bring it on, we'll play it.''

Helms could not be reached for comment and his campaign spokewoman, Beth Burris, said she has not yet heard the record.

''I'm just thankful that the taxpayers didn't have to pay for this via a National Endowment for the Arts grant,'' she said.

#90191u1484 07/10/1990 ~United Press International

BOSTON (JULY 10) UPI - An epidemic of a potentially fatal blood disorder linked to the food supplement L-tryptophan apparently was caused by contamination of material supplied by a single manufacturer, federal researchers said Tuesday.

Dr. Laurence Slutsker of the U.S. Centers for Disease Control said an as-yet unidentified contaminant in certain lots of L-tryptophan, made by one of six Japanese suppliers to the United States, seems to be the cause of an outbreak last year of eosinophilia-myalgia syndrome, or EMS.

The Food and Drug Administration ordered a recall of products made from L-tryptophan, an amino acid that occurs naturally in many foods, in November after it was linked to outbreaks of EMS, which can cause muscle pain, fatigue, breathing difficulties and in severe cases, heart failure and death.

To date, the FDA has received reports of more than 1,400 cases of EMS in the United States and 19 deaths that apparently resulted from L-tryptophan ingestion. No cases have been reported to have occurred since February.

Slutsker said a probe in Oregon found that among 46 EMS victims whose L-tryptophan products could be traced back to the original manufacturer, the material came from one Japanese company in 45 instances.

Among 41 other people who took L-tryptophan but did not become ill, the source of the supplement was the company in question in only 18 instances,

Slutsker and colleagues reported in the Journal of the American Medical Association.

The researchers also found the contaminated lots were likely to have been produced between January and June of 1989, shortly before the peak of the epidemic. They said in Oregon, the majority of EMS cases happened in September and October of 1989.

Although L-tryptophan retail products were sold under dozens of labels in Oregon and elsewhere in the United States before the FDA recall, the raw material - in the form of a crystalline compound - was supplied by only six companies, all of them in Japan, said Slutsker.

He declined to name the manufacturer of the suspect lots, but said company officials are cooperating with investigators from the FDA and the CDC. Other researchers from Minnesota's Mayo Clinic have previously singled out the source as Showa Denko of Japan.

Although L-tryptophan can be made through a chemical process, Slutsker said the lots that apparently were contaminated were made by a multi-step bacteriological process that involved fermentation, purification and chrystallization.

''We're not sure what changed, but something did change,'' when the contaminated material was produced, he said. ''We're not talking about contamination in the sense of something dripping out of the ceiling into vats. It could be that something that had been taken out in the purification process no longer was.''

Slutsker said differences in the amount of L-tryptophan ingested, or individual differences in metabolism, could explain why some people who took products made from the apparently contaminated material developed EMS while others did not.

''From what we know, dose seems to be an important factor. People who took more of it seemed more likely to become ill. But that is not to say that host factors such as metabolism do not also play a part,'' he said.

Slutsker said it also could be the contaminant was unevenly distributed in the raw material supplied to food supplement makers, so that some of the eventual retail products were more contaminated than others.

Although L-tryptophan had been used as a treatment for ailments such as insomnia and pre-menstrual syndrome, Slutsker noted that because they were sold over-the-counter, L-tryptophan products did not have to undergo the rigorous testing the FDA requires of prescription drugs.

Federal officials estimate 3 percent to 5 percent of the U.S. population

was taking the supplement before it was recalled.

Slutsker suggested the time may have come ''to review the regulation of the food supplement industry. I don't think it is too heretical to say that the whole process needs to be looked at closely.''

#90191u1496 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - First Executive Corp. said Tuesday it had signed a confidentiality agreement with a major shareholder that is considering proposing a reorganization or recapitalization plan for the company.

In return, Rosewood Financial Partners, a Dallas investment partnership, agreed to vote for First Executive's nominee for the board of directors at the company's annual meeting, according to a document filed Tuesday with the Securities and Exchange Commission.

First Executive, a struggling Los Angeles insurance company, said in the filing that it would ''endeavor'' to increase ''non-affiliate'' representation on its board and allow Rosewood to propose nominees.

Under the terms of the confidentiality agreement, Rosewood also agreed not solicit or participate in the solicitation of proxies or to become a ''participant'' in any election contest.

Significantly, the confidentiality agreement supersedes any prior agreements or understandings except those relating to a June 1989 letter agreement between First Executive and Kidder, Peabody & Co.

Kidder reportedly is representing another company - rumored to be General Electric Co. - that is interested in a transaction with First Executive.

That firm represented by Kidder may want to buy some of First Executive's operating assets or part of its junk bond portfolio. The assets for sale would probably be designated by First Boston Corp., which First Executive hired last spring to devise a restructuring scheme.

Rosewood owns 8.4 million shares of First Executive common stock, which equals 10 percent of the common stock outstanding. The partnership's general partner, Rosewood Financial Inc., is an indirect subsidiary of the Caroline Hunt Trust Estate. Caroline Hunt is sister to the Hunt brothers, a pair of Texan investors.

#90191u1514 07/10/1990 ~United Press International

(JULY 10) UPI - NBC's ''Cheers'' is not only the most popular show on television these days, but it also served as a magnet to attract viewers to a couple of new programs that cracked the top 10 this week and bounced some favorites down the ladder, it was reported Tuesday.

''Cheers'' ranked No. 1 in the Nielsen ratings for the third consecutive week and is now the top-rated show to date for the traditional 42-week season.

''The Cosby Show,'' also on NBC, jumped from seventh place last week to the No. 2 position, its best ranking since the week of March 19.

Aside from ''Cheers''' continuing reign, some real surprises surfaced in the ratings for the week ending July 8. ABC's ''Roseanne'' dropped from its third-place spot last week to tie for 10th place with another another blue-collar sitcom, Fox's ''Married ... With Children.''

''Blossom,'' an NBC pilot that is being considered a possible mid-season replacement, preceded ''Cheers'' in the 8:30 p.m. Thursday time slot and captured third place, the best performance for an NBC pilot so far this summer.

Starring Mayim Bialyk, ''Blossom'' is described as a comedic coming-of-age story seen through the eyes of a 13-year-old living in Los Angeles. The series also stars Richard Masur and Barrie Youngfellow.

A rebroadcast of the ''Seinfeld'' pilot held onto the ''Cheers'' lead-in and finished fourth in the weekly ratings.

CBS's ''Murphy Brown,'' which has popped up in the top 10 a number of times, put on its own battle of the blondes, tying for eighth place with NBC's ''Golden Girls.'' The brunettes of CBS's ''Designing Women'' slipped slightly from the No. 3 spot last week to fifth place.

NBC had six shows in the top 10 - including the top four shows on the Nielsen scoreboard - CBS had three and ABC and Fox had one each. For the week, NBC won Wednesday, Thursday and Saturday night; ABC took Monday, Tuesday and Friday, while Sunday belonged to CBS alone.

In the stakes race for Sunday night movies, NBC again had the top-rated show, ''A Stoning in Fulham County,'' which finished 18th, followed by ABC's Part 1 of ''The Bourne Identity,'' which finished 34th, and CBS's ''The Woman He Loved'' in 49th place.

NBC was in first place for the week ending July 8 with a 9.0 rating and a 19 share. Close behind was ABC with an 8.9 rating and a 19 share and CBS posted a 7.6 rating and a 16 share.

For the 42-week year-to-date race, NBC is on top with a 13.6 rating and a 23 share, ABC has a 12.2 rating and a 21 share and CBS has an 11.5 rating and a 20 share.

In the nightly news race, ABC kept its top spot. ''World News Tonight'' with Peter Jennings scored an 8.4 rating and a 20 share, the ''CBS Evening News'' with Dan Rather was second with an 7.4 rating and an 18 share, while ''NBC Nightly News'' with Tom Brokaw posted a 6.9 rating and a 17 share.

Each ratings point represents about 921,000 households. A share is the percentage of TV sets in use that are tuned to a particular show or network.

The top programs for the week ending Sunday, July 8, according to the A.C. Nielsen Co., were:

1. Cheers (NBC)
2. The Cosby Show (NBC)
3. Blossom (NBC)
4. Seinfeld (NBC)
5. Designing Women (CBS)
6. 60 Minutes (CBS)
7. Empty Nest (NBC)
8. (tie) Golden Girls (NBC)
Murphy Brown (CBS)
10. (tie) Roseanne (ABC)
Married ... With Children (Fox)

#90191u1532 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - Henry Cooper, former chief U.S. negotiator at the Defense and Space Arms Talks, will become the first civilian director of the Strategic Defense Initiative, or ''Star Wars,'' program, the Pentagon announced Tuesday.

Defense Secretary Dick Cheney selected Cooper to succeed Air Force Lt. Gen. George Monahan, who retired July 1 after 35 years in the service and after 17 months as director of SDI.

The SDI, popularly known as ''Star Wars,'' is a research program studying the feasibility of building ground- and space-based defensive weapons that would be able to destroy nuclear missiles headed for the United States.

Some $18.5 billion has been spent so far on the complex and controversial research program.

Cooper will be only the third director of SDI, which began in 1983 under the leadership of Air Force Lt. Gen. James Abrahamson.

''The search has always been for the best person for the job. I don't believe that it necessarily has to be a military person,'' Pentagon spokesman Pete Williams said, when asked why a civilian was chosen for the position.

''It was the secretary's view that Ambassador Cooper had the kind of knowledge and specialized training and experience to lead SDI,'' Williams said, adding that there were ''a number of people who expressed interest in the job.''

Cooper, currently a senior vice president of JAYCOR, an independent research and development organization, served from 1987 to 1989 as chief U.S. negotiator at the Defense and Space Arms Talks with the Soviets in Geneva and was deputy negotiator from 1985-87.

He has also served as assistant director of the Arms Control and Disarmament Agency from 1983-85, deputy director of the nuclear effects division of R&D Associates from 1982-83, and deputy assistant Air Force secretary for research, development and logistics from 1980-82.

Cooper holds a Ph.D. in mechanical engineering from New York University and Master of Science and Bachelor of Science degrees from Clemson University.

He does not have to undergo Senate confirmation to assume his new position because it is not a presidential appointment.

MEMPHIS, Tenn. (JULY 10) UPI - The cold war must really be over. The Soviet Union now has something that most non-communist nations have had for years - an Elvis fan club.

Graceland officials say they have been notified of the formation of the All-Union Association of Rock'n'Roll Fans in Moscow.

Although Elvis, who died Aug. 16, 1977, is not in the name of the club, club president Kostya Shniriov wrote that the concentration of the club is on Elvis.

''We plan to celebrate Elvis's birthday with a special concert on Jan. 8, 1991,'' Shniriov wrote. ''We are negotiating with the authorities to open a club entirely devoted to rock'n'roll, to be called Memphis.''

Shniriov sent along photos, including one of her standing beside a wall hanging in Russian and English - ''Elvis died. Rock'n'roll is living.''

The club president said that Soviet Elvis fans have some catching up to do with their counterparts across the world because of earlier limitations placed on Western influences by the Soviet government.

''Recently, a recording of Elvis's music was issued by Melodya Records called 'Elvis Presley.' We have a collection of articles about Elvis which have appeared in the Soviet press, as well as local concert posters and programs. We have tapes of Elvis's music, but unfortunately have never seen any of his films,'' she said.

Shniriov said the members want to exchange information with American fans and someday visit Memphis. But for now, she's asking that all correspondence be sent to reporter Eric Walberg at the English-language Moscow News, ''as our English is not great.''

Although Elvis never performed outside the United States, he has hundreds of fan clubs all over the world including the three newest - the Soviet Union, East Germany and Zimbabwe, Graceland officials said.

#90191u1542 07/10/1990 ~United Press International

JEDDAH, Saudi Arabia (JULY 10) UPI - Oil ministers from five Gulf states held talks Tuesday to ironing out differences ahead of the full OPEC mid-year production and pricing conference in two weeks time.

The meeting in the Saudi city was reported by the official Kuwaiti news agency, which said the participants were the ministers of Saudi Arabia, Kuwait, United Arab Emirates, Iraq and Qatar.

It followed intensive consultations between the five countries, and visits to the other members of the 13-nation Organization of Petroleum Exporting Countries, by Saudi oil minister Hisham Nazer.

A weekend trip by Nazer to Iraq also was of special significance in light of published reports of an Iraqi bid to replace the Saudis as principal OPEC setter of policy.

Iraq opposes any production increase by the cartel on grounds it would weaken prices still further, the Kuwaiti sources said.

The members of the OPEC cartel currently are pumping around 23.2 million barrels a day against the official combined ceiling of 22 million barrels a day.

Over-production by Kuwait and the United Arab Emirates in particular, has pushed down the OPEC target price average for a ''basket'' of seven Mideast crude oils from the official $18 a barrel to as low as $14.

In Jakarta, Indonesian Mines and Energy Minister Ginandjar Kartsasamita also was reported as saying it is impossible to talk about quotas as long as prices had not returned to the OPEC reference price of $18 a barrel.

''OPEC should give a priority on efforts to improve the current weak oil prices,'' Ginandjar said. ''Without this, it is impossible to talk about quotas.''

Kuwait wants an increase in its official OPEC quota of 1.5 million barrels a day. It's production has been as high as 1.9 million barrels daily.

The UAE refused to accept any limit at OPEC's last regular semiannual meeting in November and the cartel's oil ministers left its quota virtually where it was, at 1.09 million barrels a day.

UAE daily output has been in the vicinity of 2 million barrels.

Some OPEC members have been reported as saying the next July 25 semiannual meeting should focus on bringing the UAE back into the quota fold and accepting a limit on its output.

The July 25 meeting in Geneva is expected by oil-market observers to be protracted and acrimonious.

Prices have fallen 30 percent so far this year because of the cartel's failure to enforce production quotas.

The Kuwaiti sources, as the preliminary Jeddah meeting of Gulf producers began, said the July 25 conference would be ''crucial.''

New Kuwaiti oil minister Salim Al-Ameeri, who replaced long-time minister Sheik Ali Khalifa Al-Sabah in a cabinet reshuffle last month, insists on getting a quota increase, but also ''will give priority to increasing prices.''

#90191u1549 07/10/1990 ~United Press International

VIENNA, VA (JULY 10) UPI - Washington Mortgage Acquisition Inc. Tuesday said it has purchased Washington Mortgage Group Inc. from Washington Bancorporation, the parent company of The National Bank of Washington.

The purchaser, which is composed of Washington Mortgage Group management and private investors, is affiliated with the StoneLeigh Financial Group,

an international financial services company. Terms of the deal were not disclosed. Officials of the companies could not be immediately reached for comment.

Shekar Narasimhan, Washington Mortgage Group's president and chief executive officer, said the company is finalizing plans for expansion into the Southern California market and increasing its focus on managing participating funds for foreign investors.

Washington Mortgage Group, with offices in Vienna, Va.; Atlanta; and New York, said it manages over $500 million in mortgage servicing assets. Loan originations in 1989 totaled $261 million.

StoneLeigh Financial has offices in Boston; Riyadh, Saudi Arabia; Seoul, South Korea; and Vienna, Va. StoneLeigh said it is considering further acquisitions in the financial services area.

Washington Mortgage Group also said it has received approval from the Federal National Mortgage Association as a lender under the multifamily Delegated Underwriting and Servicing Program. The program effectively grants a franchise to WMG to sell its multifamily loans to Fannie Mae with delegated underwriting and superior pricing.

#90191u1552 07/10/1990 ~United Press International

(JULY 10) UPI - A Chicago judge refused to require three-year-old twins to take blood tests before ruling in the case of their half brother, who suffers from leukemia. Judge Monica Reynolds refused to order tests for James and Alison Curran in deciding whether they should donate bone marrow to their 12-year-old half brother. The judge says she will order the tests only if the twins' mother agrees. The test would show whether the twins are a suitable match for a life-saving bone marrow transplant for their half-brother.

Former Secretary of State Alexander Haig is warning that Western democracies should keep their guard up when dealing with the Soviet Union. Haig... a former NATO commander... says he disagrees with plans to remove short-range missiles in West Germany that are aimed at Eastern Europe. Speaking at a business seminar in Indonesia, Haig warned Western nations against becoming complacent toward the Soviet Union.

#90191u1577 07/10/1990 ~United Press International

PARIS (JULY 10) UPI - Just three weeks after proudly commemorating Gen. Charles de Gaulle's World War II appeal to fight German occupiers, France discreetly observed the 50th anniversary Tuesday of a less glorious but equally poignant event - the founding of the Vichy Republic.

On July 10, 1940, the National Assembly, meeting in the casino in the resort of Vichy, voted 569 to 80 - with 17 abstentions - to give full powers to Marshal Philippe Petain, and called on him to write a new constitution that would be submitted to the voters for approval.

The vote scuttled the Third Republic and allowed Petain, then 84, to pursue his policy of saving French lives through collaboration with Hitler's Germany, ultimately leading to the deportation of thousands of French Jews to Nazi concentration camps.

Petain had signed an armistice with Germany on June 22 in his role as President of the Council of Ministers.

Yet despite its historical importance, France tried as best it could Tuesday to ignore an event that continues to symbolize the widespread collaboration of the French people with the Third Reich.

The conservative daily Le Figaro ran a lengthy story about the episode, and Le Point magazine headlined its cover this week ''The Forgotten Truths of the Summer of '40.'' But the prestigious Le Monde and other newspapers ignored the anniversary.

In the only public ceremony marking the event, the minister for relations with parliament, Jean Poperen, paid tribute in Vichy to the ''lucidity and courage'' of the 80 deputies who voted against the act, only three of whom are still alive.

The low-key event was in contrast to the elaborate celebrations

surrounding de Gaulle's so-called ''Appeal of June 18'', in which he called on the French people to join him in the fight against the Germans despite Vichy's capitulation.

A giant radio commemorating the 50th anniversary of the famous broadcast from the BBC studios in London was set up on the Place de la Concorde in central Paris, and de Gaulle's speech was broadcast continuously over a huge speaker system. The festivities ended with an elaborate light and sound show on the banks of the Seine River.

But forgetting is not as easy as some would like.

Also on Tuesday, Paul Touvier, the former chief of the collaborationist militia in the Lyon area, was taken from his jail cell to a Jesuit school where seven Jews had been held before being shot to death in reprisal for the killing of a German sympathizer.

Judicial sources described the visit as part of the investigation into the murders, one of the ''crimes against humanity'' for which Touvier will be tried at a still undetermined date.

The historic vote in Vichy was arranged by Pierre Laval, a member of the last Third Republic government formed just three weeks earlier.

''The National Assembly gives all power to the government of the Republic under the authority and signature of Marshal Petain so he can promulgate, by one or several acts, a new constitution for the French state,'' the text said.

Some historians and commentators argue that many of those who voted to give Petain absolute powers did so because of his reputation as the savior of France during World War I. Others recalled that he took great care to save as many lives as possible in combat.

''We absolutely did not have the sentiment, and even less the intention, of burying the Republic,'' recalled Antoine Pinay, who voted for the law. ''We had the impression that France was being subjected to a great test and that the exceptional circumstances called for exceptional measures.''

''In renouncing more than 70 years of the Republic and 125 years of parliamentary tradition, the members of the Assembly took on themselves a responsibility from which the country has never fully recuperated,'' Le Figaro said in its Tuesday editions.

#90191u1615 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - The Pentagon Tuesday flatly denied a Newsweek

magazine report that the United States is planning a decisive blow against South American drug chiefs by coodinating a simultaneous hemispheric drug raid.

''That is all absolutely untrue ... we have no such plans,'' Pentagon spokesman Pete Williams said at a news conference, when asked about the story.

''The idea that there is to be a simultaneous, multinational military attack on all drug-growing, production and shipping targets would be ludicrous, given the number - the hundreds, perhaps thousands - of illegal airstrips, coca labs and transit points in the region,'' he said.

''There are no such plans in the United States or at Southern Command (in Panama) for a simultaneous, multinational one-strike blow,'' he said, adding that there also are no plans to hit a fewer number of targets at once.

In this week's edition, Newsweek said briefing papers from the U.S. Southern Command headquarters in Panama documented plans for a raid caried out by the armies of Colombia, Bolivia and Peru and coordinated by the Southern Command.

The report said the armies would hit targets only in their own countries. The attack would involve a use of force applied swiftly and simultaneously to the cartel's ''entire support structure,'' Newsweek reported the briefing documents as saying.

U.S. troops were slated to play a background role in the strike but would be ready for use if needed, the magazine said.

The magazine attributed the plan to Army Gen. Maxwell Thurman, head of the Southern Command, who led the U.S. invasion of Panama. Thurman entered Walter Reed Army Medical Center in Washington Monday to confirm initial tests that showed he has developed leukemia.

-30- 1970

#90191u1624 07/10/1990 ~United Press International

MOSCOW (JULY 10) UPI - The Communist Party gave Mikhail Gorbachev a new mandate for his reform programs Tuesday by overwhelmingly voting to keep him as general secretary.

Gorbachev got 3,411 of 4,527 votes cast at the 28th Communist Party Congress in its first direct election for the top post. His only opponent, Teimuraz Avaliani, a party official from Siberia, got 501 votes, and 615 delegates voted against both candidates.

''I asked to speak to express words of gratitude to you for the huge support and faith which you showed me by electing me as general secretary ... at this crucial time in the life of our country and party,'' Gorbachev said in a brief acceptance speech. ''I thank you for this.''

Earlier, Foreign Minister Eduard Shevardnadze, Gorbachev adviser and Politburo member Alexander Yakovlev and Interior Minister Vadim Bakatin were among six nominees who declined to run so as to clear the way for Gorbachev's election.

The election was the first in which the Party Congress, held every five years, directly chose the top party leader. Previously the general secretary was chosen by the smaller Central Committee. The 28th Congress also created the new post of deputy general secretary.

Several delegates argued Gorbachev should give up either the general secretary's job or his post as Soviet president but Shevardnadze countered that separating the posts now would weaken the party and the government.

''In principle I'm against any joint posts and am sure that we will achieve this,'' Shevardnadze said. ''But ... in the heat of our revolution we must make a single exception.''

Speaking before voting began, Gorbachev said he was responsible for mistakes over the past few years and conceded the joint posts had made his task more difficult. He said the addition of a deputy general secretary would help.

Nikolai Zhilenkov, a delegate from Siberia, told Gorbachev in a brief debate before voting he should ''spend more time on developing our home than on developing the common European home.''

Earlier in a combatitive response to conservatives who have used the Congress to attack his political, economic and foreign policy reforms, Gorbachev reminded delegates again that the Communist Party no longer holds a monopoly on power and risks being left behind by Soviet society if it does not change.

''The success of the party depends on its understanding that it is working in a new society,'' Gorbachev said in an unscheduled hourlong speech during a debate on his opening report to the Congress. ''Otherwise other political forces will crowd it out and we will lose our position.''

Gorbachev seemed especially angry when he discussed the critics of his foreign policy.

''I reject as completely unacceptable the attempts to call our policy into doubt,'' he said. ''They reflect someone's narrow self interest.''

Hard-liners including some military leaders have criticized the Gorbachev government for being too friendly with the West and doing too little to help Communist regimes in Eastern Europe.

''What - tanks again?'' Gorbachev asked mockingly. ''What - are we going to teach people how to live again? We are no longer teaching such lessons. We are teaching different lessons.''

He said he has tried to convince critics of the necessity of changes in foreign and domestic policy but some conservatives refuse to listen.

''Those who don't understand, who don't want to listen to arguments, that is their personal affair,'' Gorbachev said. ''But it is not a personal affair for those who occupy high posts.

''They have to carry out the policy. And they have to be loyal to the government. If they do not agree they should be decent people and retire.''

Gorbachev did not mention his critics by name but Politburo hard-liner Yegor Ligachev has led the conservative attacks on his foreign policy.

After Gorbachev's speech, the delegates by a 2,809-1,306 vote defeated a proposal that would have labeled the work of the party's Central Committee and Politburo ''unsatisfactory.''

Then the Congress accepted Gorbachev's opening report last week in a mild resolution that reaffirmed the leadership's course while criticizing some of the implementation of policies.

Monday, the Congress voted to radically change the party's ruling Politburo, giving dominance to Communist leaders from each of the 15 Soviet republics while further separating the party from the government.

NEW YORK (JULY 10) UPI - A federal jury Tuesday returned a partial verdict of guilty against John Mulheren Jr., a Wall Street speculator implicated in stock swindles by insider trader and government informant Ivan Boesky.

On its seventh day of deliberations, the jury found Mulheren, accused of helping Boesky evade taxes and securities laws in exchange for valuable investment tips, guilty of one count of conspiracy and three counts of securities fraud.

The panel also found Leonard L. DeStefano, a former trader at Mulheren's now-defunct firm, Jamie Securities Co., innocent on two counts of

conspiracy and fraud.

U.S. District Court Judge Miriam Goldman Cedarbaum told the jury to continue deliberating the other 26 counts of fraud and other charges Mulheren faces.

"This was a long trial, and sometimes it takes a long time for the jury to deliberate," Cedarbaum told the jury. "Even though you may think you are deadlocked, I don't think you have spent an inordinate amount of time in deliberations. I will ask each of you to remember my instructions ... and return to deliberate."

Mulheren, who throughout the trial has been relaxed and jovial, appeared to take the verdict good-naturedly. "You win some, you lose some," said Mulheren, typically clad in an open-necked shirt, casual trousers and dock shoes, outside the courtroom.

DeStefano described his innocent verdict as "bittersweet." "You've got two innocent men here, and one was found not to be," he said. Each count Mulheren faces carries a maximum sentence of five years in prison and a $250,000 fine. The trial began May 14.

Mulheren, who was named when Boesky turned government informant in a 1986 plea bargain, is the only Wall Street figure to fight accusations by Boesky in trial. Tips from Boesky also led to federal charges against junk bond king Michael Milken, who reached a plea bargain agreement with the government in April.

Prosecutors accused Mulheren, 41, of manipulating stock prices and conducting false securities transactions for Boesky. The two once were good friends, and Mulheren was named trustee of the Boesky estate for Boesky's children.

Mulheren was charged with manipulating the stock price of Gulf & Western Inc., now Paramount Communications Inc., so Boesky could get a good price for the 4.9 percent stake he held in the company after a failed takeover attempt.

Mulheren also was accused of stock parking, a practice designed to conceal the identity of a stock owner, to help Boesky evade taxes and minimum net capital requirements.

Testimony by Boesky, who appeared as the government's star witness, marked the first time he has publicly described the insider trading scandals that rocked Wall Street in the late 1980s.

Boesky told of a stock parking arrangement under which he sold Unocal Corp. stock to Mulheren, with agreements that any profits would be

funnelled back to Boesky through inflated brokerage fees and that Boesky would repurchase the stock at a later date.

Boesky's credibility on the witness stand came under sharp attack by Mulheren's defense attorney Thomas Puccio, who forced the admitted insider trader to concede he had lied "several times" while under oath before the Securities and Exchange Commission and in official government documents.

The most damaging testimony against Mulheren, however, came from his former partner Edward McCarthy, who said he had several conversations with Mulheren about illegal securities trades with Boesky. Testifying under immunity from prosecution, McCarthy said Mulheren asked him to keep separate records of the Unocal stock "because it was Ivan's."

Taking the stand in his own defense, Mulheren admitted paying the inflated brokerage fees to Boesky, but said he did so out of obligation because of the huge profits he made in purchasing stock from Boesky. Paying inflated fees out of gratitude was a common trading practice, he said.

Mulheren also testified he was unaware Boesky had any holding in Gulf & Western when Mulheren bought a large chunk - driving the price up - just before Boesky sold his stake back to the company.

Mulheren was arrested in 1988 carrying an assault rifle in his car at his Rumson, N.J. home after allegedly threatening to shoot Boesky for informing on him. His family blamed the incident on his failure to take the lithium he uses to control manic depression. He is on probation in connection with the gun charges.

BUDAPEST, HUNGARY (JULY 10) UPI - Hungary, already feeling the effects of a scaling back of oil shipments by the Soviet Union, will be severely hit by a five percent cut in oil exports announced by Moscow in reducing its crude oil production, Hungarian officials were reported as saying Tuesday.

Nikolai Ryzhkov, the Soviet prime minister, was reported in published weekend accounts as saying that annual Soviet oil exports would be reduced by seven million tons, or 140,000 barrels a day. This is about five percent of overall Soviet oil exports. Each ton equals approximately seven barrels.

"We must urge the Soviet Union to fulfill its obligations without fail," Tibor Borbely of the Hungarian Trade Commission in Moscow said Tuesday in an interview published in the Hungarian daily Magyar Nemzet.

Borbely said oil deliveries from the Soviet Union, which supplies most of

Hungary's oil, started to lag behind monthly quantities early this year. He said Soviet shipments in the first half of the year were only 43.2 percent of the oil that should have been exported to Hungary under a exchange agreement with the Soviet Union.

The MTI Hungarian news agency said Hungarian importers will start talks in Moscow Wednesday on the consequences of the Soviet decision. Although oil could be bought on the world market, this would have a negative effect on Hungary's balance of payments and place a heavy burden on Hungary's already-strained central budget. The trade deficit had not been expected to exceed $400 million this year.

Unofficial estimates put the drop in Soviet oil deliveries at 200,000 to 400,000 tons so far this year, MTI said. To make up this shortfall, the agency said, Hungary imported 210,000 tons of oil from Iraq earlier this year. Ryzhkov said oil exports were being cut because the Soviet Union had an exceptionally good harvest, requiring more fuel for domestic use.

But the plans to cut exports follow recent announcements of a decline in domestic Soviet production, noted Robert Ebel, a former U.S. intelligence analyst who is currently international vice president of Enserch Corp. in Washington.

Ebel, who closely monitors Soviet oil production, said that about ten days ago Pravda of the Ukraine quoted Soviet officials as saying Soviet crude production would decline by 30 million tons annually, or 600,000 barrels a day, representing about five percent of production.

Around the same time, the Moscow edition of Pravda, said deliveries of Soviet crude oil to refineries would only decline by about 21 million tons the analyst said. The difference would have to be made up from exports, Ebel said.

#90191u1673 07/10/1990 ~United Press International

LOS ANGELES (JULY 10) UPI - Defense giant Northrop Corp., reflecting the pressure of a bleak outlook for the defense business, said Tuesday it will lay off about 1,400 workers at one of the Southern California plants building the B-2 stealth bomber.

The cuts at Northrop's Pico Rivera facility are part of the company's plans, first disclosed at its annual meeting in May, to trim 3,000 jobs by the end of the year from its work force of 41,000, spokesman Tony Cantafio said.

The reductions at the parts fabrication and production plant in Pico Rivera will take place on an "across the board" basis starting this month through

September, Cantafio said. That plant employs about 10,500 workers.

Cantafio said Northrop has already notified workers at its aircraft division in Hawthorne, Calif., that 1,350 jobs will be cut at that plant by the end of the year through layoffs, contract terminations, voluntary leaves and retirements.

Northrop is also transferring production of the forward fuselage section of the B-2 from Pico Rivera to its plant in Palmdale, Calif., as a cost-cutting measure, Cantafio said. As a result, employment at Palmdale, located about 60 miles north of Los Angeles, will increase from 2,200 to 3,000 by the end of the year.

The radar-evading B-2, which is made largely with composite materials - fabrics bonded in a plastic resin - generates about half of Northrop's revenues, which totaled $5.25 billion last year. Defense Secretary Richard Cheney reduced future production of the aircraft earlier this year from 132 to 75, giving the program a total cost of $62 billion.

The Air Force has already spent more than $26 billion on the B-2, which flew for the first time a year ago. It is due to be tested soon for its ability to evade radar detection.

Two other major Southern California aerospace employers - Lockheed Corp. and McDonnell Douglas Corp. - have also announced big job cuts this year. Lockheed said in April that it would trim 2,750 workers from its aircraft unit, then announced in May that it would pull all of its aircraft operations out of Burbank, Calif., by 1994, which could mean more cuts.

McDonnell Douglas, which had already announced 7,000 layoffs this year at its Douglas Aircraft Co. facilities, disclosed plans last month to cut $700 million in costs from its operations. Douglas officials subsequently said that the cost-cutting would mean another 2,000 to 4,000 layoffs at Douglas, but no specifics are expected to be released for several more weeks.

#90191u1675 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - A defense contractor that sold shoddy helicopter engines to the Coast Guard will pay $17.9 million in the largest settlement of a ''whistleblower'' lawsuit, the Justice Department announced Tuesday.

The Avco Corp.'s Textron Lycoming Division will pay 15 percent of the settlement, or $2.7 million, to Robert C. Ballew, a ''whistleblower'' who first alerted the government to misconduct, the Justice Department said.

Ballew was a former procurement official for Aerospatiale Helicopter Corp. of Fort Worth, Texas, the primary manufacturer of a Coast Guard rescue helicopter that also is used for drug interdiction.

Ballew filed suit in May 1988 under a special provision of the False Claims Act that allows ''whistleblowers'' to receive a percentage of any settlement in return for bringing allegations of misconduct to the government's attention.

As a subcontractor on the helicopter project, Textron Lycoming promised to provide engines for the HH-65A Dauphin helicopter that could be flown for 2,400 hours between overhauls, the government said. Instead, the engines usually lasted for some 600 flight hours before requiring extensive and expensive repairs, the government said.

The engines operated at temperatures much higher than required by design specifications and deteriorated rapidly, the Justice Department said.

The government said an investigation also found that when Textron Lycoming modified the engines so the helicopters could fly during snowstorms, taxpayers were charged ''for items that were unrelated to the snow modifications but were necessary to eliminate other engine defects, despite instructions by the Coast Guard that it would not pay such charges.''

In Fort Worth, Texas, Ballew's lawyer, James Henley Morgan, said: ''I saw him today. He seemed happy enough.''

While working for Aerospatiale, Ballew ''noticed that the part numbers didn't match. There were many things he found,'' Morgan said.

Ballew eventually was laid off, Morgan said, but eventually got another aircraft industry job and still lives in the Fort Worth area.

The settlement will allow the Coast Guard to save up to $60 million, the Justice Department said, because Textron Lycoming must maintain the helicopter engines and supply replacement parts for as long as six years.

The Coast Guard will pay a maintenance fee based on the hours the helicopters are flown.

''This arrangement will increase Textron Lycoming's incentive to improve the engines' longevity, since Textron Lycoming will now bear the costs of the replacement parts,'' said Stuart Gerson, an assistant attorney general in charge of the Justice Department's civil division.

The manufacturer of the helicopter, Aerospatiale Helicopter Corp., was named as a defendant but ''no evidence was discovered to suggest that

Aerospatiale participated in Textron Lycoming's misconduct,'' the Justice Department said.

Textron Lycoming has offices in Williamsport, Pa., and Stratford, Conn., the Justice Department said.

TUSAYAN, ARIZ (JULY 10) UPI - Ten people escaped injury Tuesday when a plane on a sightseeing flight over the Grand Canyon made an emergency landing on a dirt airstrip at a ranch.

The pilot and nine passengers aboard the twin-engine Cessna 402, owned by Grand Airways of Las Vegas, Nev., were flown by helicopter to Grand Canyon Village.

Maureen Oltrogge, spokeswoman for the National Park Service, said four passenger, tourists from Taiwan, were seen by doctors at the Grand Canyon Clinic, but there were no injuries.

The plane had left Las Vegas early Tuesday en route to Grand Canyon Airport in the town of Tusayan and landed about one hour and 10 minutes later on the airstrip, eight miles west of the airport and one-half miles south of the the national park.

''The pilot reported trouble with one engine and had to shut it down. He elected to land out there,'' said Bob Ward, an air traffic control specialist at Grand Canyon Airport

The chief pilot for Grand Airways said the plane was capable of flying on one engine, ''but sometimes that's not the best choice.''

#90191u1698 07/10/1990 ~United Press International

NEW YORK (JULY 10) UPI - The New York Jets made Syracuse University's all-time leading receiver Rob Moore the first player chosen in the NFL supplemental draft Tuesday, forfeiting next year's first-round choice.

The Jets had the third shot at Moore after the Dallas Cowboys and Atlanta Falcons passed in the lottery weighted to help teams most in need. The selection allows Moore to join the team that practices a stone's throw from his childhood backyard. The Hempstead, N.Y., native grew up in the town of the Jets' training facilities before leaving to put together a remarkable career in three seasons at Syracuse.

The 6-foot-2, 201-pound receiver red-shirted his freshman season but

during the next three years, caught 106 passes for 2,122 yards - an average of 20 yards per catch - and 22 touchdowns. Moore has a year of collegiate eligibility remaining but made himself available for the NFL by graduating this spring.

The eight teams that won six or fewer games last season were in the first tier of the draft and their chances were staggered according to record. The Cowboys had 28 of the 196 chances by virtue of their 1-15 record last year. The Falcons had 27 chances, followed by the Jets with 26, the Phoenix Cardinals with 25, the New England Patriots with 24, the Tampa Bay Buccaneers with 23, the San Diego Chargers with 22 and the Chicago Bears with 21.

The NFL would not reveal the selection order in the draft but the Jets confirmed they chose third. Bob Ackles, the Cowboys' director of player personnel, said the team was protecting its first-round draft choice in next year's college draft. The Cowboys last year had no first-round pick as a result of selecting quarterback Steve Walsh in the supplemental draft.

The draft was conducted in the NFL office at 1 p.m. EDT and Moore's father Charles Moore, said he learned when Rob phoned him from Chicago that his hopes were realized.

''I found out Rob would be a Jet at 1:23, when he called. It gives my son a chance to play with his idol, Al Toon,'' Charles Moore said of the Jets' All-Pro receiver.

Jets General Manager Dick Steinberg said Moore would have been taken among the top eight players had he been availabale in this year's regular draft.

''It's not complicated,'' Steinberg said. ''The guy's big and he's fast (4.4 in the 40-yard dash), runs good routes, is well-coached, healthy, smart and productive in a very fine program.''

Moore joins Toon, veterans Jo Jo Townsell and Chris Burkett, No. 28 draft choice Reggie Rembert and seven other rookies at wide receiver.

''You can never have enough good players at any one position,'' Steinberg said. ''We expect Rob to come in and contribute quickly.''

The GM said Moore is further along in development than Rembert, the Jets' second-round pick out of West Virginia.

''No doubt that this is a guy who is in his league as far as young guys coming in,'' Moore's agent, Gary Wichard said. ''Rembert was a second-round pick so I don't think you can even compare them.

Moore was in Chicago for baseball's All-Star Game. Wichard also represents

Jack Armstrong of the Cincinnati Reds, the National League's starting pitcher in the game.

Two other players were available in the draft, Louisiana State tight end Willie Williams and Ricky Martino, a defensive back who attended Navarro Junior College, Tarrant County Junior College and Grambling but never played.

The Cowboys and Falcons had said they were leaning toward taking Moore if given the opportunity, while the Cardinals, Patriots, Buccaneers and Chargers said they definitely would have used the pick on him. Moore had said the only team he didn't want to play for was Chicago.

#90191u1705 07/10/1990 ~United Press International

(JULY 10) UPI - Soviet President Gorbachev has been overwelmingly re-elected as general secretary of the Communist Party. Delegates at the 28th Communist Party Congress in Moscow voted by secret ballot to retain Gorbachev by a 3-1 margin. The election was the first in which each delegate was able to cast a vote.

Former President Jimmy Carter is in Ethiopia, where he's appealing to African leaders to negotiate for peace in an effort to end six civil wars on the continent. Carter told delegates of the Organization of African Unity that a concerted effort needs to be made for peace in order to move Africa from oppression to freedom.

Washington is warning U-S citizens to stay clear of Kenya following political rioting throughout the country. Unconfirmed news reports say as many as 10 people have died in clashes between pro-democracy demonstrators and police. Rumors persist that the military is under orders to shoot protesters on sight.

Federally sponsored random drug testing is being linked to an overall decline in drug abuse. SmithKline Beecham Labs say only 13-point-eight percent of workers in the general work place showed evidence of drug abuse... down nearly five points from last year. A laboratory consultant says the tests have had a deterrent effect on drug use.

#90191u1712 07/10/1990 ~United Press International
WASHINGTON (JULY 10) UPI - Opponents of an administration proposal to substitute inexpensive drugs in Medicaid reimbursements charged Tuesday it would mean ''second-class'' treatment for the poor and elderly and could cause deaths.

A coalition of 15 groups representing blacks, Hispanics, the pharmaceutical industry and health care organizations joined to criticize a proposal by budget director Richard Darman that is part of budget talks between Congress and the Bush administration.

Hoping to shave $300 million from the 1991 budget, Darman proposed on June 20 that nationwide restrictions be imposed on the drugs dispensed in the Medicaid program, generally making only the cheapest drugs authorized for reimbursement. The plan is one of several by the administration aimed at trimming costs in entitlement programs.

The proposal is based on ''therapeutic substitition,'' under which pharmacists would be compelled to switch lower priced drugs with similar but not necessarily identical medicinal value for drugs named in doctor's prescriptions.

Under the plan, the Department of Health and Human Services would group drugs into therapeutic catagories and the lowest priced drug in each category would be substituted for a prescribed drug unless a doctor stated the specific medicine as ''medically necessary.''

The plan would absolve druggists from liability for any potentially adverse reactions suffered by patients, yet would not require pharmacists to receive approval for a substitution from the doctor.

The 15 organizations sent a letter Monday urging budget negotiators to oppose the Medicaid changes.

The plan's opponents argue that it is based on the faulty premise that chemically different drugs can be used interchangeably. They say it would deprive Medicaid recepients of the newest and most advanced medicines, put patients at risk for unexpected side effects from substitute medicines, and actually increase federal Medicaid spending through payments to treat adverse side effects and illnesses not cured by the substitute medicines.

David Richardson, a Pennsylvania lawmaker and president of the National Black Caucus of State Legislators, said poor patients who receive improper medicine because of the Darman plan will suffer.

''They will get worse and then they will wind up requiring more expensive treatment, more hospitalization, more surgery,'' Richardson said at a news conference. ''Some may die needlessly under this system. And if the government cannot show some compassion for the poor, at least let (the government) show some common sense.''

''(The proposal) creates a second class of medical care for the elderly and poor citizens of this country,'' said Marjorie Shea, an official of the Illinois Retired Teachers Association. ''This plan breaks long-kept promises of good health care for millions of seniors and poor citizens.''

Gerald Mossinghoff, president of the Pharmaceutical Manufacturers Association, said therapeutic substitution is illegal in virtually every state and called the plan ''downright dangerous.''

''We appreciate the need to balance the budget, but do not believe this should be achieved at the expense of quality medical care to the nation's poorest patients,'' Mossinghoff said.

#90191u1716 07/10/1990 ~United Press International

PASADENA, CALIF - A newly discovered asteroid whizzed through Earth's path Tuesday at an estimated speed of 22,000 mph, coming as close as 3 million miles from the planet, scientists said.

The rocky object, first sighted 15 days ago by Jet Propulsion Laboratory planetary scientist Eleanor Helin, is among the closest Earth-orbit crossing asteroids observed in the last 50 years and the fourth new

Earth-crossing object discovered this year, JPL officials said.

Helin said astronomers tracked the asteroid last week from the Arecibo Observatory in Puerto Rico and from NASA's Deep Space Network antennas at Goldstone, Calif. They plan to continue their observations through the weekend.

Helin, head of the Palomar Planet-Crossing Asteroid Survey, a long-term program of monthly systematic searches for near-Earth crossing asteroids, discovered ''Asteroid 1990 MF'' on June 26 when it was 8 million miles from Earth.

Magnitude estimates from Palomar Observatory indicated the asteroid was smaller than a previous near-Earth crossing asteroid, 1989 PB, a double-lobed object discovered last August.

Helin estimated 1990 MF may range in diameter from about 300 feet to 1,000 feet, depending on the reflectivity of the object.

In March 1989, a half-mile wide asteroid skirted within 500,000 miles of Earth - the closest any asteroid has come since Hermes in 1937. About 1,000 asteroids larger than a half-mile wide are known to cross Earth's path, but it is rare for any to pass so close.

Other cosmic near misses occurred in June 1989 when an astroid passed within 8.2 million miles of Earth and August 1989 when a mile-wide asteroid streaked within 2.5 million miles of our planet - or about 10 times the distance from the Earth to the moon.

Asteroids are rocky extraterrestial bodies, most of which orbit around the sun in a belt between Mars and Jupiter.

But about 1 percent of known asteroids have orbits that cross those of planets. It is estimated that asteroids in orbits that cross the path of planets generally collide with a planet about once in 10 million years.

Some scientists believe the impact of a 6-mile-wide asteroid may have caused the extinction of dinosaurs and other living creatures about 65 million years ago.

''We can tell from impact craters that Earth has been hit many times over geologic time,'' Helin said.

The asteroid discovered two weeks ago is an ''Apollo'' asteroid, one that crosses Earth's orbit.

While results are still preliminary, orbital calculations indicate the Apollo asteroid travels in a relatively small, elongated orbit 161 million

miles across. The asteroid completes one trip around the sun every two years, four months.

The asteroid's composition has not yet been determined, Helin said. Because it was relatively bright, its apparent magnitude made it readily observable by ground-based observatories during its fast-moving course through the sky.

At discovery, 1990 MF was traveling rapidly due north at approximately 12,500 mph. The object was estimated to be magnitude 15, or 140,000 times fainter than Polaris, the north star.

The asteroid brightened as it moved closer to Earth and follow-up observations showed the small body was accelerating and was expected to exceed 22,000 mph by closest approach to Earth.

#90191u1777 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - A balanced budget constitutional amendment is ''a gimmick by a group of people who really haven't got the fortitude to make the tough choices,'' a critic of the proposal told a House subcommittee hearing Tuesday.

The comment by Rep. Mike Synar, D-Okla., came during a House Judiciary subcommittee hearing on the proposed amendment, which is scheduled to be voted on by the full House next Tuesday.

Richard Darman, President Bush's budget director, testified in favor of the amendment, which would limit the government's ability to spend more than it takes in annually. Bush supports the amendment.

Darman said failure to adopt the amendment would put future voters ''at

serious risk of being made the innocent victims of a political system that has an abundance of incentives to consume in the present and leave the bills to the future.''

Under the proposal, deficit spending or an increase in the national debt would be permitted only when three-fifths of the members of each house of Congress vote for it. Bills to raise revenue would require a majority vote of the total membership of each house.

Supporters of the amendment say that the Gramm-Rudman budget law, which requires a steady decrease in the federal deficit until it is eliminated, is not strong enough and can be circumvented too easily.

To become the 27th Amendment to the U.S. Constitution, it must be approved by two-thirds of those voting in both the House and Senate and must be ratified by three-quarters of the 50 states, or 38 states.

Down the hall from the hearing, White House and congressional budget negotiators resumed efforts, after a week-long break, to cut the budget deficit and balance the budget in the next few years.

No significant developments were expected since key administration negotiators, including White House chief of staff John Sununu and Treasury Secretary Nicholas Brady were with President Bush in Houston at the Economic Summit of leading industrialized democracies.

At the balanced budget amendment hearing, former Congressional Budget Office directors Alice Rivlin and Rudolph Penner, former Council of Economic Advisers Chairman Charles Schultze and Roy Ash, who served as director of the Office of Management and Budget from 1973 to 1975, all testified against the amendment.

Synar, a subcommittee member, said in his opening statement the amendment was a ''gutless act'' and said ''we shouldn't amendment the Constitution for budget process.''

''What we have here is just another gimmick by a group of people who really haven't got the fortitude to make the tough choices that the American public demands of us,'' Synar said, refering to those who refuse to make the spending or tax decisions needed to balance the budget.

Rep. Chuck Douglas, R-N.H., who helped lead the battle to force a House vote on the measure, said a constitutional amendment was needed because Congress has shown it does not have the will to balance the budget.

''If anybody comes in here today and says we can fix this (deficit) with a statute, they're smoking something,'' Douglas said.

The full House, which defeated a similar amendment in 1982, is scheduled to vote on the controversial amendment next Tuesday against the wishes of Democratic leaders.

In a rarely successful procedure, the amendment was forced out of the Judiciary Committee, where it had been bottled up for eight years, and onto the floor after a majority of the House signed a petition calling for its consideration.

#90191u1779 07/10/1990 ~United Press International
SOFIA, BULGARIA (JULY 10) UPI - Bulgaria's first democratically elected Parliament in four decades convened Tuesday with an appeal by lawmakers to ''bury forever'' the totalitarian system that dominated the nation's post-war history.

The 400 deputies elected in multi-party elections last month have a two-year mandate to draft a constitution and institutionalize the democratic reforms adopted over the past six months.

The 40-minute inaugural ceremony was opened by 81-year-old Yosiv Petrov, an opposition legislator who spent three years in a concentration camp under the old Stalinist government. He hailed the session as a ''turning point'' for Bulgaria.

''We have been called together by history to establish a new Bulgarian constitution which will be the starting point of a new democracy, free and independent,'' Petrov said.

As he spoke, about 500 Bulgarian nationalists demonstrated outside to protest the admission of ethnic Turkish deputies in the new Grand National Assembly.

Some carried banners reading ''Bulgaria is for Bulgarians.''

The Movement for Rights and Freedoms, a party founded by ethnic Turks, finished third in the parliamentary elections after the ruling Bulgarian Socialist Party and the main opposition group, the Union of Democratic Forces.

The inaugural session was held in the ancient Bulgarian capital of Veliko Tarnovo, about 150 miles east of Sofia, the town where Bulgaria's first democratic constitution was drafted 111 years ago after freedom from 500 years of Turkish rule.

After two weeks of political turmoil that saw the resignation of President Peter Mladenov, the speeches by various party leaders had a mostly

conciliatory tone.

Opposition leader Zhelyu Zhelev called on the deputies to draft a constitution that would render irreversible the democratic reforms adopted since the overthrow of hard-line leader Todor Zhivkov Nov. 17.

''We must bury forever the totalitarian system and restore parliamentary democracy in our country,'' Zhelev said.

Alexander Lilov, leader of the former Communist Party, promised to work closely with ''all who take part in the building of a democratic, humane and egalitarian society.''

''We stretch our hand to all,'' he said.

After the speeches, the session was adjourned until next Tuesday to allow time for inter-party talks on the selection of a new president.

Mladenov, a former communist who presided over the peaceful transition to multi-party democracy, resigned Friday amid controversy over a remark he made during a stormy anti-government protest Dec. 14.

After being jeered by demonstrators in front of the parliament building, Mladenov muttered the words, ''Let the tanks come.'' The remark was captured on videotape and became an issue at the close of the election campaign.

#90191u1833 07/10/1990 ~United Press International

HOUSTON (JULY 10) UPI - The plight of the Amazon rain forests emerged Tuesday as the focus of a West German-brokered deal at the seven-nation Economic Summit to avoid butting heads over the hotly debated phenomenon of global warming.

West German Chancellor Helmut Kohl, who came to the summit urging radical measures to combat global climate change, was seeking consensus instead on less controversial language for the final summit communique Wednesday.

Kohl was said by U.S. and West German officials to be promoting the preservation of Brazil's rain forests, which absorb carbon dioxide, as an alternative to U.S.-opposed cuts in carbon dioxide from industrial sources.

U.S. officials were interested in broadening that into a call for global action to slow deforestation, an issue some Third World countries see as a choice between environmental protection and economic development.

A West German official acknowledged the proposal was a fallback position for Kohl, but noted it also played to the concerns of French President Francois Mitterrand, who favors action on carbon dioxide.

''When, for this or that reason, there is no agreement by the participants to handle the problem that way, better something than nothing,'' French government spokesman Hubert Vedrine said of the prospective compromise.

Scientific studies have widely identified carbon dioxide, produced from the burning of fossil fuels as well as natural sources, as the biggest contributor to ''greenhouse gases'' that trap heat from the sun in Earth's atmosphere.

A U.N.-sponsored scientific working group concluded ''with confidence'' in May that with no concerted effort to reduce emissions of greenhouse gases, global temperatures would rise by 2 degrees by 2025 and 6 degrees by the end of the 21st century.

Scientists believe an increase of only a few degrees over that time period could cause radical ecological changes with damaging environmental, economic and social consequences.

To date, however, the United States has refused to accept the scientific evidence of global warming, urging more research to validate its cause and probable effect.

Though the world's largest single source of greenhouse gases, the United States has opposed specific commitments on carbon dioxide reductions, placing Bush at odds with Kohl and British Prime Minister Margaret Thatcher.

Kohl and Thatcher both recently announced plans to reduce their countries' carbon dioxide emissions by roughly 25 percent to 30 percent by the year 2005 through energy conservation and other measures. Japan has made a more vague commitment to reduce carbon dioxide ''as much as possible'' by 2000.

In what appeared to be a direct prod to Bush, Thatcher said her plan was contingent on similar action by other major powers.

Rather than attacking the industrial production of carbon dioxide, U.S. officials foresaw a summit compromise discouraging deforestation, which contributes to the greenhouse effect by destroying a natural source of carbon dioxide absorption.

Trees and other plants recycle carbon dioxide into oxygen during photosynthesis. When trees are cut down, the carbon stored in wood is released, quickly when burned and slowly if left to decay.

Bush has promoted tree-planting in the United States, but environmental groups contend that alone will not eliminate enough emissions enough to stabilize or reverse the greenhouse effect.

It is estimated that 2.5 billion acres of trees would have to be planted over the next 40 to 50 years to offset carbon dioxide emitted from global use of fossil fuels.

#90191u1851 07/10/1990 ~United Press International

NEW YORK (JULY 10) UPI - American Telephone & Telegraph Co. will lay off about 4,300 workers nationwide in its network services division, the Communications Workers of America said Tuesday.

The CWA, one of the two major unions representing AT&T employees, said it was informed of the figure at a Tuesday afternoon meeting with AT&T executives in New York.

"AT&T has informed us that about 4,300 workers in the network services division will be laid off nationwide," said Laura Unger, president of CWA Local 1150, representing about 2,400 AT&T workers in the New York-New

Jersey area.

The layoffs, which come under AT&T's plan to reduce its work force as the telecommunications giant upgrades its network, will affect 241 workers in New York and 98 in New Jersey. AT&T was expected to issue an official statement later this afternoon.

"AT&T will release the figures this afternoon," said an AT&T spokesman. "We think that a little more than 1,600 employees have taken our retirement incentive package so far."

AT&T announced last year a plan to reduce its work force nationwide and across-the-board. The company said it was putting an emphasis on cost control in the face of mounting competition and sluggish revenue growth.

The company offered last winter a retirement incentive package to about 8,500 managers, many of whom decided to accept it. A similar but less generous offer was proposed to about 16,000 non-management workers in March.

AT&T also said that its modernization program would reduce the need "for the man with the toolbelt," and that it needed to reduce its work force in the network service division by 6,000 this year.

-30- 1875

#90191u1871 07/10/1990 ~United Press International

NEW YORK (JULY 10) UPI - Police anticipating a possible fifth attack by the Zodiac gunman readied stepped-up patrols Tuesday in a bid to capture the bizarre killer, who has stalked and shot his victims only in the predawn hours on Thursdays.

''Clearly, tomorrow night is a target night, we're very aware of that,'' said Suzanne Trazoff, the police department's deputy commissioner for public information.

The gunman, who has shot four people, killing one, since March 8, has spaced his last three attacks 21 days apart, leading police to believe another attack may come in the early morning hours Thursday. In one instance, he waited 63 days between shootings.

The killer, who targets victims according to their astrological signs, last struck June 21, when he shot and wounded a homeless man sleeping on a bench in Central Park. All three earlier attacks were in a eight-block area along the Brooklyn-Queens border.

Trazoff refused to discuss planned police deployments for late Wednesday and early Thursday or specifics of the efforts of the 50-detective task

force tracking the killer.

''Obviously, to tip our hand would be counter-productive,'' she said.

Trazoff also said Police Commissioner Lee Brown was getting daily updates on the investigation into the shootings by the Zodiac gunman, who has written six cryptic notes to police and the media vowing to kill one person for each astrological sign.

Police were protecting a witness who spoke to a man believed to be the killer, and a published report said detectives were studying a mystical book in the hope of finding clues as to what motivates the attacker.

The suspected hit man is believed to be a medium-built black man in his mid-30s, with a mustache and short beard.

#90191u1924 07/10/1990 ~United Press International

NEW YORK (JULY 10) UPI - Dow Jones & Co. reported Tuesday second-quarter net income was $34.89 million, or 35 cents a share, a decline of 27.9 percent from second-quarter 1989 earnings of $48.35 million, or 48 cents.

Net income for the six months ended June 30 was $59.75 million, or 59 cents a share, vs. $248.36 million, or $2.47 a share, for the first half of 1989, the company said.

The 1989 six-month earnings included a one-time after-tax gain of $164.1 million, or $1.63 a share, recorded in the first quarter. Excluding the gain, first-half 1990 earnings declined 29 percent from 1989 levels.

The company, which publishes The Wall Street Journal among other things, said earnings per share in the 1990 quarter and half was reduced by 12 and 24 cents, respectively, by increased interest expense and goodwill amortization charges related to the company's acquisition of Telerate Inc. completed last January.

Dow Jones' second-quarter operating income decreased 30.7 percent to $70,862,000 on a revenue increase of 0.9 percent to $441,628,000. First-half operating income declined 27 percent to $132,894,000, while first-half revenue increased 2.9 percent to $868,691,000, the company said.

#90191u1932 07/10/1990 ~United Press International

CAMBRIDGE, MA (JULY 10) UPI - Harvard University has agreed to work with an Ecuadorian educational foundation to convert part of the South American country's national debt into a scholarship fund, the school said Tuesday.

The unique program will enable qualified Ecuadorian students to study at the prestigious Ivy League school while providing research grants and

internships in Ecuador for Harvard students and professors.

Under the agreement, Harvard will obtain Ecuadorian debt worth approximately 15 percent of its face value. The debt will then be donated to Fundacion Capacitar, an educational program established last year to expand educational and training opportunities in Ecuador.

Capacitar will trade the debt for Ecuadorian government bonds worth 50 percent of the debt's face value, and the revenue from bond sales will pay for the scholarship fund, Harvard officials said.

"We probably will buy about $5 million of face-value debt, which is worth about three-quarters of a million dollars," said Robert Scott, Harvard's vice president for finance. Scott said the program would probably generate between $100,000 and $200,000 in scholarship funds annually.

The pact is similar to other "debt for nature" deals providing money for environmental protection, but is the first such financing agreement involving scholarship funds, Harvard officials said.

Harvard President Derek Bok, who signed the agreement Monday with Ecuadorian Vice President Luis Parodi, said the pact was "both unique and exciting. Harvard welcomes the opportunity to expand educational exchange between Ecuador and the United States."

The school says the program will provide scholarships and grants for some 70 students and professors over the next decade. Four Ecuadorians studied at Harvard last year, a school spokesman said.

#90191u1962 07/10/1990 ~United Press International
ISLAMABAD, PAKISTAN (JULY 10) UPI - Afghanistan's pro-Soviet government has captured strategic positions near Kabul from U.S.-backed guerrillas in

its longest continuous offensive of the 12-year-old civil war, Western diplomatic sources said Tuesday.

State-run Kabul Radio, meanwhile, said the guerrillas pounded the capital with rockets Tuesday, killing six civilians, wounding 14 others and causing heavy damage to property.

The rebels - based in Pakistan and known as Mujahideen - have shelled Kabul almost daily for the past two months, causing hundreds of casualties. Diplomats believe the attacks were timed to coincide with moves by President Najibullah to broaden the base of his communist regime and make it more acceptable to the people.

Most of the rocket attacks against Kabul have come from the Paghman hills, about 15 miles west of the city. The government in March launched an operation to capture the region, held by the resistance since the 1978 start of the civil war. The operation has become the longest continuous government offensive of the war.

''The regime has scored gains (in Paghman) in recent days, driving Mujahideen from positions south and west of Kargha Lake,'' said one diplomatic source.

But, he said, ''the resistance forces are said to be still holding positions in the valley floor farther north, and control virtually the whole of the Paghman hills.''

The sources said guerrillas blew up a government ammunition depot in the region on June 24, and three days later repulsed a series of attacks, resulting in heavy casualties.

The Soviet Union invaded Afghanistan in 1979 to back a series of Marxist rulers against a Moslem insurgency. It withdrew its more than 100,000 troops last year under an accord signed in Geneva by Pakistan and Afghanistan.

#90191u1970 07/10/1990 ~United Press International

DETROIT (JULY 10) UPI - A credit rating company Tuesday downgraded the senior debt ratings of Chrysler Corp. and Chrysler Financial Corp., the No. 3 automaker's chief source of profits, because of increased business and financial risks.

The ratings by Duff & Phelps of Chicago followed similar downgrades late last month from New York credit rating firms Moody's Investors Service and Fitch Investors Service, as well as commercial paper downgrades from Standard & Poors.

Duff & Phelps lowered Chrysler's senior debt rating from triple-B-plus to triple-B-minus, while the senior debt ratings of Chrysler's financial unit were lowered from A-minus' to triple-B.

The financial unit's subordinated debt was lowered from triple-B-plus to triple-B-minus, while its preferred stock went from triple-B to double-B-plus. Chrysler Realty Corp.'s commercial paper rating was lowered from 'Duff 1' to 'Duff 2.' Approximately $21.7 million worth of outstanding debt securities are affected by the rating changes.

"As to business risk, the U.S. automotive industry is in a difficult period as reflected by excess capacity, intense price competition and the Japanese tranplants continuing to gain market share," Duff & Phelps said in a statement.

"These factors have pressured Chrysler's cash flow from operations at the same time that capital spending and research expenditures have been increasing," it said, adding that although the carmaker has cut costs and sold assets to maintain ample cash reserves, its "financial condition will be under greater stress than previously expected."

Chrysler spokesman Tom Houston said the carmaker was "disappointed by the ratings, and that the actions are not warranted by the facts." Chrysler reported first quarter profits of $71 million, down 79.8 percent from $351 million earned in the year-ago quarter. It had nearly $3.4 billion in cash and marketable securities on hand as of March 31, 1990.

The financial unit earned a record $89 million during the first quarter of 1990, and has posted six consecutive years of record profits. "We've been supplying the majority of profits to Chrysler," financial unit spokesman Robert Heath explained.

#90191u1987 07/10/1990 ~United Press International

MANAGUA, NICARAGUA (JULY 10) UPI - Violence between striking Sandinista workers and pro-government laborers escalated throughout the country Tuesday as both sides traded their rocks and pipes for guns, and the army joined police in trying to restore calm.

The confirmed death toll in violence directly or indirectly related to the strike climbed to five Tuesday, and hospitals in Managua reported at least 50 people were injured Monday and Tuesday, 40 of them with gunshot wounds.

President Violeta Chamorro earlier ordered the army to join police and restore order after violence erupted in a week-old strike.

The deaths included a Sandinista striker who was killed Monday in a clash at a textile plant in Managua, a Sandinista student shot to death Friday night and a Sandinista rancher hacked to death with a machete in Matagalpa on Saturday.

Hospital officials said two others were killed Monday night in Managua but details were not released. Presidential spokeswoman Lorena Mantica said there was also an unconfirmed death in the northwestern city of Leon.

''The only thing I know is things are getting worse, because now they have guns,'' Mantica said.

She said no talks were planned Tuesday.

A reliable source at the U.N. mission in Managua, however, said high-ranking government officials and top leaders of the Sandinista Front were in private negotiations Tuesday to try to resolve the impasse.

A Red Cross spokesman said the agency transported 21 people to hospitals in Managua Monday and early Tuesday and ''the majority of them had gunshot wounds.'' He said violence also appeared heavy in Leon and in Masaya but that ''the rest of the country was relatively calm.''

There was no immediate end in sight to the violence as Chamorro continued to refuse to negotiate with Sandinista union leaders, and the union, which represents some 400,000 employees of government ministries and state-run industries, continued to press demands for a voice in setting the nation's economic policies and a review of Chamorro's plans to privatize industries.

Union officials estimated more than 85,000 people were on strike, but thousands more stayed home from work because of the violence and lack of transportaion.

Sandinista workers and strike sympathizers labored through the night to erect hundreds of barricades in the capital's streets to stop people from going to work. The city was virtually paralyzed as bus drivers were also on strike, gas stations were closed and the international airport was shut down because air traffic controllers and other airport workers were on strike.

Gunfire could be heard throughout the night and the city was filled with the glow and smell of burning tires. Blocks torn from streets, overturned trash bins, chopped-down trees, overturned cars and whatever else the strikers could get their hands on were also used to build barricades.

As cars approached the barriers, the strikers would circle them, and if the occupants were found to be supporters of Chamorro's National Opposition Union (UNO), they were chased away or beaten, their cars often

becoming burning parts of the barricades.

At one barricade late Monday night, a United Press International reporter was surrounded and threatened with a gun by several pipe-wielding Sandinistas. A Red Cross ambulance then pulled up alongside and was delayed for several minutes as the driver waited for the strikers to disassemble part of the roadblock to let him through.

''They are letting us through,'' the Red Cross spokesman said. ''The problem is the time element.''

Tuesday morning, police scattered throughout the city and disassembled many of the barricades, but as soon as they moved on to others, the Sandinistas would return and build them up again.

The violence incited by UNO supporters, meanwhile, appeared just as heavy. They formed mass groups on the streets, destroying buildings, cars and anything else that belonged to Sandinistas. Like the strikers, many carried pipes, homemade baseball bats, rocks and other makeshift weapons. Sandinistas were often pulled from their cars and beaten.

The violence did not appear to be an immediate threat to the stability of the Chamorro government, but rather part of an avowed attempt by the Sandinista Front to ''govern from below'' and prevent drastic changes in the socialist economic, land and labor reforms they instituted over more than a decade of leftist rule.

Chamorro, in an address to the nation on Radio Nicaragua Monday night, appealed for calm, blamed the violence on the Sandinistas and ordered the army to help police maintain order. She did not address Sandinista demands for negotiations.

#90191u1988 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - An investigation of three dozen U.S. subsidiaries of major foreign manufacturers found more than half the companies paid little or no federal income taxes in recent years, a House panel reported Tuesday.

House Ways and Means Committee investigators said most of the foreign companies inflated the cost of the goods they sold to their U.S. subsidiaries in an effort to reduce the level of taxable profit in the United States.

In addition, some companies engaged in schemes to avoid customs duties that involved ''illegal freight and insurance charges, kickbacks and manipulation of prices,'' the panel's Oversight Subcommittee staff said in

a report.

''Some of these companies investigated have been operating in the United States for years and have never sent a check to Uncle Sam for one thin dime in corporate income taxes,'' said Rep. J.J. Pickle, D-Texas, the subcommittee chairman.

The staff report said the IRS can do little about the problem because it is ''outgunned'' by the big multinationals, lacking the resources and experienced investigators needed for complex analyses of tax-avoidance schemes.

One problem in retaining investigators is their pay, the report added. It quoted the IRS as saying grocery checkout clerks in Southern California can make more money than a first-year Internal Revenue Service lawyer.

The report was released as Congress considers legislation that would increase IRS enforcement powers to collect taxes from foreign-owned subsidiaries.

Fred Goldberg, IRS commissioner, told the subcommittee the IRS is ''not evenly matched'' with the foreign-owned subsidiaries and said tax-avoidance cases are particularly difficult because they require information that can only come from industry sources.

He said while there is no absolute proof of widespread non-compliance by foreign-owned companies, the data suggests they ''may significantly understate their U.S. income tax liabilities'' and that the ''shortfall is substantial.''

The subcommittee examined tax returns filed over a 10-year period by 36 foreign-owned distributors of cars, motorcycles and electronics equipment, chosen because they have major U.S. operations. Twenty-five of the companies were from the Pacific Rim countries and 11 were European.

While some of the unidentified companies paid ''a significant amount of federal income tax,'' most paid little or no income tax, the report said.

It added, ''The inflated pricing of goods purchased from the foreign parent, or the performance of functions not properly compensated for by the foreign parent, appear to be the main causes for the low levels of U.S. profits.''

For example, the report said, one company sold cars to its U.S. distributor at prices averaging $800 more than it charged its Canadian distributor for the same models. Another company charged its subsidiary $250 for a television set it sold to an unrelated distributor for $150.

Moreover, the report said some of the companies that did pay taxes had those payments negated in later years by substantial losses in what apears to be a deliberate pattern in which ''companies plan profits in cycles.''

MONROVIA, LIBERIA (JULY 10) UPI - Rebel leader Charles Taylor, in a radio interview Tuesday, rejected a cease-fire that President Samuel Doe declared in a desperate bid to end the 6-month-old civil war in the western African nation.

Taylor's broadcast statements coincided with the start of peace talks organized by the Economic Community of West African States in the Sierra Leone capital of Freetown.

In the interview with the British Broadcasting Corp., Taylor repudiated Doe's call Sunday for an end to hostilities, and said his forces wanted to move into Monrovia as quickly as possible to prevent further suffering.

Doe declared the cease-fire Friday and Taylor had reportedly agreed to it

Sunday. The rebel leader's turnaround was not explained.

Taylor, speaking to the BBC via telephone, also said he would not agree to a power-sharing plan in an interim government. He also rejected suggestions of an external peacekeeping force, saying his troops would attack any forces that landed on Liberian soil.

The civil war that Taylor began to oust Doe has degenerated into a tribal conflict between members of Doe's Krahn tribe, and those of the Gio and Mano tribes who make up the bulk of the rebel National Patriotic Front of Liberia. A Liberian army death squad carried out a second tribal revenge killing Tuesday.

Taylor said if Doe agrees to leave the country, his safe departure is guaranteed and his tribe members will not be harmed.

The diplomatic corps in Monrovia has appealed to both sides to end tribal killings and violence.

Heavy firing rattled the suburbs of Monrovia Tuesday.

An army death squad killed a third person in two days, witnesses said.

Soldiers bundled Junior Vea, a 19-year-old high-school student, into a car and took him to a beach outside a U.S. Embassy residence where they slit his throat early Tuesday, witnesses said.

The soldiers accused him of being a rebel after they found him in the courtyard of a house opposite the embassy.

The body of a man who had been bayonetted also was dumped Tuesday morning just a few yards away on the same beach. Three soldiers gunned down a man in daylight Monday in front of foreign journalists.

After the first killing, people who live near the beach were warned by the soldiers that if they stared too long at the body, they would suffer the same fate.

All three killings happened opposite the official residence of U.S. Charge d'Affaires Denis Jett, which is in Monrovia's Mamba Point diplomatic quarter.

Staff members of another Western embassy buried a headless corpse that washed up on the beach near their mission Tuesday.

Soldiers also beat up a man who lived near Vea, witnesses said. Jett drove past while the beating was in progress, and when the soldiers saw him they put their victim into a car and drove away.

Witnesses said rebels had killed a pregnant woman who had hidden a soldier near the town of Caldwell, west of the capital, from which rebels have withdrawn in the past week.

The rebels Monday drove out 20,000 civilians who had gathered for safety at U.S. ship-tracking base near Paynesville, 6 miles from the city center. They were pushed north, further behind rebel lines, witnesses said.

It was not clear why the refugees had been moved, but heavy firing began in Paynesville Tuesday afternoon. Residents said they could hear artillery and mortars but gave conflicting reports as to the source of the firing.

Conditions for the capital's half-million people remained grim, with food growing scarcer and more expensive. Most homes had been without electricity and running water for nearly two weeks, although a few areas had power Monday night.

Shops, which were closed for more than a week, reopened Monday to clear stock from shelves rather than have it looted by soldiers under cover of a 12-hour curfew.

Soldiers, who ransacked supermarkets last week, have begun systematically looting warehouses in Monrovia's Freeport. Relief workers said among the goods stolen were 200 tons of rice left behind when the U.N. disaster relief organization left Liberia at the end of May. The rice and other relief supplies such as tinned meat were being openly sold in the streets of the city.

(JULY 10) UPI - The latest developments from the Economic Summit in Houston, the Communist Party Congress in Moscow, the African unity summit in Ethiopia, the civil rights debate in Washington... U-P-I has news from across the nation and around the world.

It was a full morning's work for leaders attending the economic summit in Houston.

They managed to go a long way to smooth over differences on two of the most contentious issues facing them... financial aid for the Soviet Union and trade with China.

Officials shadowing the summit say the leaders will release a joint communique tomorrow that comes out in strong support of Soviet President Gorbachev and his sweeping political and economic reforms.

But a message released today previewing the communique falls short of French and West German calls to prop up those reforms with cold cash.

One French official says a U-S plan calling for technical but NOT financial assistance will most likely be offered to the stumbling Soviet giant.

On the subject of China, the summit message says leaders agreed to more or less postpone a change in economic sanctions imposed after last year's Tiananmen Square massacre.

A message from leaders says it's time to- quote- ''acknowledge some of the recent developments'' in China. But it goes on to say that Beijing needs to do more to receive the blessings of Western trade.

President Bush and the other economic summit leaders resumed discussions after lunch to tackle another divisive issue... the environment.

#90191u2035 07/10/1990 ~United Press International
(JULY 10) UPI - Soviet President Gorbachev scored a major victory today at his nation's 28th Communist Party Congress in Moscow.

The Congress voted overwhelmingly to keep Gorbachev as party leader. Members also created the post of deputy general secretary to assist him.

Several delegates argued that Gorbachev should give up one of his positions. But a number of nominees declined to run... clearing the way for Gorbachev's re-election as party leader.

Foreign Minister Eduard Shevardnadze was one of those who declined to run... saying it was important to allow Gorbachev his joint posts during the current changes sweeping the Soviet Union.

Gorbachev received 34-hundredhundred-27 votes cast. His opponent got 501 votes... and 615 delegates cast ballots against both men.

Gorbachev expressed his gratitude to the Congress for what he called its ''huge support and faith.''

He also blasted conservatives who criticized his foreign policy as being too friendly toward the West. Gorbachev said such critics must understand that the world has changed and, if they do NOT agree with government policy, they should retire.

Diplomats in the Albanian capital of Tirana say they believe some six-thousand refugees hiding in foreign missions will be able to leave the country by week's end.

The hope comes amid continuing efforts by the United Nations to persuade the Albanian government to allow the political refugees to leave.

An official at the West German Embassy... which for the past week has been home to some three-thousand refugees... says he is ''extremely hopeful'' the Albanians will be flown out before the weekend.

The West German spokesman says a U-N special envoy who traveled to Tirana on Sunday has made strides toward resolving the issues.

The news comes as 51 other Albanians are sampling a taste of freedom.

The 49 men and two women arrived in Prague, Czechoslovakia, overnight.

A Czechoslovak news agency reports that they are being put up in hotels and have been given clothes and financial assistance.

The agency also says that all but two of them want to go on to live in the United States, Canada or Australia.

#90191u2037 07/10/1990 ~United Press International

COLUMBIA, SC (JULY 10) UPI - Squabbling creditors Tuesday forced a bankruptcy judge to delay final consideration of a California evangelist's $52 million bid for the remains of the PTL empire built and lost by Jim Bakker.

Attorneys for PTL's secured creditors could not agree on how to split the money the sale would generate, despite previous discussions and another 90 minutes of meetings Tuesday.

Under a plan proposed by PTL bankruptcy trustee Dennis Shedd, $44 million of the $52 million offered by evangelist Morris Cerullo would go toward paying tax claims and secured creditors.

Unsecured creditors - including the ministry's so-called ''lifetime partners'' whose money built PTL and its Heritage USA religious retreat - would be guaranteed nothing. Their attorneys are likely to object but the unsecured creditors, unlike their secured counterparts, have no power to block the sale.

Shedd joined the creditors in seeking a postponement of the sale until July 18, and he vowed to sell off PTL's assets piece by piece unless Cerullo's offer or a better proposal is approved on that date.

U.S. Bankruptcy Judge Thurmond Bishop also indicated an unwillingness to drag out the case any longer.

''It's time to bring this case to a conclusion. It's been in the courts longer than I've been on the bench,'' said Bishop, who assumed the case last year with the retirement of Judge Rufus Reynolds.

Representatives of several investment groups interested in making a last-ditch bid on the PTL properties made their intentions known in court Tuesday, but Shedd said he would not consider any of them a serious bidder because they have not signed contracts or put any money down to support

their offers.

Cerullo's attorney, Timothy Treadwell, said his client will not engage in a bidding war with the other parties.

Cerullo, who grew up in a Jewish orphanage in New Jersey but became a born-again Christian preacher with a Southern accent, won court approval May 31 for the first part of the deal, his $7 million offer for the PTL satellite network.

The television network is the only part of Bakker's former Christian empire that continues to make money, but Cerullo has visions of restoring the Heritage USA retreat in Fort Mill, S.C., to its former glory if the court accepts his offer of another $45 million for the remaining assets, including two luxury hotels, a television studio, a water park and 2,200 acres of prime undeveloped real estate.

Treadwell said Cerullo, 58, hopes to reopen the complex by next spring.

Shedd pushed the effort to sell Heritage USA into high gear when he announced his plan to sell the satellite network to evangelist Oral Roberts for $6.45 million unless he received a bid for the entire complex by the end of May. Cerullo came forward, knocking Roberts out of the running.

Cerullo put $7 million in an escrow account to cover the network purchase and deposited another $1 million in support of the second phase. Shedd said the evangelist appears to have the finances to complete the full transaction.

It's not the first time Cerullo has had a grand vision. In 1978, he announced plans to build a $100 million World Outreach Center on a 228-acre parcel in San Diego, where his Worldwide Evangelism Inc. is based.

The complex was to include nearly 2,000 residential units, a 6,000-seat worship center, a hospital and a school, but Cerullo scrapped the project in 1986, blaming high remodeling costs.

If Cerullo is able to complete the PTL purchase, it would end a saga that began in March 1987 when Bakker stepped down amid news of his one-time sexual encounter with Jessica Hahn.

PRAGUE, CZECHOSLOVAKIA (JULY 10) UPI - Seven Cubans, including some members of dissident groups, have sought refuge in the Czechoslovak Embassy in Havana and have asked for asylum, the Czechoslovak media reported Tuesday.

The seven refugees are in good health and good spirits, and are determined to stay until they are permitted to leave the country, the second secretary of the embassy told Czechoslovak television.

The diplomat said the seven apparently had no intention of staying in Cuba.

The activists, members of the Cuban Human Rights Committee, the Cuban Christian Democratic Movement and other opposition groups, said they want to leave for Czechoslovakia Sunday for a week to meet with government representatives.

''They are afraid, however, that Cuban authorities would prevent them from visiting Czechoslovakia without the Czechoslovak government's official protection,'' CTK, the Czechoslovak news agency, said.

The activists said they intend to tour Europe and the United States to spread the aims and programs of the Cuban opposition movement.

Cuban leader Fidel Castro, who has been resisting democratic reforms, has repeatedly vowed to continue with his communist policies.

Czechoslovak radio said the embassy is trying to resolve the situation with Cuban authorities and the two foreign ministries are in contact over the matter.

CTK cited official Cuban agency Prensa Latina quoting a Cuban Foreign Ministry spokesman as saying that the Cuban government is ready to hold talks with opposition representatives but without the mediating of Czechoslovakia's representative bodies.

The spokesman further said that it was possible to have talks on anything, but without the interference by embassies in Cuba.

According to the Cuban agency, the spokesman stated that the Cuban opposition activists could remain at the Czechoslovak Embassy as long as Czecholovak diplomats would let them stay there.

It is a touchy matter because of the recent cooling of relations over a letter President Vaclav Havel sent to Castro June 22 expressing his ''regret'' over the long sentences given to seven opposition representatives in Cuba.

''Their only offense was their demand that Cuba embark upon the road towards plurality, democracy and market economy - a road chosen today by all former totalitarian countries in Central and Eastern Europe,'' said Havel, the playwright and essayist who led his country's peaceful revolution last November.

''I protest resolutely against the decision of the Cuban justice which I consider another step of your country backwards into the darkest past, a gross violation of the basic human rights and an offense of the civilized world,'' said the letter, which was carried by CTK at the time. ''I ask you therefore to immediately release all unjustly sentenced persons.''

In a reply to Havel, Castro accused him of interfering in the internal affairs of Cuba and said he was determined that it would remain a Marxist state.

#90191u2053 07/10/1990 ~United Press International

(JULY 10) UPI - Former President Carter addressed the Organization of African Unity summit today in Addis Ababa, Ethiopia.

Carter appealed to African leaders at the second and final day of the conference to open talks with rebels in their countries to end civil wars raging on the continent.

Civil wars are currently taking place in Ethiopia, Uganda, Liberia, Sudan, Somalia, Angola, Mozambique and Morocco. All of those countries, except Morocco, are members of the 51-nation O-A-U.

Carter said his plea was for a concerted effort to- in his words- ''begin peace talks, initiate cease-fires and move people towards freedom from oppression.''

He said one of the biggest obstacles to the peace process was that the African governments often prohibited international organizations or uninvolved countries from contacting insurgent groups.

Senate Republicans say a critical civil rights bill dealing with job discrimination would lead to wrongful racial quotas in the work place.

The Senate opened debate this morning on the bill, which would reverse a series of Supreme Court rulings last year that have been accused of undercutting legal protection for minorities in the work place.

The division over the explosive issue of quotas came within the first few minutes of debate.

Republican Senator Orrin Hatch of Utah said supporters of the bill were operating- quote- ''under the guise of civil rights to force businesses to go on proportional hiring.''

Democratic Senator Edward Kennedy of Massachusetts... who is floor manager for the legislation... called the charge ''spurious,'' adding the false cry of quotas mocks civil rights and equal justice.

Even if the bill clears Congress, it may meet with a presidential veto.

#90191u2068 07/10/1990 ~United Press International

HONESDALE, PA (JULY 10) UPI) A Common Pleas Court judge Tuesday ruled child murderer Joseph Kallinger may pursue his wish to ''go home to the Lord'' and starve himself without state interference.

Wayne County Judge Robert Conway denied a request by the state Department of Public Welfare for permission to force-feed Kallinger, who is in the third week of a death fast.

Kallinger's court-appointed lawyer, Jeffrey Wander, said the ''right to die'' ruling was the first of its kind in Pennsylvania.

Kallinger, 53, a former Philadelphia cobbler serving two life terms for the 1974 murders of his 14-year-old son and another boy, age 10, testified

earlier from a hospital gurney wheeled into the courtroom that he intended never again to eat or drink.

''That will continue until I go home to the Lord,'' said Kallinger, the subject of the 1983 book ''The Shoemaker.''

Asked if he wished to be kept alive involuntarily by a feeding tube inserted into his stomach through his nose, he said, ''Absolutely not. I will do everything I can to prevent it.''

Conway issued his decision from the bench after a two-hour hearing.

The judge ruled that Kallinger knows death will be the probable outcome of his action. He also said there was nothing to show Kallinger's refusal to eat or drink would adversely affect the state of Pennsylvania.

''This man is not an incompetent; he is not a minor; he is not an unborn child, but a competent adult,'' Conway said. ''Mr. Kallinger is as free as any other competent adult to accept or refuse nutrition, liquids and medication.''

Public Welfare lawyer Thomas Blazusiak said the department would have to review the ruling before deciding whether to appeal.

''We'll consider the best interests of the patient and the mental health system,'' he said.

Kallinger's refusal of food and drink follows a 12-year battle with the state over where he should be housed. State officials insist he should be in a prison setting.

Kallinger spent 10 years at Farview State Hospital for the criminally insane until he was transferred to the State Correctional Institution at Huntingdon in 1988. Over the past two years, he has been shuttled back and forth between the prison and the mental hospital several times, returning to Farview State Hospital most recently on May 16.

He stopped eating and drinking June 22. On June 30, he was moved from Farview to a hospital, where he agreed to accept fluids intravenously but still refused food and drink.

The welfare department maintains Kallinger's actions are a ploy by the inmate to remain at Farview.

At one point in the hearing, Wander objected to Blazusiak's use of the term ''hunger strike,'' saying Kallinger ''simply wishes to die.''

Dr. Mokarram Jafri, a forensic psychiatrist at Farview, described

Kallinger as a ''malingerer.'' Although Kallinger ''states he wants to die and wants to meet his God,'' the purpose is to postpone his return to prison, Jafri said.

''Mr. Kallinger realizes the old tricks don't work anymore,'' he said.

Kallinger, who appeared frail and weak, lay on a gurney throughout the hearing, surrounded by medical and security personnel. He occasionally talked with Wander and consulted several large packets of documents on his lap.

In addition to the life terms for the Philadelphia killings, Kallinger has been sentenced to 30 to 80 years in prison for unrelated robbery and other charges in the Harrisburg area.

In New Jersey, Kallinger has been sentenced to life imprisonment for the 1974 slaying of a nurse in Bergen County, and to 42 to 51 years for robbery and attempted rape in Camden County.

In June, Kallinger asked a federal judge in Scranton to block his return to Huntingdon state prison. He claimed in his motion he is still severely mentally ill and needs treatment only the hospital can provide.

#90191u2083 07/10/1990 ~United Press International

(JULY 10) UPI - Former West Virginia Governor Arch Moore will be going to jail after a failed attempt to withdraw his guilty pleas to five federal corruption charges.

A federal judge in Charleston, West Virginia, today sentenced Moore to five years and 10 months in prison for five counts of public corruption and one of obstruction of justice. Moore also was fined 170-thousand dollars.

Today's sentencing took three hours... slowed by a hearing on the obstruction of justice charge.

Attorneys argued over whether Moore complied with his plea agreement to co-operate with federal authorities in an on-going probe of political corruption.

Assistant U-S Attorney Joe Savage claimed that Moore failed to give the government complete information on 100-thousand dollars in illegal campaign contributions used in 1984. Moore's lawyer disputed the prosecutor's claim.

Moore... West Virginia's only three-time governor... dominated the state's

political scene for more than two decades.

A federal jury in New York today returned a partial verdict of guilty against Wall Street speculator John Mulheren... but still has its work cut out.

Mulheren had been implicated in stock swindles by inside trader and government informant Ivan Boesky.

Mulheren was guilty of one count of conspiracy and three counts of securities fraud for helping Boesky evade taxes and securities laws in exchange for valuable investment tips.

Jurors also acquitted Leonard DeStefano of two counts of conspiracy and fraud. DeStefano was a trader with Mulheren's now-defunct securities firm.

The jury failed to reach a verdict on more than two dozen charges against Mulheren after seven days of deliberations. But the judge in the case said they did NOT spend an inordinate amount of time deliberating and ordered them to continue.

Mulheren faces a maximum sentence of five years in prison and a fine of 250-thousand dollars on each count.

IOANINA, GREECE (JULY 10) UPI - Increasing numbers of ethnic Greek Albanians are fleeing across Albania's southern border through barbed wire and booby traps, bringing tales of brave escapes and unbearable hardship in forced labor camps. At least 100 Albanians, mostly Greek speakers, have escaped into Greece in the past three months. Seven more crossed the border Monday night and Tuesday, arriving at a private refugee center in Ioanina.

All seven said they saw no improvement in Albania's severe living conditions since the country's leader Ramiz Alia fired several hard-line cabinet ministers and allowed 51 Albanians to fly to Prague from their refuge in the Czechoslovak Embassy.

Escape is risky for these Albanians, who face certain execution if they are caught. Many were reluctant to speak, fearing reprisals against their families.

One who would talk, Basilis, a smiling freckle-faced laborer, told how he climbed a cliff one night last week to reach the border area. ''I was determined not to be caught,'' he said. ''If they saw me I'd jump off the cliff.''

He crossed a sloping plain of 20 or 30 rows of trip wires attached to flares, but by 6:30 a.m., the sun was rising and Basilis had a few hundred yards to go.

He said he was terrified he might be seen, but never considered turning back. ''I thought if I tried to return they'd kill me at once.''

Most of the refugees are escaping alone, although others say groups of eight to 10 are not uncommon.

''That way at least three or five will get through,'' said one refugee.

Philippos, a 24-year-old worker, said he had been planning his getaway for five years. On a previous attempt, his team of seven fled just as six others were stopped by guards and shot.

He tunneled under an electrified barbed wire fence, then picked his way through two more fences to reach no man's land.

A fellow escapee, Stavros, showed scrapes from the barbed wire, and said the group had seen a partially clothed human skeleton near the first fence.

''It looked liked they had moved it 200 yards so workers from the town could see it.''

Two other refugess, Kotsis and Giorgias, who fled via the village of Tsoukas, said they had found two blackened bodies alongside a road about 200 yards from a boarded-up monastery in Polican, Albania, near the Greek border.

Stavros escaped Albania after 15 years in internal exile and forced labor camps, accused by a witness he never saw of earlier trying to flee the country.

''They had clamps they would put around your wrists and gradually tighten them, until blood came out and you fainted. Or they would tie your hands behind your back and kick you. They rarely used fists because they could hurt themselves. They preferred clubs and whips,'' he said.

Stavros' face is weather-beaten and his cheeks were once frost-bitten. He is 33 but looks 10 years older.

He said they were fed only bread a single bowl of thin vegetable soup and some weak tea daily. Their heads were shaved and they wore distinctive brown uniforms.

''If you said you were too weak, they beat you,'' said Stavros. ''Some of them even enjoyed it.''

Prisoners broke their own bones, or cut themselves with knives to avoid work. Often these wounds became infected and the prisoners lost limbs, Stavros said.

Stavros served time in prisons in Spac, Burkiza, Batra and Boper, all mining camps in Albania's north. Prisoners were kept in bare wooden rooms without heat, and worked in the chromium and copper mines under primative conditions.

''We worked by candlelight, and we had a quota, called a 'norma' to fill, Every day 10 wagons each, about 1.3 tons. We had to push them by hand over a kilometer (0.6 miles). Two or 3 people died every day from cave-ins, gas or accidents. The engineers didn't care about safety,'' he said.

Now, Stavros is afraid for his wife and two children.

''I fear they might execute them, or inject the two children with poison '' he said, but added he would never return to Albania until the regime changes. ''The whole country is a concentration camp.''

#90191u2105 07/10/1990 ~United Press International
(JULY 10) UPI - Prosecutors continue to support their case against Washington, D-C, Mayor Marion Barry in what has become a virtual seminar on how to use drugs.

Today- more testimony from Hassan Mohammadi... who has said he was Barry's chief cocaine supplier. Mohammadi demonstrated in a U-S District courtroom how he and Barry would use a spoon, a clothes hanger and a cardboard tube to smoke opium.

Since Barry's drug and perjury trial began on June 4th, witnesses also have shown jurors how Barry alllegedly manufactured makeshift crack pipes and cooked powder cocaine into crack. They also have said how Barry frequently used dollar bills to inhale a mixture of cocaine and marijuana.

Mohammadi also detailed a growing friendship he shared with the mayor, saying how he was even invited to Barry's home for Thanksgiving in 1988.

He told jurors that he and Barry smoked cocaine in Barry's basement several times.

He also said that Barry snorted cocaine in hotels, homes and on boats around Washington.

HOUSTON (JULY 10) UPI - Lawyers for the families of ARCO Chemical blast victims will be able to probe the site of last week's explosion, an attorney said Tuesday.

David Burrow, attorney for the widow of 27-year-old Gregory Davis, said an agreement will allow lawyers representing victims' families to conduct their investigations alongside chemical company personnel and Occupational Safety and Health Administration officials.

Burrow said he and ARCO attorneys agreed late Monday to convert a

restraining order filed on behalf of his client to a temporary injunction preventing ARCO from removing explosion debris.

Seventeen workers were killed July 5 when a late-night blast rocked the plant at Channelview, near Houston.

Burrow's client, Sandra Lucas Davis of Channelview, is one of five survivors who have filed negligence suits against ARCO.

The suit also names Austin Industrial, the ARCO maintenance contractor for which her husband worked, Burrow said.

Burrow said the joint-investigation agreement is similar to one worked out by attorneys for plaintiffs in the suit filed against Phillips Petroleum Co. last October when an explosion at the Pasadena, Texas plant killed 23 people.

As with the Phillips case, Burrow said he has informally assumed the role of lead counselor for plaintiffs.

Burrow said he expects the evidence-gathering phase of the investigation to be complete sometime next week, much quicker than in the Phillips site inspection which took nearly four months.

ARCO spokesmen had no comment on the lawsuits or the combined investigation.

Newtown Square, Pa.-based ARCO Chemical said Monday it has begun cutting back on filling customer orders in the wake of last week's explosion.

Production at the plant, the world's largest producer of the MTBE additive to make premium unleaded gasoline, has stopped as a result of the explosion.

Because the explosion and resulting fire was confined to the plant's waste-water treatment facility, the company expects to be able to restart the plant in phases over the next several months, a company spokesman said Monday.

#90191u2117 07/10/1990 ~United Press International

HOUSTON (JULY 10) UPI - The leaders of the world's richest democracies, trying to keep global trade talks on track, mulled over ideas Tuesday to break a logjam over U.S. demands for the elimination of farm subsidies.

During the opening session of their second day of meetings at the 16th economic summit, the leaders resumed discussion of the thorny issue, which

threatens to scuttle the stalled international trade negotiations.

The meeting featured a discussion of a compromise offered by British Prime Minister Margaret Thatcher calling for a promise that subsidies will be phased out but not setting a deadline. There was no agreement, however, and top aides for all sides resumed talks on the issue as the leaders moved to other topics on their agenda.

"Some suggestions were made during the course of the plenary (leaders' meeting) that various countries indicated they would give consideration to " Secretary of State James Baker said shortly after the session ended.

Baker said "it remains to be seen" how much progress can be made to help the leaders avoid leaving the annual summit still locked in a stalemate on agriculture.

He also dispelled speculation of a possible deal between President Bush and West German Chancellor Helmut Kohl linking an agricultural agreement with the question of increased financial assistance for the Soviet Union. The United States has opposed increased aid. "No such agreement has been made and no such agreement has been suggested," Baker said.

The Bush administration is pushing hard for an eventual elimination of farm subsidies, which make it difficult for American food to penetrate major foreign markets. European leaders contend the subsidies are needed to protect their farmers from being crushed by American agriculture.

U.S. Trade Representative Carla Hills, a vociferous opponent of farm subsidies, took her case late in the day to Frans Andriessen, vice president for external relations of the European Community, a prime supporter of the payments.

The Bush administration said that without an agreement on agriculture, the so-called Uruguay Round of global trade talks, formally known as the General Agreement on Tariffs and Trade, will fail.

The talks are scheduled to end in December but have basically ground to a halt over continued European and Japanese subsidies for agricultural products.

British officials said Thatcher, in an bid to created a consensus on farm subsidies, offered the proposal to progressively reduce subsidies but not set a timetable - a plan similar to one already suggested to GATT agricultural negotiatiors.

But the officials said there appeared to be no narrowing of the gap among the seven nations on providing subsidies. Thatcher "has tried to move things forward by tabling some language" that would allow all participants

to take note of the existing differences, a British official said.

Thatcher's proposal was prepared to help the other leaders to "work toward a common measure," the official said. "What we are seeking is to progressively reduce the level of subsidies."

The British draft is also designed to ensure the United States "some assurance that the subsidies will be reduced," the official said. While the British plan sets no timetable, officials noted it also does not reject the suggested U.S. timetable of ten years.

French spokesman Hubert Vedrine told reporters after the morning session that it is not possible to effectively resolve the agricultural issue only by hammering at farm subsidies.

"When the Americans only pose the problem of export subsidies, without talking about domestic supports, it's not possible. It's a completely unbalanced approach," Vedrine said.

#90191u2134 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - Sen. Jesse Helms, R-N.C., will urge Congress to reconsider legislation protecting the disabled in an attempt to let employers deny food handler jobs to AIDS patients, the senator's office said Tuesday.

''We will offer a motion to ... recommit the bill to conference (committee),'' said Robert Wilkie, Helms' legislative assistant.

The version of the Americans with Disabilities Act that emerged from a

House-Senate negotiating committee in June eliminated a House-passed amendment allowing employers to reassign a food handlers with a communicable or infectious disease ''of public significance.''

It was generally believed the amendment sponsored by Rep. Jim Chapman, D-Texas, was aimed at people with acquired immune deficiency syndrome.

Senate Democratic leader George Mitchell of Maine said he expects Senate action this week on the bill crafted by the House-Senate negotiators. In general, the landmark legislation would outlaw discrimination against America's 43 million mentally and physically disabled people, including those with AIDS.

''If someone with AIDS cuts himself in a food handling position, he could spread the disease,'' Wilkie said. ''We are trying to protect not only businesses, but the persons involved.''

But advocates for the disabled said Chapman's amendment is discriminatory.

''The bill's sole purpose is to end discrimination based on myths, stereotypes and fears,'' said Pat Wright of the Disabilities Rights, Education and Defense Fund. ''We believe the Chapman amendment does nothing but perpetuate myths, stereotypes and fears.''

Bob Williams, who has cerebral palsy, said through an interpreter that the bill ''is supposed to be a civil rights bill. There is nothing civil or right about the Chapman amendment.''

Helms won a round on the Chapman amendment last month when the Senate voted 53-40 to instruct conference committee negotiators to include the amendment in the conference report. But the conference rejected that instruction.

''We think we have enough votes to send it back to conference,'' said Mark Gorman, lobbyist for the National Restaurant Association, which supports the Chapman amendment. ''We've worked over the past few weeks to make sure we're not slipping, and we don't see any evidence we have.''

Wright noted a variety of health experts, including Health Secretary Louis Sullivan and former Surgeon General C. Everett Koop, have said the amendment is medically unnecessary since AIDS cannot be transmitted through food or casual contact.

Jo Ellen Deutsch of the Association of Flight Attendants said flight attendants are considered food handlers and could lose their jobs over pink eye or even a common cold if the Chapman amendment succeeds.

Willie Baker of the United Food and Commercial Workers union said the

amendment could adversely affect the nation's 13 million food handlers.

#90191u2143 07/10/1990 ~United Press International

LOS ANGELES (JULY 10) UPI - Castle & Cooke Inc., the holding company for Dole Food Co. and Oceanic Properties Inc., reported record second-quarter earnings Tuesday of $38.9 million, or 66 cents a share, an increase of 10.5 percent over earnings of $35.2 million, or 59 cents a share, for the year-ago quarter.

Second-quarter revenue was $792 million, up $99 million from $693 million in last year's second quarter.

Castle & Cooke said Dole's fresh-fruit division had improved earnings over the prior year primarily due to improved market prices for bananas, while its fresh vegetables and packaged foods divisions had lower earnings.

Dole's dried-fruit and nut division's results were slightly better than last year's second quarter.

Castle & Cooke said its real estate development operations reported improved performance over last year's second quarter because of increased residential sales in Hawaii.

Castle & Cooke said in February it would spin off Dole to shareholders as a new publicly traded company, but then announced in May that the spinoff had been delayed.

For the first half of 1990, the company posted earnings of $57 million, or 96 cents per share, compared to $47.7 million, or 80 cents per share, for the first six months of last year.

Sales for the first half of 1990 were $1.5 billion compared to $1.3 billion in the same period in 1989.

The 1990 period included a $15 million pre-tax charge for changes related to the formation of the Dole Produce Co. and unusually large marketing costs related to programs started last year. The 1989 period included a $10 million pre-tax charge related to the temporary ban on the sale of its Chilean grapes.

Castle & Cooke stock was off 25 cents to $30 a share Tuesday in early afternoon trading on the New York Stock Exchange.

#90191u2151 07/10/1990 ~United Press International

NEW YORK (JULY 10) UPI - General Electric Co. Tuesday unveiled a ''perfect'' synthetic diamond, with record heat conduction and isolation properties that are expected to change the electronics, laser and communications industries.

''GE is on the brink of a revolution ... a revolution in terms of state-of-the-art diamond technology,'' said Walter Robb, senior vice president for corporate research and development. ''Our research and development team has invented the isotopically pure diamond, putting us light years ahead of our competition.''

Diamonds, the hardest substance produced by nature, are made of carbon elements, mostly isotope C-12, and offer two properties rarely found in a single component - heat conductivity and thermal isolation.

GE said its scientific breakthrough was to produce diamonds without the presence of isotope C-13, a heavier element in diamonds which reduces the crystal's ability to conduct heat. The Fairfield, Conn.-based company said its diamond is 99.9 percent free of isotope C-13 and, therefore, is virtually pure.

''We are currently exploring applications in a variety of potential markets,'' Robb said. ''One such market is electronics.''

Powerful electronic components are vulnerable to heat, but pure crystals could expand both their lifespan and efficiency because of the diamonds' increased ability to absorb the heat.

''For instance, by attaching a slab of diamond directly to an electronic device, heat can be conducted to a block where it dissipates,'' Robb said.

Lasers would be a prime application for the new diamonds.

''Because of its higher thermal conductivity, this diamond will permit the development of a new type of laser that can be used to manufacture the next generation of micro-electronics,'' Robb said.

The perfect diamonds could also expand the lifespan of extremely expensive and crucial telecommunications equipment, such as submarine telephone switches or relays installed on satellites.

The new diamond, which has a resistance to laser 10 times higher than natural diamonds, would also have numerous industrial applications.

GE produced the world's first synthetic diamond in the 1950's and has since continued to invest in research and development in the high-technology sector. The company produced the first diamond film in 1957, a development based on a GE process known as ''chemical vapor

deposition.''

The synthetic diamonds, due to their unique properties and high production cost, are not aimed at the jewelry industry.

The supercrystals were developed under the direction of Thomas Anthony, a physicist; William Banholzer, manager for GE's advanced inorganic materials laboratory; and James Fleischer, a technical specialist. Wayne State University in Detroit contributed to the testing.

Although the price of the crystals was not disclosed, GE estimated the potential market for the new diamond crystals at ''between $50 million to $100 million annually,'' and said full production will start within a year.

(JULY 10) UPI - The leaders of seven industrial powers smoothed over two sticky issues today at the Economic Summit in Houston. A joint message released after a morning session heralded Soviet reform but held back on offers of cash. The leaders also agreed to maintain sanctions against China.

Iran's state radio hinted again today that a Western hostage in Lebanon may be released soon. Iranian sources in Syria say captors have chosen to free Irishman Brian Keenen within the next few days. 16 hostages are believed held.

A U-S military team is on its way to Hanoi, where it will try to resolve the fate of some 16-thousand Americans missing in action in Vietnam. A team spokesman says he hopes talks will accelerate the accounting of M-I-A's.

Bulgaria's first democratically elected Parliament in four decades convened today with an appeal by lawmakers to trash what's left of the totalitarian system. The session also has a two-year mandate to produce a new constitution.

Police sources have confirmed that Kenyan security forces shot and killed at least four people and wounded 35 others in political street battles today. Sources say police opened fire when confronted by a stone-throwing mob.

American Telephone and Telegraph Company will lay off about 43-hundred workers nation-wide from its network services division. The Communications Workers of America union says it was informed of the layoffs today during a New York meeting with A-T-and-T.

#90191u2208 07/10/1990 ~United Press International

HOUSTON (JULY 10) UPI - Angry environmentalists accused West German Chancellor Helmut Kohl Tuesday of caving in to pressure from President Bush and backing off his call for stronger action at the Economic Summit to combat global warming.

Members of the Sierra Club, gathered in Houston while the leaders of the world's seven industrialized democracies met for the 16th time, said Kohl had come to the summit determined to push for specific target dates for reductions in carbon dioxide emissions.

But environmentalists claimed, based on information obtained from unnamed delegation officials, that Bush had convinced Kohl during a bilateral talk Monday to abandon the stance in exchange for preserving the Brazilian rain forests.

''The president came in determined not to act (on global warming) and drew the conclusion he would have to peel off the Germans in order to have the final communique without a specific statement on global warming,'' said the Sierra Club's Daniel Becker.

''Sierra Club is appalled at this back room deal to trade inaction on global warming for vague promises on rain forests. Chancellor Kohl promised to come here with guns blazing against global warming. But, faced with President Bush's intransigence, it looks like he is taking a dive.''

U.S. and West German officials said Tuesday Kohl had wanted to promote rain forest preservation as an alternative to U.S.-opposed cuts in carbon dioxide. U.S. officials were interested in broadening that into a call for global action to slow deforestation.

European nations have been pushing for agreement on target dates for decreasing ''greenhouse gases'' that are blamed for increasing the earth's temperature, and environmentalists had hoped the summit would expand on a last year's call for ''decisive action'' to protect the environment.

West Germany and Great Britain already have committed to specific carbon dioxide emission reductions by 2005, while Japan more vaguely has promised to reduce emissions ''as much as possible'' by 2000.

But the Bush administration has called for more scientific study of the problem before committing to decisive steps to reduce emissions. The United States is the largest single source of greenhouse gases.

WASHINGTON (JULY 10) UPI - Defense Secretary Dick Cheney has ordered the Air Force to end flights of WC-130 Hurricane Hunter planes by Oct. 1 and to turn over the mission to the Commerce Department, the Air Force said Tuesday.

Cheney issued the order in an internal Defense Department memo sent to Air Force Secretary Donald Rice June 29 and disclosed Tuesday by Rep. Tom Lewis, R-Fla.

Air Force Lt. Col. Darrell Hayes confirmed the contents of the memo and said, ''We're still working'' with the Commerce Department's National Oceanic and Atmospheric Administration ''to work out the details'' of a transfer.

Despite not having a transfer agreement, the Air Force intends to end its flights as instructed on Oct. 1, Hayes said.

''If we don't have the money and DOD (Department of Defense) says not to do this, we would be following DOD instructions,'' Hayes said.

It would not be the first time the Defense Department and the Air Force have attempted to get rid of the WC-130s, which monitor storm activity and take pressure readings for the National Hurricane Center.

Cheney proposed deactivating the Air Force's WC-130 fleet as part of $10 billion in cuts in the fiscal 1990 budget. But protests from some members of Congress prompted Cheney to change plans.

Under pressure, Deputy Defense Secretary Donald Atwood promised the lawmakers last year the Air Force would continue to fly the planes in fiscal 1990 while the Air Force and NOAA held talks to decide who would be responsible for the mission in fiscal 1991, which begins Oct. 1.

The Air Force has been trying to pass the mission on to NOAA because the Air Force does not use the data and it costs about $25 million a year to operate and maintain its 12 WC-130s at Keesler Air Force Base, Biloxi, Miss.

NOAA officials have opposed taking over the mission, saying they don't want to have to recruit pilots and an airline maintenance service.

In Florida, Lewis said in a statement he sent a letter to Cheney asking him to reverse his decision ending the Air Force flights.

''Cutting the program is irresponsible and dangerous. To dismantle this fleet as hurricane season begins places all of our coastal residents in peril,'' Lewis said.

He said the nation's only Geostationary Operational Environmental Satellite is approaching the end of its expected lifespan, making the planes the only reliable method of tracking and measuring hurricanes.

''Due to these factors, I respectfully request that this decision be reversed, and the Hurricane Hunters be allowed to continue their mission of protecting our nation's coastal residents from the unexpected onslaught of a major hurricane,'' he said.

''Hugo's devastation would have been far greater if not for the lead time provided by the date gathered aboard the Hurricane Hunters,'' said Lewis. ''It's a small sacrifice in time and cost for Defense to help us until a superior replacement is available.''

NEW YORK (JULY 10) UPI - The dollar closed lower in New York Tuesday in what analysts said was volatile trading that favored the British pound and the Japanese yen.

In late New York trading, the dollar was quoted at 1.6420 against the West German mark, off from Monday's 1.65275. The dollar sold off sharply against the yen, closing at 148.25 compared with 151.15.

The dollar has sagged to its weakest level against the yen since early March, analysts said.

Against other European currencies, the dollar ended New York trading at 1.3932 Swiss francs, off from 1.3965; 5.5100 French francs, off from 5.5455; and 1,202 Italian lire, off from 1,211.25. The British pound rose to $1.8220 from $1.8080.

The pound gained strength on remarks by John Major, Britain's chancellor of the exchequer, who indicated the pound will fully enter the European Monetary System, analysts said. Once it joins EMS, the pound is expected to go higher, they said.

The mark remained strong as concern over the merger of East and West Germany dissipated, analysts noted.

The dollar, already weakened by concern over the U.S. economy, also remained lower against the stronger Japanese unit, said Braham Broyd of Manufacturers Hanover Trust Co.

"The yen finally jumped on the anti-dollar bandwagon," Broyd said. "People who didn't like the dollar over the last month first bought pounds, then marks.

"They still want to sell the dollar, and they're saying, 'What do I buy now?"' he said.

In Europe Tuesday, the dollar closed lower against the major currencies amid market concerns the United States will eventually lower interest rates. Gold was also down.

Currency analysts said that rumors persisted the U.S. may ease its monetary stance and that sentiment Japan may raise interest rates higher depressed the dollar.

The pound sterling continued to climb against the softer dollar, closing in London nearly a cent higher at $1.8150 from $1.8065 Monday.

The dollar moved lower against the deutsche mark in Frankfurt, closing at 1.6425 marks against 1.6455, and also finished down in Zurich at 1.3875 Swiss francs against 1.3930.

The dollar eased slightly in Paris, Brussels and Milan, at 5.5105 French francs against 5.5275, at 33.81 Belgian francs from 33.86 and at 1,203.80 lire against 1,207.75.

Earlier, the dollar retreated against the Japanese yen in Tokyo on, dealers said, speculation about a rise in Japan's official discount rate, the nation's key interest rate. The dollar closed at 149.60 yen, down 1.10 yen from Monday's close of 150.70.

Gold closed lower in Zurich at $355.50 an ounce against $359 and in London at $354 an ounce against $358.25. London dealers said gold was down due to a bout of selling from the Middle East.

Republic National Bank in New York closed cash gold at $355.50 an ounce, off from $357 Monday. The New York Commodity Exchange settled gold at $355.50 an ounce, off from $358.20.

Silver closed lower in Zurich at $4.80 an ounce from $4.90 Monday and was weaker in London at $4.82 an ounce against $4.87.

Republic closed cash silver at $4.82 an ounce, off from $4.83 Monday. Comex silver settled at $4.811 an ounce, up from $4.80.

SAN FRANCISCO (JULY 10) UPI - A nationwide random drug testing program for airline pilots and workers was upheld Tuesday by the 9th U.S. District Court of Appeals.

Judge William A. Norris, in a ruling on six consolidated suits, said the Federal Aviation Administration's ''interest in promoting air safety through random drug testing outweighed aviation industry employees' Fourth Amendment right to be free from unreasonable search and seizures.''

The FAA's drug-testing program, which took effect in December 1989, is aimed at commercial airline pilots, flight attendants, mechanics and some other airline workers.

The plaintiffs' lawyers said they hadn't yet decided whether to appeal to the Supreme Court, but attorney Stephan P. Berzon said the three judge panel had misinterpreted an earlier high court ruling to arrive at their decision.

The 9th Circuit opinion relied heavily on a 1989 Supreme Court decision, National Treasury Employees' Union v. Von Raab. In that case, the court ruled that a customs worker could be required to take a drug test in order to be considered for promotion, even though supervisors had no reason to suspect the worker used drugs.

Berzon argued that the Von Raab case did not imply approval of random drug testing. He said Von Raab authorized testing at specific times, such as when a worker applied for a promotion. He called random, unannounced drug testing ''categorically different.''

''You can be tapped on the shoulder any time, any day,'' Berzon said. ''That is a completely intrusive system.'' He said a worker could theoretically be forced to provide a urine sample every day for months. And Berzon said such testing could reveal private facts unrelated to airline safety, such as whether a worker was pregnant.

''Von Raab never dealt with random (testing),'' Berzon said. ''I think it's an open question before the U.S. Supreme Court.''

In discussing the issue of privacy violations, Judge Norris noted the plaintiffs' argument that random testing is more intrusive than testing as a result of specific events. However, he wrote, ''Although these factors

add some weight to the 'invasion of privacy' side of the Fourth Amendment balance, they are insufficient to tip the scales against the FAA drug testing program at issue here.''

Nevertheless, the federal court did not claim drug use was a widespread problem in the aviation industry. It simply quoted an FAA conclusion that some ''concrete evidence of drug use in the commercial aviation sector'' existed.

Berzon said the appeals court panel gave the first sign it favored the FAA's position when it refused, without explanation, to issue an order delaying the start of the testing program last year. Arguments in the case concluded last September.

The case is formally known as Bluestein v. Department of Transportation, because pilot Michael S. Bluestein was the first to file suit. For the same reason, the case was decided in California, although labor unions and individuals in several jurisdictions also sued the FAA over the same issue.

Among the plaintiffs were several unions, including the Air Line Pilots Association, the Association of Flight Attendants, the Independent Federation of Flight Attendants, the International Association of Machinists and Aerospace Workers, and the International Brotherhood of Teamsters.

#90191u2334 07/10/1990 ~United Press International

(JULY 10) - Gasoline prices shot up a penny a gallon on the New York Mercantile Exchange Tuesday, spurred by signals the market may be tightening as a result of an explosion closing the largest plant making an additive for premium gasoline.

Crude oil prices also moved up sharply on the impression the 13-nation Organization of Petroleum Exporting Countries may be getting serious about reducing the world glut that has depressed prices in recent months.

Unleaded gasoline for August delivery jumped 1.01 cent to end the day on the Merc at 57.86 cents a gallon, after trading as high as 58.50 cents.

Late Monday after the Merc closed, ARCO Chemical Co. invoked the doctrine of force majeure and said it was cutting back on deliveries of the MTBE additive used to raise gasoline octane as a result of the July 5 fire at its Channelview, Texas plant.

The announcement from the Newtown Square, Pa.-based ARCO Chemical indicated the plant would be out of operation for several months because of the mishap, in which 17 people were killed.

The Channelview plant is the world's largest single supplier of the MTBE additive.

Although the Merc does not trade premium gasoline, traders were using the regular unleaded contract as ''a hedging tool or insurance policy'' against a tight premium market, said Mary Haskins of Paine Webber Inc., New York.

''There's a price-spread relationship between the two,'' agreed Bill Hinton of Stotler & Co. in New York.

He added: ''I'm hearing from people in Houston that there's going to be a severe gasoline crunch in a few weeks.''

On the Merc, West Texas Intermediate crude for August delivery gained 36 cents on the day to $16.94 a barrel, after trading as high as $17.09. Volume was an above-average 99,036 contracts.

Hinton attributed the rise to ''an impression of a fairly intensive amount of negotiations'' among leaders of the OPEC cartel to limit oil output and raise prices.

The Wall Street Journal reported that member states' kings and presidents, as well as oil ministers, were becoming involved in the efforts.

The changing OPEC outlook, combined with a weekend Moscow announcement that the Soviet Union was cutting oil exports 5 percent and reports that Phibro Energy Inc. sold 3 million barrels of Brent crude to the U.S. Strategic Petroleum Reserve, transformed the market, Hinton said.

''It gave the market a firm enough fundamental base to trigger some technical buying,'' he said.

He and Haskins agreed Tuesday's rise in crude prices resulted from ''short covering,'' in which traders abandon short positions previously taken in anticipation of prices declining.

In addition, Hinton said there was a consensus among traders that the

weekly survey of the American Petroleum Institute would show a decline in national gasoline stocks of 1 million to 4 million barrels and a drop of 2 million to 3 million barrels in crude supplies.

Released after the Merc closed, the API reported gasoline inventories declined 1.7 million barrels, while those of crude fell 3.7 million barrels.

On the U.S. Gulf Coast crude cash market, WTI for prompt delivery gained 30 cents to $16.90 a barrel.

On the European spot market, the United Arab Emirates' Dubai light - the principal OPEC crude from the Middle East - edged up 7 cents to $13.62 a barrel. Britain's North Sea Brent crude rose 25 cents to $16.08 a barrel.

Both Marathon Oil Co., the Findlay, Ohio, unit of USX Corp., and Houston's Conoco Inc., a Du Pont subsidiary, raised the posted price they will pay for crude at the wellhead by 50 cents a barrel to $15.75 a barrel for WTI.

On the Merc, home heating oil for August delivery added 0.38 cent to 49.28 cents a gallon.

#90191u2337 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - The Resolution Funding Corp., the agency charged with raising cash for the savings and loan bailout, auctioned $5 billion in 30-year bonds Tuesday in strong bidding and at an average yield of 8.93 percent.

The average price on the latest Refcorp issue was $99.427, and the agency said it received nearly $15.5 billion in bids for the bonds that will be issued next Tuesday and that reach maturity July 15, 2020.

Samuel Kahan, chief economist at Fuji Securities in Chicago, said the Refcorp auction "rivals the kind of response you get on Treasuries," which are regularly sold by the government to eager investors. The interest rate on the government-backed bonds is 8 7/8.

"It was phenomenal," said Elizabeth Capo, a futures analyst at Stone & McCarthy Research Associates Inc., in Princeton, N.J. "It was very impressive."

Capo said that it appeared a positive research report released earlier in the day by a major Wall Street investment house recommending the bonds "perked up interest a little bit."

At its last two auctions this year, Refcorp offered 40-year bonds but met

a very cool market. The agency decided to offer a 30-year bond at its latest auction in the hope of receiving a better response from the investment community.

"They cut the maturity period. It's more marketable than it was," said David Hale, chief economist at Kemper Financial Services Inc., in Chicago. "The change in maturity, the rise in yields have obviously helped it."

Added Kahan: "Either people are much, much happier with a 30-year piece of paper rather than a 40-year piece of paper or they feel a yield near nine percent is very, very attractive." Kahan also said that "for the time being" it is doubtful Refcorp will attempt to auction any more 40-year issues.

#90191u2345 07/10/1990 ~United Press International

(JULY 10) UPI - West Germany is proposing a plan to ease the debate on the environment at the seven-nation Economic Summit in Houston. West German Chancellor Helmut Kohl is seeking consensus on a plan to preserve the Amazon rain forest, which absorbs carbon dioxide. Kohl sees his proposal as an alternative to U-S-opposed cuts in carbon dioxide from industrial sources.

An investigation of three dozen U-S subsidiaries of major foreign manufacturers found more than half of them paid little or NO federal income taxes in recent years. Investigators for the House Ways and Means Committee say most foreign companies inflated the cost of the goods sold to their U-S subsidiaries in an effort to reduce the level of taxable profit in the United States.

Violence between striking Sandinista workers and government supporters escalated throughout Nicaragua today with both sides trading their rocks and pipes for guns. Officials say five people have died in the clashes and 50 others were injured in the past 24 hours... most suffering gunshot wounds. President Chamorro has called out troops to crack down on strikers.

The Justice Department today announced the largest settlement ever paid in a ''whistle-blower'' lawsuit. Officials say Avco Corporation's Textron Lycoming Division will pay a 17-point-nine-Million-dollar settlement for selling shoddy helicopter engines to the Coast Guard. 15 percent of that- or two-point-seven-Million dollars- goes to Robert Ballew... the ''whistle-blower'' who first alerted the government to the misconduct.

A major laboratory in Washington, D-C, says the rate of illegal substance abuse among transportation workers is much lower than in the general work place. Tests of 100-thousand transportation workers found three-point-one percent of them abused illegal drugs... compared to 13-point-eight percent

in the general work place. Officials say traces of marijuana and cocaine appeared most frequently in the tests.

#90191u2351 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - A Colorado public utility said Tuesday it will hold the Department of Energy liable for up to $47 million in costs incurred by the agency's failure to meet the terms of a contract for disposing spent nuclear fuel.

The Public Service Company of Colorado, which runs the Fort St. Vrain's nuclear fuel plant 35 miles northeast of Denver, said in a filing released Tuesday at the Securities and Exchange Commission that it would charge the DOE for the costs of building and licensing a new storage facility for the spent fuel and expenses arising from delays in shipping the fuel.

Del Hock, chairman and president of the Colorado utility, sent a letter early this year to Energy Secretary Admiral James D. Watkins notifying him that the company would seek reimbursement.

But DOE has not responded to the letter yet, according to company spokeswoman Kim DeVigil.

Public Service of Colorado theoretically can charge these costs to the DOE because the latter signed a contract in 1965 promising to dispose a set amount of the utility's spent fuel.

Normally, the DOE would take the spent fuel to Idaho, where it is stored at the Idaho National Engineering Laboratory, about 60 miles from Idaho Falls.

But Idaho has refused to take any more spent fuel until DOE commits to building a reprocessing plant there.

Since Public Service of Colorado is now defueling its nuclear power plant, it cannot afford to wait for DOE and Idaho to resolve their dispute.

Thus the Colorado utility has requested bids for the construction of an independent spent fuel storage installation, scheduled to be operational by December 1991.

The storage facility will cost about $15 to $20 million; expenses due to delays in storing the nuclear fuel will comprise the remainder of the $47 million cost estimate sent to the DOE.

#90191u2363 07/10/1990 ~United Press International
BEVERLY HILLS, CALIF (JULY 10) UPI - Pathe Communications Corp., which has seen its $1.3 billion deal for MGM-UA Communications Co. start to unravel, said Tuesday its $24 million deal to sell its 60 percent stake in Cannon Pictures Inc. has fallen through.

Pathe, which is controlled by Italian financier Giancarlo Parretti, had said in May that it would sell its stake in Cannon, a low-budget movie production affiliate, to Dutch holding company Trihoof Investments B.V. and A&M Cammy Co. Inc.

The announcement was one more blow to Pathe's bid for MGM-UA, which must be completed in October.

The funds from the Cannon sale would have gone toward Pathe's deal for MGM-UA, which has been thrown into doubt since Pathe announced two weeks ago it would seek another source for a $650 million loan that was to be provided by Time Warmer Inc.

Time Warner reacted to that announcement by suing Pathe for $100 million in a breach-of-contract action.

In the failed Trihoff deal, Ovidio Assonitis, Trihoof chairman and a filmmaker, was ''severed'' as Cannon's chairman and chief executive officer.

#90191u2372 07/10/1990 ~United Press International
FORT WORTH, TX (JULY 10) UPI - A state district judge has awarded more than $121,000 to the mother of a 2-year-old girl who died after receiving a blood transfusion tainted with the AIDS virus at John Peter Smith Hospital.

''I feel peace of mind, and I feel my baby is finally at rest,'' said Belinda Jackson, 24, after her lawyer, Lowell Dushman, read State District Judge William Hughes' decision in his office.

The lawsuit alleged that while no blood test for AIDS was available at the time the girl received transfusions for a liver ailment in February 1983, hospital employees were negligant in failing to screen out a donor who was an intravenous drug user. That donor later tested positive for the HIV virus and Jackson's daughter, Tristainne, died in 1985.

Dushman, noting other lawyers had told him that any AIDS lawsuit involving a blood transfusion before 1985 could not be won, called the decision ''fantastic.''

''I'm elated,'' he said. ''It's been a long hard battle.''

After a week of testimony and another week of deliberation, Hughes mailed his decision Monday to attorneys on both sides of the case, and then declined to make his decision public until the lawyers received his letter Tuesday.

Lawyers for John Peter Smith Hospital were not immediately available for comment. But the hospital had maintained it followed all procedures accepted at the time it obtained the tainted blood, when it was not yet clear whether the AIDS virus could be spread through blood transfusions.

''I do not find from a preponderance of the evidence any negligence on the part of Tarrant County Hospital District in regard to its practices for testing blood in February, 1983,'' Hughes wrote in his decision.

''The screening process for donors employed by Tarrant County Hospital District in early 1983 simply fell below the standard of care to accomplish that objective. ... I find that the failure of adequate screening was negligence and a proximate cause of the AIDS infection to the child and her subsequent death,'' Hughes wrote.

Jackson had sought $200,000 from the Tarrant County Hospital District, which operates the county's public hospital. Hughes awarded Tristainne's estate $76,030.45 in damages, and gave the mother $30,000 for ''past'' damages and $15,000 for ''future'' damages.

Issues involving the case were appealed as far as the U.S. Supreme Court, which ruled the hospital had to supply Jackson's attorneys with the names of the blood donors in question.

Dushman said court costs will be assessed against the hospital and he planned to charge Jackson little or nothing for his work.

''The most important person at this point is Belinda,'' who still has about $50,000 in medical expenses outstanding, the lawyer said.

NEW YORK (JULY 10) UPI - As they normally do, U.S. gasoline and crude oil stocks declined during last week's July 4 holiday period, the American Petroleum Institute reported Tuesday.

Crude oil inventories fell to 380.6 million barrels from 384.3 million barrels in the prior week but remained above year-ago levels of 332.7 million barrels.

Gasoline supplies declined to 213.6 million barrels from 215.3 million barrels in the prior week and were lower than year-ago levels of 217.7 million barrels.

But stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, increased to 165.4 million barrels from 165.1 million barrels a week earlier and remained significantly higher than year-ago levels of 154.9 million barrels.

Daily gasoline production rose slightly to 7.4 million barrels from 7.3 million barrels in the prior week and was higher than year-ago output of 7.3 million barrels.

Daily gasoline imports increased substantially to 565,000 barrels from 428,000 barrels in the previous week and were above year-ago imports of 504,000 barrels.

U.S. refineries operated at 92.6 percent of capacity last week, up from 90.7 percent a week earlier and 90.7 percent a year ago.

Inventories of distillate - used for home-heating oil and diesel fuel - rose to 112.7 million barrels from 110.1 million barrels a week earlier and remained above year-ago levels of 104.9 million barrels.

Distillate production edged up to 3.1 million barrels daily from 3.0 million barrels daily in the preceding week and was higher than year-ago output of 3.0 million barrels daily.

Distillate imports rose to 314,000 barrels a day from 263,000 barrels a day in the previous week but were less than year-ago imports of 346,000

barrels a day.

Daily crude oil imports declined to 6.2 million barrels from 6.7 million barrels in the previous week but were higher than year ago imports of 6.1 million barrels.

Imports of refined products remained at 2.3 million barrels daily, the same level as both the preceding week and the year-ago week.

#90191u2391 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - A man who said he was a key cocaine supplier for Mayor Marion Barry testified Tuesday that he and Barry also smoked opium several times.

Hassan Mohammadi, an Iranian national and Washington restaurateur, continued what has become a virtual seminar on drug use at U.S. District Court by showing the jury how he and Barry would use a spoon, a clothes hanger and a cardboard tube to smoke opium.

Since Barry's drug and perjury trial began June 4, witnesses also have shown jurors how Barry allegedly manufactured makeshift crack pipes, cooked powder cocaine into a solid smokeable form, used a dollar bill as a straw to snort cocaine and laced marijuana and tobacco cigarettes with cocaine.

Mohammadi, who said he often carried opium in his car when he met the mayor, is the second witness to testify he used the narcotic with Barry. Rasheeda Moore, the woman who lured Barry into an FBI-police sting that ended in his arrest Jan. 18, also testified she smoked opium with the mayor.

''Back home, you can do it several ways but you have a special pipe for it '' Mohammadi said of opium use.

Holding a thin cardboard tube in his mouth, a wire clothes hanger in one hand and a metal spoon in the other, Mohammadi demonstrated an opium-smoking technique for the jury.

''You put the opium on the back of the spoon'' and heat the spoon to make the opium stick to it, Mohammadi said, adding that he makes a ''torch'' out of the wire hanger by heating it until it is red and then placing the hanger to the opium, cooking the drug. The cardboard tube is then used to inhale the smoke.

Barry is not charged with using opium, but prosecutors want to show a propensity for drug use to help attain a conviction on the conspiracy

charge. They also hope to corroborate Moore's testimony.

Mohammadi testified Monday he supplied Barry with cocaine 30 times since 1985, bringing to four the number of witnesses who said they saw the mayor use drugs.

On Tuesday, Mohammadi detailed a growing friendship between him and Barry. He said he had Thanksgiving dinner with the mayor's family in 1988 and that Barry posed in advertisements for the restaurant, Pardi's, that Mohammadi managed.

Mohammadi said he and Barry snorted cocaine several times in the basement of Barry's home.

''I was a good friend of Mr. Mayor,'' he told defense lawyer Robert Mance in cross-examination. ''I was always there for Mr. Mayor.''

Mohammadi, who in 1989 told police Barry did not use drugs, recanted his story when ''everybody came from the woodwork'' after the Jan. 18 Vista International Hotel sting that ended in Barry's arrest.

''Everybody cooperated with the government,'' he said. ''I did not have a choice. ... I had to cooperate.''

Asked about Mohammadi's testimony, Barry said during a break, ''You lie once, you lie five times, you lie 25 times.''

Barry has pleaded innocent to three felony counts of perjury, 10 misdemeanor counts of cocaine possession and a single misdemeanor charge of conspiracy to possess cocaine.

Mohammadi said Barry snorted cocaine in hotels, homes and on boats on the Anacostia and Potomac rivers around Washington.

He had testified he saw Barry use cocaine as early as 1985 and said Tuesday they first used opium together in February 1988 at Mohammadi's apartment.

Mohammadi said Monday he once delivered 2 grams of cocaine to Barry's office at City Hall and first saw the mayor snort cocaine in February 1985.

Barry was videotaped smoking crack the night of his arrest. He faces up to 26 years in prison and $1.85 million in fines if convicted of all counts.

Witnesses have testified they used illegal drugs in Washington, the Virgin Islands and the Bahamas.

Mohammadi, an Iranian national, pleaded guilty to conspiring to possess

drugs and testified as part of a plea agreement that promised Mohammadi he would not be deported if his testimony was considered truthful and satisfactory.

Mohammadi moved to the United States in 1973. He worked in the Iranian Embassy until the 1980 Iranian revolution that overthrew the Shah of Iran. He pleaded guilty in 1982 to trying to defraud the U.S. government by seeking to obtain immigration papers to sell illegally for supporters of the Shah.

''To the tune of $300,000?'' Mance asked in cross-examination.

''They were happy to pay it because I was very, very useful to them,'' Mohammadi said.

The government scheduled Theresa Southerland to testify after Mohammadi Tuesday, but she had not appeared in court by the end of the day. U.S. District Judge Thomas Penfield Jackson issued a bench warrant for Southerland's arrest.

#90191u2448 07/10/1990 ~United Press International

WASHINGTON (JULY 11) UPI - Tough pesticide restrictions in a California environmental ballot measure would cripple farmers' ability to sell produce overseas, farm industry officials told the International Trade Commission Tuesday.

By curtailing the arsenal of chemicals available to California farmers to control pests, weeds and crop disease, the ''Big Green'' voter initiative would diminish their competitive edge over foreign growers, opponents to the measure testified.

In addition, provisions to reduce the allowable levels of pesticide residues on imported produce would invite retaliation by other nations in the form of trade barriers to U.S. goods, opponents argued.

California leads the nation in agricultural exports, selling more than $3 billion in farm products overseas last year, most of it to Europe, Japan and Canada.

Other nations stand ready to replace California as the dominant supplier of many agricultural commodities on world markets, such as citrus fruit, said Fred LoBue, chairman of the California-Arizona Citrus League.

Jay Vroom, president of the National Agricultural Chemicals Association, said the ballot measure would turn California into an ''economic castaway, cut off ... from commerce with the rest of the United States, from trade

with the world.''

''For a great many crops, no alternative to pesticides can produce the quantity, quality, year-round availability and wholesomeness of agricultural food and fiber products that American consumers demand, at a price that they can afford,'' said Paul Drazek of the American Farm Bureau Federation.

Advocates of ''Big Green,'' while touting the measure as the most sweeping environmental initiative ever mounted, argue that agricultural and chemical interests are wildly exaggerating its economic consequences.

They also criticized U.S. Trade Representative Carla Hills for requesting the ITC's investigation of the effect on agricultural trade likely to result from the California initiative.

''It appears to Californians that you are being set up by Ms. Hills to do political dirty work for the chemical and agribusiness interests opposing Big Green,'' Craig Merrilees, of the National Toxics Campaign Fund, told the commission.

''Big Green is on the ballot in California because Washington has failed to protect us from dangerous pesticides,'' he said.

Merrilees also accused Hills and others in the administration of seeking to override the ballot measure in negotiations to revise the international trade accord known as the General Agreements on Tariffs and Trade, or GATT.

Pesticide controls under Big Green, which is on the ballot for California's November elections, go far beyond those already enforced nationally by the Environmental Protection Agency.

Specifically, the initiative would phase out over five years all pesticides known or believed to cause cancer or birth defects in humans. Pesticides regarded as possible carcinogens would be phased out over nine years unless manufacturers prove them safe.

In both cases, the measure allows a three-year extension if there is no known alternative to a pesticide in question and if its removal would cause severe hardship to farmers.

The ITC, an independent federal body that serves in this case as a fact-finding agency, held the hearing as part of its inquiry into the trade consequences of the California initiative. It is to submit a final, confidential report on its findings to Hills by the end of the year.

#90191u2464 07/10/1990 ~United Press International
HOUSTON (JULY 10) UPI - Following is the opening statement by Secretary of State James Baker in announcing the political communique at the economic summit Tuesday:

''Ladies and gentlemen, you have before you, I think, the copies of the political declaration and statements on terrorism and non-proliferation. And I'd like to, by way of opening this up, summarize those for you and then I'll be glad to respond to your questions.

''The political declaration that we're releasing today celebrates the historic advance of Democracy since the seven last met in Paris. In this declaration we reiterate our support for the peaceful democratic movement

that's bringing freedom to Central and Eastern Europe and that is uniting Germany.

''But the great events in Europe should not lead us to overlook other opportunities and other needs. During the course of our discussions we cited Namibia as a positive model for Democratic evolution elsewhere on the African continent, for instance. Most of the leaders here have met recently with Nelson Mandela. Some of them have met with President de Klerk. And we think that the focus of our efforts should be on encouraging negotiations to bring about a non-racial democracy in South Africa.

''In Central and South America we welcome the return of Democracy to Chile and Panama, and we welcome free and fair elections in Nicaragua.

''The winds of freedom have not bypassed Asia, either. We're witnessing very important changes now taking place in Nepal, as well as Mongolia. We acknowledge some recent actions taken by the Chinese government in this political declaration. But for now, the measures that were put in place at last year's economic summit remain. We will explore, however, whether there are World Bank loans that would contribute to reform of the Chinese economy especially to meet environmental concerns.

''We also devoted considerable discussion to the evolution of events in the Soviet Union and how reforming the Soviet Union can play an important role in addressing both old and new challenges facing the international community. President Bush will review that discussion for you in more detail tomorrow. The declaration closes by suggesting actions that Western nations can take to help secure and promote democracy's advance in all regions of the world. The declaration notes that political freedom and economic liberty are mutually reinforcing, and they cannot flourish in an environment of intolerance.

''A separate statement was issued on the transnational problems of terrorism and the proliferation of nuclear, chemical and biological weapons, as well as ballistic missiles. These dangers, like the illicit trade in narcotics that will be addressed in tomorrow's communique, of course, know no boundaries. In the case of nuclear proliferation, the deliberations here, I think, take on added significance in this 20th anniversary year of the Nuclear Non-Proliferation Treaty.

''In addition to the topics covered in the documents released today, regional conflicts were discussed. We recognize each conflict's unique nature and the responsibility of the parties on the ground to take the lead in seeking negotiated solutions. We think, however, that free and fair elections have a key role to play in bringing peace to these regions. In Afghanistan, in Cambodia, and in Angola, we want to see negotiated settlements providing for cease fires, arms cutoffs, and transition periods supported by the United Nations and regional organizations, all

leading to free elections.

''We discussed the current situation in the Middle East, and although different approaches were raised, we all agreed on the need for movement in the peace process. We expressed the hope that the cycle of violence and repression would give way to early dialogue between Israel and Palestinians that will lead to free, democratic elections and to negotiations.

''Regarding the human tragedy in the Horn of Africa, we discussed, among other actions being taken, the recent agreement between the United States and the Soviet Union to launch a joint effort to deal with starvation and conflict in Ethiopia.

''We also noted with particular concern developments related to Kashmir. These events threaten regional stability and they could imperil the growth of political and economic freedoms in two democracies - India and Pakistan. We're encouraged by recent moves toward dialogue between the two countries and we agreed to use all means at our disposal to encourage and support this process.

''We expressed our concern that the Asia and Pacific region has yet to see the same process of conciliation, military disengagement, and reduction of tensions that has characterized East-West relations in Europe. In this regard, we support the early resolution of the Northern Territories issue as an essential step leading to the normalization of Japanese-Soviet relations.

''The Korean Peninsula remains an area of sharp concern, especially because the North has yet to sign and implement a nuclear safeguards agreement. We welcome the recent talks between North and South Korea, and we hope that they mark a turning point in inter-Korean relations.

''In sum, the summit partners share the imperative of our time to help promote and to help secure democracy around the world. We are committed to turn the hopes of today into the solid achievements of tomorrow.''

#90191u2469 07/10/1990 ~United Press International

ENNIS, MONT (JULY 10) UPI - Militant environmental activists meeting in the Beaverhead National Forest may stage a demonstration after their 11th annual Round River Rendezvous ends, but government officials don't know when or where.

Forest spokesman Jack de Golia said Tuesday that Forest Service officials had discussed ''generally'' reports that members of the Earth First! environmental group may be planning ''some kind of demonstration'' to

follow their annual celebration-campout, which ends this weekend.

''Since we don't know much about where, there's not much we can talk about '' he added.

About 100 vehicles and 150 to 250 people had arrived at the 30-acre rendezvous site in the Gravelly Mountains, 50 miles north of Yellowstone National Park, de Golia said. Up to 500 campers are expected by Friday.

Madison County sheriff's deputies and Forest Service officers continued to monitor the gathering and guard two talc mines in the vicinity, but no confrontations had been reported by Tuesday.

Earth First! members at this year's meeting have denied they would spike trees or damage mining equipment during the campout, but several have said some kind of civil disobedience might occur after the meeting.

The possibility of a demonstration was reiterated by Earth First! organizer Philip Knight of Bozeman in a television news report Monday night, de Golia said.

Earth First! organizer Daniel Barron of San Francisco earlier noted that, after the 1987 rendezvous at the North Rim of the Grand Canyon, 100 activists jumped a fence and occupied a mineshaft tower, chaining their necks to a railing with bicycle locks.

Residents of southwest Montana's timber and cattle country voiced strong opposition at a public hearing in March after the Forest Service proposed granting a nine-day permit for the rendezvous, which was later upheld by two federal judges.

When the permit was first approved, officials said no Earth First! members had committed illegal acts during the five previous rendezvous on national forest lands.

The limited encounters between Earth First! members and locals grew less friendly but were still peaceful this week.

Logger Jim Tefertiller drove his pickup truck with personalized ''TIMBER'' license plates to the group's campsite on Sunday, and visited briefly with Earth First! members.

He later called Earth First! members ''cowards'' for advocating or tolerating sabotage of equipment, roads and other property used for timber clear-cutting, mining, off-road vehicle recreation and other forest uses they oppose.

''They could at least stop being hypocrites,'' he said. ''They should use

no electricity, eat from gardens and live in stone houses. The thing is, they don't.''

Forest officials said Tuesday the only other known encounter between locals and people attending the rendezvous occurred Friday night, when a ranger saw two pickup trucks parked ''head to head'' at the campsite. But instead of a confrontation, the ranger only saw ''a couple of cowboys and a couple of Earth Firsters drinking beer,'' de Golia said at the time.

#90191u2478 07/10/1990 ~United Press International

OSHKOSH, WIS (JULY 10) UPI - Oshkosh Truck Corp. has been selected to receive a $1 billion contract to produce the Army's next generation of truck called the Palletized Loading System Vehicle, spokesmen said Tuesday.

The contract will be awarded after the Defense Acquisition Board gives approval for initial production of the first 79 units at a cost of $48 million, said Thatcher Peterson, Oshkosh vice president for employee resources.

''We're very pleased. We've designed and built an excellent truck. Great effort went into it and good imagination was used. Our people did a marvelous job,'' Peterson said.

Rep. Les Aspin, D-Wis., chairman of the House Armed Services Committee, said the company won a competition to produce 2,707 heavy trucks, 383 trailers and 20,940 racks for the Army at a cost of $1.091 billion. Peterson also said the contract includes an option for up to another 2,700 trucks.

Peterson said production was expected to start in July 1991 and end during May 1995.

The 500-horsepower truck has five axles and 10-wheel-drive. It is designed to carry ammunition and other heavy cargo on pallets that automatically can be loaded and unloaded off the back of the truck, Peterson said.

Peterson and Aspin said the truck will carry 16.5 tons of cargo and will pull a trailer also loaded with 16.5 tons.

''A single driver can load and unload a 16.5 ton pallet of material in less than one minute without leaving the driver's seat,'' Aspin said. He said Oshkosh Truck was in tough competition with General Motors for the new truck. Both companies designed and built nine test trucks, which the Army has been testing since late last year at the Aberdeen Proving Ground in Maryland and Yuma Proving Ground in Arizona.

Oshkosh Truck employs 1,800 people at its plant in Oshkosh. Peterson said the company planned to complete the contract with its existing work force.

The company also makes other cargo trucks for the Army, chassis for the recreational and commercial vehicle industry, airport rescue vehicles, front-discharge concrete carriers, and other specialized vehicles.

Aspin said the contract was welcome news for Oshkosh and Wisconsin, especially since the production of the Army's Heavy Mobility Tactical Truck is winding down. Oshkosh Truck has produced about 13,000 of the 10-ton HEMTTs over the past decade.

Earlier this month, the Army exercised a $70 million contract option for 363 HEMTTs earmarked for Army Reserve and National Guard units.

Aspin said Wisconsin subcontractors were expected to benefit from about one-third of the contract.

#90191u2495 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - The Senate, opening debate on the major civil rights bill of the session, plunged Tuesday into a sharp debate over extending for the first time in history the protection of anti-discrimination laws to its own employees.

The Senate agreed that about 7,800 employers should come under federal laws banning job discrimination but a proposal to bar them from taking their cases to the courts provoked a bitter clash that split the parties.

Sen. Wendell Ford, D-Ky., proposed that the Senate Ethics Committee be the final judge of discrimination complaints filed by the employees. Opponents argued the employees should have the right to take their cases to the courts.

Sen. Tom Harkin, D-Iowa, said allowing the Senate Ethics Committee to rule on complaints by its own employees moves ''again to separate us from the people of the rest of the country,'' adding that at the end of the Senate process, employees should have the right to take their appeals to court.

Ford offered his proposal to legislation that would roll back Supreme Court decisions handed down last year in the area of employment discrimination.

Supporters of the bill claim the rulings undermined anti-discrimination laws in the area of employment. Opponents said remedial legislation would lead to quota systems in hiring and firing.

Sen. Orrin Hatch, R-Utah, said supporters of the bill were seeking an edge ''under the guise of civil rights to force businesses to go to proportional hiring - which is quotas.''

''This bill should be called the quota bill instead of the civil rights bill,'' Sen. Jesse Helms, R-N.C., said.

Sen. Edward Kennedy, D-Mass., floor manager for the legislation, said the charge was ''spurious,'' adding, ''It is a mockery of civil rights and the fundamental principles of equal justice under the law for opponents ... to raise the false hue and cry of quotas.''

White House chief of staff John Sununu proposed new language to Kennedy in a letter Tuesday on the issue of quotas but said ''this is really as far as we can go'' in efforts at a compromise.

''The administration's basic concern, is that the bill as crafted now, will, even if unintentionally, compel business to adopt quota policies in hiring and promotion as the only or best defense against the likelihood of legal action,'' Sununu said.

Ford's amendment would bring Senate employees under three anti-discrimination laws and two bills working their way toward passage.

The statutes are the famed 1964 Civil Rights Act, the Rehabilitation Act of 1973 and the ban on age discrimination passed in 1976.

One bill, set for final action, bars discrimination against the disabled, and the other is the 1990 Civil Rights Act to which the amendment was added.

Although the Senate has adopted anti-discrimination rules it has never put its employees under federal laws, leading to dispariging descriptions of Congress as the ''last plantation.''

Ford, who sponsored the amendment, said it ''proves the Senate intends to provide the same protection it provides for the rest of the country.''

But Ford said Senate employees would have to press anti-discrimination cases before the Ethics Committee, rather than the courts or non-congressional arenas, to preserve the Constitution's requirement of a separation of powers. President Bush said May 17, ''I want to sign a civil rights bill but I will not sign a quota bill'' but two months of steady discussions between sponsors and the White House failed to produce a compromise bill.

Kennedy aides said White House chief of staff John Sununu failed to reply to overtures during last week's recess, a point disputed by Hatch who said

that Sununu had made a new proposal Monday afternoon.

In an effort to meet administration objections, Kennedy changed language in the bill but Hatch, irate he had not seen the revisions until late Monday night, said they only made the bill ''more onerous and burdensome on the employer.''

Most of the attention was fixed on the Supreme Court's overruling of a 1971 decision that Kennedy called the ''cornerstone of efforts to guarantee equal opportunity for minorities and women in the workforce.''

The 1971 ruling involved so-called disparate impact cases where job practices adopted without discriminatory intent still have the effect of excluding qualified women and minorities.

Last year, however, the court shifted a key burden of proof from employers to employees making it more difficult and expensive to challenge discriminatory practices.

#90191u2501 07/10/1990 ~United Press International

GREENWICH, CONN (JULY 10) UPI - The Perrier Group of America said Tuesday it is rebounding from a worldwide recall five months ago triggered by reports of benzene contamination in a test batch of the bubbling drink.

The French bottler has regained distribution in 80 percent of its U.S. retail outlets, and has returned to 50 percent of the country's top restaurants, bars and hotels, and more than 70 percent of establishments in its key markets.

Sales of its regular, unflavored water in May were 67 percent of total Perrier sales in May 1989, the company reported.

''We honestly did not think we would reach this benchmark until months from now,'' said Kim E. Jeffery, senior vice president of sales and marketing at Perrier, which has its U.S. headquarters in Greenwich.

''The response shows what we've always believed. When people have the chance to choose Perrier, they do,'' Jeffery said.

With distribution and consumer demand running ahead of schedule, Perrier says it is ready to begin a $25 million advertising, promotion and marketing campaign.

The plan includes aggressive television, radio and print advertisements, special events sponsorships, and widespread product sampling and coupon distribution in top markets.

Perrier Group said Feb. 9 it was recalling its entire U.S. stock of mineral water after North Carolina's agriculture department reported abnormally high levels of benzene in a test batch.

Perrier attributed the problem to faulty filters that let benzene, used to clean bottling equipment, slip into the beverage. The finding forced the bottler to recall its worldwide stock the following week.

Perrier said the cost of recalling shipments worldwide as well as of installing safer equipment at its bottling plant in France amounted to about $30 million.

#90191u2518 07/10/1990 ~United Press International

NORTH CHICAGO, ILL. (JULY 10) UPI - Abbott Laboratories Tuesday reported record second-quarter earnings of $240.2 million, or 55 cents a share, up 13 percent compared with $212.5 million in last year's second quarter.

Revenues rose to a record $1.5 billion compared with $1.32 billion in the year-ago quarter.

For the first six months of 1990, the pharmaceuticals manufacturer reported record net earnings of $465.2 million, or $1.06 a share, up 13.3 percent compared with $410.5 million, or 92 cents a share, a year ago.

Revenues for the first half also hit record heights - to $2.94 billion compared with $2.16 billion in the comparable year-ago period.

#90191u2526 07/10/1990 ~United Press International

(JULY 11) UPI - SPORTS DIGEST

BASEBALL

Former major-league pitcher Don Bessent, who played in the World Series for the Brooklyn Dodgers in 1955 and 1956, died in the parking lot of a fast-food restaurant in Jacksonville, Fla. while the manager threatened to fire employees if they called for help. Bessent died of alcohol poisoning and had a blood-alcohol level of 0.35 at the time of death.

BASKETBALL

The NBA filed suit with the Court of Appeals asking the court to uphold the validity of the Brian Shaw's contract with the Boston Celtics. Shaw, the Celtics 1988 No. 1 draft pick who signed a five-year, $6.2 million

contract before deciding to play for Italy's Il Messaggero last season, agreed to return to Boston for the 1990-91 season. Shaw, a 24-year-old guard, later changed his mind again, saying he preferred to stay in Rome for another year in order to become a free agent in the NBA in 1991.

COLLEGE

The University of Texas basketball team received an early commitment from Joel Davis, a sophomore guard-forward from Angelina Junior College. The 6-foot-4 prospect, who also considered Oklahoma, Southern California, Western Kentucky, Colorado and Cincinnati, averaged 29 points and 18 rebounds last season.

CYCLING

Frenchman Thierry Claveyrolat won the 10th stage of the Tour de France cycling but Ronan Pensec took the leader's yellow jersey for the first time, surpassing Steve Bauer in the mountainous 70.5 miles from Geneva to Saint Gervais, France. Claveyrolat finished with an unofficial lead of 1 minute 53 seconds over Uwe Ampler of East Germany.

FOOTBALL

Art Schlichter, quarterback of the Detroit Drive, was named player of the week in the Arena Football League. He threw seven touchdowns in Detroit's 50-21 win over the New York Firebirds last week.

GOODWILL GAMES

In response to a request from representatives of the Soviet Union contingent, a supply of condoms will be made available to all athletes, their coaches and translators attending the international sporting event. The Soviets voiced concern that they would be able to obtain the protection, if they found a need for it.

HOCKEY

The Toronto Maple Leafs announced Frank Anzalone as head coach of the Newmarket Saints, their affiliate in the American Hockey League. Anzalone, a 35-year-old New York native, recently finished his seventh full season as head coach of the Lake Superior State University. ... The New York Rangers acquired center Brian McReynolds from the Winnipeg Jets in exchange for center Simon Wheeldon.

HORSE RACING

The Eclipse Awards, thoroughbred racing's most prestigious honor, will be announced live from San Francisco on ABC's ''Wide World of Sports'' on

Feb. 9, 1991. The formal award presentations will be made later that evening during the 20th annual Eclipse Award Dinner. ... Red Ransom, one of the winter-book Kentucky Derby choices, was officially retired earlier this week and will be sold for stud duty, according to trainer Mack Miller. The well-regarded horse has been plagued by physical problems, culminating in a fractured sesamoid suffered in a July 4 workout... Jockey Julie Krone, sidelined by a broken arm since Nov. 24, has resumed riding and is planning to return to the races July 24, her 27th birthday, at Monmouth Park.

OLYMPICS

In an effort to bring the 2000 Olympic Games to Berlin, a West Berlin official was named head of an ''Olympics-bureau'' to jointly represent East and West Berlin. The decision to create the panel concluded months of effort to coordinate the separate campaigns that have recently emerged in both halves of the once-divided city.

SOCCER

English soccer teams may return to European club competition this fall after being banned for five years because of their violent fans. However, UEFA, European soccer's governing body, said the ban will apply to the Liverpool club for three more years because of its fans' involvement in a 1985 incident in Belgium in which 39 people died. ... A Cameroonian witchdoctor has claimed that someone cast a spell on the ball that was used in his country's 3-2 quarterfinal-defeat in the World Cup to England. Onomo Dismas, a 46-year-old witch doctor who traveled with the national team to Italy, said ''bad spirits'' were against the team after the ball was changed with Cameroon leading 2-1.

TENNIS

Mats Wilander returned to competition after a four-month absence with a 6-0, 6-3 victory over Johan Anderson in Bastad, Sweden. Wilander, currently ranked 29th in the world, last played in the Indian Wells (Calif.) IBM/ATP in February, when he lost in the first round to Jan Gunnarsson.

-30- 4858

#90191u2543 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - An astronomer who cracked a computer spy ring warned Tuesday that computer security remains riddled with gaps and if the United States does not act now to develop standard safeguards it could lose out in the world market.

Appearing at a Congressional hearing, Clifford Stoll, who tracked down the

German hackers who stole U.S. military information by breaking into computer networkers, said he thinks Americans may be trailing other nations when it comes to developing practical ways of protecting computer information from such intrusion.

Most U.S. security measures now under development center on protecting a single, large computer shared by dozens of users - a situation common 10 years ago, but now being supplanted by thousands of small, table-top computers hooked up to giant networks, Stoll said. Protection for such modern network systems ''is developing at a snail's pace, if at all,'' he said.

Stoll told the House Science, Space and Technology subcommittee that England, France, Germany and the Netherlands have already hammered out a tentative set of standards for computer security. Those guidelines appear to ''pull in opposite directions'' of ideas being mulled over in the United States, and if the differences are not ironed out ''eventually we may not be able to sell computers in those countries,'' he said.

''It would be a wise idea to do it (set standards) here now so that we ... could set an example for others,'' said Stoll, who chronicled his pursuit of the German hackers in a 1989 book entitled ''The Cuckoo's Egg.''

Rep. Robert Torricelli, D-N.J., chairman of the subcommittee, agreed, noting that past U.S. failures to adopt worldwide standards for electrical goods and railroads produced situations in which ''we find ourselves only able to market goods to ourselves.''

Torricelli said he was disturbed by a recent General Accounting Office report, which found that as of January, federal agencies had implemented only one-third of 145 computer safeguards deemed necessary by the Computer Security Act of 1987.

''Terrorists shut down the Federal Aviation Administration's air traffic system in a new summer movie called 'Die Harder.' While most of the movie is farfetched, that basic premise is not. It could happen, and we have done very little to prevent it,'' said the New Jersey Democrat, whose committee watched short excerpts of the violent film starring Bruce Willis.

But Stoll said, ''I don't see terrorist organizations taking over computer systems as a threat to national security.''

James MacRae Jr. of the White House Office of Management and Budget criticized federal agencies' failure to quickly achieve the goals of the Computer Security Act.

OMB has found ''pockets of ignorance'' about computer security in all agencies, MacRae said, adding that his staff plans to visit top agency

managers and check their computer protection strategies.

If progress is not seen soon, OMB may take stronger action. ''We have the ultimate weapon ... that is to de-fund some of the (computer) systems whose security plans are not adequate,'' MacRae said.

Stoll emphasized the need to design security systems so they can be easily used by an average worker, like a secretary who uses a computer several hours a day. So far, most of the security plans ''seem to be very technical, very obscure, very hard to apply,'' he said.

Most protection strategies also fail to take into account - or add as an afterthought - ways to protect against the devastation that can be caused by a rogue computer program, like the ''virus'' or ''worm'' that crashed a nationwide network in November 1988.

-30- 3925

#90191u2557 07/10/1990 ~United Press International

WASHINGTON (JULY 10) UPI - The Environmental Protection Agency announced a shift Tuesday in its strategy for enforcing toxic waste disposal regulations, saying it will focus more on the nation's 216,000 waste generators.

In a report analyzing the EPA's toxic waste program under the Resource Conservation and Recovery Act, the agency also said it expected tougher environmental rules will force the closure of nearly 3,000 - or 60 percent - of the country's 4,700 waste treatment, storage and disposal facilities.

The report, done by a 90-member task force of EPA regional and headquarters officials as well as state officials, noted that over the past 10 years the EPA has concentrated on enforcing environmental safefuards at commercial toxic waste dumps and other facilities that take waste from generators.

The report recommended EPA change its enforcement strategy to target industrial facilities and other generators of waste that often store their toxic effluent at plant sites rather than sending it to commercial waste handling facilities.

The study also said the EPA needed to re-evaluate all its hazardous waste disposal rules to determine how effective they have been. It said many current regulations were issued under the pressure of court deadlines or legislative requirements and thus may be inconsistent or hard to carry out or enforce.

In that re-evaluation, the agency said it would consider changing regulations to provide greater economic incentives to waste generators to

minimize their discharges and do more recycling.

As for the thousands of toxic waste dumps and disposal facilities facing shutdown, the report said the EPA would work to ensure proper cleanup of contaminated sites, with the worst problems to receive priority.

The EPA proposed new ''corrective action'' rules Monday spelling out the procedures and decontamination standards that would have to be followed in cleaning up those sites.

The agency said it already has closed 1,273 land disposal facilities and 130 toxic waste incinerators and that it expected another 1,600 storage and treatment facilities to shut down over the next few years.

-30- 2356

#90191u2560 07/10/1990 ~United Press International

SANTA MONICA, CA (JULY 10) UPI - Patti Frustaci, the woman who gave birth to the nation's first septuplets in 1985, and her husband, Sam, agreed Tuesday to a settlement of up to $6.2 million in their suit against the fertility clinic that treated her.

The Tyler Medical Clinic will pay $450,000 of the settlement immediately and will make monthly payments to the three surviving Frustaci children for the rest of their lives.

As the terms of the settlement were announced in court, tears rolled down Patti Frustaci's face.

Outside the courtroom, Mrs. Frustaci's attorney, Browne Greene, announced that she is pregnant again with twins, due Dec. 30.

Greene said the twins, both healthy, were conceived after Patti was treated with Pergonal, the same self-injected fertility drug she took in the fall of 1984 when she conceived the septuplets.

''I feel such a relief,'' Mrs. Frustaci said after terms of the settlement were revealed. ''It's taken up a great deal of time, but the goal all along was to take care of the children.''

The settlement will help pay for the constant medical attention and other care the three surviving Frustaci children require, but their mother was hesitant to say whether it would satisfy all of the family's needs. ''I don't know. Life is a compromise,'' she said.

Mrs. Frustaci, facing a hall packed with reporters and photographers, also said she was ''in awe'' that five years after she gained national attention with the record birth, people were still so interested in her

story.

The Frustacis sued the clinic and an infertility specialist who treated Mrs. Frustaci in 1984, Dr. Jaroslav Marik, for malpractice and wrongful death.

Under the settlement, Superior Court Judge David Rothman dismissed the complaint against Marik, who is a part-owner in the clinic. Marik had denied the malpractice allegations and strenuously objected to any settlement discussions, which went on without his consent, a highly unusual occurrence in such cases but which paved the way for the settlement.

Settlement negotiations began Thursday and continued through Tuesday, a day after jury selection for a trial in the case was to begin.

The discussions were finalized after Marik was dropped from the suit. Rothman said the majority of the clinic's directors approved the settlement over Marik's objections, as was registered in the court record by his attorney,Craig Dummit.

The settlement, the bulk of which will be paid by the clinic's insurance company, calls for an immediate lump sum payment of $450,000, with the monthly payments to the children beginning in August.

The payments will vary according to the degree of the children's physical and other disabilities, which include eye problems and developmental problems.

Until the children become 18 in 2003, Stephen Earl, the most severely impaired, will receive $1,000 a month; Richard Charles, $600 a month; and Patricia Ann, $400 a month.

From age 18 until at least age 38, Stephen will receive $3,000 a month, Richard; $2,000 a month; and Patricia, $1,000 a month. If any of the three dies before age 38, the payments will go to their heirs.

The payments will continue through their lives, but once they survive past 38, the payments will not be turned over to heirs upon their deaths. The total settlement package calls for a minimum of $2.6 million to be paid to the family.

The Frustacis, who live in Riverside, made headlines on May 21, 1985, when Patti became the first American woman to deliver septuplets - four boys and three girls - born by Caesarean section at St. Joseph Hospital in Orange.

But the occasion quickly took a tragic turn. One daughter, Christina, was

stillborn. A son, David, died three days after birth, and James and Bonnie died at 16 and 19 days.

In their October 1985 suit, the couple accused Marik of not properly advising and monitoring Patti Frustaci or ordering tests that could have indicated possible multiple births.

Marik contended that Mrs. Frustaci injected herself with larger dosages of the drug than he prescribed, and that he did recommend diagnostic tests, but that she refused them.

When she was diagnosed as pregnant with septuplets, the Frustacis, who are Mormon, rejected the option of aborting some or all of the fetuses.

In their suit, the Frustacis had sought damages to cover medical and other care expenses - stated in court documents as between $1 million and $2 million and climbing.

(JULY 10) UPI - Leaders of the seven nations at the Economic Summit in Houston are easing their collective stand on sanctions against China. The agreement to ease the sanctions against China opens the door to greater economic re-engagement with the communist nation. The leaders at the Economic Summit also agreed on aid to the Soviet Union... adopting a go-your-own-way policy. The three-day summit ends tomorrow.

Soviet President Gorbachev thanked his nation's 28th Communist Party Congress for its faith and support today in re-electing him the party's secretary general. Gorbachev overwhelmingly defeated his lone oponent, despite calls for him to give up either the presidency or the party leadership. Gorbachev said the success of the Communist Party depends on it understanding that it's working in a new society.

West German news media report the Soviet Union has a huge arsenal of chemical weapons in East Germany. But an East German defense spokesman says Soviet military officials have assured him the reports are NOT true. However, shortly after the denial, the West German news agency quoted a government intelligence source as saying there's solid information that the Soviets do have chemical weapons in East Germany.

The American Telephone and Telegraph Company says there's a ''surplus'' of 43-hundred people in its network services division... confirming an earlier report of layoffs in the division. The Communication Workers of America union said today that A-T-and-T was slashing 43-hundred jobs in the division. The telecommunications giant says some of the workers will be retrained and moved into other positions in the company.

(JULY 10) UPI - Federal researchers have apparently determined the source of a potentially fatal blood disorder linked to the food supplement L-tryptophan. Officials report contaminated lots of L-tryptophan supplied by a Japanese manufacturer seem to be the cause of last year's epidemic. The Food and Drug Administration in November ordered a recall of products made from L-tryptophan. More than 14-hunded cases of the disorder and 19 deaths have been reported in the United States- but NONE since February.

Liberian rebel leader Charles Taylor has rejected a cease-fire declared by President Samuel Doe. The president declared the cease-fire Friday in a desperate bid to end the six-month civil war gripping the western African nation. Taylor reportedly agreed to end the hostilities on Sunday and his turnaround, announced today during a radio interview, was NOT explained.

The owner of an electronics store near Kalamazoo, Michigan, today was ordered to stand trial for secretly videotaping three teen-age employees having sex with their boyfriends. The encounters took place in the store after hours. The young women told the judge their former boss gave them keys to the store... saying they were free to use the television room any time after closing. Authorites say the taping went on for two and one-half years.

Glasnost... from Memphis to Moscow. Graceland officials were notified a fan club concentrating on Elvis Presley has been formed in the Soviet Union. The president of the first such club in the Soviet Union says members plan to celebrate Elvis's birthday with a special concert on January 8th, 1991. She also says negotiations have begun to open a club entirely devoted to rock 'n' roll, to be appropiately called ''Memphis.''

WASHINGTON (JULY 10) UPI - The federal government plans to file a $200 million lawsuit against Neil Bush, son of President Bush, and the other directors of a bankrupt Denver savings and loan association, ABC News reported Tuesday.

The pending suit against the president's son and the other former directors of Silverado Savings and Loan, was authorized by William Seidman director of the Federal Deposit Insurance Corp., the network reported, citing unidentified officials.

The suit will allege Silverado's losses were partly caused by the negligence of Neil Bush and the other board members, ABC said. The suit

will charge Silverado's board acted irresponsibly by approving dozens of questionable loans.

The network did not say when the suit would be filed.

ABC said investigators disclosed a memo in which a top Silverado executive acknowledged that the board was functioning as a ''rubber stamp'' while approving a wide variety of deals.

Many of the loans approved by Silverado's directors were not paid back, the network said.

Neil Bush quit the board in the summer of 1988 and the bank collapsed several months later.

Bush, 35, said he was not aware of the legal action, but claimed he was a responsible director.

''Everything was above board and appropriate. I feel like I'm right in the middle of a highly politicized issue,'' he told ABC.

Neil Bush faces a hearing this fall before federal savings and loan regulators, responded to allegations that while a director of Silverado he violated conflict-of-interest rules by voting to approve loans to individuals with whom he had a business relationship.

Silverado's failure is expected to cost taxpayers an estimated $1 billion and Neil Bush has become a central figure in the collapse of the S&L industry, the most expensive financial scandal in U.S. history.

Neil Bush acknowledged in an interview with The Washington Post that he received ''an incredibly sweet deal'' in 1984 when Denver investor Kenneth Good lent him $100,000 and then forgave the debt. Bush, who was not a member of the board when he received the loan, also said he would report that payment on his 1990 taxes.

Neil Bush insisted that that loan was ''totally unrelated'' to his work for Silverado and that other charges against him were political ''opportunism'' and ''press sensationalism.''

The federal Office of Thrift Supervision, which is overseeing the bailout of the savings and loan industry, proposed a decree in January banning Bush from the banking industry because of his actions. Bush refused to accede and the decree proposal was withdrawn.

Neil Bush said that he decided to fight regulators ''because I know I haven't done anything wrong,'' noting that his troubles could provide Democrats with campaign fodder for the November congressional and state

elections.

Neil Bush also challenged regulators' contention he violated regulations by voting to approve Silverado loans to Bill Waters, a Denver developer who had invested in Bush's oil company. Bush said there was no conflict of interest in his votes because other bank officials knew of his ties to Waters.

The president's son also discussed dealings between Silverado and Good, who forgave the $100,000 loan a year before Bush became a director of the now bankrupt thrift.

Bush said the loan was to be repaid only if the money returned a profit on investment. Bush said the invested money did not return a profit so the loan was forgiven.

The newspaper said bank records showed that Bush did not vote when Silverado's board approved loans to Good. But thrift regulators charged that Bush personally proposed to his fellow board members that they grant Good a $900,000 line of credit, which they did.

#90191u2628 07/10/1990 ~United Press International

(JULY 10) UPI - Showers and thunderstorms stretched from the nation's midsection to the East Coast Tuesday, bringing some relief from a steamy heat wave in the South and Middle Atlantic region that has killed at least five people in Georgia.

Temperatures, which exceeded 100 degrees in more than a dozen states Monday, stayed below the century mark Tuesday except in Georgia, where the mercury climbed to 101 in Macon.

Heat stroke and other heat-related illnesses claimed five lives in the past week in Georgia, authorities said. Most of the victims could not afford air conditioning, authorities said.

The hot Georgia summer also has kept firefighters busy battling more than 600 wildfires since July 1, and the Georgia Forestry Commission has asked for a voluntary halt on all outdoor burning.

State Forestry Commission Fire Chief Wesley Wells said most of the fires have been caused by lightning and have been small, with a total of 3,000 acres burned.

''It's extremely unusual for us to be fighting a lot of fires this time of year,'' Wells said. ''Summer is the time of year we usually regroup.''

The heat also increased water demand around the state, forcing most of metro Atlanta and at least seven other communities to restrict outdoor watering. County officials ordered bans on outdoor water use or established odd-even watering systems for their residents.

Blustery thunderstorms swept across Colorado overnight, and a tornado was spotted about 10 miles northeast of Denver's Stapleton Airport. The storms moved across northeastern Colorado with winds gusting to 70 mph that downed power lines and may have spawned additional tornadoes, the NWS said.

Fog covered the California coast Tuesday and high pressure sent temperatures soaring over the century mark in the Central Valley.

To the north, fair weather continued over the Pacific Northwest with temperatures ranging up to the 90s inland and cooler by the coast.

#90191u2649 07/10/1990 ~United Press International

MILWAUKEE (JULY 10) UPI - A federal judge issued a temporary injunction Tuesday halting the statewide ''Learnfare'' program in Milwaukee, saying a poor system of monitoring school attendance unfairly penalized some welfare families whose benefits are cut because of truancy.

''This is a situation where the survival and the dignity of individuals are involved,'' Judge Terence Evans said in suspending the much-ballyhooed program that links welfare benefits to school attendance by dependents of those receiving public assistance.

While it is in the public interest to reduce welfare dependency and encourage teenagers to go to school, he said, there is a ''clear interest in ensuring that subsistence benefits are not terminated improperly and that families are not destroyed in the process.''

Last week the non-partisan Legislative Audit Bureau issued a study saying the program was being undermined by administrative problems, including poor record-keeping. The audit gave particular emphasis to truancy record-keeping in the Milwaukee school system.

Evans also granted class-action status to the six AFDC families who brought the suit, which means an estimated 3,200 AFDC recipients who attend Milwaukee public schools or have children in the district can join the lawsuit.

Legal Action of Wisconsin represented the plaintiffs and contended that the information Milwaukee schools sent to welfare officials was insufficient to determine whether student absences were excused or unexcused.

Legal Action said that in some instances, the loss of benefits meant families were evicted from their homes, had to turn to food pantries, failed to pay bills or could not buy needed clothing.

Learnfare requires school attendance by the 30,000 Wisconsin teenagers who either receive Aid to Families with Dependent Children benefits or whose parents receive the benefits. AFDC families lose benefits if their teenage children have had 10 or more unexcused absences in a semester.

An average of 2,125 students in Milwaukee were subject to Learnfare penalties each month from November 1988 through June 1990.

Patricia DeLessio, a Legal Action lawyer, said only Milwaukee public school students were involved in the case because few sanctions were imposed against AFDC recipients in school districts elsewhere in the county.

Learnfare is the centerpiece of Gov. Tommy Thompson's welfare reform package, and Thompson said the decision helped point out problems in the Milwaukee Public School system. He said the judge did not attack the merits of the program.

''We can't do the record keeping for the schools,'' the governor said. ''This (deicison) doesn't go to the merits of the program at all.''

Assembly Speaker Thomas Loftus, a Democrat who is running against Thompson for governor, again said Learnfare is a mean-spirited program that should be abolished. ''Human beings are used as guinea pigs, and that's wrong,'' he said. ''You're treated under Learnfare differently depending upon where you live.''

#90191u2692 07/10/1990 ~United Press International

GUATEMALA CITY (JULY 10) UPI - Guatemalan guerrillas accused the government Tuesday of doing nothing to stop the army from bombarding villages throughout the countryside in what they described as a campaign of terror.

In a full-page ad published in the Guatemalan newspaper Prensa Libre, the leftist Guatemalan National Revolutionary Union, or URNG, said special army units were strafing ''populated zones with aerial and artillery bombardments causing a great number of deaths of innocent people.''

The ad said President Vinicio Cerezo's administration was acting as ''an accomplice in passivity.''

''We condemn and denounce the campaign of repression directed toward the popular sectors that over the past few weeks has increased in an obvious and brutal manner,'' said the declaration, signed by rebel leaders Rolando Moran, Gaspar Ilom, Pablo Monsanto and Carlos Gonzales.

Army spokesman Col. Luis Isaacs was not immediately available for comment.

Guatemalan guerrillas have been active for more than 30 years, with the war reaching its high point in the early 1980s.

Since 1966, more than 100,000 people have died as a result of guerrilla activity or counter-insurgency, while another 150,000 Guatemalans have fled the country seeking safe haven, according to the Costa Rica-based Central American Human Rights Commission.

''Dozens of people who disappear and later turn up dead after having been savagely tortured, on top of an intensive campaign of threats and intimidation, has created a climate of horror and terror,'' the rebel statement said.

Human rights groups have accused the Guatemalan army of being responsible for the eerie disappearances and random kidnapping of peasant farmers and human rights and political activists that occur on almost a daily basis.

''The government and the army appear to be looking for a military solution (to the national crisis) although they have not been capable of acheiving this during the past thirty years,'' the declaration said.

In 1981 and 1982, the army launched a major counter-insurgency campaign aimed at removing bases of guerrilla support, attacking and razing entire villages, killing women and children, dispersing and killing livestock and domestic animals and burning fields ready for sowing as part of a ''scorched earth'' policy.

An estimated 440 villages were destroyed, 150,000 inhabitants of the northern mountains fled to Mexico and from 50,000 to 75,000 people were killed between 1981 and 1984.

To consolidate the results of the setback for the guerrillas, the government organized the rural population into model villages, under close government observation, organizing villagers into militias and using psychological warfare such as captured insurgents publicly repenting, ceremonies and lectures.

The rebel leaders Tuesday called upon the general populace and the military in particular ''to respect and fulfill the process now underway to create conditions conducive to peace, democracy and social justice.''

PHILADELPHIA (JULY 11) UPI - An unemployed stock analyst filed separate multimillion-dollar defamation suits Tuesday against developer Donald Trump and a Philadelphia investment firm in the wake of his dismissal for giving an unfavorable review of Trump's Taj Mahal casino in Atlantic City.

In a federal court filing, Marvin Roffman alleges Trump forced his firing by the Janney Montgomery Scott firm March 23.

Roffman was fired after Trump wrote a letter demanding an apology for forecasting the demise of the Taj Mahal and Roffman refused to give it, according to Roffman's Philadelphia attorney, James Schwartzman.

Roffman is seeking more than $2 million in damages from Trump and his organization for defamation and interfering with his contract with the investment firm.

In a separate filing with the New York Stock Exchange, Roffman is seeking over $3 million from Janney Montgomery Scott and three of its officers for defamation, wrongful discharge and intentional infliction of mental distress.

The suit against Janney Montgomery Scott had to go through the NYSE first since the firm is a member of the exchange, according to Schwartzman.

In a statement, Norman T. Wilde, president of Janney Montgomery Scott, said that ''we believe that Mr. Roffman has every right to seek arbitration by the New York Stock Exchange'' and that the firm ''plans a vigrous defense.''

In a March 20 article in the Wall Street Journal, Roffman was quoted as saying the newly built Taj Mahal would break all Atlantic City casino records through this summer but would fail to keep afloat in the fall.

Roffman also had said Trump would need to make $1.3 million a day at the casino to avoid going broke on the project.

Schwartzman said Roffman made his remarks ''under the auspices of Janney Montgomery Scott.''

''The numbers are even worse than Marvin predicted they would be,'' Schwartzman said, although he could not cite recent revenues for the hotel-casino.

John Barry, Trump's attorney and brother-in-law, countered that the Taj Mahal, one of three casinos Trump owns in Atlantic City, was ''bringing in plenty.''

''If those (Roffman's figures) are the figures, the Taj is doing very well '' Barry said. ''It brought in $35 million last month in gaming revenues alone. Who knows what the hotel revenues were. ... The Taj is far and away the outstanding success in Atlantic City.''

Barry characterized the suit as ''complete and utter nonsense,'' saying the investment firm chose to fire Roffman despite the Trump letter, which demanded that Roffman be fired if he did not apologize.

''Mr. Roffman felt totally free to make all kinds of negative comments in the press about Mr. Trump and other organizations,'' Barry said. ''But when people make negative comments about him, he can't take it.''

Barry said the Trump Organization is considering filing a counter suit.

Wilde reiterated the firm's position that Roffman violated two company policies when he talked to Journal.

''First, all comments to the media must be cleared by the director of research or management,'' Wilde said. ''Second, no recommendations are to be released to the news media without having been disseminated broadly to Janney Montgomery Scott's client base.''

Wilde said Roffman agreed to sign a letter to Trump apologizing ''for the tone of his comments to the Journal.

''He subsequently sent a second letter to Mr. Trump in which he sought to repudiate his apology, after he had been advised in writing by his supervisor not to send the second letter.''

It was because he chose to ignore this advise that Roffman was dismissed, Wilde said.

In dismissing Roffman, ''we took measures to uphold industry standardsconcerning the professional integrity of security analysts,'' Wilde said.

#90191u2789 07/10/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (JULY 10) UPI - The Salvadoran military announced Tuesday the creation of a department to investigate human rights abuses, hours before the arrival of U.S. Assistant Secretary of State Bernard Aronson.

Aronson arrived for a two-day visit Tuesday afternoon, but made no immediate comment to the press.

The new office is to work under the authority of the military high command the Armed Forces Press Committee said in a statement.

''The office is already investigating those acts committed by members of the military who have irresponsibly placed themselves outside the law,'' the statement said.

The news release also said the military would investigate human rights abuses committed by members of the leftist Farabundo Marti National Liberation Front, or FMLN.

Jefferson Brown, a U.S. Embassy spokesman, said Aronson would exchange views on ''a few of the major topics of bilateral interest'' with President Alfredo Cristiani, top military commanders and representatives of major political parties.

Investigation of the Nov. 16 slaying by soldiers of six Jesuit priests, their housekeeper and her teenage daughter ''remains an issue of high interest'' for the State Department, Brown said. Another big topic of discussion will be efforts by the Salvadoran government and the FMLN to negotiate an end to a decade of bloody civil war.

More than 72,000 people have been killed in the war and related political violence.

The slayings of Jesuit priests have weighed heavily in the ongoing congressional debate over continued U.S. military aid to El Salvador, and the House of Representatives has already voted to cut next year's military aid by half, from nearly $90 million.

The State Department has asserted that nearly $1 billion in military aid over the course of the decade long war has helped professionalize the Salvadoran military and subjected it to civilian control.

The military ruled El Salvador outright for a half-century ending in the early 1980s. No military officer has ever been convicted of a human rights offense despite assertions by human rights groups that the army is responsible for a majority of such abuses.

Urban commandos of the FMLN contacted the local radio station YSU and claimed responsibility for the death Monday night of an army major who was gunned down on San Salvador's north side. The military also reported that six soldiers were wounded Monday by FMLN explosives, four in the capital and two in Santa Ana, 25 miles west of San Salvador.

The news release claimed that six rebels were wounded in fighting near San Sebastian, 40 miles east of San Salvador in the province of San Vicente.

#90191u2819 07/10/1990 ~United Press International
REX, GA (JULY 10) UPI - A suspect in the bombings that killed a federal judge and civil rights lawyer last December was arrested Tuesday on charges stemming from his 1972 bomb possession conviction.

Walter Leroy Moody Jr. and his wife, Susan, were arrested by federal agents Tuesday evening and taken to Macon, Ga., to face a hearing before a U.S. Magistrate.

The arrests were not related to the bombings that killed U.S. Circuit Court of Appeals Judge Robert S. Vance last December and Savannah, Ga., civil rights attorney Robert Robinson last January.

The Moodys were charged in a 13-count federal indictment with perjury, obstruction of justice, obstruction of a criminal investigation, witness tampering and trying to bribe witnesses in his 1972 conviction of possessing a bomb.

Moody served three years in prison for the 1972 conviction and has filed

repeated appeals in that case, including one that went to the 11th U.S. Circuit Court of Appeals in Atlanta.

Vance, was killed at his home in suburban Birmingham, Ala., last December by a pipe bomb. Several weeks later, Savannah City Councilman Robert Robinson, who also was a civil rights lawyer, was killed by a similar bomb that exploded in his office.

Unexploded bombs also were found during this period at the federal court in Atlanta and the NAACP headquarters in Jacksonville, Fla.

In the massive federal investigation that followed the bombings that killed Vance and Robinson, two suspects came under intense scrutiny: Moody and Robert Wayne O'Ferrell, a junk store owner in Enterprise, Ala.

Despite repeated searches of the suspects homes and businesses, neither has been charged in the December bombings, and both have maintained their innocence.

In the 1972 case, federal prosecutors said Moody planned to send the bomb and an extortion note demanding $65,000 to an Atlanta car dealer who had repossessed his car. The bomb exploded when Moody's wife accidentally opened the package at their home in suburban Macon.

(JULY 10) UPI - A federal appeals court in San Franciso today upheld a nationwide random drug testing program for airline pilots and workers. Judge William Norris of the 9th U-S District Court of Appeals issued the ruling on six consolidated suits. Norris said the Federal Aviation Administration's interest in promoting air safety through the random drug tests outweighed aviation workers' Fourth Amendment right to be free from UNreasonable search and seizure.

About three-thousand people attended today's funeral of Mitch Snyder in Washington. The nation's premier activist for the homeless was found hanged Thursday in what police are calling a suicide. A note indicated Synder took his life over a broken engagement. Mourners ranging from the homeless to celebrities later marched on the District of Columbia City Council to protest plans to gut a landmark 1984 law that guarantees emergency housing for anyone in need.

Jurors were visibly shaken today after being shown a second set of photographs in the trial of three youths accused in the 1989 gang-rape of a female jogger in New York's Central Park. Prosecutors showed the panel three pictures of the woman's bloodied head, nude torso and bruised legs. The photos were taken at the hospital by a detective... hours after the

assault on the 29-year-old Wall Street investment banker, who survived the attack.

Rain in Alaska today helped stop the spread of UNcontrollable wildfires that have charred half-a-Million acres of land in the state's interior. Firefighters are working to complete a 20-mile fireline to protect several towns. About 25-hundred firefighters were battling the blazes, but officials say some crews can now be released because of the help from the rain.

#90191u2873 07/10/1990 ~United Press International

BIRMINGHAM, Ala. (JULY 11) UPI - A federal jury, after several weeks of deliberations, convicted the USX Corp. and two United Steelworkers Union officials Tuesday on conspiracy charges.

USX was accused of conspiring with E.B. Rich, 59, of Birmingham, and Thermon Phillips, 61, of Helena, Ala., to modify pension fund eligibility rules for the two men in exchange for contract concessions at the company's Fairfield Works in 1983.

The jury convicted USX on all 14 counts brought against the company by a federal grand jury late last year.

Rich and Phillips were each convicted of one count of conspiracy. They had been indicted on 12 federal charges, including 10 counts of mail fraud.

Attorneys for USX, Rich and Phillips all declined comment on the verdict, as did the federal prosecutor.

USX faces fines totaling $6.7 million.

The indictments claimed USX changed its pension eligibility rules to include Rich, Phillips and four other Birmingham steelworkers union leaders. The government alleged that Phillips received more than $55,000 in pension benefits and Rich got more than $48,000 between November 1984 and May 1988.

In return for the pension benefits, the government claimed Rich and Phillips approved a contract in 1983 that cut pay for union workers at the Fairfield Works, which manufactures steel pipe.

U.S. Attorney Frank Donaldson of Birmingham said the investigation of the case began in 1988 following a tip from a confidential informant to the Labor Department.

#90191u3004 07/10/1990 ~United Press International
(JULY 10) UPI - Leaders at the Economic Summit agree on aid to the Soviet Union.

Report Neil Bush and other Denver thrift directors will be sued.

A-T-and-T to lay off 34-hundred workers.

U-P-I has this and other top news tonight.

There's an agreement on the issue of immediate Soviet aid among the seven leaders at the Economic Summit of industrialized nations in Houston.

The seven leaders agreed on the framework for coordinated aid to the communist superpower. The U-S-backed plan calls for a thorough study of Soviet need before pushing ahead with any plans on concerted assistance.

The study will be conducted by the International Monetary Fund and the Organization for Economic Cooperation. It is to be completed by the end of the year.

The summit nations also took positive notice of recent changes in China... agreeing to reward China with an easing of the economic sanctions last year against Beijing.

Work continues behind the scenes on pursuing a compromise on farm subsidies to remove a long-standing obstacle to world trade talks.

West German officials say British Prime Minister Thatcher proposed a three-part compromise based on substantial reductions in export subsidies, increased market access and harmonized regulatory systems.

Officials hope to work out compromise language in time for a final communique to be issued at the summit's end tomorrow.

#90191u3010 07/10/1990 ~United Press International
(JULY 10) UPI - A-B-C News reports the federal government plans to file a 200-Million-dollar lawsuit against the son of President Bush and the other directors of a bankrupt savings and loan association.

The suit against Neil Bush and the other former directors of Denver's Silverado Savings and Loan was authorized by the director of the Federal Deposit Insurance Corporation.

The network says the suit will allege Silverado's losses were partly

caused by the negligence of Neil Bush and the other board members. The suit will charge Silverado's board acted irresponsibly by approving dozens of questionable loans... many of which were NOT paid back.

Neil Bush quit the board in the summer of 1988 and the thrift collapsed several months later.

Neil Bush has become a central figure in the collapse of the S-and-L industry, the most expensive financial scandal in U-S history. Silverado's failure alone is expected to cost taxpayers an estimated one-BILLION dollars.

The 35-year-old Bush says the charges against him are political ''opportunism'' and ''press sensationalism.''

#90191u3028 07/10/1990 ~United Press International

LOS ANGELES (JULY 11) UPI - A Tokyo newspaper with the largest circulation in the world and a communications company announced Tuesday that they have started the first pay-per-call service in the United States offering Japanese news in both English and Japanese.

''We think that there is an enormous appetite in this country for news out of Japan, both from Wall Street and the Japanese living here,'' said Charles Denatale, Audio Communications Inc.'s marketing director, at a news conference.

Stories for the service, which came on line Tuesday, are provided by Yomiuri Shimbun, which has daily circulation of more than 14 million. Phone calls to the service are answered by computers at ACI, a Las Vegas, Nev., company that offers 350 other pay-per-call services.

Access to the service, called the Japanese News Hot Line, can be made by calling a 900 number at a charge of $1 per minute for the Japanese version. For the English version, the charge is $2 for the first minute and $1 for each minute after that.

Denatale said the English version costs more because of the costs of translation from Japanese to English.

The service offers headline news, economic news and sports, with each of those features including five different stories. Callers can skip over one story to go to the next.

Each program will be updated at least once a day before the start of the business day on the East Coast.

The service can also be accessed through 800 numbers, with the charge applied to credit cards. That feature is designed to attract use from Japanese tourists in the United States, since hotels usually do not provide 900 service to guests.

Tomanari Doi, executive director of Yomiuri Shimbun, said that the new service comes at a time when Japan is receiving large amounts of news from the United States through Cable News Network and American movies and magazines.

''In other words, Japan is importing much more news about the United States than exporting Japanese news to your country,'' Doi said. ''I hope this service will help Americans get access to Japanese culture and current events as well as helping Japanese tourists, business people and students in the United States to keep up developments in their homeland.''

The companies did not offer any revenue projections for the service or any estimates as to whether the English or Japanese version would be more popular. Denatale said privately held ACI, which says it is the largest pay-per-call provider in the country, will gross as much as $75 million this year from all of its services.

ACI owner James Feist said the news service will help improve the image of the pay-per-call industry, which is perhaps best known for providing sexually-oriented call services.

''We see this service as the tip of the iceberg toward changing the 900 number industry,'' Feist said, adding that ACI is considering offering similar services from news operations in the People's Republic of China, Israel and Eastern Europe.

#90191u3095 07/10/1990 ~United Press International

(JULY 10) UPI - A workforce reduction announced earlier this year by the American Telephone and Telegraph Company will hit its network services division first.

A-T-and-T confirms an earlier report that it plans to eliminate 43-hundred jobs nationwide in the division.

The Communication Workers of America union revealed the cutbacks today after a meeting with A-T-and-T executives in New York. The C-W-A represents 135-thousand workers at the telecommunications giant.

A-T-and-T says the phased-out positions are surpluses in the division. It adds that some of the people laid off will be given the opportunity to retrain and fill 22-hundred openings elsewhere in the company. Those who

are NOT rehired will receive serverance pay.

Company spokesman Thomas Frazee says the cuts are the result of new technology that has reduced the demand for a large workforce.

C-W-A workers picketed in front of the New York Stock Exchange and distributed leaflets criticizing the decision. A-T-and-T stock today closed with a 75-cent loss... down to 37 dollars and 50 cents.

#90191u3098 07/10/1990 ~United Press International

(JULY 10) UPI - Amnesty International says governments world-wide used torture, executions and illegal imprisonments last year to quell nationalist and ethnic tensions.

Amnesty International says tens of thousands of people suffered these human rights abuses... with thousands of them disappearing.

A report by the London-based human rights organization says more than 20 countries severely repressed ethnic and nationalist movements in 1989, including India... Iraq... Israel... Guatemala... Tibet... and Ethiopia.

Amnesty describes the government attempts to crush the movements as- quote- ''gross violations in the name of national security and law enforcement.''

It also says the conflicts escalated as a result of the government efforts.

The group adds that prisoners were tortured or ill-treated in about 100 countries... with deaths due to inhumane prison conditions or ''suspicious'' circumstances occurring in dozens of nations.

-30- 1114

#90191u3099 07/10/1990 ~United Press International

(JULY 10) UPI - The nation's highest-ranking black clergyman in the Roman Catholic Church has resigned... citing ill health and personal reasons.

Archbishop Eugene Marino... who was in charge of the Atlanta archdiocese... spent only two years in the post. The 56-year-old Marino was America's first black Roman Catholic archbishop.

He did NOT attend today's news conference to announce his resignation due to numerous physical ailments and psychological problems.

Marino issued a statement saying Atlanta needs- in his words- ''a shepherd who is physically, spiritually and psychologically healthy.''

The news conference was also used to name Cleveland Auxiliary Bishop James Lyke the apostolic administrator of the Atlanta archdiocese. Lyke will serve until the pope and other church officials choose a new archbishop.

Lyke, who's also an African-American, says there is some logic to him being named Marino's temporary replcement. But he refuses to speculate on whether he will be named the new archbishop.

-30- 1183

#90191u3104 07/10/1990 ~United Press International

(JULY 10) UPI - The California woman who gave birth to the nation's first septuplets agreed to a six-point-two-Million dollar settlement... ending the suit against the fetility clinic that treated her.

Patti Frustaci and her husband, Sam, agreed to the settlement today.

The Tyler Medical Clinic will pay 450-thousand-dollars immediately and will make monthly payments to the three surviving children for the rest of their lives.

On May 21st, 1985, Patti Frustaci became the first American woman to deliver septuplets... four boys and three girls. But one was stillborn and three others died within days. The three surviving babies need medical attention.

Conception occurred after Mrs. Frustaci took a fertility drug. In their suit, the couple accused one of the clinics's owners of NOT properly advising and monitoring Patti Frustaci... or testing for possible multiple births. The Frustacis sued the clinic and an infertility specialist for malpractice and wrongful death.

Outside the Santa Monica courtroom today, the couple's attorney announced Mrs. Frustaci is pregnant again... this time with twins. The twins, both healthy, were conceived after Patti was treated with the same fertility drug she took in 1984. Mrs. Frustaci had one child before the septuplets.

#90191u3105 07/10/1990 ~United Press International

(JULY 10) UPI - A judge in Fort Worth, Texas, has awarded more than 121-thousand-dollars to a mother whose daughter died after receiving a blood transfusion tainted with the AIDS virus.

The girl received transfusions for a liver ailment in February of 1983. And while NO blood test for AIDS was available at the time, the lawsuit alleges hospital employees were negligant in failing to screen a donor who

was an intravenous drug user. The donor later tested positive for the H-I-V virus and Belinda Jackson's daughter died in 1985 at age two.

Jackson's attorney says lawyers had told him any AIDS lawsuit involving a blood transfusion before 1985 could NOT be won. He called the decision ''fantastic.''

-30- 861

#90191u3175 07/10/1990 ~United Press International

(JULY 10) UPI - Treasury Secretary Nicholas Brady reports ''substantial progress'' on phasing out farm subsidies... among the sticky issues facing participants of the Economic Summit. But he says NO ''conclusive language'' had been adopted. Baker says work will continue into the night to find a suitable compromise.

As their aides continued working, the delegation heads attended a formal dinner at the Houston Museum of Fine Arts that was the social capstone of the 16th annual event.

While President Bush played host at the Economic Summit in Houston, Barbara Bush led the spouses of four world leaders on a whirlwind tour of San Antonio. The first lady says she chose San Antonio because she wanted to give her guests a look at- quote- ''the flip side of the coin of Texas.''

Presidential son Neil Bush says he's NOT aware of reported pending legal action against him in connection with the failure of the Silverado Savings and Loan. A report says the federal government plans to sue Bush and other directors of the bankrupt Denver thrift for 200-Million dollars.

The Senate's first action on major civil rights legislation was to extend, for the first time, anti-discrimination laws to cover the chamber's own employees. However, workers would NOT be allowed to take their cases to federal court. Instead, their last resort would be the Senate Ethics Committee and the Senate itself.

The Soviet Communist Party gave Mikhail Gorbachev a new mandate for his reform programs today. By an overwhelming 75-percent margin, delegates to the 28th party congress voted to keep him as general secretary.

The Soviet Congress had been scheduled to conclude tommorrow. But a Pravda newspaper editor told reporters it might reconvene later in the week to approve the new Politburo to be formed by the Central Committee.

-30- 2003

#90191u3186 07/10/1990 ~United Press International

(JULY 10) UPI - In Nicaragua, the death toll in violence stemming from a week-old strike by Sandinista workers climbed to at least five today. Officials attribute the rise to the fact that the strikers and pro-government workers they're fighting with now have guns. The army has joined police in trying to restore calm.

Nairobi, Kenya, was reported quieter today after three days of rioting that began Saturday when a pro-democracy rally turned violent. But police sources say security forces shot and killed four people and wounded 35 others today in street fighting north of the capital.

Italian police arrested an American man today after he splashed red paint on a statue of St. Paul in Rome's St. John Lateran Basilica. Authorities say 57-year-old Thomas Siemer has caused disturbances in the past when he has tried to present peace petitions to Pope John Paul.

A man who said he was a key cocaine supplier for Marion Barry testified for a second day today at the Washington mayor's drug and perjury trial. Hassan Mohammadi told how he and Barry also smoked opium several times.

A judge in Honesdale, Pennsylvania, ruled today a child murderer may starve himself if he wants. The 53-year-old Joseph Kallinger testified he planned NEVER to eat of drink again- quote- ''until I go home to the Lord.'' Kallinger is serving two life terms for the 1974 murders of his son and another boy.

Former President Nixon has scrapped plans to limit access to his presidential library in Yorba Linda, California. Previously, a spokesman had said people like, for example, Bob Woodward... who helped UNearth the Watergate scandal... would NOT be admitted because- quote- ''He is NOT a responsible journalist.''

-30- 1889

#90191u3304 07/10/1990 ~United Press International

(JULY 10) UPI - President Bush and his counterparts from Britain, Canada, France, Italy, Japan and West Germany held two rounds of talks at the Economic Summit in Houston today. As the world leaders headed to a formal dinner, their aids continued to deal with the troublesome issues of helping the Soviet Union, global trade and the environment. Midway through the three-day summit, the world's richest democracies also opened the door to greater economic ties with China. A final communique is to be issued tomorrow.

The Senate today opened heated debate on the first major civil rights bill of the session. Lawmakers agreed about 78-hundred Senate employees should come under federal laws banning job discrimination. But then they refused to give the workers recourse in federal courts. Instead, any senate

employee pressing discrimination claims would go to the Senate Ethics Committee or the full Senate.

Environmentalists charge there's an ulterior motive behind the Energy Department's proposal to restart a plutonium reprocessing facility. The Energy Department says it wants to restart the facility to dispose of spent nuclear fuel at its Hanford plant in Washington state. But the environmentalists say the government actually plans on producing nuclear weapons.

An internal F-D-A report released today found 230 people in the Washington area may have been infected with the AIDS virus through blood donated to the American Red Cross. But the Red Cross immediately responded by saying there is NO proof the infections were necessarily caused by blood transfusions. The study did NOT indicate how recently the Washington-area transfusions in question occurred.

#90192b0006 07/11/1990 ~Business Wire

COLUMBUS, OH (JULY 11) BUSINESS WIRE - The Huntington National Bank is one of the first banks in the United States to implement the SWIFT II program, an international bank telecommunications network that sends messages via personal computer faster and less expensively than Telex.

The Huntington is the only bank in the midwest with the SWIFT II capability.

SWIFT, the Society for Worldwide Interbank Financial Telecommunications, is a cooperative telecommunications network owned by its members and headquartered in Belgium. It provides computer-to-computer communications for its 1,600 member banks in 71 countries. SWIFT dominates international banking communications.

''The SWIFT system works through an interface with personal computers. Messages are transmitted via computer rather than the traditional Telex method. This speeds up the transmission and reduces the cost of the communication,'' said John M. Jourdan, senior vice president and manager of Huntington's International Division.

For three years prior to the introduction of SWIFT II, Huntington personnel participated in the task force developing the new system. The Huntington was then one of a handful of U.S. banks to participate in the test phase of the system.

''SWIFT II can store more data and transmit more messages than the old network,'' Jourdan said. ''The enhancements make the system faster, more secure and more flexible.''

The SWIFT II network is used by The Huntington to transmit approximately 300 incoming and outgoing messages each day. Messages include letters of credit, payment orders to overseas banks for customers who have to pay bills in foreign countries, and statements for foreign banks that maintain accounts with The Huntington.

''We try to use SWIFT II for every overseas transmission,'' Jourdan said. ''It's much cheaper to send a message to France via SWIFT than it is by Telex.''

To maximize efficiency and speed, The Huntington has interfaced the SWIFT II system with its Global Trade Access system. The Global Trade Access (R) system is a dual data base, automated letter of credit system that was conceived and designed by The Huntington.

It allows Huntington customers to use their personal computers to send and receive information on letters of credit internationally. The system is marketed throughout the United States.

The Huntington and 55 other banks worldwide have been testing the new SWIFT II system since January. Only seven U.S. banks participated in the test.

The Huntington National Bank is a subsidiary of Huntington Bancshares Inc. an $11.6 billion regional bank holding company headquartered in Columbus. The company's banking, mortgage, trust and investment banking subsidiaries operate 281 offices in Ohio, Michigan, Kentucky, Indiana, Delaware, Florida, Illinois, Maryland, Massachusetts, New Jersey, Pennsylvania, Rhode Island, Virginia and West Virginia.

#90192b0021 07/11/1990 ~Business Wire

DENVER (JULY 11) BUSINESS WIRE - U.S. Gold Corp. (NASDAQ:USGL) Wednesday announced that it is involved in definitive negotiations with a major mining company for a possible joint venture of the Tonkin Springs Property in Eureka County, Nev.

Should an agreement be reached the transactions would be subject to approval by U.S. Gold's senior secured lender as well as a majority of the subordinated debenture holders. Mining and milling operations at Tonkin Springs have been placed on stand-by status in order to minimize expenses. Continued operations are dependent upon the results of these negotiations.

''While it is premature to discuss the possible terms of a joint venture at Tonkin Springs,'' said William W. Reid, president of U.S. Gold, ''it is likely that such an arrangement would result in U.S. Gold retaining less than a majority of the project which would then be operated by the other mining partner.

''Proprietary technology would be co-owned by the parties. Such a joint venture would provide infusion of necessary funds and additional operating expertise which are critical to bring this mill and new technology to commercial status.''

Tonkin Springs is the first commercial scale mill to be built in North America to incorporate bio-oxidation pre-treatment of refractory gold ores. The mill produced its first gold in March 1990.

U.S. Gold Corp. is a Denver-based gold mining company with producing mines in Nevada and gold properties in other western states. The company is listed on the NASDAQ National Market.

PLEASANTON, CA (JUNE 11) BUSINESS WIRE - Mission-Valley Bancorp (NASDAQ/NMS:MVBC) holding company for Commercial Bank of Fremont, The Bank of Pleasanton, The Bank of San Ramon Valley, Lamorinda National Bank, The Bank of Milpitas, N.A. and Concord Commercial Bank Wednesday announced its second quarter financial results.

Both net income and total assets set new records.

Mission-Valley Bancorp had net income of $1,245,000, or 35 cents per share for the second quarter of 1990, compared to $1,141,000, or 32 cents per share, for the like period last year, an increase of 9 percent.

Net income for the first half of 1990 was $2,360,000, or 66 cents per share, an increase of 13 percent over 1989 first half net income of $2,083,000, or 64 cents per share.

Total assets reached $388 million at June 30, 1990, compared to $311 million at June 30, 1989, an increase of 25 percent. Total loans at June 30, 1990, were $292 million and total deposits were $350 million.

The quality of the loan portfolio continues to be excellent with only .12 percent of total loans rated as non-performing at June 30, 1990, compared to .64 percent as of June 30, 1989.

An increase of 25 percent in the annual cash dividend was announced at the Shareholders Meeting on May 9, resulting in a new rate of 20 cents per share. The first semi-annual payment of 10 cents per share was paid on July 3 for shareholders of record as of June 13.

#90192b0049 07/11/1990 ~Business Wire
MESA, AZ (JULY 11) BUSINESS WIRE - The American Legion, the nation's largest organization of American wartime veterans, has added the Eye Care Plan of America to its roster of benefits for the organization's 3 million members and their families.

Eye Care Plan of America, a discount vision wear plan, is marketed and administered by First American Health Concepts Inc. (NASDAQ:FAHC). The Mesa firm is the oldest and largest discount vision care company in the country.

Terms of the agreement between the Indianapolis-based American Legion and FAHC were not disclosed. The contract will take effect immediately.

According to FAHC chairman and chief executive officer J. Kent Massey, the American Legion members and their families will almost double the number of people served by FAHC vision care plans, bringing the total to more than 6 million.

''Including family members, over 14 million people now have access to our nationwide network of 4,500 licensed opticians, optometrists and ophthalmologists,'' Massey said.

Members may use their Eye Care Plan of America cards, or in the case of the Legionnaires, their American Legion membership cards, to purchase eyewear at substantial reductions from retail prices.

''This newest addition to our family benefit plan is a direct response to feedback from our members,'' said Miles S. Epling, national commander of the American Legion. ''Most Legionnaires wear glasses and the Eye Care Plan of America will cut the cost of their eyewear between 20 and 60 percent. We think Legion members also will appreciate the fact, that with ECPA, there are no claim forms or paperwork.''

Eighty-five percent of the U.S. population is within 20 minutes of one of FAHC's providers. ECPA members use a toll-free number to locate the providers nearest them. Most Sears, Montgomery Wards, J.C. Penney,

Dillards and Royal optical shops, along with more than 2,500 independent outlets, make the FAHC provider network the largest in the nation. Massey said, ''It's difficult to state the exact impact on revenues FAHC will realize from the addition of the American Legion, but significant growth is anticipated.''

FAHC, recently named by Inc. magazine as one of the nation's 100 fastest growing small public companies, continues to report strong cash flow with no long-term debt and total assets of $2.4 million.

Sponsors of Eye Care Plan of America include insurance companies, financial institutions, corporate employers and civic and financial organizations. Last year, the company also added the Veterans of Foreign Wars to its list of sponsors.

#90192b0057 07/11/1990 ~Business Wire

DENVER (JULY 11) BUSINESS WIRE - Gordon E. Beckstead, president of HYTK Industries Inc. announced Wednesday that HYTK will acquire 100 percent of the outstanding stock of Cactus Club USA Inc.

Cactus Club is a manufacturer of better men's sportswear that includes shirts, sweaters, boxer shorts and caps. Cactus Club shirts are sold throughout the United States and in Europe, Japan and Australia. The shirts have been worn on TV shows such as ''The Bill Cosby Show'' and ''Days of Our Lives,'' in the movie ''Do the Right Thing,'' and by Kevin Seal on MTV.

Cactus Club was started by Jerry and Susie Brownstein. Susie will remain with the company as the designer and Jerry will continue to consult and work with the company. The Brownsteins bring a combined 40 years of experience in the garment industry to Cactus Club and will remain a valuable part of its future growth.

Douglas K. Baker, a director of HYTK has agreed to take charge of the Cactus Club operation. Baker, 56, earlier in his career, had many years of experience selling and installing systems in the garment industry. He has over 25 years experience in both starting and managing large computer companies.

He was first recognized in 1970 as founder-chief executive officer of MAI Basic Four Co., the first company to develop multi-user business application software. Basic Four has become a major mini-computer and software company with sales of approximately US $400 million.

Following Basic Four, Baker joined Qantel as chief executive officer, where he recognized the market need and introduced Manufacturing Resource Planning (MRP) software. This accomplishment led to the rise of the MRP product sales to third highest industry-wide, second only to giants IBM and Hewlett-Packard. At the same time, Baker spearheaded a national and international sales distribution network.

Under Baker's direction (1973-1983), Qantel sales mushroomed from $1.5 million to $150 million, with 1,200 employees worldwide. Among his most recent achievements is the development of the first credit card-operated computerized video rental system. He established international markets and has contacts in some 33 countries including Japan, Europe, Australia and the Far East.

The company is very fortunate to have a person of Baker's experience in national and international sales with experience in both the computer and garment industries to head up Cactus Club.

Baker will be supported by the Brownsteins and Elaine L. Longa. Longa, a graduate of the Fashion Institute of Design and Merchandising, brings some eight years of experience in the garment industry. She will serve as assistant manager of operations. She recently held the position of assistant designer and merchandiser at Koala Blue Inc., a $16 million garment manufacturing company.

#90192b0090 07/11/1990 ~Business Wire

NEW YORK (JULY 11) BUSINESS WIRE - Marc Haas, philatelist, investor, antiquarian, Knight of the Order of St. John of Jerusalem, died in Burgenstock, Switzerland, on July 8, 1990, at the age of 82.

Haas was founder, president and a substantial stockholder of American Diversified Enterprises Inc., a private venture capital company. During Haas' presidency, the company, which began in 1955 with a modest loan, became the largest street transportation company in the United States, and commencing in 1965, diversified into numerous other investment areas and is now reputed to have a net worth in excess of $100 million.

During World War II, he served as a dollar-a-year man in the Office of Defense Transportation.

His extraordinary collection of early American covers (stamped, post-marked envelopes) was sold in 1979 for a record $11 million. In 1990 he was elected an Emeritus Trustee of The Philatelic Foundation.

He was Knight of the Order of St. John of Jerusalem, an English order similar to the Knights of Malta, headed by the Queen of England. He was a vestryman of St. Bartholomew's Church for over 25 years, for eight of which he was senior warden. He has been honorary senior warden for the last ten years.

Haas was an outstanding collector of antique furniture, china, silver and other objets d'art.

He is survived by his wife of over 43 years, Helen Hotze Haas, who suggests that memorial contributions may be made to New York Hospital-Cornell Medical Center.

Funeral services will be held at St. Bartholomew's Church, 109 E. 50th Street, New York, N.Y., at 11 a.m. on Monday, July 15, 1990. Interment will be private.

#90192b0096 07/11/1990 ~Business Wire
LOS ANGELES (JULY 11) BUSINESS WIRE - Teledyne Inc. reported Wednesday that income of continuing operations was $26.6 million or 48 cents per share, for the three months ended June 30, 1990, compared to $32.8 million or 59 cents per share, for the same period in 1989.

Operating profit in 1990 decreased from last year's second quarter in all segments except the consumer segment. Sales were $882.1 million for the second quarter of 1990, compared to $907.7 million for the second quarter of 1989. Sales for the second quarter of 1990 decreased from the same period of the prior year in the specialty metals and industrial segments.

Income of continuing operations for the six months ended June 30, 1990, was $59.3 million, or $1.07 per share, compared to $68 million, or $1.22 per share, for the same period in 1989. Sales were $1.72 billion for the six months ended June 30, 1990 compared to $1.77 billion for the same period in 1989.

Income of continuing operations for the six months ended June 30, 1990, includes a reversal of $7.7 million provision for income taxes which is no longer necessary as a result of the spin-off of Teledyne's insurance and finance subsidiaries at March 31, 1990.

Teledyne's former insurance and finance subsidiaries were presented as discontinued operations in the first quarter report.

Net income for the second quarter of 1990 was $26.6 million, or 48 cents per share, and does not include any amount for discontinued operations. Net income for the same period of 1989 was $46.8 million, or 85 cents per share, including $14.0 million for income of discontinued operations.

Net income for the six months ended June 30, 1990, was $84.9 million, or $1.53 per share, including $25.6 million of income of discontinued operations reported in the first quarter. Net income for the six month period of 1989 was $117.3 million, or $2.11 per share, including $49.3 million of income of discontinued operations.

A cash dividend for the quarter ended June 30, 1990, of 20 cents per share was paid on May 22, 1990, to shareholders of record May 7, 1990.

#90192b0098 07/11/1990 ~Business Wire
MOBILE, AL (JULY 11) BUSINESS WIRE - QMS Inc. (NYSE:AQM) the world's largest independent supplier of laser printers, has introduced the first

printer to incorporate artificial intelligence (AI).

The QMS-PS 410, a revolutionary, low-cost laser printer with broad market appeal to small workgroup and single computer users, uses AI and other technological innovations to make the printer more user-friendly and easily adaptable to a wide range of host computers and software applications.

List priced at $2,795, the printer also offers a high-performance feature set that is significantly more sophisticated and powerful than laser printers currently sold at much higher prices.

The 4-page-per-minute QMS-PS 410 printer is QMS's entrant into the burgeoning $1 billion ''personal laser printer'' market. Other major players in this field include Hewlett-Packard and Apple Computer.

The PS 410 features true Adobe PostScript, the powerful industry-standard text and graphics printer language. The printer also supports the vast number of software applications which use the Hewlett-Packard Printer Control Language (HP PCL) and HP GL (optional).

At the heart of the PS 410 is a multi-processor architecture featuring a Motorola 68020 microprocessor running at a 16.67 MHz ''clockspeed.'' Most laser printer controllers use the earlier generation Motorola 68000 microprocessor running at 12 MHz, which is at least three times slower in printing a document.

The PS 410 also uses state-of-the-art ''surface mounting technology'' (SMT) to achieve maximum density of its electronic components. This enables a compact design which fits easily on a desktop.

For maximum graphics design and document flexibility, the printer features 45 Adobe Type 1 scalable, rotatable fonts rather than the typical 35 or 39 found in other PostScript printers.

The performance improvements and extensive printer language and font support found in the QMS-PS 410 are designed to bring the power of PostScript and desktop publishing to the majority of computer users, such as secretaries and single PC users, who have traditionally settled for simple word processing output.

The printer also makes use of the latest in rasterizing technology from Adobe Systems. Adobe Type Manager (ATM) is resident in the printer, allowing the printer to scale and rotate fonts much faster than printers not using this technology. As in the use of the 68020 MPU, this results in faster printing speeds which are essential for the sophisticated, powerful PostScript printing language.

BOULDER, CO (JULY 11) BUSINESS WIRE - Sunbelt Media Group Inc. Wednesday announced that Montgomery, Ala., residents began watching UHF-TV channel 39 on Friday, June 2.

Viewer response to Sunbelt's ''Video Jukebox Network'' pay per view programming was immediate and enthusiastic, according to Todd Harvey, Sunbelt's operations manager.

Harvey made a thorough survey of the stations coverage, and determined that the TV station exceeded predicted coverage in all areas.

Bill Kitchen, Sunbelt and The Toen Group Inc.'s chief executive officer, announced that the financial performance for the station was already excellent.

''We are delighted to announce that our first TV station in Montgomery has made a profit during the first full week of operation,'' Kitchen said. ''Paid calls to the station have averaged over 280 calls per day, and have been as high as 380 daily calls. All indications are that the revenue of the station will be excellent, and the operation will be profitable.''

Sunbelt has entered into firm agreements for the purchase or lease/purchase of additional stations in Knoxville, Tenn.; Boulder; Vero Beach, Fla.; Columbus, Ohio; and others.

The Knoxville station should begin operation on July 30, with additional TV station startups occuring approximately one per month.

REDMOND, WA (JUNE 11) BUSINESS WIRE - Microsoft Wednesday announced that it plans to open an East Coast Product Support Services site this fall.

The new site will be located in Charlotte, N.C. It will supplement technical assistance services now offered out of the company's Lincoln Plaza facility in Bellevue, Wash. The staff members at that site currently handle more than 8,000 calls a day from customers who have questions about Microsoft products.

''Microsoft considers customer support to be of paramount importance,'' said Joachim Kempin, vice president of OEM and Product Support Services at Microsoft Corp. ''By adding the Charlotte facility, we will improve the level of support for our East Coast customers.''

The Childress Klein Properties' LakePointe Office Park in Charlotte was chosen after a search team investigated every major city on the East Coast. Among the reasons Microsoft selected Charlotte were its competitive real estate market, large student population (from which Microsoft expects to recruit staff), state-funded training program, and high quality of life.

Microsoft expects the Charlotte site to receive at least 1,500 calls a day initially. The staffing level is expected to grow to 150 or more within the facility's first year of operation. Persons interested in applying for a position should send a resume to: Microsoft, One Microsoft Way, Redmond, WA 98052-6399, Attention: Human Resources, Charlotte.

In addition to providing free technical assistance to end users, Product Support Services also offers two subscription technical assistance programs: Online and Online Plus. These programs, aimed at software developers and corporate information centers, offer in-depth information and quick response times for complex questions. Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems, languages and application programs, as well as books, CD-ROM products and hardware for the microcomputer marketplace.

SEATTLE (JULY 11) BUSINESS WIRE - Syufy Enterprises of San Francisco and Celerex Corp. announce the acceptance of MasterCard and VISA credit cards at the Century Park 12 Theatre in Redwood City, Calif.

According to Ray Babcock, Controller and M.I.S. Director at Syufy: ''We decided to offer credit cards because it is a unique convenience we can provide our customers. We anticipate that it will not only offer enhanced service in terms of alternate payment choices for our customers, but in addition, if the customer is not limited to cash on hand, then we hope to realize additional sales.'' Babcock added, ''The reason we selected the Celerex System was because of its speed and ease of use for our customers and employees.''

The Celerex System is operated by simply passing a credit card through the terminal reader and keying in the amount. Instead of dialing out for verification, as most conventional terminals do (a process which has proven to be too slow at theatres), the Celerex System instantly verifies the credit card against on-site bad account stop files for MasterCard and VISA. A response is given instantly and the transaction is stored. The clerk tears off a printed receipt and hands it to the customer. A standard carbon draft or customer signature is not required for low dollar amount transactions.

The Celerex terminals are located at each ticket window and at the two cash registers located at the ends of the V-shaped cafeteria style concession lanes. In addition, a terminal is located in the manager's office which is used for generating detailed and summary management reports on credit card usage. Syufy operates 45 walk-in and 18 drive-in theatres in California, Arizona, Nevada, New Mexico, and Utah.

Designed for the high volume, low dollar ticket business the Celerex System allows these traditionally ''cash only'' businesses such as fast food, parking lots, and now theaters, to accept credit cards and checks more quickly than they are able to accept cash, providing enhanced service and convenience to the consumer.

For more information on the Celerex System, contact Celerex Corp., 1370 Stewart Street, Seattle, Wash., 98109, telephone 206/623-0225, or toll free 800/543-1615.

SEATTLE (JULY 11) BUSINESS WIRE - Alaska Airlines on Tuesday applied to the U.S. Department of Transportation for authority to provide service between San Diego and Los Cabos, Mexico, and between Los Angeles and Mazatlan and Puerto Vallarta, Mexico.

If approved, the carrier expects to begin service in October or November using Boeing 727-200 aircraft.

The San-Diego-Los Cabos service will feature one daily nonstop round trip. Alaska will offer one daily round trip flight on the Los Angeles-Mazatlan-Puerto Vallarta route, with nonstop and one-stop segments alternating between the Mexican cities.

The routes will be in addition to the Los Angeles-Los Cabos, San Francisco-Mazatlan and San Francisco-Puerto Vallarta service Alaska now offers.

Application for the additional routes comes a week after the Seattle-based airline applied for San Francisco-Los Cabos and Los Angeles-Guadalajara

route authority. An October 1 start date is planned on these routes.

Alaska Airlines serves 36 cities in Alaska, Mexico and five Western states. Service to Mexico was inaugurated in late 1988.

SAN JOSE, CA (JULY 11) BUSINESS WIRE - General Service Administration (GSA) approval was recently awarded to TeleVideo Systems Inc. (OTC:TELV).

The GSA approval marks the company's expanding focus on sales in the government arena. Earlier this year, Jimi Harris, a specialist in government sales, a position created to assist in the acquisition and servicing of government contracts.

''We are quite pleased to have been awarded GSA approval and minority status,'' said Dr. K. Philip Hwang, TeleVideo's chairman and chief executive officer. ''We believe that despite recent defense budget cuts, the federal government remains a strong market for high-performance computers and computer enhancement products.''

The approval, already in effect, permits TeleVideo to begin bidding on contracts and taking government orders immediately. The TeleVideo GSA schedule contract number is GS00K90AGS5200.

TeleVideo Systems Inc. is a leading supplier of industry-standard, high-performance LAN file servers and workstation products, low-cost video display terminals and computer enhancement products.

LOS GATOS, CA (JULY 11) BUSINESS WIRE - Caere Corp. (NASDAQ:CAER) announced 1990 second quarter net revenues of $6,835,000, up 40 percent from second quarter 1989 revenues of $4,898,000.

Net income was $1,399,000 (27 cents per share), an increase of 102 percent compared to $691,000 (20 cents per share) in the second quarter of 1989.

Net revenues increased 46 percent to $13,050,000 for the six months ended June 30 from $8,931,000 in the comparable 1989 period. Net income increased 162 percent to $2,727,000 (52 cents per share) from $1,039,000 (30 cents per share) for the like period in 1989.

These increases resulted from sales of the company's OmniPage family of products.

OmniPage sales were $4,353,000 for the second quarter of 1990 compared to $1,970,000 for the second quarter of 1989. Net sales for the OCR/bar code products were $2,482,000 for the second quarter of 1990 compared to $2,928,000 for the comparable quarter in 1989.

Caere designs, develops, manufactures and markets information recognition software and systems products that provide a low cost, accurate means of converting text, numeric, and bar code data into computer usable form.

SAN FRANCISCO (JULY 11) BUSINESS WIRE - The Pacific Bank (NASDAQ:PBSF) has reported record half-year earnings of $5,044,000, or $1.30 a share, for the six months ended June 30, a 47 percent increase over net income of $3,433,000, or $1.15 a share, for the first half of 1989.

Norman C. Eckersley, chairman and chief executive officer, said assets at June 30 this year reached another record high of $786,509,000, up 27 percent from the year earlier. Also in the first half of 1990, loans grew 28 percent to $570,847,000, and deposits were up 25 percent over last year to $694,152,000.

For the second quarter of 1990, the bank also had record earnings of $3,038,000, or 78 cents a share, a 60 percent increase over net of $1,895,000, or 56 cents a share, for the three months ended June 30, 1989. This included a second quarter non-recurring gain on the sale of a collateralized mortgage bond which was purchased originally as an interest rate hedge, and has since been replaced by other hedging instruments. Per share earnings comparisons reflect the full additional 930,000 shares of common stock issued during 1989.

In a recent study, The Findley Reports, a publication of a leading independent bank analyst, awarded The Pacific Bank its highest rating, Super Premier-A Quality, for the bank's financial performance in 1989. The bank has four offices in the San Francisco financial district, and offices in Hong Kong, Tokyo and the Cayman Islands.

#90192b0218 07/11/1990 ~Business Wire

HILLSBORO, OR (JULY 11) BUSINESS WIRE - Lattice Semiconductor Corp. (NASDAQ: LSCC) today announced record revenue and net income for the first fiscal quarter ended June 30, 1990.

Revenue for the quarter was $16.6 million, an increase of 134 percent over the same period a year ago, and up 27 percent over the fourth quarter of fiscal 1990 revenue of $13.1 million.

Pretax income for the quarter jumped to $4.1 million (25 percent of revenue) from $0.9 million (13 percent of revenue) a year ago. This represents a 41 percent increase over the $2.9 million (22 percent of revenue) posted in the March 1990 quarter.

During the fiscal year ended March 1990, income taxes were nominal due to operating loss carryforwards. Under provisions of the Internal Revenue Code of 1986, as a result of the company's initial public offering in November 1989, the use of these carryforwards is now limited and as a result the company is now recording a provision for income taxes.

Net income for the quarter was a record $2.9 million, a 221 percent increase over the $0.9 million posted in the same period last year. This is a 9 percent increase over the results reported for the fourth fiscal quarter. Earnings per share for the first fiscal quarter were $0.28 vs. $0.12 a year ago, and $0.26 in the prior quarter.

Lattice Semiconductor Corp., based in Hillsboro, designs, develops and markets high speed E2CMOS programmable logic devices (PLDs). The company's proprietary PLDs, known as Generic Array Logic (GAL) devices, provide electronic systems companies with quickly designed and easily configured components. PLDs shorten design cycles and reduce development costs by allowing the customer to quickly and efficiently incorporate different logic functions on a single device. Products are sold worldwide through an extensive network of independent sales representatives and distributors, primarily to OEM customers in the fields of microcomputers, graphic systems, workstations, computer peripherals, telecommunications and industrial controls.

The company completed its initial public offering of common stock in November 1989 and in June 1990 filed a registration statement with the Securities and Exchange Commission relating to a proposed public offering of 2.5 million shares of common stock. Of the shares being offered, approximately 1.5 million shares are to be sold by the company. Company headquarters are located at 5555 N.E. Moore Court, Hillsboro, Ore., 97124-6421, U.S.A.; telephone, 503/681-0118; fax 503/681-0347; TELEX 277338 LSC UR.

CHICAGO (JULY 11) BUSINESS WIRE - Altheimer & Gray Wednesday announced the opening of an office in Warsaw, Poland, marking the first entry into that country by a U.S. law firm.

Attorneys in the Chicago-based firm have represented clients in Poland for over 15 years. This work has recently intensified to the point where a full-time, permanent presence is necessary, said Louis B. Goldman, co-chairman of the firm's international practice group. He and group members James E. Carroll and Victor A. Pollak are overseeing the establishment of the Warsaw office.

A 75-year-old firm that is the 15th largest in Chicago, Altheimer & Gray is currently working in Poland on behalf of clients involved in manufacturing, real estate investment and development, construction and hotels. It expects most of its client base there will be made up of U.S. and other non-Polish companies in these areas and in joint ventures, acquisitions, architecture, engineering, agribusiness and telecommunications.

The office will open as soon as approval is received from the Polish government, possibly as early as this month. It will be staffed by both Polish and U.S.-based Altheimer & Gray attorneys. The firm is negotiating with a prominent member of the Polish bar to head the office.

The Polish government welcomes the kinds of basic industry investments that will encourage manufacturing locally, said James Carroll. This policy has caused an urgent need for modern manufacturing plants and office space, creating opportunities for investors, developers and architects. As privatization takes hold, this need will intensify along with a related increased demand for quality hotels and housing, he said.

Chicago-based architectural and engineering firm A. Epstein and Sons International Inc. has been operating in Poland and other Eastern European countries since the early 1970s. A client of Altheimer & Gray, Epstein has been urging the firm to open an office in the Eastern Bloc for some time.

Founded in 1915, Altheimer & Gray has doubled in size in the past six years, growing to nearly 200 attorneys serving more than a thousand publicly and privately owned companies.

#90192b0618 07/11/1990 ~Business Wire

SUNNYVALE, CA (JULY 11) BUSINESS WIRE - DAVID Systems Wednesday continued its price leadership in the 10BASE-T market by announcing a series of 10BASE-T Network Adapter Kits (the Intelligent Concentrator Kit, the DAVID ExpressNet Kit, and a VolksNet Kit) as well as two new Ethernet 10BASE-T adapters: the DAVID Ether-T PC/AT, designed for use in any 8 or 16 bit bus IBM PC or compatible personal computer, which includes the IBM PC, XT, AT, PS/2 Model 30-286 or compatibles, 80386 and 80486, and the DAVID Ether-T MC, for use in IBM PS/2 and compatible personal computers using the Micro Channel architecture.

The introduction of these kits and adapters furthers DAVID System's price leadership in 10BASE-T Ethernet providing the lowest end-to-end per port cost in the industry, continuing the leadership set with the introduction of VolksNet, the first 10BASE-T Hub available at less than $100 per port.

The Intelligent Concentrator Kit provides expansion capability for DAVID's Intelligent Concentrator in quantities of either 6 or 12 ports and includes a Twisted Pair module and either 6 or 12 Ether-T PC/AT Adapters at prices of $3,650 (6 port kit) and $5,000 (12 port kit). These prices

result in a $417 cost for a complete end to end connection.

The VolksNet Kit provides a complete 10BASE-T Lan for only $375 for a complete end-to-end connection. There are two VolksNet kit configurations available: a VolksNet Hub plus 4 Ether-T PC/AT Adapters at $2,499 or a VolksNet Hub plus 12 Ether-T PC/AT Adapters at $4,499.

Finally, the DAVID ExpressNet Kit provides a full 10BASE-T LAN with full Network Management and comes in two configurations as well; an ExpressNet Hub plus either 4 Ether-T PC/AT Adapters ($3,795) or 12 Ether-T PC/AT Adapters ($5,795). This results in a cost of $483 per port for a complete connection.

The introduction of the DAVID Ether-T PC/AT Adapter means increased flexibility for users employing 10BASE-T Ethernet in that users no longer have to purchase and stock two types of adapters, one for the PC and one for the AT. Only one adapter type is required to interface 10BASE-T Ethernet into any 8 or 16 bit bus.

And DAVID Systems has priced the new adapter at PC adapter pricing with a suggested list price of $350. This includes the Adapter, a 5.25'' driver diskette with drivers for NetWare 2.15c and installation manual. Adapter pricing is as low as $275 a card when ordered as part of one of DAVID Systems' 10BASE-T Network Adapter Kits.

The adapter is software configurable for most options, including interrupt level, DMA channel number, and the 8/16 bit mode, with hardware jumpers required only for unusual conditions. Installers can make one software configuration file to install many adapters in the same environment instead of having to physically adjust hardware jumper configurations for each of many boards.

The adapter also reads whether it is installed in an 8 or 16 bit slot which allows the software to select the bus size. Superior performance is achieved through efficient driver performance and the utilization of 64kb RAM memory on board the adapter.

The Ether-T MC adapter allows users of Micro Channel Architecture computers to take advantage of networking with unshielded twisted pair wiring offered by the 10BASE-T standard. The Ether-T MC adapter provides four LED indicators (Link, Transmit, Receive, and Jabber) to make installations easier and minimize workstation downtime by identifying problem areas in workstation configurations.

The Ether-T MC also contains 64kb on-board RAM memory providing improved performance. The suggested list price for the Ether-T MC is $460.

The Ether-T PC/AT and the Ether-T MC are the two newest DAVID Ether-T

Adapters, a family of Ethernet 10BASE-T adapter boards for IBM personal computers and compatibles that establish local area network connections using ordinary telephone wire. The adapters meet the standard Ethernet IEEE 802.3 10BASE-T specification and operate with the full range of DAVID 10BASE-T featured products.

The DAVID LAN product family includes the DAVID ExpressNet 10BASE-T Hub, Intelligent Concentrators (48 and 132 port), the DAVID ExpressView network management system, the recently announced VolksNet 10BASE-T Ethernet LAN for small network configurations, and the DAVID Ether-T Adapters for IBM personal computers and compatibles. DAVID Systems currently has over 100,000 ports of Ethernet installed worldwide.

With the DAVID LAN product family comes the industry's most knowledgeable support group. For years DAVID technicians have supported the installation of complex voice/data/LAN networks through both call-in support and field service support.

Formed to enhance the role of integrated digital communications, DAVID Systems supplied its first Ethernet LAN products in 1985. As a technical leader in its field, DAVID holds six communications patents and is an active participant in the IEEE802.3 10BASE-T Consortium at the University of New Hampshire.

DAVID Systems products emphasize integrated solutions for LANs, voice and data which are easy to expand and adapt to changing customer needs.

SANTA CLARA, CA (JULY 11) BUSINESS WIRE - Inmac Corp. (NASDAQ:INMC), the world's leading catalog marketer of computer supplies, accessories and data communications products, Wednesday announced its intention to downsize its U.S. manufacturing operations.

The decision will result in the elimination of 73 jobs at the company's San Jose, Calif., manufacturing facility.

Ken Eldred, Inmac's president and chief executive officer, stated: ''We made the decision to alternatively source certain of our data communications products because investigations have shown that our other manufacturing and assembly operations plus outside vendors are now able to supply us with products up to the quality level that Inmac customers have come to expect.

''We expect that this move will not only enable us to keep our costs in line but also to improve our service level.''

Eldred continued: ''Inmac began manufacturing in 1976 in order to introduce products that were not readily available from others and to guarantee that goods were made to a higher standard of quality. We will continue to operate our Scottish data communications plant and our Mexican cable assembly facility.

''Expansions into these highly successful operations further reduced our dependence on the San Jose plant. We are retaining a staff of engineers and quality assurance people to continue our extensive product testing and evaluation efforts.''

The company offers over 4,000 products in its catalogs, virtually all of which carry the Inmac brand name and are manufactured by the company or manufactured by others to Inmac's specifications.

Inmac also announced the recent reorganization of its North American marketing group which resulted in the elimination of three vice presidential level positions.

Said Eldred: ''These moves are part of Inmac's continuing program to reduce costs and improve service. We are striving to respond better to our customers needs by putting more marketing strength close to the customers.''

Inmac employs 1,400 people in nine countries. Nearly half of these employees are U.S.-based. The company estimates that the downsizing and restructuring will result in an approximate $500,000, or 3 cents per share charge to its fourth quarter operating results to cover severance related costs.

SAN JOSE, CA (JULY 11) BUSINESS WIRE - International CMOS Technology Inc. announced Wednesday that Bob Lewis will be the North Central Regional Manager responsible for all 14 central states.

He will be located in ICT's Chicago office.

Lewis' primary responsibilities will be managing sales representatives and distributors, locating new business, and improving relationships with ICT's existing customers. He will report directly to Ernie Abeytia, director of distribution sales/western area sales manager.

''Bob joins ICT with a variety of management experience in sales and engineering. His previous employment experience includes Linear Technology, Precision Monolithics, Display Graphics and Tektronix. With this type of background we are happy to welcome him to the ICT family and feel confident that he will do a great job,'' stated Ernie Abeytia.

International CMOS Technology Inc. (ICT) designs, manufactures and markets user programmable integrated circuits. ICT's products include a variety of memory and logic devices, and the development tools for designing with user programmable products. ICT is publicly owned and traded over the counter (pink sheets).

LOS ANGELES (JULY 11) BUSINESS WIRE - Utilitech Inc. (NASDAQ:UTLL), has acquired Siemens Metal Fabrication Division, El Paso, Texas, from Siemens Communications Systems Inc., in an asset purchase valued at $1 million and has merged it into a newly formed subsidiary, Quality Metal Industries Inc., according to Nathan Hevrony, Utilitech chairman and chief executive officer.

The former Siemens division is engaged in the manufacture of fabricated metal and sheet metal parts, enclosures, equipment shelves and cabinets for the telecommunications industry. The acquisition includes an exclusive, three-year supply contract valued at approximately $10.5 million.

The new entity is now an 80 percent subsidiary of Utilitech's UMD subsidiary (Utility Marketing and Development Corp.), which provides products and services to the telecommunications industry. First-year sales for the new company are projected at $5 million.

Hevrony said, ''The acquisition enhances UMD's position in the telecommunications industry, as well as providing manufacturing capabilities for the company's light fixtures and related components operations.''

Utilitech manufactures and markets a variety of products for comsumer and industrial markets, including Con-Tacts paper and other pressure-sensitive papers, plastics and lighting fixtures. The company also serves the telecommunications industry with products and services.

LOS ANGELES (JULY 11) BUSINESS WIRE - Paul M. Harris, chairman of the board of Guardian Bancorp (ASE:GB) announced Wednesday that the company reported net earnings of $1,932,433, or 52 cents per share, an increase of 54 percent over the $1,255,950, or 38 cents per share, reported for the second quarter of 1989.

The 1989 per share amount reflects the three-for-two stock split in May 1989.

Total assets increased to $459,773,952 at June 30, 1990, compared with $419,783,665 at December 31, 1989, an increase of 10 percent. Total loans were $292,234,468, compared with $249,055,665 at Dec. 31, 1989, an increase of 17 percent. Book value per share was $10.75 at June 30, 1990 compared with $8.83 at Dec. 31, 1989.

Guardian Bancorp is the holding company for Guardian Bank, which has its head office at 800 S. Figueroa St., Los Angeles, Calif.

The consolidated results of operations for the second quarter of 1990 follows.

OSHKOSH, WI (JULY 11) BUSINESS WIRE - Oshkosh Truck Corp. (NASCAQ:OTRKB) has been selected as the producer of the U.S. Army's new generation heavy duty transport truck, called the Palletized Load System (PLS) vehicle.

The contract, which is expected to be signed within 30 days, calls for a total of approximately 2,700 trucks and associated equipment for a value in excess of one billion dollars. The contract contains an option for the purchase of additional units. Production is scheduled to begin during July, 1991, and end during May, 1995.

The prime mission for this 500 horsepower, five axle, ten wheel drive truck is the transporting of ammunition and other heavy cargo on pallets that can be automatically loaded and unloaded off the back of the truck. The cost-saving PLS system permits the Army to maximize cargo movement while minimizing the number of vehicles and personnel.

HOUSTON (JULY 11) BUSINESS WIRE - Sanifill Inc. (AMEX:FIL) has entered into letters of intent to acquire three nonhazardous disposal sites.

Two of the acquisitions are construction and demolition waste sites of which one is a new permit. The third acquisition is a special waste site permitted to dispose of nonhazardous oilfield waste.

For the year ended Dec. 31, 1989, the two operating companies reported unaudited combined revenues of approximately $7 million and unaudited income before taxes of approximately $2.2 million prior to a write off of approximately $1.8 million for discontinued operations.

Consideration will consist of Sanifill common stock and cash. The closings of the acquisitions are expected to occur on or before Sept. 30 and are subject to the performance of due diligence procedures by the parties and the negotiation of final acquisition agreements.

Sanifill Inc., headquartered in Houston, is an environmental services company specializing in nonhazardous solid waste disposal.

ONTARIO, CA (JULY 11) BUSINESS WIRE - Convenient Transaction Service operators of the Money Quik network Wednesday announced that they selected NCR to provide ATMs for a number of Money Quik's off-site retail locations on the West Coast.

The contract with Money Quik for 180 NCR 5070 interior ATMs is valued at $5 million in ATMs and service over the next five years.

The sites include 7-Eleven convenience stores, Sears and Target stores in Los Angeles and San Diego. In addition, NCR ATM machines will be installed by Money Quik in Las Vegas. The total number of Money Quik ATM sites by the end of the summer will be 630.

According to Warren Anderson, chairman and chief executive officer of Money Quik, ''We selected the NCR 5070 because its design flexibility and service allows for easy placement in off-premise locations. With its electronic journaling, dip card reader (magnetic card reader) and enhanced graphics, the NCR 5070 provides our customers with superior functionality, ease-of-use and reliability.''

He added that NCR's nationwide service capability will be an asset to Money Quik's expansion plans.

''With Money Quik's strong presence in California, this is a significant contract win for NCR. We are pleased to be a partner with Money Quik, and it is another example of expanding our presence on the West Coast,'' said Raymond Miolla, vice president of NCR's Financial Systems Division.

Money Quik serves all ATM cardholders on shared ATM networds (over 20 million cardholders in California) and provides 24-hour access to cash from checking, savings or credit card accounts. Because Money Quik does not issue cards, it does not compete with financial institutions or networks. Money Quik provides additional cash access points for customers of all financial institutions.

Service and maintenance support for Money Quik ATMs will be provided by NCR's field and software engineers.

NCR is the world's largest provider of ATMs. Based in Dayton, Ohio, NCR manufactures, markets and supports business information processing systems for worldwide markets.

UNIVERSAL CITY, CA (JULY 11) BUSINESS WIRE - Three of Brazil's premiere artists will collaborate to bring to the screen the remake of the Oscar-winning ''Black Orpheus'' for Cine-Source Inc. (NASDAQ:FILM) an independent film production company.

Robert Whitmore, president of Cine-Source, announced that Antonio Carlos Jobim, the highly respected, award-winning composer of the original score, has agreed to contribute new music for the picture. Carlos Diegues will direct and Leopoldo Serran will write this new, English-language version of the film that won the 1959 Oscar for Best Foreign Film.

Jobim redefined Latin music in his score for the 1959 movie. And the new version also will be music-driven -- this time by the rhythmically compelling New Brazilian music and the fascinating Afro-Latin culture. Known world-wide as the composer of ''The Girl From Ipanema,'' Jobim's name has led the field of Latin American music in the 20th century.

One of the most distinguished and creative film-makers in the exploding cinema of Brazil, Diegues directed the internationally acclaimed comedy, ''Bye Bye Brazil,'' in which he collaborated with screenwriter Serran. Diegues' Academy Award-nominated picture, ''Better Days Ahead,'' was selected to compete in the 1990 Berlin Film Festival in February.

Whitmore says the film is set to begin filming in February 1991, ''So that we can capture actual footage of the world's most famous celebration -- the Carnivale in Rio.'' Set against this widely exotic pageantry, ''Black Orpheus'' is a poignant story of a girl who falls in love with a charismatic Brazilian musician while visiting Rio for a family gathering.

Updated 30 years from the original, the new ''Black Orpheus'' will feature American stars in the two leading roles of Orpheus and Eurydice.

Cine-Source is co-presenter with Nelson Entertainment of ''Texasville,'' the long-awaited sequel to director Peter Bogdanovich's 1971 ''The Last Picture Show.'' Due for release in late summer or early fall this year, ''Texasville'' was written, directed and produced by Bogdanovich and reunites ''Last Picture Show'' stars Jeff Bridges, Cybill

Shepherd, Timothy Bottoms, Randy Quaid and Cloris Leachman.

Cine-Source is negotiating the terms of a contract with Jeffery Abelson, a member of Cine-Source's advisory board, to act as chief operating officer of the music company. Abelson has been president of Paralax Productions, an award-winning music production company, for the past 10 years.

#90192b0642 07/11/1990 ~Business Wire
CUPERTINO, CA (JULY 11) BUSINESS WIRE - Apple Computer Inc. Wednesday announced the formation of a new spinout company, General Magic Inc.

Former Apple employees Bill Atkinson, Andy Hertzfeld and Marc Porat founded the new company and will serve as General Magic's executive team. Apple will become a minority investor and General Magic's largest corporate shareholder. Apple also has the first non-exclusive license to manufacture and market the spinout's technologies. Apple chairman and CEO John Sculley will serve on General Magic's board of directors.

According to General Magic's founders, the new concern will design and develop a new class of ''Personal Intelligent Communicator'' products.

''We're excited that Apple will be working closely with these industry pioneers as they develop their revolutionary new vision of computing and communication,'' Sculley said.

Sculley also said that Apple chose to spinout the project because the new concern will address market segments outside of Apple's mainstream business. ''The spinout relationship gives Apple a venue to expand the portfolio of its activities while focusing the company's resources on advancing personal computing,'' Sculley said. General Magic said that Apple's management and many of Apple's employees have been actively involved in developing the concepts that led to the creation of the spinout. ''With John Sculley on our board, we expect the relationship between the two companies to be strong and productive,'' General Magic's founders said.

Bill Atkinson, a 12-year Apple employee, will maintain his ties with the company by becoming an Apple Fellow Emeritus.

IRVINE, CA (JULY 11) BUSINESS WIRE - Advanced Logic Research Inc. (ALR) (NASDAQ:AALR) announced the signing of an agreement with Softsel DNS Germany for the distribution of its complete line of personal computers.

According to Dave Kirkey, vice president of International Sales and Worldwide Marketing at ALR, ''As ALR moves to open channels into other countries, Germany is especially important to us as we perceive it to be one of the more progressive countries in Europe in the high-technology sector.

''Combined with high-technology products from ALR, the relationship with Softsel DNS promises to be a lucrative one.''

Softsel (now Merisel) is successfully selling ALR's full line of personal computer products in the United States and Canada. To date, Softsel DNS

Germany has ALR products in stock, including PowerVEISA, BusinessVEISA and PowerFlex lines.

A formal media conference will take place July 17 in Salzburg, Austria at the Kobenzl Hotel with ALR's vice president of International Sales and Worldwide Marketing, Dave Kirkey attending. As a distributor of ALR products, Softsel DNS Germany will provide products, service, technical support and high-profile advertising in the German markets.

Advanced Logic Research is a leader in high-performance CPU technology. ALR carries the most comprehensive line of ISA, Micro Channel and EISA-based PCs ranging from entry-level 12.5 MHz 286 computers to 33-MHz 386- and 25-MHz i486-based high-performance systems and multiprocessor systems based on UNIX and Novell.

ALR products can be purchased through value-added resellers, value-added dealers, major chains and retail locations throughout the United States, Canada, Europe, Latin America and Asia.

#90192b0645 07/11/1990 ~Business Wire

KNOXVILLE, TN (JULY 11) BUSINESS WIRE - Two years after Pilot Corp. split with Marathon Petroleum Co., the Knoxville-based oil company had annual sales of $240 million.

Today, Pilot Corp. expects sales to increase to $350 million by year's end a 45 percent increase over 1988 figures.

''We are very proud of where we are in the market today,'' James A. Haslam II, president, said. ''We are well ahead of where we hoped to be two years ago after splitting with Marathon.''

Pilot now employs 1,300 people in its 32 Travel Centers and 53 convenience stores in 21 states. Two years ago just after the split with Marathon, Pilot had 69 properties with 750 employees in 16 states.

On June 30, 1988, Pilot spun off one-third of its units plus other considerations to Marathon Petroleum in exchange for Marathon's 50 percent interest in Pilot. Pilot transferred 39 of its 108 units to Marathon, leaving Pilot with 69 operations.

The reason for the amicable split was a differing view on where the two companies were heading. At the time of the divestiture, Haslam said Pilot wanted to build a nationwide chain of Travel Centers.

''When we made the announcement of the split with Marathon, we said we wanted to be the finest operator of convenience stores and Travel Centers in the country. We also said we wanted to build a nationwide chain of Travel Centers. We think we are well on our way to accomplishing our goal '' Haslam said.

Pilot recently opened three new Travel Centers in Nashville, Tenn., Youngstown, Ohio, and Perryville, Md. The company has opened six Travel Centers and one convenience store since January.

''Our Travel Center network stretches from Carney's Point, N.J., to Barstow, Calif., and from Beloit, Wis., to Wildwood, Fla.,'' Haslam said.

With the opening of the three newest centers, Pilot is a nearly 30 million gallon-per-month company, almost 12 percent larger than it was at the time of the split.

''Everyone in our organization deserves a tremendous amount of credit for getting us back to where we were so quickly,'' Haslam said. ''Our company is truly on the move.''

ATLANTA (JULY 11) BUSINESS WIRE - Fulton Federal Savings Bank (NASDAQ:FFSB) announced Wednesday that the Office of Thrift Supervision (OTS) had disapproved the capital plan Fulton Federal had filed pursuant to the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA).

Such plan contemplated the sale of Fulton Federal's 22 metro Atlanta branch offices to First American Bankshares Inc. Fulton Federal was required to file such a plan because it is not in compliance with the capital standards imposed under FIRREA.

Fulton Federal also announced that it had agreed to sell its mortgage servicing business. The agreement, which is expected to close by July 31 (subject to the satisfaction or waiver of certain conditions), calls for Fulton Federal to transfer the servicing rights on substantially all of its residential mortgage loans and a portion of its commercial mortgage loans for a cash purchase price of 87 basis points (0.87 percent) of the

outstanding balances on the closing date.

The sale also includes certain data processing and other assets associated with the mortgage servicing business. The purchaser, Bluebonnet Savings Bank FSB of Dallas, has agreed to offer employment to the 40 Fulton Federal employees involved in the servicing operations.

At June 30, Fulton Federal's residential and commercial mortgage loan servicing portfolio consisted of approximately $1.5 billion of outstanding loans.

The sale agreement provides that of this portfolio, Fulton Federal will retain the servicing rights on certain to-be-determined commercial mortgage loans and the purchaser will have the right, under certain circumstances, to reduce the purchase price on certain residential mortgage loans transferred.

Fulton Federal's loan service fee revenue before operating expenses for the years ended Dec. 31, 1989, 1988 and 1987 was $3.9 million, $2.4 million and $2.2 million, respectively.

WYE, ENGLAND (JULY 11) BUSINESS WIRE - Presenting at the Ninth International Symposium on Plant Lipids at Wye College, Calgene (NASDAQ:CGNE) announced Wednesday its discovery of a new enzyme that plays a key role in the formation of laurate.

Laurate is a medium chain fatty acid produced by coconut and oil palm trees and certain species of wild plants, but absent in major European and North American oilseed crops such as rapeseed and soybean.

Approximately 500 million pounds of laurate are used in the United States each year in the production of detergents, soaps, lubricants and other industrial products.

A Calgene research team led by senior scientist Dr. Maelor Davies, has shown that a specific enzyme, lauroyl-ACP thioesterase, is present in the seeds of the Bay Laurel, a native California and Oregon tree, during laurate formation. They have also obtained evidence that the enzyme plays a key role in the synthesis of laurate.

Davies said: ''Until now there has been virtually no understanding of the biochemical and genetic mechanisms which enable plants to make this

fatty acid. This discovery is a major step toward our objective of cloning the genes responsible for laurate production and introducing them into commercial rapeseed varieties.''

The thioesterase project is one of several programs under way at Calgene in the area of plant oils modification. Calgene has previously announced the cloning of genes for stearoyl-ACP desaturase, a key enzyme in the formation of vegetable oils used in both food and industrial applications, and ACP (acyl carrier protein), another important oil synthesis gene.

Calgene is establishing broad patent coverage on its oil genes and related technology and has filed over 30 patents worldwide.

Calgene Inc., is an agribusiness biotechnology company that is developing improved plant varieties and plant products for the seed, food and specialty chemical industries. The company has five operating subsidiaries -- Ameri-Can Pedigreed Seed Co., Calgene Chemical, NobleBear Inc., Plant Genetics Inc. and Stoneville Pedigreed Seed Co.

AGOURA HILLS, CA (JULY 11) BUSINESS WIRE - Fortune Petroleum Corp. (NASDAQ:FPEX) announced Wednesday that its rights offering, which had been extended to June 15, 1990, has expired, having raised $284,797.

The rights offering was offered at a price of $1.95 per unit, consisting of three shares of common stock and one stock warrant. The warrants became exercisable on June 1, 1990, at a price of 90 cents per share. A total of 438,150 shares and 146,050 warrants are being distributed.

Fortune also announced the cancellation of its letter of intent to acquire substantially all the assets of Western Energy Resources Inc. The letter of intent required, among other considerations, that Fortune receive unit subscriptions in the amount of $500,000. This amount of subscriptions was not met leading to the termination of discussions with Western.

''Plans are underway to utilize a portion of the funds raised to rehabilitate some of the company's wells in an attempt to increase its current oil and gas production,'' Dan E. Pasquini, president, stated.

Fortune Petroleum is an independent oil and gas exploration and production company with its principal properties located in California.

SAN FRANCISCO (JULY 11) BUSINESS WIRE - Financial Center Bancorp (NASDAQ:FCTB), the parent company of The Financial Center Bank, n.a., has announced second quarter earnings for the period ended June 30, 1990.

Unaudited figures reflect net income of $997,000, or 76 cents per share, for the second quarter ended June 30, 1990, compared with net income of $895,000, or 70 cents per share, for the like period last year, an 11.4 percent increase.

Net income for the six-month period ended June 30, 1990, was $1,601,000, or $1.22 per share, up 11.7 percent from $1,434,000, or $1.13 per share, for the similar period last year.

At June 30, 1990, Financial Center Bancorp, which was founded in 1984, had consolidated assets of $282 million, deposits of $260 million and shareholders' equity of $16 million.

Its sole subsidiary, The Financial Center Bank, n.a., is organized into three interrelated divisions. The banking division has four regional commercial offices located in San Francisco, Oakland, San Mateo and Walnut Creek, Calif., and provides loans and other commercial banking services to small and medium-sized businesses, professionals and high-net-worth individuals.

There are also three retail banking offices, located in San Jose, Mountain View and Hayward, Calif. The Financial Center Mortgage division originates non-conforming residential mortgage loans for sale to institutional buyers, through offices in 19 California cities and one office in Seattle.

The First Capital division provides long-term financing, guaranteed under SBA loan programs, to qualifying companies, and sells the guaranteed portion of these loans to institutional buyers. First Capital has one office in San Francisco.

#90192b0664 07/11/1990 ~Business Wire

RALEIGH, NC (JULY 11) BUSINESS WIRE - Ron E. Doggett, chairman and chief executive officer of GoodMark Foods Inc. (NASDAQ/NMS:GDMK), Wednesday announced results for the fourth quarter and fiscal year ended May 27, 1990.

For the thirteen weeks ended May 27, 1990, net sales increased 9.1 percent to $36,400,000 from $33,376,000 in the fourth quarter last year.

Net income was $1,312,000, or 30 cents per share, compared with $1,299,000 or 30 cents per share in the year-earlier period.

For the fiscal year ended May 27, 1990, net sales were $136,734,000, up 5.9 percent over net sales of $129,116,000 for the previous fiscal year. Net income for fiscal 1990 was $3,623,000, or 83 cents per share, compared with net income of $4,851,000, or $1.10 per share, last year.

Doggett said: ''Fiscal 1990 was a challenging but progressive year. Although final results for the year were below our expectations, we were encouraged by improving trends in the fourth quarter. Price increases, which we took to offset record high meat costs, temporarily caused our sales to slacken, but some aggressive marketing programs are now producing better sales comparisons.

''Our business remains solid and we are well positioned for growth. Our strategy for fiscal 1991 is to continue our aggressive sales and marketing programs, continue to build our business for the long-term, and maintain a strong financial position. Our goal for the year is to resume a pattern

of consistent growth.''

GoodMark Foods is the nation's leading producer and marketer of meat snacks. The company is also a regional producer of packaged meat products, cookies, crackers, brownies and other snacks. Its principal brands include Slim Jim, Penrose, and Pemmican meat snacks; Jesse Jones packaged meats; A Whale Of A Snack cookies and crackers; Rachel's Brownies; and Andy Capp's snacks.

ALEXANDER CITY, AL (JULY 11) BUSINESS WIRE - Russell Corp. (NYSE/PSE:RML) Wednesday announced record sales and earnings for the 13 weeks ended July 1, 1990.

Sales for the quarter ended July 1, 1990, were a record $166,570,000, compared with $149,474,000 in the quarter ended July 2, 1989. Net income for the quarter increased 29 percent to $12,714,000, equivalent to 31 cents per common share vs. net income of $9,851,000, or 24 cents per share a year ago.

Sales for the 26 week period ended July 1, 1990, were $325,632,000, compared with $296,358,000 in the like period ended July 2, 1989. Net income for the first half of 1990 increased 19 percent to $26,929,000, an increase from 56 cents to 66 cents per common share.

A company spokesman said that despite increased competitive pressures, especially in certain T-shirt markets, shipments remained in line with expectations. The spokesman also noted that improved manufacturing efficiencies are the result of ongoing and previous capital expenditures associated with the company's continuing expansion and modernization.

Russell Corp. is an integrated manufacturer and marketer of leisure apparel, activewear, athletic uniforms, better knit shirts and a comprehensive line of lightweight woven fabrics. The company's common stock is listed on the New York Stock Exchange and several regional exchanges under the symbol RML.

SYDNEY, Australia (JULY 11) BUSINESS WIRE - Despite the strong growth recorded in the March quarter Australian national accounts, Westpac Banking Corp. (NYSE:WBK) economists say that the private sector is suffering and that the economic slowdown is proving uneven across industry sectors.

In the July issue of Westpac's Market Insights, the Westpac team, like most observers, says that the national accounts figures do not reflect the actual state of the Australian economy.

Market Insights argues that a technical ''recession'' has been avoided only because of a ''sharp expansion in government spending.''

According to the national accounts, the Australian economy was booming in the March quarter. A closer look at the figures reveals that the jump in economic activity was due principally to government spending, which rose 4.2 percent in the March quarter (compared with the December quarter 1989).

While GDP rose 1.8 percent, spending in the private sector fell marginally. Private investment spending, the area most sensitive to high interest rates, fell 3.1 percent.

Business investment in plant and equipment has now fallen for four consecutive quarters and if the latest CAI/Westpac Survey of Industrial Trends is any accurate guide, further falls are likely over the remainder of 1990.

''One bright spot is that, with housing approvals steady, dwelling construction activity is probably close to bottoming out,'' Market Insights say.

Commenting on Market Insights, Westpac's Chief Economist, Bob Graham, warned that ''as high real interest rates continue, highly-geared corporates, in particular, are at risk in the economic downswing. In contrast, many diversified industrial companies are better placed to take advantage of new opportunities.

''The outlook is becoming positive for the tourism and 'high-tech' industries,'' Graham said.

Westpac Banking Corp. is an international financial services group headquartered in Australia with operations extending offshore to 29 countries. Westpac ranks among the top 100 banks worldwide in terms of assets. In its home markets of Australia, New Zealand, Papua New Guinea, and the South West Pacific, Westpac offers a full range of banking and financial services. Specialized services are provided through the Westpac offices in Asia, Europe, and the United States.

DALLAS (JULY 11) BUSINESS WIRE - Direct consumer marketer of home improvement products, Wednesday announced results for its fiscal year and fourth quarter ended April 30.

For the year ended April 30, revenues increased 37 percent to $252 million from $184 million last year. The company's Cabinet Division, acquired in October 1988, contributed $42.6 million in revenues, compared with $14.7 million for the seven-month period subsequent to the acquisition in fiscal 1989. The Siding Division's revenues increased 24 percent to $209 million from $169 million last year.

Excluding the results of its deck divisions, which were closed in fiscal

1989, income from continuing operations increased to $5.9 million, or 42 cents per share, from $1.5 million, or 11 cents per share last year.

Income from discontinued operations was $160,000, or 01 cent per share, compared with a net loss of $7.3 million, or 53 cents last year.

These resulted in net income of $6.1 million, or 43 cents per share, for the year ended April 30, 1990, compared with a net loss of $5.7 million, or 42 cents per share, last year.

For the fourth quarter ended April 30, revenues increased 27 percent to $64.6 million from $50.7 million last year. The company's Cabinet Division, acquired in October 1988, contributed $10.7 million in revenues, a 54 percent increase over $7 million for the same period last year. The Siding Division's revenues increased 23 percent to $53.9 million from $43.7 million last year.

Income from continuing operations was $2.3 million, or 16 cents per share, compared with a loss of $3.6 million, or 25 cents per share in last year's fourth quarter.

Net income for the fourth quarter, including a 01 cent loss from discontinued operations, was $2.1 million, or 15 cents per share, compared with a net loss of $8.9 million, or 63 cents per share, for the same period last year.

At April 30, AMRE had $24.1 million in cash and marketable securities, compared with $1.6 million at April 30, 1989.

Cash flow from continuing operations was $24.8 million for the 12 months ended April 30, 1990, compared with $904,000 for the same period last year.

Both cash and cash flow for fiscal 1990 include approximately $6.2 million received in tax refunds resulting from losses in fiscal 1989.

On July 10th, the company announced an increase in its quarterly cash dividend to 03 cents per common share from 02 cents per share previously. It will be payable on Aug. 3, to shareholders of record on July 20. This marks AMRE's 11th consecutive quarterly cash dividend.

DALLAS (JULY 11) BUSINESS WIRE - Maxus Energy Corp. announced Wednesday that its Intan-B platform in Indonesia has commenced production ahead of the anticipated September starting date.

Production from the four wells on Intan-B is approximately 26,000 gross barrels per day and will increase when a fifth well is added over the next few days.

Combined production from the Intan-A and B platforms in Southeast Sumatra is approximately 50,000 gross barrels per day. Due to capacity restrictions of the temporary processing facilities, production should average around this level until the permanent processing facilities are installed in late 1990.

When complete, the permanent facilities will include four platforms from the Widuri field, as well as the two Intan platforms. Peak production from the Intan and Widuri fields is expected to reach 220,000 gross barrels per day, or approximately 60,000 net barrels to Maxus, during the first half of 1991.

Maxus Energy is operator with 56 percent of the contractors' interest in the Southeast Sumatra production-sharing contract area. The other interests in the contract area are held by BP Petroleum Development (SES) Ltd., C. Itoh Energy Development Co. Ltd., Deminex Sumatra OEL GmbH, Repsol Exploracion S.A., Hudbay Oil (Indonesia) Ltd., Inpex Sumatra Ltd., Lasmo Sumatra Ltd., Sunda Shell N.V., TCR Sumatra AG and Warrior Oil Co. The contract area is held with Pertamina, the Indonesian state oil company.

EL SEGUNDO, CA (JULY 11) BUSINESS WIRE - The board of directors of Rockwell International Corp. Wednesday increased the quarterly dividend on the company's common stock and Class A common stock by 10.3 percent and authorized extension of the company's stock repurchase program by an additional $500 million.

The quarterly dividend, which was increased from 19-1/2 cents to 21-1/2 cents per share, is payable September 4, 1990 to stockholders of record Aug. 13, 1990. The dividend increase marks the fourteenth consecutive year of higher annual dividends on the company's common stock. "Our first priority in applying our financial capabilities is

providing our businesses the resources necessary to achieve their full long-term potential," Donald R. Beall, chairman and chief executive officer, said.

"At the same time, the company's financial strength permits us to further enhance shareholder value through our stock repurchase program and

periodic dividend increases," Beall added. "Each action demonstrates the board's and management's confidence in the outlook for Rockwell."

Under the company's current stock repurchase program, begun in March 1986 and extended in $500 million increments in March 1987, December 1988 and July 1990 a total of $2 billion of stock repurchases has been authorized. Together with another program which was approved in November 1983, the company has repurchased 79.7 million shares of its common stock for $1.63 billion, or $20.49 per share. The stock repurchase program is being implemented through open market purchases from time to time. At current prices, the extended program would reduce the presently outstanding common stock by about 7.5 percent.

The board of directors also declared regular quarterly dividends of $1.1875 per share of Series A preferred and $0.3375 per share of Series B preferred stock. Both preferred dividends are payable Oct. 1, 1990 to stockholders of record Aug. 31, 1990.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

#90192b0720 07/11/1990 ~Business Wire

NEW YORK (JULY 11) BUSINESS WIRE - For the first time in its 11-year history of sponsoring public real estate limited partnerships, W. P. Carey & Co. Inc. is sponsoring a $100 million real estate investment trust (REIT).

Called Corporate Property Associates 10 Incorporated (CPA:10), it is the latest offering in the Corporate Property Associates series of real estate investment funds that combine rising income with significant upside potential.

Announcement of the new CPA REIT was made Wednesday by William Polk Carey, chairman of W.P. Carey & Co. Inc., who said that CPA:10, like the nine CPA programs before it, will invest in corporate real estate property subject to absolute net-leases and secured by the real estate of credit-worthy corporations.

CPA:10 carries an option to increase the offering by $100 million to a $200 million total fund with a leveraged portfolio of up to $500 million, making CPA:10 the largest investment pool of its kind. It is anticipated that $100 million will be offered through select dealers like PaineWebber and the other $100 million through institutions.

CPA:10 will be managed by an affiliate of W.P. Carey & Co. Inc. whose board of directors includes Nobel Laureate Dr. Lawrence Klein, and former President of the Federal Reserve Bank of Chicago Charles J. Scanlon. The trust will also have four independent trustees: Donald E. Nickelson, former president of PaineWebber Group Inc.; Charles C. Townsend, former head of the corporate finance department of Morgan Stanley and chairman of Morgan Stanley Realty; Ralph G. Coburn, Rear Admiral USNR (Ret.), former head of the National Association of Real Estate Investment Trusts; and William Ruder, former assistant secretary of commerce for the United States. As chairman of CPA:10 and W.P. Carey & Co., William P. Carey, will serve as director, as will Francis J. Carey, president of both organizations.

The REIT's board will have a broad range of responsibilities, one of which is the authority to permit CPA:10 to be publicly traded. If the directors are confident after a period of time that the company's shares will trade at a comfortable premium over the original public offering price, they will likely permit its shares to trade on the New York Stock Exchange.

In terms of investment policy, Carey said, ''We will apply the same investment philosophy to the trust that we applied successfully to our partnerships.

He explained that the REIT structure was chosen because of its application to both institutional and individual investors, noting that REITs provide institutional investors with income free from taxation, including unrelated business taxable income (UBTI). He also remarked that REIT tax reporting is simplified with the use of the 1099 form instead of the K-1.

W.P. Carey & Co. Inc., is a pioneer and leader in sale leaseback financing. Since 1979, it has offered the Corporate Property Associates (CPA) series of real estate programs whose current collective portfolios are valued at about a billion dollars.

Further details are available through PaineWebber Inc. and other selected securities dealers.

NEW YORK (JULY 11) BUSINESS WIRE - Airship International Ltd. (NASDAQ: BLMP) announced Wednesday that its new airship, ''Airship Shamu,'' which has been operating at Sea World of Florida in Orlando since July 4, and is painted in the likeness of Shamu, the killer whale, will begin its maiden promotional tour.

Airship International ltd. and Anheuser-Busch Cos. Inc. (NYSE: ANHEUS) have entered into a multi-year agreement to operate Airship Shamu, one of the world's largest airships certified for day and night flight.

Airship International Ltd. will operate Airship Shamu as a goodwill ambassador, aerial advertising/public relations vehicle and as an aerial camera platform for Sea World. On July 7, Airship Shamu televised its first event, the Pepsi 400 NASCAR race in Daytona Beach, Fla., and will continue to cover several major sporting and special events in addition to goodwill flights in major cities.

Sea World is owned and operated by Busch Entertainment Corp., the family entertainment subsidiary of Anheuser-Busch Cos. Inc.

According to Louis J. Pearlman, chairman and president of Airship International Ltd., ''the company is proud to have the opportunity to operate for Sea World. Airship Shamu is the most technically advanced airship in the world and will provide Sea World the unique distinction of having a flying whale of an ambassador that can never be forgotten.''

The airship is 194 feet in length, approximately two-thirds the size of a football field, complete with a NightSign System, comprised of 8,500 red,

green, blue and yellow lights that can depict animated messages and logos that can be seen from over a mile away.

The airship joins its sister airship, which Airship International operates for The Metropolitan Life Insurance Co. For additional information, please contact: Richard L. Schafler, Director of Corporate Communciations, Airship International Ltd., 500 Fifth Ave., New York, N.Y., 10110, 212/869-2032.

CHICAGO (JULY 11) BUSINESS WIRE - United Airlines said Wednesday that it regained the No. 1 position among U.S. carriers in the month of June, leading the industry in revenue passenger miles (RPMs) and recapturing its long held leadership position.

The carrier also said that its available seat miles (ASMs) in June increased 916,530,000 ASMs, or 10.4 percent, for the same month over a year ago, making United the fastest growing airline in the United States.

''Our success stems from the outstanding efforts made by the employees of United Airlines,'' said Stephen M. Wolf, chairman and president. ''That dedication to offering the highest quality of service clearly is attracting a greater number of passengers to United.

''Recapturing the No. 1 position is part of a strategic plan implemented during the past two and a half years that has involved major schedule rationalization, aggressive expansion and market share growth. We have accomplished this goal by returning to our core business and focusing on quality service.

''We knew that if we were successful qualitatively, quantity (size) would take care of itself. With the 54 new aircraft we are receiving this year, United's growth will continue at an industry-leading pace. The results we announce today are proof positive that our plan is on target.''

The airline's total scheduled RPMs were 6,905,116,000 for the month, representing an 8.4 percent increase over June 1989. Total ASMs were 9,738,464,000 up from 8,821,934,000 a year earlier.

Twice during the month, United broke company records for single-day revenue passenger miles and on June 28, United set a new company record for the number of passengers boarded in a single day. Wolf said that United's Pacific RPMs rose 35.6 percent over a year ago demonstrating the

strength of United's market presence in the Pacific Rim. Earlier this year, United announced that it has become the No. 1 carrier in the trans-Pacific market.

A revenue passenger mile is one fare-paying passenger carried one mile. An available seat mile is one seat flown one mile.

United Airlines offers 1,945 daily flights to 158 cities in 14 countries. United will inaugurate service between Chicago and Paris on Aug. 1.

BOSTON (JULY 11) BUSINESS WIRE - Keane Inc. (AMEX:KEA) reported earnings and revenues Wednesday for the second quarter ending June 30, 1990.

Revenues increased to $23,926,000, up 32 percent; pretax income rose to $2,362,000, up 58 percent and net income increased to $1,363,000 up 54 percent versus $883,000 during the second quarter of 1989. Earnings per share rose to 29 cents per share as compared to 23 cents-(a) per share a year ago. In March of 1990 Keane successfully completed a secondary stock offering adding an additional 826,950 shares which are reflected in the company's 1990 earnings per share calculations.

For the first six months of the year, Keane's revenues were $46,597,000 versus $34,006,000 last year. Pretax income was $4,269,000 as compared to $2,898,000 in 1989, and net income was $2,488,000, up 45 percent as compared to $1,710,000 last year. Earnings per share for the six month period was 56 cents per share (on 4,448,000 shares) versus 44 cents-(a) per share (on 3,845,000 shares) a year ago.

The increase in revenues and net income is due to the continuing strong demand for custom software development services, and Keane's strategy to differentiate itself through its project management expertise.

Keane Inc. is a $95 million custom software development company which designs, develops, integrates and maintains software for corporations and hospitals.

#90192b0734 07/11/1990 ~Business Wire

BOSTON (JULY 11) BUSINESS WIRE - Cellular mobile telephone subscribers in the United States are one step closer to widespread, nationwide service, as indicated by tests completed recently by Northern Telecom (NYSE:NT) and Motorola (NYSE:MOT).

Motorola and Northern Telecom Wednesday announced that the first U.S. cellular mobile telphone intersystem call handoff, conforming to the IS-41 industry cellular system networking standard, has been accomplished between switching systems manufactured by the two companies.

This milestone occurred during a telephone call from a test vehicle traveling between Boston, and Manchester, N.H. Cellular One, a Southwestern Bell company, serves the Boston area with a Motorola EMX 2500 system, while Cellular One in Manchester, owned by the JHP Partnership, uses a Northern Telecom DMS-MTX to provide cellular service.

Because today's technology cannot establish a connection between cellular systems from different vendors, such calls are normally disconnected if a subscriber drives from one service area to another. This test call, however, was automatically ''handed off'' between systems, allowing the conversation to continue without interruption.

Handoff procedures were strictly governed by IS-41 standards for inter-cellular system communications as specified by the Electronic Industries Association (TIA/EIA) TR45.2 sub-committee.

''This is an important development toward realization of uniform, nationwide cellular service,'' said John Stupka, president of Southwestern Bell Mobile systems, and chairman of the Cellular Telecommunications Industry Association (CTIA) Advanced Technologies committee. ''Operational standards such as IS-41 are essential to the future development of the cellular industry.''

Robert Pelissier, one of the JHP partners, echoing Stupka, said, ''We are pleased that JHP was able to contribute to this important step toward a truly nationwide cellular network.''

''Uninterrupted service is a must if the growth of cellular communications is to continue as we expect,'' said Don Nelson, president, U.S. Cellular Operating Co. of New Hampshire, another of the JHP Partners. ''Losing a call just because you travel across an invisible line will not be tolerated by customers. We need standards to forge the necessary, cooperative links between the various cellular manufacturers.''

The ability to provide, across multi-vendor systems, enhanced cellular

services and capabilities, such as nationwide roaming and feature transparency, data services, ISDN-like capabilities, corporate networking and advanced database services, will depend primarily upon standardized networking.

''Call handoff between various switching systems will increase the value of cellular service for subscribers and service providers alike,'' said Mike Patriarche, vice president, cellular systems, Northern Telecom Inc. ''Northern Telecom has taken a leadership role in the implementation and testing of IS-41 on the DMS-MTX.''

Northern Telecom was previously instrumental in the first-ever successful IS-41 cellular intersystem call handoff, accomplished in Canada in conjunction with NovAtel.

Even with the successful test completion in the Boston/Manchester area, call handoff cannot be provided by Southwestern Bell's Cellular One to its customers. Southwestern Bell and other Bell cellular companies are prohibited by the Modification of Final Judgment from handing off calls across LATAs (local access and transport areas).

''We will continue testing IS-41 between our and all North American manufacturers' switching systems,'' said Bernie Smedley, senior vice president of Motorola Inc. and general manager of the Radio-Telephone Systems Group.

''Motorola is a strong supporter of this standard's implementation, and we look forward to its additional enhancements. Our Distributed Mobile Exchange (DMX), introduced in 1985 by Cellnet of the United Kingdom, has pioneered inter-systems handoff and other features in several multi-system cellular markets, notably in California, the Northeast corrider, and Japan.''

Southwestern Bell Mobile Systems, a subsidiary of Southwestern Bell Corp., provides cellular service to more than 441,000 customers in 24 markets across the United States, including four of the top 10 and six of the top 15 major markets. In some markets the company markets cellular service as Cellular One, a Southwestern Bell Co., while in other markets it is known as Southwestern Bell Mobile Systems.

The JHP Partnership is the licensee of the Manchester-Nashua non-wireline cellular system. The partnership was formed in 1985 to apply for and operate non-wireline cellular systems. It was the lottery winner in Manchester.

Motorola is the world's leading designer, manufacturer and supplier of cellular systems, infrastructure equipment and subscriber products.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and services to telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people across the country.

MILFORD, MA (JULY 11) BUSINESS WIRE - CPS Superconductor Corp., a subsidiary of Ceramics Process Systems Corp. (CPS)(OTC:CPSX), Wednesday

announced a major advance in the electrical performance of its High-Temperature Superconductor (HTSC) wire.

The company achieved critical current performance in excess of 10,000 amperes per square centimeter at liquid nitrogen temperatures on fibers used in the fabrication of wire. This high critical current is relatively insensitive to magnetic field, an important parameter in producing commercial products.

The process used to manufacture the fiber combines the company's ceramic fiber spinning process and ''melt texturing'' and is designed for continuous production. A company spokesman said ...''The combination of higher electrical performance and volume manufacturing are the key elements in commercializing HTSC wire.''

The company is a major contractor for the Defense Advanced Research Projects Agency (DARPA) and produces metallized ceramic superconductor wire in continuous lengths.

CPS Semiconductor manufactures and markets high temperature superconductor power, wire, conductors, and fabricated shapes. Ceramics Process Systems develops, manufactures, and markets advanced ceramic products for the microelectronics, automotive, and defense industries. CPS recently completed a $3.3 million equity financing for new product development and manufacturing.

NEW YORK (JULY 11) BUSINESS WIRE - Shorewood Packaging Corp. (NASDAQ:SHOR) Wednesday announced that its board of directors authorized the repurchase of up to 1,000,000 shares of its common stock (or 1,500,000 shares after giving effect to the 3 for 2 stock split payable to stockholders of record on or about Aug. 6, 1990) from time to time in the open market.

As of today's date, there are 13,178,550 shares (or 19,767,825 shares on a post split basis) of the company's common stock issued and outstanding.

The repurchase program represents approximately 7.6 percent of the fully diluted shares outstanding. A portion of the shares, if and when repurchased, may be used with respect to the exercise of stock options under the company's existing stock option plan.

''The stock repurchase program announced today is intended to maximize the long term value of our company for our stockholders,'' said Paul B. Shore,

chairman, president and chief executive officer.

''Shorewood has recently completed a major capital expenditure program which was substantially funded with internally generated cash. This capital expenditure program has put in place the productive capacity necessary to sustain our continued growth.

''Absent a major acquisition, which we have not identified at this time, we believe that the optimum use of the free cash flow currently being generated by Shorewood is to repurchase our shares and today's decision will allow us to accomplish that goal.''

The company anticipates that funds necessary for the stock repurchase plan will come from cash presently available as well as from borrowings under the company's existing short-term credit lines.

Shorewood Packaging Corp. and its subsidiaries print and manufacture high quality paperboard packaging for such industries as music, home video, food, tobacco, film, cosmetics and toiletries.

The company's executive offices are in New York City with manufacturing and sales operations in New York, Georgia, Alabama, Virginia, Illinois, California, Canada and England.

#90192b0762 07/11/1990 ~Business Wire

LOS ANGELES (JULY 11) BUSINESS WIRE - Ford Motor Co. (NYSE:F) Wednesday said it is offering $700 per car to scrap 1,000 of the most heavily polluting cars in the Los Angeles basin, thus joining the SCRAP project launched last month by Unocal Corp. (NYSE:UCL)

J.C. Collins, Ford Division's L.A. District sales manager, also announced that Ford is offering all participants in the combined program an additional $700 toward the purchase or lease of new low-emitting Ford vehicles -- such as Ford Festiva, Ford Escort and Mercury Tracer.

Collins said that Ford's $700 new-car purchase incentive, plus the $700 buy back -- which may be combined with first-time purchase plans or college-graduate programs and current-model rebates -- could bring a participant's cash benefit toward purchase of a new Ford to more than $3,000.

He also reported that area Ford and Lincoln-Mercury dealers are contributing to getting an additional 90 high-polluting cars off the roads.

Assembled on the street in front of the Unocal building were 30 new Ford Escorts and Mercury Tracers -- together with one crushed pre-1971 car. The display was intended to demonstrate that one pre-1971 car emits more than 30 times as much hydrocarbon emissions as current models, according to Collins.

''The SCRAP program helps demonstrate the progress we have made in cleaning up new-car emissions with catalytic technology,'' said Donald R. Buist, director of Ford's Automotive Emissions and Fuel Economy Office.

On June 1, Unocal announced its South Coast Recycled Automobile Program (SCRAP), which offered to buy 7,000 pre-1971 cars at $700 per vehicle to be scrapped. Since then, over 10,000 owners of pre- 1971 cars have applied for the program.

Early data gathered by the SCRAP project show that these old cars have been driven more than originally expected -- an average of 7,000 customer-reported miles a year, compared with about 6,000 miles currently set as a standard in air quality computer models.

Unocal has contracted with Hugo Neu-ProlerBw/aTo1/8crush the old carCEsFEUired under the program at its Di9town Metal Center.

RYE, NY (JULY 11) BUSINESS WIRE - Melville Corp. (NYSE:MES) specialty retailer of apparel, footwear, drugs, toys and household furnishings Wednesday announced that its board of directors elected Ronald S. Staffieri as corporate vice president.

Staffieri joined Melville as president of its Kay-Bee Toy & Hobby Shops subsidiary earlier this year. He previously was president of Things Remembered, a unit of Cole National Corporation.

Kay-Bee's sales in 1989 were $724 million and it currently operates over 770 stores. On July 3 an agreement was signed to acquire the operating assets of Circus World Toy Stores Inc., a chain of 330 stores with 1989 sales of 177.6 million which will become part of Kay-Bee. The transaction is subject to customary conditions and regulatory approval and is expected to close in August.

Melville specialty retail chains, with stores located across the country, include Marshalls, the off-price brand name apparel chain; Chess King, the young men's apparel chain; Wilsons, in leather apparel; Bob's, the casual family apparel and footwear chain; Accessory Lady, the quality fashion accessory stores; CVS, the prescription drugs, and health and beauty aids chain; Freddy's, the ''deep discount'' drug and sundries stores; Thom McAn Fan Club and the Meldisco Leased Department division in footwear; the Kay-Bee toy chain; Linens 'N Things, the brand name linens and domestics chain; This End Up, the casual furniture stores; and Prints Plus, the prints and wall decor stores.

NORTH CANTON, OH (JULY 11) BUSINESS WIRE - Belden & Blake Corp. Wednesday announced that it has acquired interests in approximately 350 producing oil and natural gas wells, along with undeveloped leasehold acreage and other assets, from New York Life Inc. for $6.4 million.

All of the properties are located in eastern Ohio and western Pennsylvania. New York Life Inc. and various New York Life-sponsored partnerships retain the majority working interest in 250 of the producing

wells. Belden & Blake has assumed operations on these wells from the previous operator, and expects to assume operations on the majority of the remaining wells in the near future.

Belden & Blake Corp. is a privately-held oil and gas producer and operator headquartered in North Canton, Ohio. The company's 270 employees provide all technical and administrative services for Belden & Blake Energy Co. (AMEX:BBE), Belden & Blake International Ltd., listed on the Luxembourg Stock Exchange, and more than 100 Belden & Blake-sponsored drilling programs.

NEW YORK (JULY 11) BUSINESS WIRE - Management Company Entertainment Group Inc. (NASDAQ: MCEG) Wednesday announced that it has signed a licensing agreement with Viacom International, the parent of Showtime Networks Inc., for exclusive U.S. pay television and pay-per-view exhibition rights for eight of its current films, including Without You I'm Nothing, starring MCEG client Sandra Bernhard; and such future releases as Chains Of Gold, starring MCEG clients John Travolta and Marilu Henner; Sketches, directed by MCEG client Neal Israel and starring C. Thomas Howell, Jason Bateman and Jonathan Silverman; Convicts, starring Robert Duvall, James Earl Jones and Lucas Haas; Cold Heaven, starring Theresa Russell and Mark Harmon; Fatal Charm, starring Christopher Atkins; and Catch Me If You Can, starring Matt Lattanzi.

MCEG stated that it anticipates its revenues for the films under this agreement will provide additional working capital. This revenue will be primarily recognized in fiscal years 1991 and 1992. The company anticipates that it will realize cash flow benefits from this arrangement as is the case with the recently announced HBO transaction for video rights to a number of these films.

#90192b0790 07/11/1990 ~Business Wire
CHELSEA, MA (JULY 11) BUSINESS WIRE - Town & Country Corporation (AMEX:TNC) Wednesday reported that sales and earnings for its first fiscal quarter were down slightly from the same period a year ago.

Sales for the quarter ended May 31, 1990 were $99,822,150 compared with $105,074,773 for the first quarter of fiscal 1990. Net income reached $222,279, or $.02 per share, compared with $718,504, or $.06 per share for the first quarter of fiscal 1990.

C. William Carey, chairman, stated, ''A combination of factors influenced our figures for the first three months of the new fiscal year. As a result of soft retail sales, many of our customers made decisions to reduce inventories and to delay placing orders for new merchandise until later in the year, and at the same time sales of our recognition and education products were below expectations.''

According to Mr. Carey, the change in buying habits emerged last year and now appears to be an established pattern which will reinforce the seasonality of Town & Country's jewelry manufacturing business. ''Historically,'' Carey said, ''Town & Country's strongest performance comes in the second half of the fiscal year as our customers gear up for the Christmas selling season which accounts for more than 70% of retail jewelers' annual revenues.''

Elaborating on industry trends, Mr. Carey observed that there is continued consolidation among U. S. jewelry retailers. He indicated there are fewer large volume customers and said, ''The positive side of this from Town & Country's perspective is that these new consolidated entities need suppliers with greater resources, the capacity to fill large orders for high quality merchandise, and deliver on time.

''Our continued financial support of Balfour's efforts to achieve better manufacturing and sales efficiencies also affected our first quarter performance. Implementing operational improvements at Balfour has not been a quick and easy process and it is, obviously, taking longer than we had originally anticipated to produce the results we believe are achievable in the Educational Products and Recognition Products Groups.

''With regard to our retail division, we are encouraged by Little Switzerland's first quarter results. It appears that the trend is now moving favorably toward a recovery in tourism which had been so adversely affected by last year's Eastern Airline strike and Hurricane Hugo.''

Town & Country Corporation is an international manufacturer of fine jewelry with facilities in Massachusetts, New York, Texas, Hong Kong, and Bangkok, Thailand. The Company's Little Switzerland luxury-products retailing group sells up-scale jewelry, watches, crystal, china and fragrances in duty-free ports of the Caribbean.

WINSTON-SALEM, NC (JULY 11) BUSINESS WIRE - Integon Corp. (NASDAQ: ITGN) announced Wednesday that it has called a special meeting of shareholders to vote on a proposed transaction which would result in the purchase of substantially all of Integon Corp.'s assets by Jupiter Industries and Head Insurance Investors L.P.

The meeting is scheduled for July 30 at Integon's corporate offices in

Winston-Salem and will begin at 10 a.m.

The closing of the transaction should occur within a short time following the shareholder meeting. Integon's public shareholders will receive $6 a share cash, following the closing.

The company said that notices of the special meeting and proxy statements were mailed yesterday to shareholders of record July 5, 1990.

Also Wednesday, the company was notified by the North Carolina Department of Insurance that the department had completed their review of the transaction in all material respects and it had determined that the transaction should be approved. The formal approval is anticipated within the next 10 working days.

Earlier, approvals of the transaction were received from the Georgia Insurance Department and the Bankruptcy Court in Southmark's Chapter 11 proceeding. No further regulatory approvals are necessary.

Integon markets a diversified line of life insurance, annuities and property and casualty insurance in 47 states and the District of Columbia. The company has assets of over $1.5 billion. All of Integon's insurance companies are rated ''Excellent'' by A.M. Best Co., the insurance industry's independent rating service.

HAUPPAUGE, NY (JULY 11) BUSINESS WIRE - Beauty Labs Inc. (NASDAQ:LABB) announced Wednesday that it has completed a restructuring of its bank debt whereby the term of its bank credit line has been extended until June 30, 1991.

The company also released the results of operations for the year ended March 31, 1990. Beauty Labs reported a net operating loss of $4 million on net sales of $13 million.

The company attributed the decline in sales and the greatest portion of the loss to the Food and Drug Administration (''FDA'') opinion that the labeling of the Overnight Nail Miracle, the company's nail treatment product, caused the product to be considered as a drug within the meaning of Section 201(g) of the Food, Drug and Cosmetic Act (''FDCA'').

The company made several modifications of the labeling of Overnight Nail Miracle to ensure compliance with the FDCA. On March 14, 1990, the FDA,

by letter to the company, stated that at the present time it had no objections to the company's revised labeling of Overnight Nail Miracle.

The company believes that this action resolved amicably and successfully the matter of determining the proper labeling to be used for any future manufacturing of this product.

Hal Markowitz, CEO of Beauty Labs stated, ''While we are clearly disappointed with the results of operations for the last fiscal year, we are encouraged that the matter has been resolved concerning the labeling of Overnight Nail Miracle, and look forward to a return to profitability.''

#90192b0813 07/11/1990 ~Business Wire

FORT MYERS, FL (JULY 11) BUSINESS WIRE - First Federal Savings and Loan Association of Fort Myers Wednesday reported that net earnings for the quarter ended June 30, 1990 were $1.4 million or 45 cents per share compared to $1.8 million or 57 cents per share for the quarter ended June 30, 1989.

The reduced earnings for the 1990 quarter resulted primarily from decreased net interest income.

Net earnings for the nine month period ended June 30, 1990 were $5.1 million or $1.62 per share compared to $4.5 million or $1.45 per share for the nine month period ended June 30, 1989. This increase resulted primarily from a gain from the disposition of a mortgage-backed bond which more than offset a decrease in net interest income.

Stockholders' equity at June 30, 1990 was $78.8 million or $25.27 per share compared to stockholders' equity of $75.4 million or $24.15 per share at June 30, 1989, representing an increase of 4.51 percent over the past 12 months. The Association's equity as a percentage of total assets at June 30, 1990 was 8.80 percent.

Savings deposits for the quarter ended June 30, 1990 increased $2.2 million. For the quarter ended June 30, 1989 savings deposits decreased $5.4 million.

Loans originated and purchased for the quarter ended June 30, 1990 were $46.0 million compared to $38.6 million for the quarter ended June 30, 1989. The average rate on new loans during the period was 10.12 percent compared to 9.90 percent during the 1989 quarter.

The combined yield on all interest-earning assets at June 30, 1990 was 9.65 percent and the cost of all interest-bearing liabilities was 7.41 percent, resulting in an interest rate spread of 2.24 percent. At June 30, 1989, the combined yield on all interest-earning assets was 9.58 percent and the cost of all interest-bearing liabilities was 7.70 percent, resulting in an interest rate spread of 1.88 percent.

First Federal, serving Southwest Florida through its 24 offices, reported assets at June 30, of $896.0 million. The shares of common stock of the Association are traded in the over-the-counter market and quoted through the NASDAQ National Market System under the symbol ''FFMY.''

#90192b0815 07/11/1990 ~Business Wire

STATEN ISLAND, NY (JULY 11) BUSINESS WIRE - Gateway Bancorp Inc. of Staten Island, holding company of Gateway State Bank, announced that its consolidated net income for the six months ended June 30, was $2,404,000, or 62 cents per share, as compared to $2,759,000, or 72 cents per share, for the comparable period in 1989.

The weighted average number of common shares outstanding was 3,854,166 as compared to 3,839,463 in 1989.

Consolidated net income for the second quarter was $1,134,000, or 29 cents per share, as compared to $1,492,000, or 39 cents per share, for the comparable period in 1989.

Where applicable, share and per share amounts have been adjusted to reflect the ten percent (10 percent) stock dividend declared on March 13, to shareholders of record as of April 3, paid on April 20.

The decrease in consolidated net income for the six and three month periods ended June 30, was primarily attributable to a $298,000 increase in the provision for loan losses from $150,000 for the three months ended June 30, 1989 to $448,000 for the comparable period in 1990, an increase in the level of nonaccruing loans from an average of $2,286,000 for the three months ended June 30, 1989 to an average of $4,962,000 for the three months ended June 30, 1990, and to an increase in noninterest expense resulting from the company's growth.

The aforementioned increases in the provision for loan losses and level of nonaccruing loans were attributable to adverse conditions in the Staten Island real estate market. Such conditions resulted in an increase in the level of delinquent loans, an increase in the amount of loan

chargeoffs, and a slowdown in the rate of loan recoveries.

Average earning assets for the six months ended June 30, 1990 were $246,715,000, representing a 9.1 percent increase over $226,112,000 for the comparable period in 1989. This increase in average earning assets was funded by an increase in the average deposit base and the retention of net income.

Total assets grew by $27,570,000, or 10.9 percent, to $279,785,000 at June 30, 1990 versus $252,215,000 at June 30, 1989. Total deposits grew by $24,286,000, or 11 percent, to $244,514,000 at June 30, 1990 versus $220,228,000 at June 30, 1989.

COLUMBUS, OH (JULY 11) BUSINESS WIRE - Michael H. Thomas has been named chairman and chief executive officer of Buckeye Financial Corp., and Robert W. Strouse has been named president and managing officer of Buckeye's principal subsidiary, Buckeye Federal Savings and Loan Association.

The changes, announced by Buckeye's board of directors today, will be effective Aug. 1, 1990, subject to the approval of the Office of Thrift Supervision.

Thomas replaces Michael J. McMennamin, who is resigning to pursue other interests.

W. Ford Kieft III will remain as president and chief operating officer of the holding company.

Thomas said these management changes will not affect Buckeye's pending merger with BancOhio National Bank, which is expected to be completed this fall.

Thomas, an executive vice president of JMAC Inc., has been a member of the board of directors for both Buckeye Financial Corp. and Buckeye Federal Savings and Loan Association since February 1988. He has been employed at JMAC, an investment company, since 1980.

Strouse has been employed by Buckeye since 1979 and has been its Chief Legal Counsel since 1982. In addition to being secretary of the holding company, he has had management responsibility for human resources, administrative services, auditing and retail product delivery during his

employment.

Kieft has been employed at Buckeye since October 1988 and has more than 15 years' banking experience.

#90192b0827 07/11/1990 ~Business Wire

PORTLAND, ME (JULY 11) BUSINESS WIRE - Consumers Water Company (NASDAQ:CONW) announced Wednesday the company's plan to dispose of all the assets of its two real estate companies.

John Parker, president, observed that whereas the company had previously announced its desire to sell its real estate development properties, the Company has now concluded that it would be in the best interest of its shareholders to dispose of its income producing properties as well. Consumers' two real estate companies are The Dartmouth Company and its wholly-owned subsidiary, Arcadia Company. While both companies are for sale, management anticipates that the most likely scenario will be an orderly disposal of the various properties.

Consistent with the divestiture decision, Consumers anticipates including a provision for the anticipated loss from the liquidation of the two real estate companies in its second quarter financial results. The provision, anticipated to aggregate $4.6 million after tax (or $0.76 per share), will reflect a combination of the estimated net proceeds from the disposition of the properties and the anticipated operating losses of the real estate companies during the liquidation process.

The primary advantage of taking this action at this time is that future losses are provided for now, thus, allowing the true earning power of the Company to be fully reflected in its reported results for 1991 and beyond.

Dartmouth and Arcadia have had a negative impact on Consumers' operating income for the last two years and such operations, if continued, are not likely to turn around quickly. Thus, it was explained, the objective of the divestiture of the real estate businesses is to remove this source of earnings drag and strengthen Consumers' balance sheet, thereby enhancing shareholder value.

The decision does not affect the many parcels of land owned by Consumers' various water utility companies. Mr. Parker also stated that he does not anticipate that the decision will have an adverse impact on the Company's dividend policy.

Besides The Dartmouth Company and Arcadia Company, Consumers Water Company owns and operates ten water utility companies in six states, Burlington Homes of New England, which provides mobile and modular housing, and C/P Utility Services Company, Inc.

WASHINGTON (JULY 11) COMTEX - The 8-K report filed at the SEC shows on June 29, 1990, Communications Systems Inc. announced that it had completed arrangements for the spin-off of its telecommunications operations. The spin-off, as detailed in the 8-K filing, is to take place through the issuance of one common stock of Hector Communications Corp. as a dividend for every two shares of CSI common stock held as of the July 31, 1990 date of the spin-off. Hector is a holding company for the telephone operating subsidiaries of CSI.

Also on June 29, 1990, CSI put on hold the spin-off of Highstone Industries Inc., a holding company for CSI's telephone equipment group. The move to

delay the spin-off was made due to current uncertainties in two principal elements of the Highstone group: the Berry test sets product line and the REMOS monitoring system currently under development. Further, CSI stated that it determined that Zercom Corp., which it acquired in April of 1990, was substantially more compatible with the operations of CSI than the company's telecommunications segments. Zercom therefore would not be included in the Highstone spin-off. Since the absence of the Zercom subsidiary from the Highstone group would substantially affect the profitability of the group, the delay of the spin-off was made to allow management of CSI to consider other, alternative means of divesting the operations tentatively remaining within the Highstone group.

WASHINGTON (JULY 11) COMTEX - The 8-K report filed at the SEC shows in a press release dated July 3, 1990, Country Wide Transport's wholly-owned subsidiary, Country Wide Truck Service Inc. (CWTS), announced that it was considering divesting its dry freight transport operations while maintaining its more profitable refrigerated freight business.

CWTS reported that it had not achieved it projected results from operations in 1990. As a result of actual 1990 corporate performance, cash flow would not be sufficient to maintain corporate operations in their current form. Further, CWTS's liability insurance must be renewed on August 1, 1990, which will require a premium deposit of $500,000 to $600.000 if all operations are continued. CWTS therefore stated that by downsizing operations through divestiture, it could both reduce the size of the liability premium required and generate required funds. CWTS expressed the expectation of a better position in the freight market through the reduction of its debt structure and the concentration its operations within its most profitable market segment.

WASHINGTON (JULY 11) COMTEX - The 8-K report filed at the SEC shows in a press release dated July 3, 1990, Peidmont Federal Savings Bank stated that it intends to increase its general valuation allowances to reflect the softening of the real estate market and the expected increases in non-performing assets and loan charge-offs.

The amount of the valuation, to be determined in Peidmont's second quarter, will reportedly be several million dollars greater than the $2.2 million of loan charge-offs during the quarter, and are expected to result in substantial losses from the quarter and the year.

WASHINGTON (JULY 11) COMTEX - The 8-K report filed at the SEC shows on June 13, 1990, Unico Inc. entered into final agreements for the financing of a $27 million methanol facility to be constructed in Commerce City, Colorado. As per the agreement, Unico, through its wholly owned subsidiary, Intermountain Chemical Inc., becomes the general partner of IC Partners Ltd., and IC Partners in turn becomes the general partner of Sandy Creek Chemical Limited Partnership (formerly Intermountain Chemical L.P.). Sandy Creek Chemical L.P. is the owner of the Commerce City facility.

According to the 8-K filing, the facility was to be begun immediately and was to be completed in the latter part of 1991. Unico's recorded investment in the project was $250,000, with an initial ownership interest in the partnership of 8.1%. Upon completing of the project, Unico is to receive profits from the project according to fomulae laid out in the partnership agreement. Forcasts, according to the filing, indicate that Unico is to receive approximately 30% of those earnings.

WASHINGTON (JULY 11) COMTEX - The 8-K report filed at the SEC shows as announced on June 29, 1990 by RealAmerica Co., RealAmerica Partners Ltd. I (RAPL I), in which RealAmerica Co. is the general partner with a 93.75% interest, was made one of the subjects of a suit brought by John Karlton. John Karlton is the sole shareholder of Capital Growth Corp. of New Mexico. The suit related to the purchase by Capital Growth of the First Plaza office building and retail complex in Albaquerque, New Mexico. The suit alleged variously against those named misrepresentation and breach of fiduciary duty in connection with the sale.

The suit seeks compensatory damages and punitive damages in an unstated amount, or, alternately, recission of the sales transaction. RealAmerica Co. believes the suit to be groundless, and intends to vigorously defend and assert counterclaims alleging default under, or acceleration of, the Karlton note related to the sale, as well as full payment of that Karlton note. That note held a value on its face of $1.5 million.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 11) COMTEX - The latest debate on jurisdiction of stock index futures pitting Wall Street against La Salle Street became a one-sided affair today when Chicago futures officials rescheduled their appearance before the Senate Banking Committee at the last minute.

This allowed top securities executives, along with a former Chicago Mercantile Exchange official, to lobby unimpeded for the Bush administration's bill which would shift regulatory control of stock index futures from the Commodity Futures Trading Commission to the Securities and Exchange Commission.

The bill also provides the SEC authority to set margins, the good-faith money needed to execute trades and modifies the exclusivity clause of the Commodity Exchange Act to permit products with both futures and securities characteristics to trade in either market.

Stock index futures, traded in Chicago but based on the prices of stocks traded on the New York Stock Exchange, allow investors to bet on the movement of a basket of stocks without buying the actual securities. They are controversial because of the use of computerized program trading, which enables investors to profit from the differences in the prices of future contracts on stock indexes and of the corresponding stocks. Critics have cited those quick shifts between products as a cause of stock market volatility.

James Jones, chairman of the American Stock Exchange, National Association of Securities Dealers President Joseph Hardiman and Wayne Luthringshausen, chairman of the Options Clearing Corporation, testified before the Senate panel on behalf of the legislation. The three are members of the Ad Hoc Coalition for Intermarket Coordination, a group of leading stock exchanges and security industry organizations.

Their position is that stock futures and equity markets constitute a single market, requiring one federal regulator and the legislation is needed to restore investor confidence in the markets.

The commodity exchanges and most members of congressional agricultural committees are opposed to the bill, arguing jurisdictional changes would unnecessarily disrupt the markets, fail to reduce market volatility and cause the futures markets to lose business.

"The administration's proposal will enhance the soundness of our linked equity and derivative markets," said Jones. "At the same time, the proposal would eliminate competitive barriers to development of innovative and useful securities products."

Former senator Thomas Eagleton also testified on behalf of the bill. This is somewhat of a surprise given the fact he served as a member of the board of governors of the Chicago Mercantile Exchange from 1987 through 1989.

"The CFTC is underfunded, underenthused, and overwhelmed," Eagleton said. "It makes no sense for equity or equity derivatives to be split into two varying regulatory playing fields."

Eagleton added the CFTC is not competent to be a regulator because it lacks funds to have adequate enforcement personnel. He argued switching control of stock index futures to the SEC would not harm the Chicago markets.

"It's a figment of someone's imagination that farm groups will be hurt," Eagleton said. "A tiny bit of jurisdictional transfer has nothing to do with wheat, eggs or soybeans."

Karsten Mahlmann, the chairman of the Chicago Board of Trade, Leo Melamed, chairman and chief executive officer of the Chicago Mercantile Exchange, and Robert Wilmouth, president and chief executive officer of the National Futures Association were originally scheduled to appear before the Senate committee today. They will get a chance to present their case before the panel in two weeks.

STAMFORD, CT (JULY 12) COMTEX - Lotus Development Corp., the Cambridge, Mass., computer software developer, has filed a patent infringement suit against Scotts Valley, Calif.-based Borland International Inc., claiming certain facets of Borland's Quattro and Quattro Pro products infringe on Lotus' copyrights for its famous 1-2-3 product.

The action follows by four days the filing by Borland in a federal court in California of a request for a summary judgment stating that Borland's product does not infringe on Lotus' patent, according to a Securities and Exchange Commission filing.

According to the Lotus suit, filed July 2 in U.S. District Court for the District of Massachusetts, Lotus claims that the user interface of Quattro and Quattro Pro is based on the interface in 1-2-3.

Lotus has asked the court for an injunction barring Borland from marketing either product.

It is also asking that all of the Borland products that allegedly infringe on its patents be impounded, and for damages and attorneys fees.

This 8-k Filing was submitted to the Securities and Exchange Commission on JULY 11, 1990

GROUP LED BY H WAYNE HUIZENGA OF FT. LAUDERDALE, FL OWNS 8,307,885 SHARES (56.30%) OF PSYCHEMEDICS CORP (TICKER: PCMC) OF SANTA MONICA, CA.

ANNOUNCEMENT:

A. Clinton Allen, Donald F. Flynn, and Larry A. Kaufman were elected as directors at the annual meeting.

Wayne Huizenga and Donald Flynn acquired an aggregate of 317,220 shares and 475,950 warrants for $700,000 through a purchase agreement dated June 29, 1990.

The warrants are exercisable at $4.41 per share.

The shares and warrants were acquired in exchange for the cancellation of $1.05 million in notes payable to Huizenga, Flynn and certain other investors (the investors).

Also according to the agreement, the investors acquired a $500,000 note in exchange for the cancellation of a $200,000 note and on June 30, loaned the company an additional $150,000 under the $500,000 note.

The note is convertible into common stock at $3.53 per share.

The investors have agreed to buy $450,000 worth of preferred stock from Psychemedics.

Flynn and Huizenga will each buy 37,772 preferred shares and will receive warrants to buy 30,234 common shares each at $4.41 per share in exchange for a total of $266,666 payable to Psychemedics.

#90192u2533 07/11/1990 ~United Press International

WASHINGTON (JULY 11) UPI - A House committee Wednesday called on the Dominican Republic to end what human rights activists say is the virtual enslavement of Haitian workers at Dominican sugar cane plantations.

The House Foreign Affairs Committee approved an amendment by Rep. Gus Yatron, D-Pa., that urges the Dominican Republic to end the deceptive recruitment and forcible transportation of Haitian sugar cane workers, and to allow the workers freedom of movement and the right to quit their jobs and return home.

The amendment, added to the food aid portion of the farm bill before Congress, also authorizes $1 million in annual aid to the Dominican Republic to impove housing for Haitian sugar cane workers and provide access to education for their children.

Holly Burkhalter, Washington director of Human Rights Watch, said most Dominican sugar cane plantations are owned by the government and conditions are so terrible for workers that it is impossible to recruit enough natives of the country to harvest the crop.

Burkhalter said in its zeal the government has turned to ''extremely abusive'' methods to obtain workers from Haiti, which shares the island of Hispaniola in the Caribbean with the Dominican Republic.

''It's almost a form of enslavement. ... Some of the Haitian workers we talked to in the Dominican Republic have been there all there lives,'' she said.

''They are not permitted any freedom of motion. They are not permitted any freedom of organization. ... They are held under armed guard.''

Burkhalter said the recruitment of the Haitian workers often is based on false pretenses but that sometimes force has been used.

Human Rights Watch is the parent organization of America's Watch, which released a report last month titled ''Harvesting Oppression: Forced Haitian Labor in the Dominican Sugar Industry.''

#90192u2618 07/11/1990 ~United Press International

NEW YORK (JULY 11) UPI - Promoter Don King Wednesday testified he never tried to stop the Feb. 11 Buster Douglas- Mike Tyson bout in Tokyo when he pointed out Douglas received a long count after an eighth- round knockdown.

King said he was merely trying to point out referee Octavio Meyran's error in giving Douglas too much time to get up. Douglas went on to knock out Tyson two rounds later to capture the heavyweight championship.

Douglas is trying to break his exclusive promotional contract with King on grounds King breached that contract by his actions in Tokyo. King countered with a breach of contract suit against the champion and his manager John Johnson, and sued The Mirage Hotel and Casino in Las Vegas, Nev., for interfering with that contract.

King was cross-examined Wednesday by Mirage attorney John Sharer before Justice Robert Sweet and a six-person jury at U.S. District Court.

''You're saying you did not try to stop the fight?'' Sharer asked King.

''I didn't try to stop it. I tried to point out an error ...'' King replied.

When read a deposition in which he said he was trying to stop the Tokyo fight, King said at the time he was merely ''reemphasizing and agitating.''

''Are you saying ... your response in the first press conference (in Tokyo) was not true?'' Sherer said.

''Yes,'' King replied.

You lied to the press?'' the attorney asked.

''Yes,'' King answered.

''And today (Wednesday) you're telling the truth?'' Sharer asked.

''I'm under oath,'' King responded.

At another point Sharer asked King, who had described Douglas as ''brilliant and magnificent'' in the Tokyo fight, where was the injustice after the eighth-round knockdown.

''Not with the performance, the peformance was brilliant, nobody was questioning that,'' King said.

He then was asked if he called for a rematch in a Feb. 13 news conference in New York.

''No,'' replied King.

''It is now your position that you did not try to change the decisions?'' asked the attorney.

''Yes,'' the witness replied, explaining his actions were ''because of the blatant and egrigious error of the man in the center of the ring,'' Mexican referee Meyran.

''But, it's an injustice here if the decision holds?'' Sherer said.

''Without a rematch,'' King said.

King explained that all along he merely was asking for a rematch, because that's where he would make ''megabucks.''

''In your heart you knew you were only asking for a rematch?'' asked the lawyer.

The witness agreed.

#90193b0010 07/12/1990 ~Business Wire

SEATTLE (JULY 12) BUSINESS WIRE - Burlington Resources Inc. (BR) today reported second quarter 1990 net income from continuing operations of $51 million or $0.36 per share compared with $31 million or $0.21 per share during the same period last year. Results from discontinued operations are set out in the accompanying financial statement.

Second quarter 1990 operating income from Meridian Oil, BR's exploration and production company, increased to $54 million from $38 million a year ago. This increase reflected both higher sales volumes and an $11 million increase in natural gas contract take-or-pay recoveries.

Although prices were weak, the company was able to increase both production volumes and operating profitability primarily through its successful low-cost coalbed methane development program and other cost-efficient acquisition and drilling activities. In the second quarter of 1990, natural gas sales totaled a record 620 million cubic feet per day and were 26 percent above the 494 million cubic feet per day sold in the same quarter last year.

Crude oil sales volumes increased by 16 percent, rising to 33,600 barrels per day from 29,000 barrels per day a year ago. Natural gas prices averaged $1.25 per thousand cubic feet during the second quarter, 13 percent below the average in the same quarter a year ago. Oil prices also declined by 13 percent from the prior year quarter to $16.91 per barrel.

Second quarter 1990 operating income from El Paso Natural Gas, the company's interstate pipeline, was $44 million compared with $42 million a year ago. Pipeline throughput increased by six percent to 3.6 billion cubic feet per day primarily due to higher off-system deliveries to new markets.

In the first six months of 1990, net income from continuing operations totaled $120 million or $0.83 per share. During the same period in 1989, BR's net income was $84 million or $0.55 per share. Higher earnings for the first half of 1990 were largely the result of volume-related increases in Meridian's operating income.

BOULDER, CO (JULY 12) BUSINESS WIRE - Exabyte Corp. (NASDAQ:EXBT) Thursday reported net income for the quarter ended June 30, 1990, of $8 million, or 38 cents per share.

Net income for the comparable period in the previous year was $2.3 million or 13 cents per share. Second quarter revenues increased by 150 percent to $46.3 million from $18.5 million for the same period last year.

For the six months ended June 30, 1990, the company reported net income of $14.7 million, or 70 cents per share. Net income for the comparable period in the previous year was $5.5 million, or 30 cents per share, including extraordinary gains from the utilization of income tax carryforwards of $1.25 million, or 7 cents per share.

Revenues for the 1990 six-month period were $86.8 million, an increase of 159 percent over revenues of $33.5 million for the equivalent period of last year.

Exabyte Corp. develops, manufactures and markets high-capacity 8mm cartridge tape subsystems which are used primarily with workstations, network file servers and minicomputers.

SANTA CLARA, Calif. (JULY 12) BUSINESS WIRE - Siliconix Inc. (NASDAQ1/4NMS:SILIQ) announced Thursday that it has filed a Notice of Motion with the Bankruptcy Court, seeking approval of a new agreement with International Rectifier Corp. covering the patents that were the subject of the litigation between them that began in July 1986.

A hearing on the motion will be held on July 30. If the agreement is approved by the Court, Siliconix will pay International Rectifier a one-time license fee of $250,000 and will acquire a royalty-bearing license under the litigated patents.

The new agreement will terminate on August 29, but may be extended beyond that date by International Rectifier, in its sole discretion, upon payment by Siliconix to International Rectifier of a fee of $20,000 per week.

This agreement is intended to replace the previous License Agreement that had been scheduled to expire on July 15, because it was not approved by the Bankruptcy Court at the hearing held on June 28.

Siliconix believes that the new agreement adequately responds to the objections previously raised by the Court in refusing to approve the previous License Agreement with International Rectifier.

Settlement of the patent litigation itself is also subject to Bankruptcy Court approval and will be considered by that court in due course.

Siliconix is a leading supplier of advanced semiconductor products for motor controls, power supplies, computer peripherals, telecommunications, instrumentation and automotive systems.

In business for 28 years, Siliconix is a publicly traded company on the NASDAQ National Market System.

SANTA CRUZ, Calif. (JULY 12) BUSINESS WIRE - Robert Prough, president of The Henry Wine Group, has announced that Drake Farms Trucking of San Luis Obispo will serve as the wine distributor's long-haul carrier.

Drake Farms Trucking will link the statewide distribution network of The Henry Wine Group's family of companies: Central Coast Wine Company in Santa Cruz, Wine Exchange in San Luis Obispo and Vintage House Distributors in Huntington Park.

A family-run firm, Drake Farms Trucking started in San Luis Obispo in 1985 and specializes in refrigerated transportation. President John Drake is looking forward to the association: ''The basis of our operation is quality and service. We're excited about being in on the ground floor with The Henry Wine Group. We'll do the job they need us to do, and we'll grow together.''

Drake's modern fleet of tractors and refrigerated trailers will truck The Henry Wine Group's orders from their 30,000-square-foot Santa Cruz warehouse to their distribution warehouses in San Luis Obispo and Southern California. The breakpoint delivery system will move wine throughout California five days a week and within 24 hours after the order is placed.

Prough commented on the appointment: ''Drake shares our commitment to a higher level of service, and their integrity is excellent. They do business the way we would do business if we were in the trucking industry. We are proud to have Drake contribute to the quality of distribution of The Henry Wine Group.''

As importers, wholesalers and distributors of premium wines, The Henry Wine Group offers California, Oregon and Washington vintages, as well as a

broad selection of imports from Europe.

#90193b0052 07/12/1990 ~Business Wire

INDIANAPOLIS (JULY 12) BUSINESS WIRE - INB Financial Corp. (NASDAQ:INBF) today reported second quarter net income of $1,604,000 or 8 cents per share, fully diluted.

This compares to second quarter 1989 net income of $16,228,000 or 89 cents per share, fully diluted. As previously announced, the corporation strengthened its reserve postion with an additional $20.0 million provision for credit losses during the 1990 second quarter.

Net income for the first six months of 1990 totaled $15,970,000 or 87 cents per share, fully diluted, compared to $28,592,000 or $1.57 per share fully diluted, for the first six months of 1989. The results for all periods include the recently acquired CSB Inc., parent company of the former Chesterton State Bank, accounted for as a pooling of interests.

A higher level of nonperforming assets also reduced the earnings for the 1990 second quarter. Nonperforming assets totaled $108.0 million on June 30, 1990 compared to $79.5 million on March 31, 1990, an increase of $28.5 million. Over 80 percent of this increase was in loans that meet previously agreed to terms and conditions and are current or less than 90 days past due as to principal and interest.

The increase in nonperforming assets was the result of an in-depth review and analysis of the loan portfolio in light of current market conditions, with particular emphasis on non-residential real estate loans. As of June 30, 1990 nonperforming real estate loans totaled $58.2 million, of which $55.8 million were construction and commercial mortgage loans.

Nonperforming assets as a percent of loans and other real estate owned were 2.71 percent on June 30, 1990 vs. 2.00 percent on March 31, 1990. Reserves as a percent of nonperforming loans were 70.6 percent on June 30, 1990 and 81.5 percent on March 31, 1990. Accruing loans past due 90 days or more totaled $13.8 million on June 30, 1990 and March 31, 1990.

The allowance for credit losses increased to $74.4 million or 1.87 percent of loans on June 30, 1990, up from $62.2 million or 1.57 percent of loans on March 31, 1990 and $54.5 million or 1.39 percent of loans on June 30, 1989. Net charge-offs totaled $15.3 million for the 1990 second quarter vs. $9.9 million for the same quarter in 1989. Commercial loans accounted for the majority of the increase in net charge-offs.

Tax equivalent net interest income totaled $54.4 million for the 1990 second quarter vs. $55.6 million for the same quarter last year. Net interest margin was 4.10 percent for the 1990 second quarter and 4.30 percent for the 1989 comparable quarter. Both net interest income and net interest margin were reduced by a higher level of nonaccrual loans, the securitization of $75 million of credit card loans in July of 1989 and the sale of approximately $96 million national affinity credit card loans early in the second quarter of 1990. Pursuant to a prior agreement, the national affinity credit card loans were sold at book value with the corporation continuing to service these accoaunts.

For the first six months of 1990, tax equivalent net interest income totaled $111.7 million compared to $111.2 million for the same period in 1989. Net interest margin was 4.24 percent and 4.35 percent for the first six months of 1990 and 1989, respectively.

Noninterest income totaled $25.0 million for the 1990 second quarter vs. $25.5 million for the 1989 comparable quarter, or $23.1 million when a non-recurrig item of $2.4 million is excluded from 1989. Credit card fees increased $925,000 or 17.4 percent, primarily due to servicing of accounts while trust fees and commissions were up 10.4 percent and service charges on deposit accounts increased 9.1 prcent. For the first six months of 1990, noninterest income totaled $50.1 million compared to $48.9 million for the same period in 1989. Investment securities losses were $54,000 in 1990 vs. gains of $481,000 for the first six months of 1989.

Noninterest expense for the 1990 second quarter totaled $48.9 million and $96.8 million for the first six months of 1990. This compares to $47.2 million for the 1989 second quarter and $93.7 million for the first six months of 1989. Adjusting for a change in the state tax law effective Jan. 1, 1990, noninterest expense increased 6.9 percent over the 1989 second quarter and 6.7 percent over the first six months of 1989.

Total assets on June 30, 1990 were $5.99 billion compared to $6.01 billion a year ago.

Loans totaled $3.98 billion on June 30, 1990 compared to $3.93 billion on the same date in 1989. Total loans were reduced approximately $171 million since June 30, 1989 from the previously mentioned securitization of credit card loans and the sale of national affinity credit card loans.

Deposits totaled $4.69 billion on June 30, 1990 compared to $4.47 billion on the same date in 1989.

Shareholders' equity totaled $415.5 million on June 30, 1990 compared to $422.8 million on June 30, 1989. This decrease can be attributed to the addition of an Employee Stock Ownership Plan feature to the corporation's

existing 401(k) plan in February 1990.

As of June 30, 1990, the trustee had acquired $31.3 million of the approximately $33 million of the corporation's common stock to be acquired prior to Dec. 1, 1990. On June 30, 1990, the corporation's equity capital ratio was 6.94 percent, the primary capital ratio was 8.08 percent and the total capital ratio was 8.91 percent.

INB Financial Corp. is a multi-bank holding company based in Indianapolis. The corporation's bank affiliates provide a full range of banking and trust services to individuals, businesses, other institutions and government agencies located primarily in Indiana and the central Midwest. Through its bank-related affiliates, the corporation also provides a diverse portfolio of financial services, including mortgage banking, leasing, insurance and brokerage services.

EUGENE, OR (JULY 12) BUSINESS WIRE - A 19 percent gain in net income has been achieved by Centennial Bancorp for the six month period ended June 30 1990.

Centennial Bancorp (formerly Valley West Bancorp) is the parent company for the Eugene-based Centennial Bank and Centennial Mortgage Co.

Net income for the six month period ended June 30, 1990, was $711,735, or 39 cents per share, as compared to $600,380, or 34 cents per share, for the same six month period of last year. The improvement is due to the strong Eugene-Springfield economy, allowing for continued growth in the loan portfolio and continued favorable interest rate margins.

Total assets at June 30, 1990, were $105,721,730 as compared to $92,976,149 at June 30, 1989. This represents a 14 percent increase in size for the Eugene-based bank holding company.

#90193b0054 07/12/1990 ~Business Wire

LOS ANGELES (JULY 12) BUSINESS WIRE - Corporate Data Sciences Inc., (NASDAQ:CODS)(PSE:CDS), announced Thursday that effective July 17, 1990, James Frew, the chairman and a director of Consolidated Packaging Corp. (CPC) will resign as an officer and director of CPC in order to pursue other diversified interests.

Frew, however, will continue in a consulting capacity on behalf of the company which is the beneficial owner of approximately 92 percent of the outstanding shares of common stock of CPC.

Frew's resignation is also a prelude to the anticipated involvement of a new investor group which the company anticipates will be beneficial in assisting with the financing of future growth.

CDS has been advised by Nelson Asset Management Limited (Nelson), which entity beneficially owns approximately 37 percent of the outstanding shares of the company's stock, that it is involved in detailed negotiations with respect to ownership of the company.

These negotiations are being held with the new investor group as well as with Polly Peck PLC and Telfos Holdings, PLC, the U.K. companies from which Nelson originally acquired its company shareholdings and with which Nelson maintains credit facilities.

In light of such negotiations, Polly Peck has extended the due date of its facility with Nelson until August 30, 1990, to permit the parties adequate time to reach a satisfactory conclusion to the negotiations.

The details of any agreements with such investor group have not been finalized at this time and no assurances may be given that any such agreements will be entered into. The company will provide additional information on any further developments.

The company also announced that it is in the process of completing the exchange of it's Medallion Kitchens subsidiaries for 16.9 million shares of ARIL common stock and CDS will then own, including its current position

22,119,256 shares of ARIL representing approximately 81 percent.

CDS will distribute its 22,119,256 shares of ARIL pro-rata to CDS shareholders of record on Jan. 22, 1990 on the basis of 1.63 shares of ARIL for each one share of CDS held, immediately after the completion and closing of the exchange, which is currently expected to take place before the end of the month.

SAN FRANCISCO (JULY 12) BUSINESS WIRE - Richard H. Finn, 55, the current president of Transamerica Finance Group, Transamerica Corp.'s finance arm, has also been elected that company's chief executive officer.

Finn succeeds Arthur E. Van Leuven who will remain Transamerica Finance Group's chairman until his scheduled retirement Nov. 30, 1990 at age 65. Van Leuven will also continue his positions with Transamerica Corp. as both an executive vice president and a director until that date.

Transamerica Corp.'s chairman and chief executive officer James R. Harvey stated that, ''Dick Finn's appointment is part of the orderly process of management transition at our Finance Group, as Art Van Leuven approaches the end of his distinguished 44 year career with Transamerica.

''Dick Finn has served in a series of increasingly responsible positions within Transamerica's finance operations. That experience has prepared him well for his new role as the head of all of Transamerica Corp.'s finance activities.''

Finn has been with Transamerica since 1979, when Transamerica Corp. acquired Interway Corp. (now Transamerica Leasing). He was named president and chief executive officer of Transamerica Leasing in 1981 and became its chairman in 1988.

Finn became president of Transamerica Finance Group when that Group, which combines Transamerica's consumer finance, commercial finance and leasing activities, was formed on Jan. 1, 1989.

The presidents of Transamerica Finance Group's three principal subsidiaries, Transamerica Financial Services, Transamerica Commercial Finance, and Transamerica Leasing, will now report directly to Finn in his new position as Transamerica Finance Group's chief executive officer.

Finn earned undergraduate and master's degrees in economics at Oxford

University. Prior to joining what is now Transamerica Leasing, in 1967, Finn served as a consultant with the management consulting firm of McKinsey & Co.

Transamerica Finance Group Inc., which is based in Los Angeles, has nearly $9 billion in assets and is the 3rd largest independent finance company in the United States. In 1989, Transamerica Finance Group earned $183 million after-tax.

San Francisco-based Transamerica Corp. is one of the world's largest financial services organizations, with over $30 billion in assets. The company, whose activities are concentrated principally in finance and insurance, earned $332 million after-tax in 1989 on consolidated revenues of $6.8 billion.

#90193b0065 07/12/1990 ~Business Wire

BEVERLY HILLS, CA (JULY 12) BUSINESS WIRE - The U.S. Navy has awarded Litton's Guidance & Control Systems division $33.2 million to produce 185 more Carrier Aircraft Inertial Navigation Sets (CAINS II) for the Navy's F/A-18, F-14D and AV-8B combat aircraft.

This funding is the Navy's 1990 production option on an earlier contract for these laser gyro navigation sets, designated AN/ASN-139. Current production contract value to Litton under the CAINS II program totals approximately $60 million for 343 sets.

The 1990 option includes purchase of 44 of the sets by the government of Kuwait under the U.S. foreign military sales program.

Work under the new award is expected to run through June 1992 and will be done at the Litton division's facilities in Woodland Hills, Calif., Salt Lake City, and Grants Pass, Ore.

Litton is the only company producing laser gyro inertial navigation systems for both U.S. Navy and Air Force tactical aircraft. The company's Guidance & Control Systems division, based in Woodland Hills, is the world leader in military aircraft inertial navigation systems.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

#90193b0068 07/12/1990 ~Business Wire

LOS ANGELES (JULY 12) BUSINESS WIRE - Allen C. Miech, 51, has been elected chief executive officer of Transamerica Financial Services, Transamerica Corp.'s consumer lending subsidiary.

The chief executive officer designation is in addition to Miech's current position as president of Transamerica Financial Services.

Miech will now report to Richard H. Finn, president and chief executive officer of Transamerica Finance Group, the Transamerica Corp. subsidiary that oversees Transamerica Corp.'s combined consumer finance, commercial finance, and leasing activities.

Miech formerly reported to Arthur E. Van Leuven, who had been chairman and chief executive officer of Transamerica Financial Services. Van Leuven has relinquished both titles in anticipation of his scheduled retirement Nov. 30, 1990, at age 65. Van Leuven will retain his posts as chairman of Transamerica Finance Group and as an executive vice president and a director of Transamerica Corp., until he retires.

Commenting on Miech's appointment, Transamerica Corp.'s chairman and chief executive officer, James R. Harvey stated: ''In his 28 year career with Transamerica Financial Services, Al Miech has gone all the way up the managerial ladder. He has occupied every line management position and, as a result, is superbly qualified to oversee the future growth of Transamerica's consumer finance activities.''

Harvey also commented: ''It is a tribute to Art Van Leuven's leadership that an outstanding, experienced management team is in place, ready to continue moving Transamerica Financial Services ahead as Art approaches retirement.''

Miech was named president and chief operating officer of Transamerica Financial Services in 1988. He also serves as senior vice president and a director of Transamerica Finance Group. Miech has held a variety of increasingly responsible managerial positions with Transamerica Financial Services from 1962 to the present. His previous positions included: executive vice president, vice president and chief credit officer (both at the Los Angeles home office of Transamerica Financial Services), and regional vice president for Northern California.

Miech was born in Milwaukee, and attended the University of Wisconsin in Milwaukee.

Los Angeles-based Transamerica Financial Services operates 428 consumer finance branch offices in 30 states. The company had $3.1 billion of consumer finance receivables outstanding at March 31, 1990, and earned $77.2 million after tax in 1989.

San Francisco-based Transamerica Corp. is one of the world's largest financial services organizations, with over $30 billion in assets. The company, whose activities are concentrated principally in finance and insurance, earned $332 million after-tax in 1989 on consolidated revenues of $6.8 billion.

#90193b0077 07/12/1990 ~Business Wire

BARTLESVILLE, OK (JULY 12) BUSINESS WIRE - Phillips Petroleum Co. Thursday announced that its board of directors on July 9 approved the extension of a leveraged employee stock ownership program first instituted in 1988.

The ESOP will borrow approximately $400 million, guaranteed by Phillips, to purchase shares of authorized, but unissued, common stock from the company. Based on recent market prices, approximately 15 million shares would be purchased. Proceeds from the sale will be used by the company to retire existing debt and maintain the company's current total debt level at about $4 billion.

The necessary borrowing and ESOP share purchase are expected to be completed later this year.

Phillips' existing ESOP, a part of the company's Long-Term Stock Savings Plan, provided for an annual allocation of stock to participating employees through 1998. New shares purchased will provide for an annual allocation of approximately 1 million shares to participants for up to seven additional years. The remainder of the new shares will be primarily substituted for shares which would have been purchased on the open market for ESOP dividend reinvestment purposes.

Employee benefit plans currently own about 19.5 percent of Phillips' common stock. The additional purchase of stock by the ESOP is expected to bring ownership by the plans to around 25 percent.

Phillips currently has approximately 245 million shares outstanding and

had announced in December of 1989 a $250 million stock repurchase program. Silas said repurchases were limited to $15 million because of newly anticipated capital investment requirements and debt management objectives. He said additional repurchases most likely would not be made during the remainder of the program's authorized term, which ends Dec. 31, 1990. However, he said the company will give consideration to further stock repurchase programs in the future.

VANCOUVER, BRITISH COLUMBIA (JULY 12) BUSINESS WIRE - Bethlehem Resources Corp. (TSE,VSE:BTH; NASDAQ:BTHMF) announced that drilling will commence within one week on its 50 percent owned Irish Gulch Zn-Pb-Ag massive sulphide property located 60 km east of Helena, Mont.

The property, held under a joint venture agreement with Goldpac Investments Ltd., who is also the operator, is comprised of 119 claims totalling 1400 hectares.

There is a long history of exploration interest in the area dating back to the late 1800's however, it is largely untested. In May 1989, the joint venture began a grassroots exploration program of mapping and prospecting which discovered significant stratiform lead-zinc-silver mineralization at surface. Geologically the property shows strong similarities to the Sullivan deposit owned by Cominco Ltd. and considered to be one of the largest lead-zinc deposits in the world.

Bethlehem and Goldpac intend to spend US$125,000 on a work program comprised primarily of diamond drilling. Discussions are currently being held with major mining companies interested in participating in the joint venture.

VALENCIA, CALIF. (JULY 12) BUSINESS WIRE - The Newhall Land and Farming Company (NYSE/PSE:NHL) announced that Gloria Glenn has been promoted to vice president, planning, of the company.

Thomas L. Lee, chairman and chief executive officer of Newhall Land, said, ''Gloria Glenn has made a substantial contribution to the company's

development of the master-planned community of Valencia. She and her staff have been instrumental in planning a balance of industrial and commercial development with residential housing.

''Her future responsibilities will continue to expand as Valencia becomes the regional center for north Los Angeles County.''

Glenn joined Newhall Land in 1978 as planning administrator and was promoted to government relations manager in 1981. She was named vice president, planning, of Valencia Co., Newhall's real estate development division, in 1985, and senior vice president of that division in 1987. Prior to joining Newhall, Glenn was with the Los Angeles County Planning Department.

Glenn is a member of the American Planning Association, and is on the General Planning Advisory Committee for the city of Santa Clarita. She also is a member of Zonta, an organization of women executives in Los Angeles County.

A graduate of California State University, Northridge, Glenn resides in Santa Clarita with her husband.

Newhall owns and is developing one of the most valuable, large landholdings in the United States -- Valencia, a master-planned community that is twice the size of Manhattan and only 30 miles from downtown Los Angeles.

#90193b0101 07/12/1990 ~Business Wire

SAN FRANCISCO (JULY 12) BUSINESS WIRE - Earnings improvements for both the second quarter and first half of 1990 were reported by Potlatch Corp. Thursday.

For the second quarter, the company's net earnings increased to $32.3 million, from 1989's $25.7 million. Earnings per common share were $1.12 a 25 percent improvement over the 89 cents reported for 1989's second quarter. Sales of $321.2 million were 8 percent ahead of 1989's $296.1 million.

Earnings for the first half of 1990 were $69.4 million, compared with $61.6 million for the like period in 1989. Earnings per common share

were $2.40 or 10 percent over the $2.19 reported in the first half of 1989. Sales for the first half of 1990 were $648 million, 9 percent above the $593.5 million reported for the first half of 1989.

Richard B. Madden, Potlatch chairman and chief executive officer, stated that the year-to-year comparisons were favorably impacted by a rescheduling of annual maintenance shutdowns from the first half to the last half of this year at two of the company's pulp-based operations.

Adversely affecting second quarter 1990 results were non-recurring expenses totalling $3.8 million related to the redemption of substantially all the $75 million principal amount of 5-3/4 percent convertible subordinated debentures on June 26, 1990.

The redemption eliminates the potential for dilution and no fully diluted earnings per share are reported for the quarter of the six months ended June 30. In 1989 fully diluted earnings per share for the second quarter and first half were 86 cents and $2.06 respectively.

For the second quarter the wood products group reported earnings of $.8 million compared with a loss of $2 million in 1989. Realizations for plywood and oriented strand board were up moderately.

''Non-recurring expenses negatively influenced second quarter results for both years,'' Madden said. ''The purchase of Blandin Wood Products Co. assets in late June, combined with continuing progress at our Lewiston, Idaho sawmill, should improve second half results for this group,'' he added.

The Northwest Paper division reported second quarter earnings of $18.4 million, down from $20.4 million in 1989. ''Despite modest increases in sales realizations and shipments during the period, earnings declined due to higher costs, some of which are still related to new equipment,'' Madden stated. ''In addition, markets which are typically soft at this time of the year have been weaker than normal recently.''

Second quarter earnings for other pulp-based businesses grew to $43.9 million from $31.4 million for the like period in 1989. This improvement was due mostly to scheduling differences related to the maintenance shutdowns at the pulp and paperboard mills.

Excellent results from the consumer products division also contributed to higher earnings. ''Even though earnings were up considerably for this group, results were hampered by a variety of significant operating problems at the Lewiston mill,'' Madden noted. ''Markets for our tissue products remain strong, while pulp prices continue to weaken,'' he added.

''Our second half results will be negatively affected by a maintenance

shutdown scheduled at our Cypress Bend, Ark., mill late in the third quarter and early fourth quarter and the extended shutdown at our Lewiston mill in the fourth quarter,'' Madden explained.

Potlatch is a diversified manufacturer of forest products with timberland in Arkansas, Idaho and Minnesota.

SAN FRANCISCO (JULY 12) BUSINESS WIRE - Beginning Friday, July 13, VISA credit card customers of Wells Fargo Bank will be able to use their VISA card to make long distance calls from any touchtone phone in the United States and in more than 170 foreign countries.

Customers who enroll in this new free service, called VisaPhone, will be issued an MCI calling card that is linked to their credit card. MCI will send a monthly statement to customers detailing their calls and the charges will appear on their monthly Visa credit card bill. Customers can sign up for the service by calling the 800 number listed on their monthly VISA statement.

According to Barbara Brady-Smith, senior vice president of Wells Fargo's credit card division, the bank's Visaphone program offers customers up to 22 percent savings over AT&T's standard card rates and up to 15 percent savings over AT&T's Universal bankcard rate.

''In today's fast-changing credit card environment, we're committed to keeping a competitive edge, and giving our customers the flexibility, convenience, and cost savings that a telephone credit/calling card can offer,'' notes Brady-Smith.

Customers who select MCI as their primary long distance carrier are also being offered PrimeTime from MCI, which offers up to 27 percent savings over AT&T's standard statement on evening and week-end hours. PrimeTime calls are billed to customers' monthly Visa bills.

Later this year, the bank plans to launch a similar program with MasterCard.

#90193b0114 07/12/1990 ~Business Wire

SAN FRANCISCO (JULY 12) BUSINESS WIRE - Bank of San Francisco Co. (ASE:BOF) reported record net income of $1,598,000, or 67 cents per share, on a fully diluted basis, for the first six months of 1990 versus $1,079,000, or 46 cents per share, for the first half of 1989, representing a 48 percent and 46 percent increase in net income and earnings per share, respectively.

Net interest income for the six months was $9,639,000, an increase of 35 percent over the $7,115,000 for the first half of 1989. Non-interest income increased 13 percent to $2,661,000.

For the second quarter of 1990, net income was $802,000, or 34 cents per share on a fully diluted basis, versus $619,000, or 26 cents per share, for the second quarter of 1989, representing a 30 percent and 31 percent improvement in net income and earnings per share, respectively.

Net interest income for the quarter was $4,910,000, an increase of 34 percent over the $3,651,000 for the second quarter of 1989. Non-interest income increased 14 percent to $1,433,000.

At June 30, the company's total assets were $363,603,000, up 25 percent from the $290,560,000 reported for the like period in 1989. Total deposits were $337,913,000, an increase of 28 percent from a year earlier. Net loans increased 27 percent over the prior year to $256,571,000.

At mid year, the allowance for possible loan losses was $4,787,000, representing 1.83 percent of total loans compared to 1.59 percent at the end of the second quarter of 1989. Stockholders' equity at June 30 was $22,382,000, or $9.84 per share.

The company's primary capital, which consists of stockholders' equity and the allowance for possible loan losses, remains strong at 7.38 percent of total assets.

''We are pleased that our strong earnings trend established in 1989 has been maintained in 1990,'' commented Donald R. Stephens, chairman and chief executive officer. ''Our efforts to continue this trend are reflected in our solid asset growth and stable margins and we continue to build our reserves.''

Bank of San Francisco Co. is the parent company of Bank of San Francisco. The eleven year old financial services company provides a broad array of credit and investment services to professionals, successful business people, and affluent individuals and to their enterprises throughout the San Francisco Bay Area.

ALHAMBRA, CA (JULY 12) BUSINESS WIRE - Glenn H. Yee, president and chief executive officer of Eastern International Bank, has announced the formal conversion of his institution to a state-chartered, commercial bank, effective June 29.

Eastern International Bank, formerly Eastern Savings Bank, is one of only two institutions in the state to both recieve regulatory approval and to complete conversion to a full-service commercial bank. Eastern International Bank had total assets at June 30 of approximately $90 million. The bank has offices in Alhambra and in Los Angeles' Chinatown.

Yee said that Eastern made the conversion to ''offer a wider range of services to our customers and to gain a more favorable environment to attract the capital for future growth.''

The California Department of Banking is reviewing applications of several savings and loans which have expressed an interest in making the conversion to a commercial bank. However, to date, only two institutions in California have received approvals by both thrift and banking regulators and have also completed the conversion process.

''We believe that because of our excellent performance and strong financial position we were allowed to make this conversion so soon,'' Yee said. ''We are very pleased to be welcomed into the family of state-chartered banks.'' He pointed out that Eastern International had capital of over 6.7 percent of assets, which is more than double the savings-and-loan standard, and well above the regulatory requirements for commercial banks.

Eastern International has also had continuity on its board of directors. Seven of the current 10-member board were founding directors, and the chairman, Robert Chan, has served in that capacity since the institution was established in 1985. The bank's legal counsel is Ernie Leff, affiliated with the firm of Weston & Sarno of Beverly Hills. The bank's independent auditor is Deloitte & Touche.

SANTA MONICA, CA (JULY 12) BUSINESS WIRE - National Medical Enterprises Inc. (NYSE:NME) Thursday announced an investment of more than $37.2 million for the construction of two psychiatric hospitals, the expansion of three existing hospitals as well as the construction of a freestanding alcohol and substance abuse treatment center.

NME also reported the dedication of three psychiatric hospitals, one in Texas and two in Illinois, and the opening of a residential treatment center in Florida, which represent an additional investment of more than $32.4 million.

Norman A. Zober, president of NME's Specialty Hospital Group in Washington D.C., said that the company's Psychiatric Institutes of America (PIA) subsidiary is constructing an 80-bed hospital in Indianapolis and an 80-bed hospital in Topeka, Kan. PIA will add 50 beds to its Great Plains Hospital in Lawton, Okla.; 30 beds to its managed Regent Hospital in New York; and 18 beds to its Riverwood Center in Prescott, Wis.

Zober also said that NME, through its Recovery Centers of America subsidiary, is constructing a 44-bed alcohol and substance abuse treatment center in Seattle.

He reported the opening of Cedar Creek Hospital, a 60-bed hospital in Amarillo, Texas. He said that PIA dedicated Linden Oaks Hospital, an 84-bed hospital in Naperville, Ill., and Oakwood Hospital, a 60-bed facility in Rockford, Ill. PIA also opened its 40-bed Bay Harbor Residential Treatment Center in Largo, Fla.

''In the past five years, PIA has increased its capacity by more than 42 percent,'' said Zober. ''Our studies indicate that the United States could add more than 8,000 psychiatric beds in the 1990s to meet the continued increase in demand. We have indentified more than 100 additional domestic markets that could support a psychiatric hospital.''

Psychiatric Institutes of America (PIA) currently operates 68 freestanding psychiatric hospitals in 24 states with approximately 5,800 beds, while Recovery Centers of America operates 13 freestanding alcohol and substance abuse facilities in 10 states with approximately 700 beds.

In addition to the psychiatric hospitals under construction in Indiana and Kansas, PIA is currently building three hospitals in California with a total of 220 beds. The parent company, National Medical Enterprises, one of the nation's largest health care services companies, also operates acute and physical rehabilitative hospitals throughout the United States and internationally.

EMERYVILLE, CA (JULY 12) BUSINESS WIRE - ViewStar Corp., the leading network-based document imaging software vendor, has participated with Compaq Computer Corp. in several major 1990 marketing events, including the PC EXPO and AEC Systems trade shows.

ViewStar also plans to team with Compaq again at Comdex in November. The high performance of the Compaq SystemPro PC system will be highlighted at these trade shows with ViewStar's document imaging software applications demonstrating enterprise-wide imaging on Compaq products.

The ViewStar system will specifically demonstrate the performance capabilities of the new Compaq SystemPro computer and 486/25 servers.

The demonstrations include a mortgage loan processing application showing how a Compaq-based ViewStar system can be used to build a database of customer information from loan applications as they are scanned into the system. Also, a typical engineering application will demonstrate how the ViewStar system can be used to retrieve, annotate and route scanned ''E''-size drawings.

In both demonstrations, simple workflow scripts supporting mainframe access are used to create decision points directing the flow of information. Support for Standards

The ViewStar system, which is based on a standard SQL database, runs on all Compaq hardware and compatibles under MS DOS 3.1. It operates on NETBIOS-compatible networks including Novell, 3Com, Banyan, Ungermann-Bass and PC LAN.

With headquarters in Emeryville, ViewStar Corp. was founded and incorporated in February 1986 to develop network-based document image processing software for standard computing environments. Its products are sold directly through national offices in Boston, New York, Washington, Dallas, Houston, Charlotte, N.C., Irvine, Calif., Burbank, Calif., and Emeryville.

Compaq Computer Corp. is a world leader in the manufacture of PC systems, including desktop, portable and laptop personal computers. Founded in February 1982, Compaq is a Fortune 500 company with worldwide sales of $2.9 billion in 1989. Compaq products are sold in 62 countries through a network of more than 3,000 authorized Compaq Computer dealers.

SAN DIEGO (JULY 12) BUSINESS WIRE - Mitek Systems Inc. (NASDAQ:MITK) Thursday announced that J. David Ricards has joined the company as vice president, engineering.

Previously, Ricards was for eleven years associated with the Spin Physics Division of Eastman Kodak Co. in a number of senior managerial positions, most recently in new product development.

Prior to that, he held senior engineering positions with Applied Magnetics Corp. for nine years and, earlier was a development engineer with Beckman Instruments.

Commenting on the appointment, Phillip C. Thomas, president and chief executive officer said, ''With more than 16 years of management experience in the successful development and production of high-technology electro-mechanical components, assemblies and systems, David Ricards is a strategic addition to Mitek's management team.''

Ricards received a bachelor of science degree in electronics from the California State University at Long Beach in 1967. He also completed the Executive Program for Scientists and Engineers (EPSE) at the University of California at San Diego in 1984.

A member of IEEE and the UCSD-EPSE Management Association, Ricards holds several patents in his field.

Mitek Systems, based in San Diego, modifies computers, computer peripherals and digital facsimile machines in compliance with U.S. government TEMPEST standards to prevent electronic interception by unauthorized parties. Mitek's value-added TEMPEST products are used by U.S. and NATO governments and private industry in high-security applications.

SAN FRANCISCO (JULY 12) BUSINESS WIRE - Bruce L. Baird, 47, has been appointed corporate vice president of international marketing for Potlatch Corp., it was announced Thursday by John M. Richards, Potlatch president and chief operating officer.

''The new position was created in recognition of the growing importance of international markets to the company,'' Richards said.

Baird has been vice president of Idaho Pulp & Paperboard and vice president-sales of the Pulp & Paperboard Group, which is extensively involved in overseas markets particularly in the Pacific Rim. During his six years as vice president-sales for the Group, Baird was actively involved in the development of export markets for bleached board.

In his 17 years with Potlatch, Baird also served as manager of business planning for the company's Southern Wood Products Group and manager of operations control and business planning for the Northwest Paper Division.

He holds an electrical engineering degree from Vanderbilt University and an M.B.A. from Indiana University.

Baird will continue to be based in Lewiston, Idaho.

VANCOUVER, B.C. (JULY 12) BUSINESS WIRE - Polestar Exploration Inc. (VSE:PSE, NASDAQ:PSEAF) is pleased to announce a $1 million private placement and an option/joint venture agreement to place Polestar's wholly-owned Crystal Peak Garnet project into production.

Hawkeye Developments Ltd., a Vancouver based resources company, has agreed subject to Vancouver Stock Exchange approval, to purchase 445,000 shares at $2.25 with attached non-transferable warrants to purchase a like number of shares at $2.75 within a two year period.

The two companies have also signed an option/joint venture agreement whereby Hawkeye may earn a 70 percent interest in the Crystal Peak Garnet Project by making total payments of $5 million over a five year period, paying all costs to put the property into production and paying an additional 3 percent royalty on net sales.

Some of the directors of both companies have also formed a private

corporation whose objective is to raise $30 million for late-stage development and production financing of other high quality projects. Polestar will receive 200,000 common shares of this company as part of the agreement with Hawkeye and will also have opportunities to participate in such projects.

It is the intention of Polestar's board of directors to build a strong and diversified resource company. Current projects include precious metals prospects and joint ventures, industrial minerals projects and an interest in a gas and oil well scheduled for production in 1991.

MILPITAS, Calif. (JULY 12) BUSINESS WIRE - Qume Corp. (NASDAQ:QUME), a Milpitas-based supplier of computer peripheral products, has created a new separate division dedicated to development, marketing and sales of computer monitors and terminal products.

Previously, Qume's display products were managed by a marketing group within the corporation.

Appointed to head up the new division is Charles M. Lejsek, a founder and former president of Fremont, Calif.-based Link Technologies Inc., a division of Wyse Technology of San Jose, Calif. Lejsek reports to Stephen R. Bowling, executive vice president.

Also hired as the division's vice president of marketing is Shari Deriso who held the same position during her five years with Link.

Bowling said, ''The display division was established to give Qume a greater concentration on this highly competitive sector. The division will have a dedicated engineering, marketing and sales capacity that will substantially enhance Qume's success and competitiveness in all geographic regions.''

''I want to emphasize Qume's commitment to monitors and terminal products '' Lejsek said. ''We're building a motivated team and we're going after the business with greater strength and resources than ever before. Qume is a player that will demonstrate significant price/performance advantages over its competitors.''

Qume Corp. manufactures and markets page and daisywheel printers, display products and computer suppliers and accessories. In addition, the company's Data Technology Division offers disk drive controller boards, chip sets and high capacity floppy disk drives and subsystems. Qume's products are marketed worldwide through a variety of distribution channels and OEMs.

#90193b0220 07/12/1990 ~Business Wire

MOUNTAIN VIEW, Calif. (JULY 13) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) announced Thursday that its board of directors has adopted a stock purchase rights plan to protect the value of Adobe stockholders' investment in the company.

With this plan, the board has declared a dividend distribution of one common stock purchase right on each outstanding share of its common stock, which entitles shareholders to purchase stock in Adobe in the event of a hostile effort to acquire control of the company.

''The Board believes that the shareholder rights plan is a reasonable means of safeguarding the interests of Adobe shareholders given the environment of today's equity markets,'' said John Warnock, chairman and chief executive officer, Adobe Systems.

Warnock added that such a plan has been under consideration by the board for several months, and is typical of plans routinely adopted by companies and referred to as ''poison pill'' measures.

The rights dividend distribution is payable as of July 24, 1990, to shareholders of record on that date, and the rights will expire 10 years later unless redeemed at an earlier date. (The attached document further details the plan.)

Adobe Systems Inc., founded in 1982, is headquartered in Mountain View. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing and Display PostScript, a graphics software component for computer displays.

In addition, the company develops and markets a line of application software products. Revenues for 1989 were over $120 million.

Adobe Systems Inc. Shareholders' Rights Plan

The rights will not become exercisable until the earlier of a public annoucement that a person or group has acquired without board approval beneficial ownership of 20 percent or more of the outstanding common stock of the company, or the close of business 10 days after the announcement of an intent to commence a tender or exchange offer that would result in the offeror acquiring 20 percent or more of the company's common stock.

Once exercisable, each right would entitle the holder to buy a share of the company's common stock at an exercise price of $230.

If the company is acquired in a merger or other business combination transaction, each right then exercisable will entitle its holder to purchase that number of shares of the acquiring company's common stock that has a market value equal to the right's exercise price.

If any person or group acquires 20 percent or more of the company's common stock, or if such 20 percent shareholder engages in certain self-dealing transactions with the company, each holder of a right, other than the 20 percent shareholder, will have the right to purchase that number of shares of the company's common stock having a market value at the time of the transaction equal to the exercise price.

Holders of rights will not be entitled to those discount purchase rights in the event that such merger or other business combination or 20 percent acquisition results from a tender or exchange offer for all the company's outstanding shares, the terms and price of which have been determined by the company's board of directors to be both adequate and otherwise in the best interests of the company's shareholders.

The board may redeem the rights for $0.01 per right at any time prior to, or within 10 days after, the day a person or group acquires without board approval 20 percent or more of the outstanding common stock of the company.

After such time, the board may redeem the rights prior to the consummation of a business combination in which all holders of common stock are treated equally and which does not involve such 20 percent shareholder (except as a holder of common stock treated like all other holders).

In the event any person or group acquires 20 percent or more of Adobe stock or engages in any of the types of transactions, acquisitions or other events described above as self-dealing transactions, the board may require all or any portion of the outstanding rights to be exchanged for common stock on a pro-rata basis at the rate of one share of common stock per outstanding right.

However, any rights held by any such 20 percent shareholder would not be entitled to participate in this exchange.

Until the rights become non-redeemable, the company may, except with respect to the redemption price, amend the rights in any manner, including without limitation, an amendment that provides that all the rights shall become exercisable for shares or fractions of shares of preferred stock of the company that are economically common stock equivalents.

After the rights become non-redeemable, the company may amend the rights in any manner which does not adversely affect the interests of holders of the rights.

Note to Editors: PostScript and Display PostScript are registered trademarks of Adobe Systems Inc.

LOS ANGELES (JULY 12) BUSINESS WIRE - Wayne H. Patterson, chairman of the board and chief executive officer of LIVE Entertainment Inc. (NASDAQ:LIVE) Thursday announced he has accepted the resignation of Gilbert L. Wachsman chief executive officer of Lieberman Enterprises Inc., the Minneapolis-based rackjobber and wholly owned subsidiary of LIVE.

Patterson noted that Wachsman had resigned his position in order to pursue other business activities.

Patterson announced that, as chairman of the board of Lieberman, he would be taking a greater role in the day-to-day operation of Lieberman's business activities. In addition, Devendra Mishra, president of LIVE, will immediately become acting chief executive officer of Lieberman.

Patterson also announced that Bill Frederick has joined Lieberman as senior vice president, finance, and chief financial officer from the Oster/Sunbeam Companies, where he was vice president, finance and administration. Patterson pledged the complete support of LIVE to Lieberman during the transitional period.

Lieberman, one of the country's leading rackjobbers of home video, music and personal computer software, is a wholly owned subsidiary of LIVE Entertainment, a diversified entertainment software producer, distributor and retailer with headquarters in Los Angeles.

LIVE is also the parent company of Los Angeles-based home video supplier International Video Entertainment Inc. (IVE); the LIVE Specialty Retail Group, with headquarters in Milford, Mass., which includes Strawberries Records, Tapes & CDs, the leading specialty music retail chain in the New

England area, and Waxie Maxie, a leading specialty music retail chain based in the Washington metropolitan area; and indirect subsidiary VCL/Carolco Communications GmbH, a home video distributor based in Munich.

#90193b0618 07/12/1990 ~Business Wire

SAUSALITO, Calif. (JULY 12) BUSINESS WIRE - SBT Corp. has announced the release of SBT Accounts Receivable and SBT Sales Orders, Version 6.35.

New features in Accounts Receivable 6.35 allow for balance forward vs. open item accounts, non-AR cash receipts and optional line-item tax. Features new to Sales Orders 6.35 include explosion of assemblies during shipping, improvements to C.O.D. tag printing, a sales tax by tax code report, automatic sales order printing, automatic report recalculation, and optional line-item tax.

New features in SBT Accounts Receivable 6.35 --

-- Balance Forward vs. open item accounts allows the user to choose whether prior period activity appears in detail on statements, or whether it appears as a single balance forward summary line.

-- Non-AR cash receipts is used to enter cash receipts that do not arise from customer transactions, such as tax refunds, insurance payments and royalties.

-- The optional line-item tax allows line items to be taxed at 26

different tax rates. This feature accommodates users of VAT (value-added tax), as well as circumstances where differential tax rates are required for different inventory items, or excise or other taxes are charged.

-- When linked to SBT Manufacturing, users can explode assemblies while shipping sales orders without having to enter and process sales orders, by using the explosion of assemblies during shipping option. This option reduces inventory at the component level rather than the finished goods level. For example, a retailer who sells a computer system has the capability to have his inventory reduced by the system's component parts -- the computer itself, the monitor, printer, etc.

-- When linked to SBT Accounts Receivable, the sales tax by tax code report lets the user view information included on sales orders about the VAT.

-- Automatic sales order printing automatically prints sales orders as each order is entered or revised.

-- Automatic report recalculation recalculates the Business Status Report at a user defined frequency.

-- The optional line-item tax feature has also been added to SBT Sales Orders.

SBT Accounts Receivable and SBT Sales Orders version 6.35 are compatible with the current releases of the SBT Database Libraries. Retail price is $595 per module. Users who have purchased either of the two modules in the last 45 days can upgrade to Version 6.35 for a $15 per order service charge.

#90193b0619 07/12/1990 ~Business Wire

CANTON, Mass. (JULY 12) BUSINESS WIRE - July 12, Hills Department Stores Inc. (NYSE:HDS) today announced that sales for the five week period ended July 7, 1990 increased 2.1 percent to $163.2 million from $159.9 million for the corresponding period in 1989. Same store sales for June 1990 increased 0.5 percent.

Sales for the 20 week period ended July 7 increased 7.7 percent to $752.8 million from $699.3 million for the corresponding period a year ago. Same store sales increased 4.3 percent during this period.

Stephen A. Goldberger, chairman and chief executive officer, commented,

''We are encouraged that inventory levels remain on plan, given the general softness in some of our markets. Sales of our basic product categories and specialty departments continue to exceed our expectations.''

Hills reported sales in fiscal 1989 based on a 53-week year. Consequently, the ending dates for 1990 fiscal months are one calendar week later than the corresponding 1989 fiscal month ending dates. Had the company reported results based on a 52-week year, fiscal June 1990 total and same store sales results would have reflected increases of 3.7 percent and 1.8 percent respectively. Results for the comparable 22 week calendar period would have reflected increases of 5.5 percent and 2.7 percent respectively.

Hills Department Stores Inc. is a discount store chain, operating in 14 states, with 210 locations compared with 200 stores a year ago.

SALT LAKE CITY (JULY 12) BUSINESS WIRE - Utah Medical Products Inc. (NASDAQ/NMS:UTMD), a manufacturer and marketer of proprietary medical products for use primarily in the critical care areas of hospitals, announced increases in revenues and earnings for the second quarter 1990.

Sales for the second quarter were $5,357,259, an increase of 33 percent from the $4,018,728 reported for the second quarter of 1989.

Net earnings increased 84 percent to $941,459, or 12 cents per share, from the $512,182, or 7 cents per share, reported for the like period last year. Weighted average shares outstanding were 7.82 million vs. 7.61 million in the second quarter 1989.

For the first six months of this year, sales were $10,362,020, or an increase of 33 percent, from the $7,789,509 reported for the first six months of 1989.

Net earnings for the six month period were $1,709,032, or 22 cents per share, compared with $921,383, or 12 cents per share, for the like period last year, an increase of 85 percent. Weighted average shares outstanding were 7.81 million vs. 7.57 million for the first six months of 1989.

Wm. Dean Wallace, president, stated: ''We continue to be on track to

meet our target goals for a 30 percent growth in revenues and are exceeding our 30 percent target in earnings for 1990. Sales planning for long-term growth into Asia Pacific has been undertaken through a recently announced three-year agreement with Baxter Japan Ltd. in which they have purchased exclusive distribution rights in Japan for Utah's Deltran disposable blood pressure transducer.

''Three new products were introduced in May at the American College of Obstetricians and Gynecologists in San Francisco. Additional product ideas are actively being pursued and expansion planning for our building is underway. We appreciate the solid support that the investment community and our shareholders have demonstrated over this past quarter.''

#90193b0631 07/12/1990 ~Business Wire

CUPERTINO, CA (JULY 12) BUSINESS WIRE - Apple Computer Inc. Thursday announced it has signed an agreement with Bitstream Inc., allowing Bitstream to sub-license TrueType, Apple's outline font technology, to Bitstream's original equipment manufacturers (OEMs).

This agreement will allow Bitstream's OEM customers to license both the TrueType rasterizer and outline fonts directly from Bitstream.

''Apple has licensed TrueType to Bitstream with the intent of providing TrueType capabilities to a broad OEM customer base,'' stated Jim Stoneham, Apple TrueType product manager. ''Bitstream's experience and knowledge as both a font developer and technology supplier to output device manufacturers will further advance TrueType technology into a wide variety of printing and imaging products.''

Bitstream currently licenses fonts and enabling technology to more than 370 equipment manufacturers and software developers throughout the world. With this agreement, the broad base of Bitstream OEM customers will be offered a complete solution, including the TrueType rasterizer, appropriate Bitstream resident fonts and add-on fonts to support their products.

Apple signed a similar licensing agreement with Microsoft Corp. in September 1989. The agreement with Microsoft will enable personal computers users in multivendor environments to easily share information across platforms while maintaining the high-quality text display and output that the TrueType technology offers.

''Apple's goal in licensing TrueType to both Microsoft and Bitstream is to

extend the reach of native TrueType support in the printing and imaging products used in the personal computer market,'' added Stoneham. ''As an integral part of Macintosh System Software 7.0, TrueType will be offered to all new and existing Macintosh customers.

TrueType is an advanced new scalable type technology that was designed by Apple in close cooperation with major type vendors. TrueType has been integrated into the operating system so that it is transparent to software applications, providing customers with high-quality text at any size on any output device.

Apple expects to see a large number of new fonts and applications that will take advantage of this technology when TrueType ships with Macintosh System Software 7.0 around the end of this year.

CUPERTINO, CA (JULY 12) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) Thursday announced that Sumitomo Trust and Banking Co., the world's 12th largest bank, has signed an agreement to purchase Tandem NonStop computer systems and application software from Internet Systems Corp., Chicago, to enhance its international banking services.

Tandem NonStop VLX systems will be installed in Tokyo, New York and London and a NonStop CLX system will be installed in Singapore. The Tandem network will link the bank's head office in Tokyo with branch offices in London, New York, Cayman, Los Angeles, Singapore, Hong Kong and Sydney.

Tandem was chosen for its flexibility, fault tolerance, easy expandability and ability to connect with external networks, as well as the market presence of both Tandem and Internet in the finance industry.

Sumitomo Trust and Banking Co. will use the Tandem systems to handle international financial transactions around the clock. Because the bank expects higher volumes of transactions and a broader scope of services in the future, the expandability and fault tolerance of Tandem systems were important.

Installation support for the system will be provided by Sumisho Computer Service, an Alliance member of Tandem Computers Japan Ltd.

The application software will be provided by Internet Systems Corp. Internet designs and markets integrated computer software for processing international banking transactions. The company's U.S. headquarters are

located at 200 W. Madison Street, Chicago, Ill. 60606, 312/630-0050.

Tandem Computers Inc. manufactures and markets computer systems and networks for online transaction processing. Tandem's world headquarters are located at 19333 Vallco Parkway, Cupertino, Calif. 95014. The telephone number is 408/725-6000.

SAN FRANCISCO (JULY 12) BUSINESS WIRE - The Gap Inc. Thursday reported sales of $167 million for the five-week period ended July 7, an increase of 31 percent over sales of $127 million for the comparable period ended July 8, 1989.

The company's comparable store sales increased 24 percent in June 1990 compared to an increase of 13 percent a year ago.

Sales of $693 million for the 22 weeks ended July 7, represent an increase of 24 percent over sales of $557 million for the like period in 1989. Year to date comparable store sales increased 17 percent in both 1990 and 1989.

As of July 7, The Gap Inc. operated 1,012 stores compared to 932 at July 8 1989, an increase of 9 percent.

KNOXVILLE, TN (JULY 12) BUSINESS WIRE - Bank Of East Tennessee (NASDAQ:EATN) Thursday announced results for the three and six months ended June 30, 1990.

For the three months, net interest income after provision for loan losses increased 38.9 percent to $1,744,134 from $1,256,046 earned in the second quarter of 1989. Net income for the second quarter of 1990 was $148,420, or 8 cents per share, up 33.3 percent over net income of $111,361, or 6 cents per share, for the second quarter of last year.

For the six months ended June 30, 1990, net interest income after provision for loan losses was $3,306,451, up 21.5 percent from $2,720,590 in the similar period last year.

Net income for the first half of 1990 was $282,073, or 15 cents per share, an increase of 19.2 percent over net income of $236,717, or 12 cents per share, for the first six months of 1989.

Total assets at June 30, 1990, were $179.0 million and total deposits were $156.3 million.

Commenting on the results, Fred R. Lawson, president and chief executive officer, said: ''We are pleased by the improvement in earnings reflected in our second quarter results. The bank is also on schedule to reach our target of $190 million in total assets at year end.

''During the quarter, we opened our new Mortgage Loan Department and we added two new ATMs in Blount County, which raises the Bank's total to 15 ATMs. During the last half, we expect to continue to attract new customers and to maintain a consistent level of profitable growth.''

Bank Of East Tennessee is an FDIC-insured banking institution with executive offices in Knoxville. The bank serves the East Tennessee counties of Knox, Hamblen and Blount through 10 offices.

#90193b0639 07/12/1990 ~Business Wire
GARDEN CITY, NY (JULY 12) BUSINESS WIRE - Computer Associates International Inc. (NYSE Symbol:CA) announced Thursday that the results for the first quarter ended June 30, are unlikely to meet the estimates and projections for the quarter made by most analysts and investors.

Definitive results will not be available until July 24, when they will be published as originally planned. Based on analysis of preliminary numbers, however, it appears that revenues will be significantly less than the revenues of last year's comparable quarter and, consequently, earnings may also be lower.

In making the announcement, Anthony W. Wang, president of Computer Associates stated that, ''We are, of course, disappointed with the June results. With the preliminary indications of the June results, not only are we focusing on the revenue issue, but we are also closely scrutinizing our expenditures to maintain growth in net income even if revenues for the year should be lower than expectations. We do, however, believe that our strategies for revenue growth are correct, and, at this time, we continue to be optimistic about the year as a whole.''

#90193b0643 07/12/1990 ~Business Wire

MINNEAPOLIS (JULY 12) BUSINESS WIRE - Dayton Hudson Corp. (NYSE:DH) today reported that its net retail sales for the five weeks ended July 7, 1990, increased 11.8 percent to $1.26 billion from $1.13 billion a year ago.

Comparable-store sales were up 5.1 percent from the same period a year ago.

Kenneth A. Macke, chairman and chief executive officer, said the corporation was extremely pleased with the strength of business at its Target division. ''Target's sales continue to be very strong across the board, with especially good apparel sales during the month.''

Macke said Mervyn's increase was as expected, due to a substantial calendar shift during the last week of the month. ''Mervyn's men's and kids' businesses are very good and they go into the final month of the quarter with less clearance than last year.''

The department store division's sales continue to be sluggish, reflecting what appears to be a difficult business climate in the Midwest. ''The better and contemporary pieces of this business continue to do very well '' he said.

''Our inventories are in good shape and we continue to be on track for solid performance for the year,'' Macke said.

For the second quarter, Macke said strong profit improvement from the base business is expected to approximately offset the impact in the quarter from the acquisition of Marshall Field & Co. (The acquisition was effective June 24, 1990).

June sales by business segment for the five weeks were as follows:

o Target's total sales rose 14 percent while comparable store sales were up 8 percent.

o Mervyn's total sales increased 4 percent and comparable store sales increased 1 percent.

o The department store division's total sales were up 23 percent and comparable-store sales were up 1 percent. The total sales increase for June primarily reflects two weeks' sales from Marshall Field's.

The corporation's sales for the 22 weeks ended July 7, 1990, were $5.17

billion, up 11.9 percent from $4.62 billion in the same period a year ago.
Comparable-store sales for the 22-week period were up 5.9 percent compared to the same period last year.

As of July 7, 1990, Dayton Hudson operated 688 stores in 33 states.

#90193b0646 07/12/1990 ~Business Wire

SUNNYVALE, CA (JULY 12) BUSINESS WIRE - Monoclonal Antibodies Inc. (NASDAQ:MABS) and Quidel Corp. jointly announced Thursday that they have entered into a definitive merger agreement providing for the combination of the two companies on a pooling of interests basis.

Monoclonal will issue approximately 9.7 million shares of common stock in exchange for all of the outstanding stock of the privately held Quidel.

The proposed merger is subject to certain conditions including approval by the stockholders of both companies and is expected to be completed in approximately 90 days.

Founded in 1979, Monoclonal is located in Sunnyvale, and has approximately 100 employees. Its revenues are primarily sales of diagnostic test kits directed toward the fertility market. In the most recently reported quarter ended March 31, 1990, Monoclonal reported revenues of $2.5 million and operating income of $235,000.

Quidel, headquartered in San Diego, was founded in 1982 and has approximately 200 employees. Its revenues are primarily sales of diagnostic test kits directed toward fertility, infectious disease, allergy, and autoimmune diseases. For the quarter ended March 31, 1990, Quidel's unaudited revenues were $4.7 million and operating income was $63,000.

Scott L. Glenn, president and chief executive officer of Quidel and of the new company said, ''We have long been impressed by Monoclonal's strong market position in the fertility market, which was built over the years with their ovulation predictor test kits and dedicated sales support to the physician. More recently, Monoclonal's birth control diagnostic test under development with Akzo Pharma N.V. offers a significant consumer product opportunity.

Glaze and Glenn further stated that the merger should provide the opportunity to recognize significant cost and performance benefits and

productivity increases at the new company. Consolidation of certain manufacturing operations and facilities should yield economies of scale and reduce overhead.

Likewise, the new company will pursue increased productivity from coordinated sales and marketing. The combined R&D effort will permit a broader product program by re-directing otherwise duplicated efforts. Reserves will be setup to provide for merger, consolidation, and transition expenses.

These changes are expected to adversely impact the new company's operating results for at least two quarters following the merger.

Quidel is separately negotiating with David Blech, a private investor, for an investment of approximately $7 million in Quidel equity securities prior to the merger. Blech has been a founder and investor in a number of successful biotechnology companies.

If the investment is consummated, it is expected that a portion of these funds would be used to repay certain indebtedness and other obligations of the combined companies.

Any investment by Blech is conditioned on the execution of mutually satisfactory agreements.

The new board of directors will consist of several current members of the board of each company. Thomas A. Glaze will be chairman of the board and Scott L. Glenn will be president and chief executive officer.

John D. Diekman will remain a member of the board of directors and the executive committee of the board.

Glenn and Glaze indicated that the merged company will be focused in its mission of developing, manufacturing and marketing innovative, rapid, simple-to-use diagnostic tests for fertility, allergy, infectious diseases and autoimmune diseases targeted at the physician, laboratory and home markets.

#90193b0649 07/12/1990 ~Business Wire

EASTON, PA (JULY 12) BUSINESS WIRE - SI Handling Systems Inc., traded on the Additional Over-the-Counter (NASDAQ) Exchange under the trading symbol ''SIHS,'' announces its continued profitability during the first quarter ended May 27 as follows:

	Three Months Ended	
	May 27, 1990	May 28, 1989
Sales	$6,514,000	$4,054,000
Net earnings	10,000	51,000
Earnings per share	.01	.03

The sales increase and the decrease in earnings are primarily attributable to several large orders taken in the second half of fiscal 1990 resulting from the company's successful efforts to penetrate markets for its new products which include Dispen-SI-matic, the enhanced Sorter and Automated Storage and Retrieval Systems (AS/RS), for which gross profits were reduced as a result of entry-level competitive positioning and normal production inefficiencies associated with first time products.

The company is showing far less profitability now than it can expect when it is through the ''learning curve'' for these products. The addition of these products gives SI Handling one of the broadest ranges of product offerings in the automated materials handling marketplace.

SCOTTSDALE, AZ (JULY 12) BUSINESS WIRE - Interactive Media Technologies Inc. (NASDAQ:IMTX) and Canon Sales Co. Inc. of Japan jointly announce the signing of an intent agreement for Canon Sales' exclusive distribution in Japan of IMT's present and future products, including its multimedia integration system, the IMTX 8000.

''This agreement with Canon Sales is another major step in our worldwide distribution plans. With initial IMTX 8000 product being shipped later this month, this agreement is a perfect fit for our marketing direction. We are proud to have the opportunity to enter into an agreement with a company such as Canon Sales,'' said R. Glenn Williamson, chairman and chief executive officer of IMT.

The IMTX 8000 is the industry's first multimedia integration system. It is a combination hardware and software product that will enable desktop users to produce studio-quality videos at a fraction of the time and cost involved using current technology.

Williamson went on to say, ''IMT and Canon Sales intend to turn this initial intent agreement into a full working relationship in a short period of time. We would like to see the IMTX 8000 in Canon Sales distribution channels in the fourth quarter of 1990 and we will move swiftly toward accomplishing that goal.''

Canon Sales Co. Inc., a publicly traded division of Canon International, provides exclusive sales and distribution for Canon worldwide as well as for Apple products throughout Japan.

MILPITAS, CA (JULY 12) BUSINESS WIRE - Roderick A. Young has been named president and chief operating officer of Diasonics Inc. (ASE:DIA), the company announced Thursday.

The company also announced that Dr. Ruediger Naumann-Etienne, president and chief operating officer of Diasonics since 1987, is leaving the company to form an international investment advisory firm. Naumann-Etienne will remain a member of the board of directors of Diasonics, and he will serve as a consultant to the company on a number of key projects.

Rod Young, 46, was most recently president of Toshiba America MRI Inc., the former Diasonics MRI division. Prior to Toshiba, he was Diasonics executive vice president and MRI division general manager for three years.

Before coming to Diasonics in 1987, Young spent 15 years with Raychem Corp. where he held a number of senior management positions including vice president and general manager of the Industrial Group and chief financial officer.

He holds a bachelor of science degree from Stanford University and a

master in business administration degree from the Harvard Graduate School of Business. Young and his wife, Cathy, have three children and live in Palo Alto, Calif.

''I am excited to get back to Diasonics. The company has some very attractive technology opportunities along with the financial and human resources required to succeed. I look forward to helping guide that success,'' Young said.

Stewart Carrell, Diasonics chairman and chief executive officer, stated: ''We are fortunate to have Rod Young back at Diasonics. He is a proven business leader with a track record of building strong and successful management teams. We believe Rod's insight and direction will be crucial to the company's future success.

Diasonics Inc. is a worldwide leader in the development and manufacture of computer-based medical diagnostic and therapeutic instrumentation.

#90193b0666 07/12/1990 ~Business Wire

NEW ORLEANS (JULY 12) BUSINESS WIRE - First Commerce Corp. (NASDAQ:FCOM) Thursday released its second quarter earnings of $5,207,000.

As anticipated in its announcement on June 15, 1990, net income declined 28 percent from the second quarter of 1989. During this quarter, nonperforming assets grew $12,142,000 and an $11,953,000 provision was added to the allowance for loan losses.

These actions were taken in light of the continuing soft economy, which made it necessary to build the allowance for loan losses to 2.22 percent of loans.

Earnings per share were 40 cents, vs. 58 cents in the second quarter of last year. Operating income was $5,188,000, a 30 percent decrease from last year's second quarter.

Net interest income was $41,478,000 in the second quarter, a 6 percent increase over last year's second quarter. Loan growth of 10 percent was the major factor in the 4 percent increase in earning assets in the second quarter of this year when compared to the same quarter last year.

The net interest margin was 4.33 percent in the second quarter, compared to 4.53 percent in the same quarter in 1989 and 4.33 percent in the first quarter.

Other income, excluding securities transactions, was $17,943,000 in the second quarter, a 19 percent increase over last year's second quarter. The growth of noninterest income resulted from recurring sources, principally increased fees on deposit accounts and credit card income. Operating expense was $40,475,000, 5 percent higher in the current quarter than in the same quarter of last year.

The provision for loan losses was $11,953,000 in the second quarter of 1990, compared to $5,948,000 in the same period of last year. The growth of nonperforming assets this quarter made it necessary to increase the allowance for loan losses to 2.22 percent of loans at the end of the quarter. Net charge-offs were $4,592,000 this quarter, compared to $6,233,000 in the same quarter in 1989.

Nonperforming assets were $77,548,000 on June 30, 1990, a 19 percent increase from the end of the first quarter and $4,574,000 higher than at the end of 1989's second quarter. As a percent of loans, nonperforming assets were 3.28 percent at the end of the second quarter, versus 3.12 percent one year ago and 2.76 percent at the end of 1989.

This increase was slightly less than anticipated in the June 15, 1990 announcement.

On June 30, 1990, stockholders' equity was 5.73 percent of assets, primary capital was 6.92 percent and total capital was 9.07 percent. Total assets were $4.30 billion on June 30, loans and leases, net of unearned income, were $2.33 billion and deposits were $3.55 billion.

#90193b0667 07/12/1990 ~Business Wire

FAIRMONT, W.VA (JULY 12) BUSINESS WIRE - The board of directors of CB&T Financial Corp. (NASDAQ:CBTF), Fairmont, W. Va., and the Tygarts Valley National Bank, Elkins, W. Va., jointly announced Thursday that they have entered into a definitive agreement whereby CB&T will acquire all the outstanding shares of the Tygarts Valley National Bank.

Tygarts Valley National Bank has assets of approximately $32 million.

The $3 million transaction, based upon the closng price of CB&T shares on July 1, is structured on the exchange of 2.3 shares of CB&T stock for each share of Tygarts Valley National Bank 110,000 shares outstanding. The agreement is subject to regulatory and Tygarts Valley National Bank

shareholder approval.

The Tygarts Valley National Bank Merger Agreement follows CB&T's July 3, announcement of a merger with the Bank of Hundred, Hundred, W. Va. The Hundred Bank has assets of approximately $34 million and the combined acquisition of the two banks will increase CB&T's assets to over $600 million. They will become West Virginia's sixth largest multibank holding company with 23 offices in ten north-central West Virginia counties.

In commenting on the transaction Tygarts Valley Chairman and President George Sheets, said ''We are pleased to be joining a fine company like CB&T and we believe this merger will be a substantial benefit to our customers and employees and certainly to our shareholders.

In announcing the agreement, CB&T's Chairman and President, William T. McLaughlin II, commented, ''We are especially excited about our affiliation with the Tygarts Valley National Bank. It has been a longtime goal of CB&T to merge with an Elkins bank. We believe the Randolph County area will enjoy significant economic growth during the years ahead and CB&T wants to be a part of this expansion. Our north-central West Virginia franchise is obviously enhanced by this transaction; not only in terms of the added customer base the Tygarts Valley National Bank brings to us, but, more importantly, in terms of the economic potential of the Elkins area.

It is anticipated that the transaction will be finalized during the first quarter of 1991 and that the name of the Tygarts Valley National Bank will be changed to CB&T of Randolph County, thereby giving Tygarts Valley a closer identity with the CB&T franchise.

MONTREAL (JULY 12) BUSINESS WIRE - Audrey Resources Inc. (ME,TSE:AUY) announced the discovery of an important new massive sulfide lens near the 1100 lens.

The new lens, named the ''C'' lens, was identified on section 11,200E by underground drill hole 90-11-48, which first intersected the 1100 lens over 62 feet (19 meters) then the ''C'' lens over 182 feet (55.5 meters). The following table gives the results for the massive sulfide for each lens. The intersection is at a vertical depth of 2,115 feet (645 meters) (4,655 average elevation; see attached section).

The partners in this project, Audrey (50 percent) and Minnova Inc. (50 percent), have agreed on an additional budget to conduct 10,000 feet of underground drilling on the 1100 lens and this new discovery. The feasibility study for bringing the 1100 lens into production, which was to be completed at the end of July, has been postponed one month following this new discovery.

The ''C'' lens could be the source of the strong geophysical anomaly detected in the fall of 1989, south-east of the 1100 lens, which two surface drill holes conducted in February 1990 had not been able to intersect.

MARKHAM, CANADA (JULY 12) BUSINESS WIRE - Geac Computer Corp. Ltd. (TSE:GAC) announced record earnings for the year ended April 30 of $8,150,000, compared to $4,520,000 for the previous year.

Earnings per share was 38 cents (32 cents fully diluted) for 1990, and 22 cents (21 cents fully diluted) in 1989. Income from operations, before unusual items and income taxes, increased by 66.6 percent to $2,611,000 in the fourth quarter this year, compared to $1,567,000 in the same period in 1989.

With the loss of revenue related to the sale of the Canadian Financial Division, revenue remained at $72,707,000. Revenue for the previous year was $74,791,000. In the fourth quarter, revenue was $20,459,000, slightly higher than the $20,181,000 recorded in the fourth quarter of the prior year.

''We are pleased with the continuously profitable performance of the Company and the strong financial position as evidenced by our cash balance of $13,474,000 with no bank debt, compared to $5,816,000 at the end of the previous fiscal year,'' said Stefan R. Bothe, president and chief executive officer of Geac.

Founded in 1971, Geac Computer Corp. Ltd. is Canada's largest computer software and hardware vendor, serving the library, credit union and financial services industries worldwide.

As a world leader in OnLine Transaction Processing (OLTP) solutions to its chosen markets, Geac combines unique skills in application software, systems software and hardware development on its Geac Series 8000 and Series 9000 computers, as well as on a broad range of industry standard platforms.

Geac serves over 660 libraries and financial institutions worldwide with a staff of over 500 professionals in 10 countries. Geac has development centres in Canada, the United States, the United Kingdom and France. Its world headquarters are in Markham, Ontario, Canada.

DARIEN, CT (JULY 12) BUSINESS WIRE - ActMedia, the leading in-store marketing company, Thursday announced the formation of an international division with Steven T. Henick as president.

Henick, 47, joins ActMedia from Tambrands Inc., where he was vice president - international. Henick also has many years experience developing international markets for companies including Atari Inc., and Procter & Gamble.

''Foreign markets represent tremendous opportunities for ActMedia growth '' said ActMedia CEO and president Wayne W. LoCurto. ''Our products and services will become as important to marketers in Europe as they have in the United States.''

Henick said ActMedia will look at setting up operations in a number of

countries immediately, including the United Kingdom, France, Canada and Australia.

''We'll either be acquiring companies already there or will be opening new offices,'' he said.

According to Henick, a selection of ActMedia's successful programs will be implemented where appropriate, including shopping carts, advertising on the inside and outside of grocery carts, Shelf Talk, on shelf advertising placed directly in front of the advertiser's product, Aisle Vision, over-aisle directories with advertising in the center, and POP radio.

In addition, ActMedia will be developing and training large field forces for its in-store sampling, couponing and promotional programs called ActNow and Impact.

''ActMedia has succeeded by pioneering programs that reach people in-store at the last moment before purchase decisions are made,'' said Henick.

''With the increasing worldwide concentration of retail products and outlets, there will be increasing opportunities to develop cohesive in-store programs.''

In the United States, ActMedia has established industry leadership with programs in more than 20,000 food stores in over 250 chains that cover 204 of 209 ADIs. Total sales last year exceeded $110 million.

ActMedia is based in Darien and is a wholly-owned subsidiary of Dallas-based Heritage Media Corp., a publicly-held company that trades on the American Stock Exchange.

NEW YORK (JULY 12) BUSINESS WIRE - G. Clifford McCarthy Jr. has joined Bull & Bear Group Inc. as senior vice president and co-chairman of the firm's investment policy committee with responsibility for the firm's fixed income portfolios.

The announcement was made by Bassett S. Winmill, chairman of the New York financial services firm which manages ten mutual funds and a discount brokerage service.

In making the announcement, Winmill said, ''We are delighted to have McCarthy on our management team. His outstanding track record and

expertise in the fixed-income securities markets should contribute significantly to the performance of our company's mutual funds.''

McCarthy began his professional career in 1956 as a bond trader at Salomon Brothers where, during the ensuing ten years, he became head of one of Salomon Brothers' four New York offices and, in 1968, was promoted to partner.

From 1971 to 1981, he was vice president, Citicorp Investment Management, where he directed the bank's fixed income department.

Before joining Bull & Bear, McCarthy was vice president of Balfour Maclaine Capital Markets and a general partner of Printon, Kane & Co. In both posts, his responsibilities centered on high yield bond sales and trading.

McCarthy attended Wagner College and was enrolled in the University of Virginia's Executive Training Program. He is a member of the Bond Club of New York. He and his wife live in Harmon Cove, N.J., and have one grown daughter.

LEVITTOWN, NY (JULY 12) BUSINESS WIRE - Quantech Electronics Corp. (OTC) Thursday reported results for its fiscal year ended March 31, 1990 (''Fiscal 1990'').

For fiscal 1990 revenues were $2,457,857 as compared with $2,760,954 in the prior fiscal year. There was operating income of $191,238 as compared to $238,779 in the prior fiscal year.

After extraordinary items there was income before earnings in investment of affiliate of $261,708 during the current fiscal year as compared to $230,852 in the prior year.

Including earnings (loss) in investment of affiliate, there was net income of $319,994, or 7 cents per share, versus a net loss of $70,989, or 3 cents per share, for the prior fiscal year. This is a positive swing of $390,983.

There were 4,649,797 weighted average shares outstanding in the current fiscal year as compared to 2,135,000 in the prior year.

Richard S. Kalin, co-chief executive officer, said, ''I am gratified by

Quantech's return to profitability. We intend to pursue new opportunities with renewed vigor and believe we will be reporting the results of some initiatives shortly.''

Quantech Electronics Corp., through its AAA Installation and Maintenance subsidiary, is the largest independent consumer electronic service organization in the greater New York metropolitan area. The company also owns 47.5 percent of Micronetics (NASDAQ:NOIZ), a manufacturer of solid state noise devices, microwave switches and devices and other microwave components and sub-assemblies.

HUDSON, NH (JULY 12) BUSINESS WIRE - Micronetics Inc. (NASDAQ:NOIZ) Thursday reported results for its fiscal year ended March 31 (Fiscal 1990).

For Fiscal 1990, revenues were $3,166,945 as compared with $2,930,477 in the prior fiscal year. This represents an increase of $236,468, or 8.1 percent. There was a pre-tax profit of $119,728 as compared with a pre-tax loss of $640,885 in the prior fiscal year.

There was net income of $118,228, or 6 cents per share, for Fiscal 1990 as compared to a net loss of $567,526, or 30 cents per share, in the prior fiscal year. For Fiscal 1990, this includes an extraordinary item of $31,600, or 2 cents per share. This is a positive swing of $685,484.

Richard S. Kalin, chairman, stated, ''I am encouraged by the company's increased shipments and return to profitability during Fiscal 1990. It primarily reflects the integration of the company's acquisition of New England Microwave and move to New Hampshire last year.
Many problems we inherited have been solved, and I expect to report continued increases in sales and earnings in future periods.''

Micronetics Inc., operating through its Micronetics and New England Micronetics' Divisions, is a leader in the design and manufacture of solid state noise sources and noise generators, microwave switches (solid and coaxial) and drivers, used in electronic control devices, communication systems, electronic counter-measures, airborne radar and other sophisticated defense and telecommunications systems.

#90193b0701 07/12/1990 ~Business Wire

NEW YORK (JULY 12) BUSINESS WIRE - IBM Corporation and Diebold, Incorporated Thursday announced they have signed an agreement providing for the formation of a joint venture that will provide self-service banking systems worldwide.

The new firm will be located in Canton, Ohio, and is anticipated to begin operations later this year, subject to the completion of procedural requirements outside the United States. Terms of the agreement were not disclosed.

Worldwide Marketing Plan In the U.S., the joint venture and Diebold will market the combined product line with assistance from IBM. Outside the U.S., IBM will market and service the combined product line. From August until the joint venture is finalized later this year, IBM World Trade will sell Diebold ATMs under an international distribution agreement. Diebold and IBM will continue to manufacture their existing products under agreements with the joint venture. As part of its business, the joint venture will offer existing products developed by Diebold and IBM. This includes Diebold's ATM products, the MDS 1000 family, as well as the IBM 473X line of personal banking machines. The principal function of the venture, however, will be to develop new ATM and self-service products that will better serve the financial community. The joint venture, along with Diebold and IBM, will support current customers who have these systems installed, as well as work on expanding its application systems and hardware platforms to meet new requirements.

Diebold, Incorporated (NYSE:DBD) is a world leader in the automation of self-service transactions, security products, software and service for these systems. Headquartered in Canton, Ohio, Diebold maintains offices worldwide.

IBM is in the business of applying advanced information technology to address specific needs of customers around the world. The company provides solutions incorporating information processing systems, software, communications systems and other products and services. These solutions are provided by IBM's worldwide marketing organizations, as well as through the company's business partners, including authorized dealers and remarketers.

#90193b0705 07/12/1990 ~Business Wire
CANTON, OHIO (JULY 12) BUSINESS WIRE - Diebold, Inc. Thursday announced that it has signed an agreement to purchase certain assets of IBM Corporation's National Service Division, including existing automated teller machine (ATM) maintenance agreements and service parts inventories required to support the installed base of IBM ATMs in the United States.

Terms were not disclosed. Diebold said it expected the purchase to be completed in the second half of this year subject to regulatory approval.

Robert W. Mahoney, Diebold's chairman and chief executive officer, said, ''This acquisition, which is expected to increase Diebold customer service revenue by approximately 10 percent, fits perfectly into our strategic growth plan. We announced today that Diebold and IBM have signed an agreement providing for formation of a joint venture.

'' That transaction enhances the importance of our servicing organization. Upon consummation of the joint venture, Diebold will be providing service for the joint venture's current and future products in the United States.''

IBM Vice President Marvin L. Mann said, ''Because Diebold has an excellent reputation for service quality, we are confident that our customers will be well served by this transaction.

''All of IBM's ATM service contracts will be honored by Diebold, which is committed to not only delivering quality service but to the smooth integration of IBM customers into Diebold's service program, which is centralized through its Customer Response Center.''

Diebold, Incorporated (NYSE:DBD) is a world leader in the automation of self-service transactions, security products, software and service for these systems.

Diebold's 2,300 service professionals in 400 North American locations service more than 500,000 pieces of equipment in more than 50,000 locations for over 13,000 customers in the financial and commercial industries. Headquartered in Canton, Ohio, Diebold maintains offices worldwide.

#90193b0710 07/12/1990 ~Business Wire

VANCOUVER, BC (JULY 12) BUSINESS WIRE - Galactic Resources Ltd. (''Galactic'') announced Thursday that pursuant to agreements with 10 shareholders of Cornucopia Resources Ltd. (''Cornucopia'') it has acquired by private purchase 3,165,250 common shares of Cornucopia, representing 16.34 percent of Cornucopia's outstanding shares, on the basis of 0.5 of a common share of Galactic for each common share of Cornucopia.

The Cornucopia shares were acquired for investment purposes, as well as to facilitate a possible business combination with Cornucopia.

Galactic has proposed to Cornucopia that negotiations be entered into with a view to effecting a proposed business combination of the two

corporations on terms to be mutually agreed upon. Galactic has proposed that it would issue 0.5 of a common share of Galactic for each outstanding share of Cornucopia.

A decision to proceed with a business combination and, if so, the final share ratio are both subject to settlement of the terms of a definitive agreement, the receipt of all necessary approvals and the receipt of a fairness opinion from Galactic's independent financial advisors.

The share purchase agreements also contemplate the payment of additional Galactic shares if within one year Galactic acquires, other than by normal market purchase made through the facilities of a stock exchange, additional Cornucopia shares for a consideration greater than 0.5 of a Galactic share per Cornucopia common share. Galactic may acquire additional shares of Cornucopia.

Certain of the Cornucopia shares to be acquired by Galactic pursuant to the agreements referred to above have been acquired form Robert M. Friedland, Vice Chairman, of Galactic and from his wife.

Galactic produces gold at the Ridgeway Mine in South Carolina with joint venture partner The RTZ Corporation PLC, and its wholly owned Summitville Mine in Colorado. Galactic and Cornucopia are joint venture partners in the Ivanhoe property located on the Carlin Gold Trend in Nevada. Galactic also has precious metal development projects in California, Nevada, Canada China, and the Philippines.

Galactic Resources Ltd. trades on the American, Toronto, Montreal, and Vancouver Stock Exchanges (symbol:GLC). American Stock Exchange quotes in US $ are listed daily in The Wall Street Journal under American Stock Exchange Composite Transactions.

#90193b0726 07/12/1990 ~Business Wire

KNOXVILLE, TN (JULY 12) BUSINESS WIRE - Plasti-Line Inc. (NASDAQ:SIGN) reported second quarter sales for the period ended July 1, 1990, of $21,763,000 as compared to $23,232,000 for the second quarter of 1989, a decrease of 6 percent.

Net income was $339,000 as compared to $1,078,000 in 1989, a decrease of 69 percent. Net income per share was 9 cents as compared to 30 cents per share in 1989. For the six months, sales were $40,107,000 versus $41,939,000 for the first six months of 1989, a decrease of 4 percent.

Net income was $358,000 as compared to $1,621,000 in 1989, a decrease of 78 percent. Net income per share was 10 cents versus 45 cents per share in 1989.

Income for both periods was negatively affected by several factors, including lower sales volume at the Knoxville, location, higher manufacturing costs at all three operating locations and a less favorable product mix generally throughout the company.

According to James R. Martin, president, ''We remain cautiously optimistic that shipments and orders will improve over the remainder of the year. We have made progress in 1990 towards broadening our overall customer base and are taking steps to reduce manufacturing costs, including making key changes in manufacturing management.''

Plasti-Line Inc. produces indoor and outdoor sign products and point of purchase marketing products for corporate identification programs.

MIAMI (JULY 12) BUSINESS WIRE - Carom Capital Corporation (NASDAQ:CCCC),

headquartered in Miami, Thursday reported increased revenues and a loss for the 1990 fiscal year ending March 31.

The fiscal 1990 results include the treatment of its real estate subsidiary, Groshire Development Group, Inc., as a discontinued operation, which will allow Carom Capital to focus on its new business. The Company intends to sell the remaining properties owned by Groshire. The Company had been know as Metalbanc Corporation (NASDAQ:MBAN) until formally changing its name on May 3, 1990 to reflect its new strategic direction.

In fiscal 1990, Carom Capital had total revenues from continuing operations of $998,000 compared with $436,000 in the prior year. The Company reported a net loss of $478,000 ($.15 per share) in fiscal 1990 versus earnings of $83,000 ($.03 per share) in fiscal 1989. The fiscal 1990 results include a $150,000 loss from discontinued operations and a $325,000 writeoff of its investment in financial institutions, while those of the prior year include income from discontinued operations of $133,000 and a gain of $232,000 on the sale of the Company's precious metals business.

Howard M. Glicken, president of Carom Capital, said that ''the 1990 fiscal year was one of transition, as we evaluated acquisition candidates following the sale of our precious metals trading operations. The acquisition of a 51 percent interest in Jillian's Entertainment Corporation shortly after the fiscal year-end concluded that process and gives us clear direction for the future.''

Jillian's owns and operates upscale billiard parlors in Miami and Seattle. ''The Seattle club opened in April to rave press reviews, and construction has already begun for a new club on the waterfront in Cleveland, which is scheduled to open this summer.'' ''Carom Capital's goal is to have several additional clubs operating across the country by the end of fiscal year 1992, provided that the necessary financing can be obtained,'' said Mr. Glicken. ''We are committed to growth in the leisure market. The discontinuance of the Groshire operations will allow us to focus on the activities of Jillian's.''

GREENBELT, MD (JULY 12) BUSINESS WIRE - COMNET CORPORATION (NASDAQ/NMS Symbol: CNET) Thursday announced results for the fourth quarter and year ended March 31.

Revenues for the fourth quarter increased to $7,138,000 compared with $6,861,000 for the comparable period last year. Net earnings were $626,000 or $0.23 per share, versus a loss of $3,238,000, or $(1.21) per share for the same period the prior year.

Net earnings for continuing operations the prior year were $9,000. Net earnings for the fourth quarter ended March 31, included $175,000, or $0.07 per share from a change in accounting for income taxes, as defined under FASB Statement No. 96.

For the year ended March 31, revenues increased to $22,856,000 vs. $21,591,000 the prior year. Net earnings were $1,370,000, or $0.51 per share vs. a loss of $2,807,000 or $(1.06) per share the period ended March 31, 1989 (including reserves established for discontinued operations).

The company reported net earnings for continuing operations of $687,000, or $0.26 per share the prior year. The company's Group 1 Software subsidiary (NASDAQ/NMS Symbol: GSOF; 83 percent owned by COMNET) reported record revenues and earnings for both the fourth quarter and for the full fiscal year.

Group 1's fourth quarter revenues increased 18 percent to $6,747,000 and net earnings increased 20 percent to $1,226,000. For the full year, Group 1's revenues increased 15 percent to $20,281,000, compared with $17,710,000 the same period the prior year. Net earnings increased to $2,951,000 compared with $2,763,000 the prior year.

COMNET CORPORATION has three operating units in the computer software and services field:

GROUP 1 SOFTWARE, INC. (NASDAQ/NMS Symbol: GSOF) is the leading provider of mainframe and microcomputer (PC) software to the direct marketing industry and other volume mailers. GROUP 1 offers a broad range of list management, postal discount mail personalization and demographic database software products. The Company has offices throughout the United States and in Canada, and is represented in the United Kingdom, Australia and New Zealand.

COM-MED SYSTEMS serves the nursing home and continual health care market with computerized management systems plus professional and data processing services.

AIM Division provides computer services for direct marketing clients, plus customized graphics, forms design, laser and LED printing, PARM predictive modeling and On-Demand Publishing.

RYE, NY (JULY 12) BUSINESS WIRE - Melville Corp., a specialty retailer of apparel, prescription drugs, health and beauty aids, footwear, toys and household furnishings, Thursday reported retail store sales for the fiscal month and six month periods ended July 7.

Retail store sales for the five weeks ended July 7 were $735,144,000, an increase of 13.5 percent over sales of $647,685,000 for the five week period last year.

Retail store sales for the six month period ended July 7, increased 11.4 percent to $3,701,234,000 compared to $3,321,445,000 for the comparable period last year.

As of July 7, there were 6,926 stores and leased departments in operation, an increase of 2.5 percent from the 1989 total of 6,756.

Melville specialty retail chains, with stores located across the country, include Marshalls, the off-price brand name apparel chain; Chess King, the

young men's apparel chain; Wilsons, in leather apparel; Bob's, the casual family apparel and footwear chain; Accessory Lady, the quality fashion accessory stores; CVS, the prescription drugs, and health and beauty aids chain; Freddy's, the ''deep discount'' drug and sundries stores; Thom McAn Fan Club and the Meldisco Leased Department division in footwear; the Kay-Bee toy chain; Linens 'N Things, the brand name linens and domestics chain; This End Up, the casual furniture stores; and Prints Plus, the prints and wall decor stores.

SYRACUSE, NY (JULY 12) BUSINESS WIRE - Diagnostic Medical Instruments Inc. (NASDAQ:DMII) reported a 13 percent increase in revenues to $1,380,391 for the three months ended June 30, 1990 compared to $1,216,238 for the comparable quarter a year ago.

Earnings for the quarter were $40,853, or 1 cent per share, compared to a loss of $370,358, or 9 cents per share, for the third quarter of fiscal year 1989.

The significantly improved results are attributable to increasing sales of the new Altair PC Holter systems both domestically and internationally and to tight control of expenses.

For the nine months ended June 30, 1990, the company had net income of $44,134 on revenues of $3,920,165 compared to a loss of $477,043 on revenues of $4,526,272 for the first nine months of fiscal year 1989.

Diagnostic Medical Instruments Inc. designs, manufactures and markets ambulatory ECG systems used in the diagnosis of cardiovascular problems.

WOBURN, MA (JULY 12) BUSINESS WIRE - MedChem Products Inc. (AMEX:MCH) announced Thursday the settlement of a patent infringement lawsuit brought against it by Ophthalmic Systems Inc. relating to the marketing of MedChem's hyaluronic acid (AMVISC) product line.

Under the terms of the settlement agreement, the plaintiffs will receive a one-time payment of $300,000, the lawsuit will be dismissed and all claims for alleged past, present and future patent infringement by MedChem, its distributors and customers are being abandoned by the plaintiff.

Dr. David A. Swann, chairman of the board of MedChem, noted that ''while we believed that we had legitimate and valid defenses to the plaintiff's claims, the settlement permits us to avoid the expense and uncertainty assoicated with protracted litigation.''

As previously reported, MedChem is also a defendant in a patent infringement action brought by Pharmacia Inc., which has resulted in the issuance of a preliminary injunction regarding the use, manufacture and sale of certain of MedChem's hyaluronic acid products. MedChem's appeal of the preliminary injunction is presently awaiting the scheduling of oral arguments before the U.S. Court of Appeals for the Federal Circuit.

MedChem Products Inc. develops, manufactures and markets biomedical products for use in surgical and ophthalmic markets. These products, derived from naturally occuring biomaterials, help surgeons to perform delicate operations more safely and effectively.

#90193b0794 07/12/1990 ~Business Wire
MEMPHIS, TN (JULY 12) BUSINESS WIRE - National Commerce Bancorporation (NASDAQ/NMS:NCBC) Thursday announced record second quarter earnings.

Net income was $6,378,000 for the second quarter of 1990, a 10 percent increase over the $5,796,000 reported for the like period a year earlier. Earnings per share rose 10.9 percent to 61 cents per share from 55 cents per share in 1989.

The company's return on average assets and return on average stockholders' equity were 1.37 percent and 18.95 percent respectively, for the second quarter. These compared with 1989 second quarter returns of 1.40 percent and 19.52 percent.

For the six months ended June 30, 1990, net income totaled $12,007,000, a 10.5 percent increase over the first six months of 1989. Earnings per share were $1.14, compared to $1.03 in 1989, a 10.7 percent increase.

For the six-month period, return on average assets were 1.31 percent, compared to 1.34 percent for 1989, while return on average equity was 18.07 percent, compared to 18.60 percent a year earlier.

Bruce E. Campbell Jr., chairman and chief executive officer, commented that he was pleased with the quarter's results, particularly the improvement in net interest income and in the second quarter acquisition of the former Germantown Trust Savings Bank.

The new facility will substantially enhance the company's presence in this most affluent municipality by increasing customer convenience and access.

National Commerce Bancorporation, headquartered at One Commerce Square in Memphis, has assets of $1.9 billion, and is the parent company of National Bank of Commerce, Nashville Bank of Commerce, and the NBC Knoxville Bank. Other NCBC subsidiaries include Commerce Capital Management Inc., an investment advisory company; Commerce Investment Corp., a broker-dealer which offers a wide range of investment services; and Commerce General Corp., a data-processing company.

The common stock of the company is traded on the over-the-counter market in the National Market System of the National Association of Securities Dealers Automated Quotation System (NASDAQ). The trade symbol for National Commerce Bancorporation is NCBC.

HOUSTON (JULY 12) BUSINESS WIRE - Service Corporation International (SCI) reported Thursday that it has consummated its previously announced agreement to sell its insurance company, Family Service Life Insurance Company, to Liberty National Life Insurance Company.

Liberty National Life Insurance Company, a wholly owned subsidiary of Torchmark Corp., purchased Family Service Life Insurance Company for $165.1 million less dividends received by SCI in 1990.

In completing the sale of Family Service Life Insurance Company today, SCI Chairman R. L. Waltrip noted that the sale is an important step toward completion of SCI's strategy of focusing on its three core businesses:

funeral service, cemetery operations, and Provident Services Inc., a wholly owned subsidiary that provides financing to independent funeral homes and cemeteries.

Said Waltrip, ''We believe that there is no better buyer for our insurance company. We look forward to a continuing relationship with the Torchmark companies in connection with our pre-arranged funeral business.''

SCI is the largest funeral home and cemetery corporation in North America. The company's assets, at year-end 1989, exceeded $1.6 billion.

Torchmark Corp. is a financial services and insurance holding company headquartered in Birmingham, Ala.

Merrill Lynch Capital Services acted as financial advisor to SCI.

SCI's common stock is traded on the New York Stock Exchange. The ticker symbol is SRV.

NEW YORK (JULY 12) BUSINESS WIRE - The board of directors of The Adams Express Company Thursday declared a 12 cents per share dividend, payable Sept. 1 to stockholders of record, August 21.

The net asset value of Adams Express at June 30 is compared with the year earlier in the following table:

	Net Asset Value	
	6/30/90	6/30/89
Net assets	$566,710,676	$511,450,355
Shares outstanding	29,982,939	28,295,508
Net assets per share	$18.90 (a)	$18.08

(a) After capital gain distribution of 4 cents per share paid in March

For the twelve months ended June 30, according to Indata's figures, total return on Adams Express Net Asset Value, after adjusting for income dividends as well as capital gains distributions paid was 17.8 percent. Comparable figures for the Dow Jones Industrial Average and The Standard & Poor's Index of 500 Stocks were 22.2 and 16.2 percent, respectively.

For the six months ended June 30, according to Indata's figures, total return on Adams Express net asset value, after adjusting for income dividends as well as the capital gains distribution paid in 1990 was 4.8 percent. Comparable figures for the Dow Jones Industrial Average and the Standard & Poor's Index of 500 Stocks were 6.5 and 3.0 percent, respectively.

During the three months ended June 30, the Adams Express Company added eight new names to its investment list with purchases of: Banc One Corp., Bard (C.R.) Inc., Home Depot Inc., Melville Corp., Morrison Knudsen, Sunrise Medical Inc., Texaco Inc. and United Telecommunications Inc. Additions were made to the existing portfolio holdings of International Flavors & Fragrances and Pfizer Inc.

Four issues were eliminated from the investment list with the sales of First America Bank Corp., Merck & Co. Inc., Phelps Dodge Corp. and Southern New England Telecommunications Corp. Reductions were made in the Holdings of Bell Atlantic Corp., Coca-Cola Co., Colgate-Palmolive Co., Dillard Department Stores Inc., Elan Corp., Genzyme Corp., Motorola Corp., Schering-Plough Corp. and Wal-Mart Stores Inc.

#90193b0808 07/12/1990 ~Business Wire
RENO, NE (JULY 12) BUSINESS WIRE - Prolonged hot weather, coupled with the addition of new customers, resulted in record electric use Wednesday, Sierra Pacific Power Co. (NYSE:SRP) said Thursday.

Between 1 p.m. and 2 p.m. on Wednesday, Sierra Pacific Power's customers were using a total of 936 megawatts of electricity. This surpasses last summer's peak electrical consumption of 913 megawatts set on July 19, 1989 and the previous all-time high record electrical consumption was 922 megawatts set on Feb. 7, 1989.

The new record was established following several days of warm weather with daytime temperatures in the high 90s and warmer than usual nighttime temperatures. Higher than normal electrical demand for irrigation pumps also contributed to the new peak, along with the addition of new mining customers in Northern Nevada.

Company officials said the utility is experiencing no problems in serving customers during this period of higher than normal demand and predicted that its customers' electricity usage may continue to increase as long as the current warm weather pattern continues. Sierra Pacific Power Co. serves electricity to approximately 233,000 customers in Northern Nevada and Northeastern California.

#90193b0815 07/12/1990 ~Business Wire
SEAL BEACH, Calif. (JULY 12) BUSINESS WIRE - TouchStone Software Corp., a leading software publisher of PC utilities and Unix communications products, Thursday reported several major contracts with distributors and local co-publishers in Europe, Canada and Australia.

TouchStone initiated its international-business strategy earlier this year with the appointment of Darlene Kindstrand to the position of international sales director.

During the last year TouchStone has increased revenues over 200 percent and attributes this success to the company's best-selling ''Check It'' utility program and to Kindstrand's success in establishing strategic distributor relationships in a wide range of countries.

According to Kindstrand, ''International business is a key issue in the 90s and it is TouchStone's intent to be well-positioned not only in Europe for 1992 but also to achieve global marketing recognition as a worldwide supplier of quality software products.''

The introduction to international markets has been accelerated for TouchStone as a result of its relationship with leading distributors such as Merisel -- the newly merged company of Softsel/Microamerica -- who have subsidiaries in multiple counties worldwide and who offer high-profile promotional training programs like Softeach.

''Softeach U.K. and the four-city U.S. Spring Softeach tour were a huge success for us and we established a rapport with dealers worldwide as well as confirming that Check It solves very real problems that exist all around the world,'' said Kindstrand.

TouchStone launched its European venture with participation at the ''Which Computer?'' show in Birmingham, U.K., and the announcement of Check It distribution through Softsel House U.K., Frontline and CCC Ltd.

As a result of the European tour, TouchStone was also able to secure co-publishing agreements with SoftPublishing in France and Markt&Technik of Germany, both of which are leading software publishers in their local markets. Translations of the Check It brochure have already been completed in French and German and translated versions of the product itself are scheduled for the fall of 1990.

C. Shannon Jenkins, president and chief executive officer of TouchStone, adds, ''We look at international business as another opportunity to grow and expand our markets; not only immediately, but throughout the 1990s.

''U.S. software publishers have a proud record of exports to foreign markets, where our products generally account for up to 70 percent of local sales. TouchStone is pleased to be able to join in that success story.''

TouchStone Software designs, develops and markets computer software programs which document and troubleshoot hardware and software components of IBM-compatible PCs, PS/2s and personal computers and which provide communication and compatibility between different types of computers.

NEW YORK (JULY 12) BUSINESS WIRE - The board of directors of Petroleum & Resources Corp. Thursday declared a 20 cent per share interim income dividend on the common stock of the corporation, payable Sept. 1 to stockholders of record, Aug. 21.

The net asset value of Petroleum & Resources Corp. at June 30 is compared with that a year earlier in the table below:

	Net Asset Value	
	6/30/90	6/30/89
Net assets	$319,329,015	$ 280,775,906
Shares outstanding	10,384,600	9,997,630
Net assets per share	$ 30.75-a	$ 28.08

(a) After capital gain distribution of 3 cents paid in March 1990 and $29,895,000 stated value $1.575 convertible preferred stock outstanding.

For the 12 months ended June 30, according to Indata's figures, total return on Petroleum & Resources net asset value, after adjusting for income dividends as well as capital gains distributions paid was 18.8 percent.

Comparable figures for the Dow Jones Industrial average and the Standard & Poor's Index of 500 Stocks were 22.2 and 16.2 percent, respectively.

For the six months ended June 30, according to Indata's figures, total return on Petroleum & Resources Corp. net asset value, after adjusting for income dividends as well as the capital gains distribution paid, was 0.9 percent.

Comparable figures for the Dow Jones Industrial Average and the Standard & Poor's Index of 500 Stocks were 6.5 percent and 3 percent, respectively.

During the three months ended June 30, Petroleum & Resources Corp. added three new names to its portfolio list with purchases of Baroid Corp., Pool Energy Services Co. WAHLCO Environmental Systems Inc.

Additions were made to existing portfolio holdings of MCN Corp., Sonat Inc., Texaco Inc. and Unocal Corp.

The following issues were eliminated from the investment list; AllWaste Inc. and Phelps Dodge Corp. A reduction was made in the holding of Chevron Corp.

The board of directors of Petroleum & Resources Corp. also declared a $0.39375 per share income dividend on the $1.575 convertible preferred stock of the corporation payable Sept. 1 to preferred stockholders of record Aug. 21.

NEW YORK (JULY 12) BUSINESS WIRE - Management Company Entertainment Group Inc. (NASDAQ: MCEG) Thursday announced that its semi-annual interest

payment of approximately $1.4 million on the convertible subordinated debentures due 2009 will not be made on the due date of July 15.

The company is in negotiations with G.E. Capital, with a view to extending and restructing its $72.5 million bridge and credit loans which currently mature on July 14. To prevent the payment of interest, G.E. Capital has provided notice to the United States Trust Co. of New York, as trustee for the bondholders, that has the effect of preventing payment of interest to bondholders if the company fails to repay the G.E. Capital loans on July 14. G.E. Capital has indicated that it won't at this time extend the maturity date of its loans beyond July 14.

MCEG is also negotiating with Virgin Group Ltd., a creditor and the largest shareholder of the company. G.E. Capital on July 10 advanced approximately $3 million to meet certain obligations of MCEG's United Kingdom subsidiary.

Management Company Entertainment Group Inc. is a diversified entertainment company with a talent base, primarily engaged in entertainment talent management; entertainment production, distribution and marketing; and entertainment financing.

MEMPHIS, TN (JULY 21) BUSINESS WIRE - First Tennessee National Corp. (NASDAQ/NMS:FTEN) (FTNC) reported net income for second quarter 1990 of $1.01 per share, or $16,191,000.

Earnings were favorably affected by growth in net interest income and noninterest income coupled with successful control of noninterest operating expense. The corporation reported a net loss of 70 cents per share, or $10,931,000 for second quarter last year after providing $39.1 million to the loan loss reserve due to the deterioration of certain commercial and real estate loans.

For the first six months, net income totaled $1.23 per share, or $19,661,000, compared to 12 cents per share, or $1,967,000 recorded in the first half of 1989.

Nonperforming assets at June 30, 1990, totaled $92.1 million, down from $98.2 million at June 30, 1989, and $93.8 million at March 31, 1990. Approximately $23 million of nonperforming assets were either contractually current or were past due fewer than 90 days as of June 30, 1990.

The decline in nonperforming assets resulted from charge-offs of nonaccrual loans that were reserved for in prior periods.

The allowance for loan losses decreased to $77.2 million for June 30, 1990 compared to $78.9 million for the same period last year and $79.2 million for March 31, 1990. Year-to-date domestic net charge-offs rose to $17.7 million vs. $13.4 million for the first half of last year.

Net interest income for the first half of the year rose 6.4 percent, compared to the first half of last year. Noninterest income, excluding securities transactions, rose 13.9 percent from the first six months of 1989.

Bond division income for the six months increased 31.9 percent, trust service income rose 9.5 percent and service charges on deposit accounts were up 5.6 percent compared to last year's first half.

A one-time gain of $2.2 million resulting from a decline in the projected benefit obligation of the pension plan through the curtailment of benefits due to a reduced workforce was also included in noninterest income.

Noninterest operating expense for the first half of 1990 was level with the same period in 1989, consistent with previously announced productivity program improvement implemented at the end of last year. The expense included an increase due to higher rates charged by the FDIC. Excluding

this, expenses would have declined 1.1 percent.

First Tennessee is among the 100 largest bank holding companies in the United States, reporting total assets at June 30, 1990, of $6.4 billion and shareholders' equity of $389.3 million.

TAMPA, FL (JULY 12) BUSINESS WIRE - The board of directors announced their decision to extend the expiration date for the exercise of the company's outstanding Series A Common Stock Purchase Warrants from July 15 1990 until July 15, 1991.

Each warrant entitles the holder to purchase one share of the one cent Par Value Common Stock of the company. The current exercise price as determined pursuant to the Warrant agreement between the company and The Trust Company of New Jersey, as warrant agent, is 84 cents per share.

The Warrants were originally issued in conjunction with the company's IPO in July and August of 1987. The original exercise price of the Warrants was $1.50 per share.

Warrantholders are advised to seek a current prospectus of the company prior to exercising their Warrants to purchase Common Shares. The board also announced that the Annual Meeting of Shareholders will be held on Aug. 15 with a record date of July 13. The meeting will be at the Eastlake Woodlands Country Club in Palm Harbor, Fla.

LOS ANGELES (JULY 12) BUSINESS WIRE - Castle & Cooke Inc. (NYSE:CKE) announced Thursday that it has been contacted by several major companies interested in acquiring its Dole Food Co. and has retained the investment-banking firm of Goldman, Sachs & Co. to assist in evaluating a possible sale of Dole.

Castle & Cooke recently announced that the planned separation of its food and real estate businesses would be delayed because of substantial changes in the real-estate-financing markets and the additional time required to obtain a favorable revenue ruling from the Internal Revenue Service.

Castle & Cooke is an international holding company conducting business in two primary operating areas: food production/ distribution through Dole Food Co. and real estate development.

Dole Food Co. is the world's leader in the sourcing, shipping and marketing of high-quality fresh and packaged fruits, fresh vegetables and nuts. In fact, Dole now provides consumers with more than 60 safe, high-quality fresh fruits and vegetables and more than 200 processed and packaged fruits, juices and nuts.

Dole is the world's second-largest producer of bananas and the largest producer of fresh and processed pineapple. It is also a major marketer of table grapes and citrus. Dole is the leading domestic distributor of iceberg lettuce, celery and cauliflower. It plays an important role in the distribution of winter fruit; in fact, Dole is the leading fresh-fruit exporter from Chile.

It is also one of the largest marketers of almonds, pistachios, raisins, carrots and broccoli. Dole is a leading producer of canned pineapple and a major participant in the chilled and frozen-juice market.

Castle & Cooke also operates a substantial real-estate-development business through Oceanic Properties Inc. Its development activities include residential, resort, commercial and industrial projects.

Castle & Cooke owns an aggregate of approximately 129,000 acres of land in Hawaii, making it Hawaii's third-largest private landowner. In California, it owns approximately 32,000 acres and in Arizona approximately 9,000 acres.

#90193b0876 07/12/1990 ~Business Wire

CINCINNATI (JULY 12) BUSINESS WIRE - Fifth Third Bancorp's net income was $29,894,000 for the second quarter and $56,365,000 for the first six months of 1990, compared to $27,858,000 and $51,793,000, respectively, for the same periods in 1989.

Earnings per share were 76 cents for the second quarter, a 5.6 percent increase over last year's 72 cents, and $1.44 for the first six months of 1990, up 7.5 percent over last year's $1.34.

Total assets were $7.3 billion at quarter-end, compared to 1989's second quarter-end assets of $6.6 billion. For the first six months of 1990, return on average equity was 15.7 percent and return on average assets was 1.60 percent.

Prior year amounts have been restated for First Ohio Bancshares Inc., of Toledo, Ohio, acquired Nov. 30, 1989, and 1st Security Bank, of Hillsboro, Ohio, acquired Dec. 13, 1989. These acquisitions have been accounted for as poolings of interests.

The Bancorp's continued expansion into new and existing markets has resulted in the opening of 26 new banking locations over the past year. The increased operating expenses related to market expansion is viewed as a necessary investment to enhance future earnings. For example, The Fifth Third Bank of Columbus, which started operations in July 1985, and became profitable in its second year of operation, now has 19 banking locations and assets exceeding $400 million.

Under-performing assets (which include loans 90 days past due) totaled $92.6 million at quarter-end, of which $53.4 million was commercial real estate related. The Federal Reserve and the Office of the Comptroller of the Currency have recently completed their audits at most Fifth Third locations. We were pleased that our conservative approach to monitoring credit quality was well within the audit guidelines.

Service fee income continued to grow in the second quarter, up 19.3 percent over a year ago. Higher income from trust services, data processing services and service charges on accounts were all large contributors.

At quarter-end, the Bancorp had $738.1 million in equity, which represented 10.1 percent of total assets. This strong capital position ranks Fifth Third at or near the top of similar sized banks, and reflects Fifth Third's commitment to sound, conservative banking principles.

Fifth Third Bancorp is a regional bank holding company with 209 banking locations, including 25 Bank Marts located in Kroger stores, throughout Ohio, Indiana and Kentucky.

NASHVILLE, TN (JULY 12) BUSINESS WIRE - Southern Hospitality Corp. (NASDAQ/NMS:SHOS) Thursday reported net income of $365,702 or 7 cents per share for its fourth fiscal quarter ended May 31, 1990, bringing its earnings for the full fiscal year to $39,225 or 1 cent per share.

The profit achieved in fiscal 1989-90 compares with an operating deficit of $833,327 for the prior year, although extraordinary items related to the company's chapter 11 reorganization enhanced last year's earnings by

$2.9 million, and the company reported $2.1 million in net income for the 1988-89 year.

Sales for the fiscal year totaled $20,848,447, compared with $22,846,131 for the prior year. Hillenmeyer said the 8.7 percent decline was largely due to the closing of one restaurant, but also reflects a 1.8 percent decline in same-store-sales.

The company reported a significantly improved balance sheet from the prior year, with cash increased by $174,730, current ratio improved from 1.05/1 to 1.3/1, and long-term obligations reduced by $422,607. All of this was accomplished with cash flow from operations.

Southern Hospitality is a regional chain of 25 Wendy's Restaurants headquartered in Nashville. The company's stock is traded over the counter (NASDAQ Symbol: SHOS).

CORPUS CHRISTI, TX (JULY 12) -- Maritek Corporation (TICKER: MRTK) announced today that it's wholly owned subsidiary, Maritek Bahamas Ltd., has entered into an agreement with a group of Taiwanese shrimp farmers to form a new corporation in the Bahamas, "Bahamas Mariculture Ltd.". Maritek Bahamas Ltd. will contribute U.S. $495,000 for the other 50% of the stock and are expected to start operations immediately.

Maritek has granted the new Company an option on another 350 acres of undeveloped mariculture land at U.S. $2,222 per acre for a period of 2 years at Maritek's Bahamas property.

Maritek's 25,000 acre Bahamas property consists of 42 miles of beach-front property on the coastal ridge, suitable for resort and residential development. Maritek earlier obtained permission from the Bahamas Government for a resort subdivision of part of this coastal ridge and expects to start marketing waterfront villas and lots soon.

Behind this more elevated beach-front ridge are low lying salinas suitable for mariculture. There are over 16,000 acress of this undeveloped mariculture land on Maritek's property and this transaction puts a value on this land.

For further information call Maritek at 512-851-2701; Fax: 512-851-2257.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 12) COMTEX - The Congressional Budget Office predicted today that Gross National Product will grow between 2 percent and 2.5 percent in 1990 and 1991 if President Bush and Congress are successful in negotiating a deficit reduction package totalling between $40 billion to $60 billion in the fiscal 1991 budget.

However, CBO director Robert Reischauer told the congressional Joint Economic Committee that such a deficit reduction would tighten fiscal policy significantly and said the Federal Reserve Board would need to favorably respond to such a deficit plan in order to avoid recession.

"If a deficit package is enacted early in the summer and not in the (congressional) lame duck session, this will allow the Federal Reserve to ease monetary policy to offset any contraction in the economy," Reischauer said. "Lower interest rates will spur investment, lead to a weakening dollar, which will spur exports."

Reischauer added it is critical for the budget summiteers to conclude a meaningful agreement in order for the financial markets to respond positively by cutting long-term interest rates.

"We have no credibility with the American people on the issue of the deficit," said committee chairman Rep. Lee Hamilton (D-Ind.). "How do you make the package credible?"

"Legislation must be passed," said Reischauer. "It has to be perceived as being permanent. Setting out targets doesn't do much. What really matters is enacting fundamental legislation."

CBO forecasts unemployment for 1990 and 1991 to remain close to the 1989 average of 5.3 percent and inflation rates are expected to stay relatively steady. However, with assumed deficit cuts, the CBO predicts short-term interest rates will fall from 7.6 percent in 1990 to 6.9 percent in 1991 and long-term interest rates will drop from 8.5 percent in 1990 to 7.8 percent in 1991.

Reishauer believes the Fed will cut short-term interest rates just over 1 percent if a deficit accord is reached, but he does not advocate the Fed ease credit now before a deficit package is in place.

"That would be like giving a child dessert before his broccoli," Reischauer quipped.

Due primarily to revenue shortfall of approximately $23 billion, the CBO says it now expects the fiscal year 1990 baseline budget deficit will total $195 billion, which is $36 billion above the estimate it released in March.

Over the 1992-1995 period, the CBO projects the economy will grow at a 2.6 percent annual rate, while the administration forecasts a growth rate of slightly more than 3 percent.

"I would characterize the administration's GNP growth from 1992-1995 as extremely optimistic," Reischauer said.

The Resolution Trust Corp. will need tens of billions of dollars in the next few years to resolve the savings and loan crisis. CBO estimates that additional RTC spending needs would add $68 billion to the deficit in 1991, $81 billion in 1992, and $33 billion in 1993.

WASHINGTON (JULY 12) COMTEX - The 8-K report filed at the SEC shows on June 22, 1990, Conservative Savings Bank, a wholly-owned subsidiary of Conservative Savings Corp., assumed $58 million in liabilities and acquired certain assets of Equitable Federal Savings & Loan Association, of Columbus, Ohio. The assets and liabilities were acquired from the Resolution Trust Corp. at a cost of $1.57 million.

The deposits assumed, less the $1.57 million deposit premium and costs of acquiring the selected assets, resulted in no cash outlay by Conservative Savings Bank.

#90193c0034 07/12/1990 ~Comtex

WASHINGTON (JULY 12) COMTEX - The 8-K report filed at the SEC shows on July 3, 1990, Fireman's Fund Insurance Co. filed a lawsuit against Wespercorp in the Superior Court of California, County of Orange, for alleged breach of contract. Damages sought were in the amount of $485,000.

The suit relates to the settlement of a suit with Citizens Utility Co. That settlement, of Nov. 26, 1986, was paid in the amount of $500,000 by Fireman's Fund Insurance Co., acting as a surety for California Minicomputer Systems, a subsidiary of Wespercorp. The related surety agreement stated that Wespercorp would indemnify Fireman's for its payments in the suit.

In an agreement of Dec. 12, 1986, Fireman's Fund and Wespercorp agreed that the indemnification would take the form of Wespercorp common stock, plus cash and notes if the stock's value was not at an agreed upon level one year following its issuance. On Feb. 24, 1989, Fireman's Fund demanded that Wespercorp pay an approximate $382,000 in cash and notes to satisfy an obligation resulting from that stock non-performance.

As George E. Dashiell, president and CEO of Wespercorp, commented, "At the time this demand was placed we did not have the cash to satisfy the obligation." Further, "Since then the matter has been under negotiation to restructure the agreement such that Wespercorp could fulfil its obligation with notes or equity. At the time the complaint was filed Wespercorp had previously submittedd a proposal that it believed would be in the best interest of both parties."

#90193c0036 07/12/1990 ~Comtex

WASHINGTON (JULY 12) COMTEX - The 8-K report filed at the SEC shows on June 8, 1990, the board of directors of Capital Enterprises Inc. engaged the firm of Frederick R. Grant, C.P.A., to serve as its independent pubic auditors. Prior to that date, the former independent auditors for the company, Sweeney & Co., C.P.A., were terminated as per a Form 8 report filed with the SEC on Jan. 5, 1990.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two fiscal years, there were no disagreements between those former auditors and the company.

-30- 867

#90193c0037 07/12/1990 ~Comtex

WASHINGTON (JULY 12) COMTEX - The 8-K report filed at the SEC shows on June 28, 1990, Kaufman and Broad Home Corp. engaged the independent auditors of the firm of Enrst & Young to audit its financial statements for the fiscal year ending November 30, 1990. With that change, Kaufman and Broad replaced its former public auditors for the firm of Price

Waterhouse.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two fiscal years, there were no disagreements between those former auditors and the company.

Also during the previous two years, Kaufman and Broad did not consult with Ernst & Young on any matters related to its business, its audits or its corporate policies and practices.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 12) COMTEX - Treasury Secretary Nicholas Brady urged the Senate Banking Committee today to enact the Bush administration's bill switching control of stock index futures from the Commodity Futures Trading Commission to the Securities and Exchange Commission in order to avoid future market crashes such as those that occured in October 1987 and October 1989.

Brady argued the issue is not over a turf war between the Chicago futures markets and New York stock markets but rather that stock index futures and stocks are part of a single market and need one regulator.

"The single most important step Congress can take to reduce both the likelihood of major market disruptions and the severity of their consequences is to unify regulation for the one market," Brady said. "Minor events are likely to continue to cause major market disruptions -- and major events could cause even worse results. Simply stated, we are accepting too much systematic risk for too little benefit."

Brady headed a presidential task force set up after the 1987 market crash when the Dow Jones Industrial average plunged 508 points in a single day.

"The task force concluded that the interaction of trading in stock and stock index futures in the 'one market' is a major cause of market

disruptions," Brady said. "Yet the nation's disjointed regulatory system has not kept pace with this reality, preventing us from putting the 'one market' tools in place to deal with these market disruptions."

The issue of jurisdictional control has generated plenty of controversy. Brady, along with SEC Chairman Richard Breeden and members of the securities industry believe the legislation is needed to restore individual investor confidence in the markets, reduce the chance of major market disruptions, and prevent manipulation and fraud in transactions between the stock and futures markets.

The commodity exchanges and most members of congressional agricultural committees are opposed to the bill, arguing jurisdictional changes would unnecessarily disrupt the markets, fail to reduce market volatility and take business away from the futures markets.

Stock index futures, traded in Chicago but based on the prices of stocks traded on the New York Stock Exchange, allow investors to bet on the movement of a basket of stocks without buying the actual securities. Traders utilizing index arbitrage through computerized program trading profit from the differences in the prices of futures contracts on stock indexes and the corresponding stocks.

Critics have cited those quick shifts between products as a cause of stock market volatility.

"Seems to me the administration is trying to have its cake and eat it too " said Sen. Alfonse D'Amato (R-N.Y). "As far as this senator is concerned, computerized trading exacerbates the problem. Institutional traders make a quick buck while the little guy gets clipped."

Brady disagreed.

"Program trading is not the problem," the treasury secretary said. "It connects the New York and Chicago markets. We're not advocating killing this link."

"The focus on volatility is a red herring," Brady continued. "Our concern is not average price changes, but the episodes of violent market freefalls. During these major market disruptions, pricing relationships between stocks and futures break down."

The bill also provides federal oversight authority over the ability of the futures markets to set margins on stock index futures, the good faith money needed for trading, and modifies the exclusivity clause of the Commodity Exchange Act to allow products with futures and stock characteristics to trade in either market.

HONG KONG (JULY 12) - Hong Kong's trade with its largest commercial partner, the United States, recorded a 3.9 percent rise in the first four months of this year, figures released here Thursday showed.

China's trade with the United States grew 17 percent compared with the same period last year, despite U.S. sanctions imposed on China after the military crackdown of democracy protests in June last year.

Hong Kong's trade with the United States rose to 5.015 billion U.S. dollars in the first four months of the year from 4.828 billion U.S. dollars in the same period last year, according to figures released by the U.S. Information Service here.

U.S. exports to Hong Kong were up 8.3 percent to 2.235 billion U.S. dollars from 2.064 billion last year.

The United States' total trade with China in the first four months this year was 5.710 billion U.S. dollars, compared with 4.878 billion U.S. dollars last year, but U.S. exports to China dropped 14 percent to 1.607 billion U.S. dollars from 1.871 billion U.S. dollars.

TOKYO (JULY 12) - Japan's trade surplus increased 27.6 percent from a year earlier to 6.7 billion dollars in June, the Finance Ministry said Thursday.

Exports rose 4.7 percent to 23.8 billion dollars while imports fell 2.2 per- cent to 17.0 billion dollars, the ministry said in a preliminary report.

But the surplus during the first six months of this year was down 22.8 per- cent from the same period last year to 25.8 billion dollars.

Exports during the period fell 1.4 percent to 133.9 billion dollars while imports rose 5.6 percent to 108.2 billion dollars.

Japan's June trade surplus with the United States was 3.4 billion dollars, with exports to that country falling 6.7 percent to 7.4 billion dollars over the year while imports declined 3.7 percent to 4.2 billion dollars.

The trade surplus with the European Economic Community was 1.6 billion dollars. Exports to the 12 nations rose 12.8 percent to 4.3 billion dollars, while imports jumped 18.4 percent to 2.7 billion dollars.

The surplus with non-communist Asian nations came to 2.9 billion dollars. Exports to these nations rose 9.5 percent to 7.6 billion dollars, while imports dropped 7.6 percent to 4.7 billion dollars.

#90193d2870 07/12/1990 ~French/German News Agency

WARSAW (JULY 12) - The World Bank has lent Poland 240 million dollars for the reconstruction of its urban heating system which is dilapidated and causes pollution, press reports here said on Thursday.

Of the total, 80 million dollars will be spent on improvements to the system in Warsaw, and 120 million will be spent in Gdansk, Gdynia, Katowice and Cracow. The remaining 40 million dollars will be used by various companies.

The head of the bank's delegation Henk Busz said that the improvement programme would take from between seven and 10 years.

The bank has said that it is prepared to lend Poland a total of 2.5 billion dollars during the next three years.

It has already announced a loan of 153 million dollars for the modernisation of transport facilities, of 168 million dollars for protection of the environment, and earlier this month of 250 million dollars for the exploration and exploitation of hydrocarbon and natural-gas resources.

#90193d3050 07/12/1990 ~French/German News Agency

NEW DELHI (JULY 12) - Hundreds of Indian Airlines (IA) employees struck Thursday to protest the government's "open sky" policy allowing private operators, forcing the cancellation of almost 150 flights, an IA spokesman said.

Pilots, technicians, cabin crew and ground staff belonging to six major unions were observing the token 24-hour strike due to end at midnight Thursday, the spokesman said.

IA management cancelled nearly 150 of the 200 flights it was to operate Thursday, but "very few passengers" had been stranded because the airline had publicised the strike in advance, he said.

Some 23,000 passengers travel daily on IA, one of the world's largest regional airlines which flies to 59 cities and 10 international destinations.

The spokesman could not say how many of the airline's 20,000 employees had struck, but said hundreds were involved.

Unions are protesting the government's new policy of allowing private operators to enter the aviation business. Many entrepreneurs have already announced plans to start "air taxi" services.

"The strikers don't want private operators to dominate the Indian skies," the spokesman said. "Under changed civil aviation rules, any one can start an airline."

#90193d3130 07/12/1990 ~French/German News Agency

MANILA (JULY 12) - The Philippines' balance of payments deficit in the first four months of 1990 grew by 217 percent from the same period last year to 514 million dollars, a Central Bank (CB) statement said here Thursday.

The sharp increase from the 162 million dollar payments deficit recorded in the same period in 1989 was due to shortfalls in commodities exports and a continued surge in imports, the CB said.

Exports in the first four months of 1990 increased by only 5.89 percent to 2.56 billion dollars, while imports grew 22 percent to 3.85 billion dollars. This resulted in a 78 percent increase in the trade deficit to 1.29 billion dollars.

The country's top exports were manufactured electrical equipment and garments while its top imports were capital goods, raw materials and

mineral fuels and lubricants.

The Philippines enjoyed a 448 million dollar balance of payments surplus at the end of 1989.

#90193d3300 07/12/1990 ~French/German News Agency

MADRID (JULY 12) - Spanish consumer prices rose 0.3 percent in June over the May level, the national statistics institute said Thursday.

The latest figures kept the inflation rate for the first six months of the year at 2.5 percent, and year on year inflation stood at 6.5 percent.

-30- 454

#90193d4030 07/12/1990 ~French/German News Agency

NUREMBERG, West Germany (JULY 12) - West German electronics group Grundig said Thursday its net profit rose five percent last year over the previous year's level to 147 million Deutsche marks (91.8 million dollars).

Turnover was up 11 percent to 3.8 billion Deutsche marks (2.3 billion dollars).

Profits rose less rapidly than sales because of falling consumer prices and rising staff costs, company president Johan von Tilburg said.

He hit out at Asian producers, accusing them of dumping, and praised the European Commission for fighting such unfair trade practices.

But he said that Grundig was already reaping the benefits of changes in Eastern Europe and its sales in that region would top 100 million Deutsche marks (62.5 million dollars) this year, with total group sales topping four billion Deutsche marks.

Eastern European sales would double next year to account for five percent of the group's total sales.

Grundig estimates that the East German market alone is worth 500 million Deutsche marks (312 million dollars) a year, half of it in colour televisions. The group already holds an 18 percent share of the East German market.

The current troubles of Dutch electronics giant Philips, which holds a 31.5 percent stake in Grundig, did not seem to worry the company's leaders. Mr. von Tilburg stressed that as far as he knew Philips was not planning to sell its stake.

-30- 1597
#90193d4080 07/12/1990 ~French/German News Agency
PARIS (JULY 12) - The price of shares in the French Dumez construction company jumped by 20 percent, and shares in the Lyonnaise des Eaux water company fell by almost 14 percent in reaction to their merger when trading was resumed here on Thursday.

Trading in the shares had been suspended ahead of Wednesday's announcement of their merger plans by the two companies.

Under the arrangement, three Dumez shares will entitle holders to four Lyonnaise shares. This was seen as valuing Dumez at 936 francs compared with a previously quoted price of 641 francs.

Stock market sources said that this made Dumez shares look under valued and made Lyonnaise shares comparatively less attractive.

Dumez shares were trading on Thursday afternoon at 775 francs, a rise of 21.1 percent, after opening at 795 francs and at one point rising to 800 francs.

Lyonnaise shares were trading at 608 francs, down 13.7 percent, having opened at 618 compared with 702 previously. They had fallen as low as 584 francs at one point during the morning.

Some 818,000 Dumez shares and 933,000 Lyonnaise had changed hands by 2:30 p.m. (1230 GMT).

-30- 1340
#90193d4400 07/12/1990 ~French/German News Agency
BUDAPEST (JULY 12) - Hungary's industrial output fell by 9.9 percent, while prices rose by 25.3 percent during the first five months of 1990 compared with the same period of 1989, MTI news agency said Thursday, quoting the central statistics office.

The biggest fall in output occurred in the engineering sector where production was down by 21.7 percent. But production of electricity rose by 0.2 percent. Agricultural poduction fell by 10.7 percent.

Prices rose by 25.3 percent during the same period.

The largest increases were in food prices, which rose by 32.5 percent, domestic heating 25.7 percent, services 23.9 percent, and clothing 20.1 per cent.

The trade balance improved sharply, particularly regarding trade with the

West, which showed a surplus of 338.1 million dollars, compared with 23.9 million dollars in the previous five-month period.

#90193d4460 07/12/1990 ~French/German News Agency

BANGKOK (JULY 12) - Hundreds of Vietnamese refugees have applied to return home from southeast Asian countries, raising hopes that this could "short-circuit" the problem of forced repatriation, refugee officials said here Thursday.

The officials and the Vietnamese Embassy said a team of Hanoi immigration officials were currently touring Malaysia, Thailand and Indonesia to interview the refugees who, if cleared, would be expected to return to Vietnam within the next few weeks.

Although the figures remain small compared to the more than 198,000 Vietnamese refugees now in camps around Asia, the officials pointed out that they involved the largest groups ever requesting voluntary repatriation in Southeast Asia and could mark a turning point.

"This could somehow short-circuit the unresolved problem of mandatory repatriation," said Alexandre Casella, a Bangkok-based United Nations High Commission for Refugees (UNHCR) official.

The expected voluntary repatriations from Southeast Asia are to take place as the UNHCR announced that a meeting on boat people to be held next week in Geneva had been postponed indefinitely as the U.S. and Vietnamese positions on forced repatriation were still far apart from other countries which were to have attended the talks.

The United States and Vietnam oppose forced repatriation.

British Foreign Office Minister Francis Maude said Wednesday in London that Britain had not ruled out a resumption of "mandatory repatriation" of Vietnamese boat people who have sought refuge in Hong Kong.

Hong Kong, currently home to 54,000 Vietnamese refugees, forcibly initially sent 51 refugees home in December to dissuade economic migrants fleeing Vietnam from heading for its shores.

Hong Kong's forced repatriation progam was suspended, however, pending an internationally agreed solution to the problem.

A Comprehensive Plan of Action (CPA) adopted in June last year at an international conference in Geneva calls for the voluntary repatriation of those refugees from Vietnam who are not political refugees.

Since the CPA was put into action small groups have been repatriated from Malaysia and the Philippines under UNHCR auspices.

Refugee officials said that the Hanoi team, currently in Malaysia at the outset of a regional tour, was to interview about 40 refugees in Malaysia.

More than 110 refugees in Thailand and some 150 in Indonesia had already applied for interviews with the team, led by Immigration Department Deputy Director Tran Quoc Van.

The Hanoi officials are expected to arrive here over the week-end.

But Mr. Casella, UNHCR special adviser and coordinator for voluntary repatriation for east and southeast Asia, said figures were likely to eventually be higher since new applications were being made almost every day in Thailand.

Thailand has some 16,000 Vietnamese refugees, Malaysia 18,000, and Indonesia 16,000.

Mr. Casella said the refugees in Thailand, housed in a camp at Phanat Nikhom, 150 kilometers (90 miles) southeast of here, had decided to go back after some two weeks of counselling by UNHCR officials.

He attributed the rapidity with which they had taken the decision to a growing realization among camp inmates that the chances of most becoming eligible for resettlement in the United States, Australia or other Western countries were slim at best.

Unnamed UNHCR sources quoted Thursday by the English-language Bangkok Post said there was now a possibility of several thousand voluntary returnees from Phanat Nikhom.

Mr. Casella stressed that, under an agreement reached by Hanoi and the UNHCR, returning Vietnamese refugees were covered by an amnesty preventing prosecution for illegal departure from Vietnam and the UNHCR will have access to monitor their well-being.

AMSTERDAM, Netherlands (JULY 12) - The Dutch Fokker aircraft manufacturer is considering developing a new airliner to carry between 50 and 100 passengers for regional airlines, the company said here on Thursday.

Denying a newspaper report that plans for the aircraft had already been drawn, spokesman Robert Mol said: "We have begun market research to study the possibility of launching a fast, twin-engined aircraft with relatively

limited capacity of betwen 50 and 100 seats."

He said that the viability of the project would not be known until the research had been completed at the end of 1991.

Fokker revealed its project at a congress of U.S. regional airlines in Washington last week.

Mr. Mol said that the new aircraft, would be targeted at regional airlines which were experiencing strong growth. It could also find a market within Europe after 1992.

Announcing its results on May 9, Fokker said that it envisaged developing new versions of its two successful civil aircraft, the twin-engined medium-range Fokker-100 and the Fokker-50.

Fokker plans to invest 300 million guilder (150 million dollars) during three years on these projects and to develop its capacity to build the two aircraft.

Fokker averted bankruptcy in 1987 due to a net loss of 107 million guilder after the state injected new funds.

The company recovered last year with the launch of the Fokker-100 which has attracted orders worth 10 billion guilder (about five billion dollars), and expects in 1990 to double its net 1989 profit of 42.4 million guilder (21 million dollars) which was in turn three times higher than the 1988 figure.

NAIROBI (JULY 12) - A Kenyan human rights lawyer who angered the government by calling for multi-party democracy has left the country after spending a week in the U.S. embassy here, the U.S. ambassador said Thursday.

Gibson Kamau Kuria, an outspoken opponent of the government and a former detainee, sought refuge in the U.S. embassy last week after the detention of two former cabinet ministers, Kenneth Matiba and Charles Rubia, who have spearheaded the democracy movement.

The detentions sparked five days of bloody anti-government riots that have left 22 dead. The Kenyan authorities have announced 15 deaths, and sources close to the government reported another seven people killed on Wednesday.

Nairobi was calm but tense Thursday as people braced for a weekend pro-democracy rally rumoured to be planned in Nairobi's Kamakunji Square, where the riots erupted last Saturday. Nairobi's inhabitants fear further

bloodshed if the demonstration goes ahead.

U.S. ambassador Smith Hempstone said Mr. Kuria had left for London late Wednesday. He thanked the Kenyan government for allowing Mr. Kuria, who won the Robert Kennedy Memorial Human Rights Award in 1989 for defending political prisoners in Kenya, to leave.

PARIS (JULY 12) - There was a flood of asylum-seekers into OECD countries last year and it is becoming increasingly difficult to distinguish between political refugees and economic migrants, according to a report released here Thursday.

Norway has seen the sharpest increase in the number of people seeking asylum, up 113 per cent between 1983 and 1989, the report from the 24-member Organisation of Economic Cooperation and Development said.

It was followed by Greece, up 98 per cent, Denmark, up 42 per cent, and West Germany, Italy and Sweden, with increases of between 37 and 39 per cent.

But West Germany saw the highest number of requests for asylum last year, at 121,300, with a total of 992,000 refugees flooding in from Eastern Europe as reforms got under way there.

The bulk came from East Germany -- 344,000, almost 10 times the 1988 total of 44,000 -- but there were also a quarter of a million Poles, 98,000 Soviet citizens and 23,000 Romanians.

In the short term, this influx is boosting consumption and production in West Germany, but is posing problems of integration, the OECD said.

It also expressed concern that rising "nationalist demands" in Eastern Europe could lead to the "emigration of certain ethnic minorities."

Unemployment remains high among immigrants in most OECD countries, despite an improvement in the job market last year, the report said.

And illegal immigration persisted despite a tightening of border controls in France, Belgium, West Germany and Switzerland.

Fewer people are emigrating from Italy and Spain, but Portugal, Greece and Yugoslavia are still seeing "a sustained flow towards the EEC," while Turks are heading for the Gulf.

Irish emigration to other European Economic Community countries and the

United States is picking up.

TAIPEI (JULY 12) - Shipping magnate Chang Yung-fa, listed by the U.S. business magazine Forbes as Taiwan's richest man, is afraid to leave his home because of worsening crime in the island nation.

"What's the point to have (my) name published (in newspapers)? It'll only get me into trouble," the board chairman of the Evergreen Group, operators of the world's largest container fleet, said in an interview published Thursday in the Chinese-language United Daily News.

"I'm afraid to go out. I don't have any freedom," the 62-year-old magnate and philanthropist was quoted as saying.

"I like to play golf, but I rarely play it now because the social order is bad," he said, adding that he had avoided going to public places since martial law was lifted in July 1987.

"Instead, I stay at home and read books," he said.

Mr. Chang's fears were not unfounded.

His son, Chang Kuo-ming, 32, was kidnapped by three men in November 1989 and released only after he paid a record ransom of 50 million Taiwan dollars (1.9 million U.S.).

The abductors were later arrested and sentenced to death and the ransom money recovered. But the case has attracted public attention because one of the death row convicts, Ma Xiaobin, 27, is a defector from China.

Human rights advocates and ruling party and opposition legislators have asked President Lee Teng-hui to amnesty the three kidnappers, who have also won sympathy from Roman Catholic, Protestant and Buddhist groups.

Mr. Chang himself, a devout follower of Yi Kuan Tao, a sect related to traditional Chinese Taoism, called in June for their death sentences to be commuted "to give them a chance to turn over a new leaf."

"Young men should be given a chance if they feel remorse (for their crimes)," the magnate said after two of the abductors wrote his son asking for forgiveness.

"It's best if their (death) sentences can be commuted...We are willing to help within the limits of the law," he said.

The president, said to be a close friend of Mr. Chang, has rejected calls to pardon the kidnappers.

Mr. Chang, who usually shuns publicity, also said his fortune was worth five billion U.S. dollars, instead of two billion as reported by Forbes, the magazine said.

Even if wrong, the smaller figure would put him among the world's richest men.

The magazine estimated his shipping interests, but failed to include his stakes in heavy industry, securities firms, contruction companies, transportation firms, hotels and a private airline, Mr. Chang told the paper.

While conceding that money has deprived him of his freedom in some ways, Mr. Chang said money had its merits.

"At least, you can pay back society, doing many good things," he said.

Mr. Chang lives a frugal life -- he is a vegetarian and drinks nothing but water -- but donates between 150 and 200 million Taiwan dollars (between 5.5 and 7.4 million U.S.) a year to the needy, according to the paper.

Although Taiwan boasts of a per capita income of 6,890 U.S. dollars, many people there still live in great poverty, Mr. Chang said.

Once, he donated nine coffins in one day to needy families of the bereaved, the paper said.

Mr. Chang also said Forbes had underestimated the net assets of Taiwan plastics tycoon Wang Yung-ching, one of five other Taiwan billionaires who made it to the richest men's list.

"There must be a mistake," Mr. Chang said, in apparent reference to Mr. Wang's ranking last among the six listed local billionaires. Mr. Wang's Formosa Plastics Group is the island's largest private conglomerate.

ISLAMABAD (JULY 12) - Pakistan's government has decided to deport all illegal women immigrants from Asian and African countries in a drive against smuggling and exploitation, officials said Thursday.

Authorities have set up a four-member committee under Law minister Iftikhar Hussain Gilani to identify and recommend the deportation of women and children arriving illegally from African and Asian countries, officials

said.

Its task is to prevent the smuggling of human cargo in the future, officials said.

Women and children from Bangladesh, India, Sri Lanka, Burma as well as those from Tanzania, Nigeria and other African countries were reportedly victims of the smugglers.

The decision came after human rights activist Ansar Burney last week said that a well-organised gang of smugglers in the sub-continent had lured hundreds of Bangladeshi women to household jobs in richer Pakistan.

Some of the women, including young girls, were reportedly sold to underground prostitution dens, while others ended up in Pakistani jails.

The southern port city of Karachi was said to be a haven for the unauthorised immigrants. It is also used as a transit point for people promised jobs in the oil-rich Gulf states.

The smuggled individuals also reportedly included children who were to be employed as camel jockeys in Arab countries.

Officials said the number of illegal immigrants, including women and children, could run into the thousands.

Mr. Burney said the committee, of which he is a member, has started collecting data on the women and children from jail authorities.

After proper identification, arrangements will be made for their repatriation and their travel expenses will be borne by his Ansar Burney Welfare Trust, he said.

ABU DHABI (JULY 12) - Syrian Vice President Abdel Halim Khaddam said in comments published Thursday that Arab countries should expect an Israeli attack on one of them, but warned that such a move would mean heavy losses for Israel.

"Due to Israel's agressive nature, the Arabs should always expect the possibility of an assault on one Arab state or another," Mr. Khaddam told the United Arab Emirates daily Al Ittihad in an interview.

However "the situation no longer exists where Israelis can launch wars and aggressive acts against the Arab nation, he said.

"Israel knows very well that the Arabs have means that enable them to pay back the aggression," Mr. Khaddam said. "They are capable of inflicting heavy losses on us, but we can also cause them great damage."

The vice president did not specify how Arab countries might retaliate.

Syria, Iraq and other Arab states are thought to have medium- and long-range missiles capable of reaching targets inside Israel.

Mr. Khaddam, whose country is a leading antagonist of Israel, said Syria rejected separate peace pacts between Arab states and Israel.

He blasted a plan by U.S. Secretary of State James Baker to promote talks between Palestinians and Israelis in Cairo ahead of talks that could lead to elections among Palestinians in the occupied territories.

"There is no American intiative but there is (Israeli Prime Minister Yitzhak) Shamir's initiative which Baker's points were meant to implement " he added.

The vice president called for separating the Arab-Israeli conflict from the civil war in Lebanon, where Syria has 35,000 troops deployed and is a major power broker.

"The Arab-Israeli dispute will last long but Lebanon has an internal crisis," he said. "Linking them means destroying Lebanon."

#90193d4680 07/12/1990 ~French/German News Agency

MANAMA (JULY 12) - World Cup referee Jassem Mendi of Bahrain has made an astonishing attack on the "mafia gang" he alleges runs the game's world body FIFA, the International Federation of Football Associations.

Mendi was among the officials selected for the World Cup in Italy but he failed to be picked to referee a game.

"I was chosen among the 16 best referees in the World Cup, but I did not actually referee a single match," said a bitter Mendi.

He accused a "mafia gang" within FIFA of discrimination in favouring European and Latin American referees and called for a "new international order" for the men in black.

Mendi, who ran the line five times in World Cup ties, said it was only as a referee that the chance arose "to shine".

"FIFA did not give me that chance." The world body "superbly ignored the

referees of the Third World," he said.

"If I had known I was going to be treated in such a way, I would not have gone to Italy."

#90193d4700 07/12/1990 ~French/German News Agency

WASHINGTON (JUNE 12) - China is selling Libya about 10,000 tons of chemicals that can be used to manufacture chemical weapons, The Washington Times reported Thursday, citing U.S. officials.

The Libyan regime of Colonel Moamer Kadhafi plans to use the chemicals at a second major weapons plant being built in the southern part of Libya, said the officials who spoke to the newspaper on condition of anonymity.

U.S. officials protested to China over the sale of the chemicals to Libya last month and Beijing halted a planned shipment from a chemical factory on the China coast, the Times reported.

But another chemical manufacturer on the China coast agreed in the past several weeks to ship Libya 10,000 tons of the chemicals, an official said. It could not be determined whether the chemicals were en route to Libya.

The officials said these new reports of Chinese chemical shipments bolster earlier intelligence that Libya was building a second chemical weapons plant on the ruins of an ancient city near Sabha, 700 kilometers (320 miles) south of Tripoli.

Other intelligence reports indicate the second plant will be built underneath the Sabha ruins with West German plans that were used to build Libya's first chemical weapons plant at Rabta, The Washington Times said.

An alleged chemical weapons complex at Rabta, 96 kilometers (60 miles) south of Tripoli, has begun producing mustard gas and will eventually produce the deadly nerve agents tabun and sarin, the officials said.

The Rabta plant was reportedly destroyed by fire earlier this year, but Western intelligence experts now believe the blaze was a hoax designed to ease international pressure on Tripoli over the chemical weapons issue.

#90193d4790 07/12/1990 ~French/German News Agency

BEIRUT (JULY 12) - The Christian Lebanese Forces militia Thursday rebuffed a government call to withdraw from East Beirut, saying they would not move as long as troops loyal to military leader General Michel Aoun

remained in the city.

Brigadier Fouad Malek, a militia field commander, said ''we will not pull our forces from Beirut as long as illegitimate forces manned military positions in the capital.''

Malek, who spoke to a radio station operated by the militia, was referring to the presence of Aoun's troops in a large sector of the didvided Christian-inhabited part of the capital.

The militia officer was responding to an appeal by the Lebanese cabinet Wednesday for the 10,000-strong militia to end its 15-year presence in East Beirut so that President Elias Hrawi could expand his authority.

The government also urged the 15,000 troops loyal to General Aoun to join the 25,000-strong regular force of pro-Syrian army commander General Emile Lahoud.

A source close to Aoun rebuffed the cabinet appeal.

Aoun has rejected a peace treaty that was worked out by the Lebanese parliament in Taif, Saudi Arabia, last October for failing to ensure a speedy withdrawal of Syria's 35,000 troops from the country. He has also refused to recognize Hrawi and his cabinet.

MOSCOW (JULY 12) - The Soviet Union had a trade deficit in 1989 for the first time in 13 years, TASS news agency said Thursday.

Imports last year totalled 72.1 billion rubles (115 billion dollars) and exports 68.8 billion (110 billion dollars), giving a deficit of 3.3 billion rubles (five billion dollars), TASS said.

The 1989 import figure was up 7.1 billion rubles (11.3 billion dollars) or 14 percent over the previous year's level, largely due to increased imports of consumer goods.

Energy products' share of exports shrank from 42.1 percent of the total to 39.9 percent.

Total trade was up 6.6 percent over the previous year's level at 140.9 billion rubles (225 billion dollars), with trade with capitalist countries up 19.1 percent at 36.9 billion rubles (59 billion dollars), TASS said.

The main non-communist trading partners were West Germany, Finland, Italy, Japan, the United States, Britain and France.

Merchandise trade with developing countries was up 14.7 percent over 1988 at 17.1 billion rubles (27.3 billion dollars), with India heading the list followed by Iraq, Syria, Turkey, Argentina, Afghanistan and Algeria.

But merchandise trade with other socialist bloc countries was stable compared with the 1988 level at 86.9 billion rubles (139 billion dollars).

#90193d4830 07/12/1990 ~French/German News Agency

NEW DELHI (JULY 12) - Om Prakash Chautala, eldest son of Deputy Prime Minister Devi Lal, was once again sworn-in Thursday as the chief minister of the north Indian state of Haryana, a post from which he was forced to resign nearly two months ago.

Chautala quit the post on May 22 following a public outcry at the murder of an independent candidate from an constituency where elections were to be held to the local legislature. Chautala was one of the candidates.

The opposition Congress (I) Party immediately accused Prime Minister Vishwanath Pratap Singh of ''stooping to any level to protect the only thing he is interested in, that is own chair''.

The party spokesman M.J. Akbar said Singh's policies were a ''camouflage'' and said the prime minister was still to order an inquiry that led to the killing on May 17 of Amir Singh, the independent candidate who was listed to contest the Meham legislative seat.

The bullet-ridden body of Amir Singh was recovered from a field just outside the constituency and the independent Election Commission immediately countermanded the poll.

Political observers said Chautala's return to power would seriously erode peoples perception of prime minister's policies and his catch phrase of ''valve-based politics'' where personalities play a secondary role.

Devi Lal had been bitter about Singh and other ruling party members of ''letting him down'' over demand for his son's ouster.

The rapprochement between the two leaders came about last Saturday when Singh hosted a dinner for Lal soon after the deputy prime minister returned to the Indian capital after a three-week nature cure therapy in the southern city of Bangalore.

#90193d4840 07/12/1990 ~French/German News Agency

ADDIS ABABA (JULY 12) - African leaders dispersed Thursday after their latest annual OAU summit, full of good resolutions about gradual democracy and measures to haul the continent's economy out of crisis.

For the first time, the civil wars bloodying some Organisation of African Unity member states for many years were aired, starting with host nation Ethiopia, in addition to inter-state and regional conflicts.

Barely a third of the OAU's heads of state or government from 51 countries attended the summit, but the link between development and democracy, and peace and development, was emphasised by everyone, as well as the need to respect human rights.

However, the realities back home look like overtaking positions adopted by leaderships whose regimes are increasingly contested by populations feeling the winds of change from Eastern Europe.

Socio-political unrest in West Africa, riots and demonstrations in Kenya and Somalia put down with violent repression, food rioting in Zambia, internal conflicts in the Horn of Africa and Angola, Mozambique and Liberia: all of Africa is on the boil.

The summit wound up by urging peaceful settlement of all the disputes through negotiation, but a fierce altercation during one plenary session between Mauritania and Senegal showed clearly what difficulties remain to be overcome.

The two countries have been at loggerheads since April last year, when a border killing sparked a wave of reprisal slayings of Moors and blacks in both countries and the evacuation, or expulsion, of tens of thousands.)

Afro-Arab cooperation has often been difficult, despite efforts by Algeria and outgoing OAU chairman Egypt.

Problems have again emerged in Arab versus black-African tension pitting Chad against Libya, in Sudan, the Mauritanian-Senegal dispute, and in the growth of help from some Arab countries for rebels in northern Ethiopia after the government here renewed diplomatic relations with Israel.

There was unanimous agreement that South African President Frederik de Klerk had taken encouraging reform measures, but that they remained insufficient to permit an end to sanctions.

Black nationalist leader Nelson Mandela got a standing ovation.

TOKYO (JULY 12) - Japan's Marudai Food Co. said Thursday it had purchased Taiwan's second largest meat packer for 900 million yen (six million dollars).

Marudai officials said the acquisition of Swiss Fine Foods Corp., a subsidiary of Taiwan's Shui On Group Ltd, would give Marudai its first overseas plant.

They said that Marudai, a leading ham and sausage maker, had increased Swiss Fine Food's capital to 60 million Taiwan dollars (2.28 million dollars U.S.) from the previous 10 million Taiwan dollars (380,000 dollars U.S.) to wipe out its accumulated loss of 50 million yen (333,000 dollars).

Swiss Fine Food produces 1,500 tons of ham and sausages a year, with its sales last year amounting to one billion yen (6.7 million dollars), the officials said.

NAIROBI (JULY 12) - Four more supporters of multi-party politics arrested in Kenya have been officially detained under a law which allows for unlimited detention detention without trial.

The official Kenya Gazette published Thursday said lawyers John Khaminwa, Ibrahim Mohamed and Gitobu Imanyara, and Raila Amolo Odinga, had been detained under the Public Security Act.

The announcement brings to six the number of people detained under the act this month, after the detentions last week of former cabinet ministers Kenneth Matiba and Charles Rubia.

Raila Odinga, son of Kenya's first vice-president Oginga Odinga, has already undergone a period of some years' detention under the act. He was held after the abortive airforce-led bid to overthrow President Daniel arap Moi in 1982.

#90193d5010 07/12/1990 ~French/German News Agency

DAKAR (JULY 12) - Separatist rebels staged an armed attack on a passenger transport vehicle in Casamance, a province in southern Senegal, leaving two dead and six injured, Senegalese radio reported Thursday.

The violence was believed to be the latest in a series of attacks by the banned Movement of Democratic Forces of Casamance, held responsible for the deaths of about 12 people and the wounding of 100 since April 21.

According to the report, two women, a baby and three men, one of them French, were among victims of the attack by "a gang of around 10 rebels" Wednesday afternoon.

The driver had stopped to pick up someone whom he took for a would-be passenger when the attackers pounced and opened fire.

The military governor of the province, General Amadou Abdoulaye Dieng, called the attack "vile", the radio reported.

He said the Casmance Movement guerrillas were "murderers who must be found and destroyed."

The daily newspaper Le Soleil Thursday reported a theft of arms from a court at Ziguinchor, the Casamance region's capital.

On June 20, separatist guerrillas reportedly carried out a night raid with machine guns on the security forces, injuring nine. In a sweep of the region, security forces were later said to have found leaflets hostile to the governor.

Dozens of suspected members of the movement have been brought before the State Security Court in recent weeks in connection with a string of armed raids in the region.

The Casamance separatist movement, which has a long history, has seen a violent upsurge since 1982.

#90193d5030 07/12/1990 ~French/German News Agency

HAVANA (JULY 12) - A Cuban man has taken refuge in the Spanish Embassy here and demanded political asylum, becoming the fifteenth Cuban this week to enter a foreign diplomatic compound in a bid to leave the country, an embassy official said Thursday.

Luis Montegrado Rodriguez, 27, entered the embassy compound late Wednesday and said he wanted asylum in a Western country, said Fidel Sendagorta, an official at the Spanish Embassy.

In his bid to leave Cuba, Mr. Montegrado joined 14 other Cubans who took refuge in the Czechoslovak Embassy between Monday and Wednesday.

The Spanish diplomat said Mr. Montegrado had been jailed from 1985 to 1988 for attempting to seek asylum at the U.S. interest section in the Swiss Embassy here.

He said the Spanish Embassy could not grant asylum to Mr. Montegrado but

would seek to resolve the affair through "good will on both sides."

Embassy sources said Cuban authorities had been informed of Mr. Montegrado's asylum bid and had reiterated its refusal to negotiate the fate of any of the refugees currently in foreign embassies.

Tuesday Cuban police reinforced their guard around the Czechoslovak Embassy at the embassy's request.

Five Cuban dissidents entered that embassy compound Monday, saying they feared imminent arrest and hoped to travel abroad to present their case against the government of President Fidel Castro. Two students entered the embassy later Monday seeking asulum, followed by seven other people who sneaked into the compound Wednesday.

Diplomats in Havana said Wednesday that they did not expect the trickle of asylum seekers to grow into the kind of refugee flood experienced in 1980, when some 10,000 Cubans descended on the Peruvian Embassy here, and the government eventually allowed 128,000 disaffected citizens to sail to the United States.

The diplomats said the current situation was different in that the Cuban media was not reporting the story and the government was jamming Spanish-language broadcasts aimed at this Caribbean island by the U.S. Government's Radio Marti, which had encouraged the 1980 exodus.

#90193d5200 07/12/1990 ~French/German News Agency

LONDON (JULY 12) - Platinum prices fell sharply in London on Thursday in the wake of a fall in Tokyo, dropping to 469 dollars an ounce at the morning fixing, nine dollars below Wednesday's closing level.

Other precious metals were little changed, with gold slipping to 352.75 dollars an ounce from 354.25 at Wednesday's close, while silver was at 4.826 dollars against 4.8125.

Tom Butler, an analyst with merchant bank Samuel Montagu, said that platinum prices had been dragged down by "selling pressure in Tokyo last night because of exchange rate fluctuations there."

The metal had fallen below a significant psychological level in Tokyo, he said, sparking a wave of technical selling.

#90193d5520 07/12/1990 ~French/German News Agency

COLOMBO (JULY 12) - At least 48 soldiers including an officer were feared

killed in a rebel attack on an army camp in northern Sri Lanka as new fighting broke out around other camps in the region, officials said.

Guerrillas of the Liberation Tigers of Tamil Eelam (LTTE) ignited a fuel dump inside the Kokkavil camp, then opened fire amid a raging inferno, killing an estimated 48 soldiers, the officials said.

An official communique said that shortly after the petrol dump exploded the troops "made use of this opportunity to initiate a tactical withdrawal."

Minister of State for Defence Ranjan Wijeratne said earlier Thursday that a suicide-attack by the LTTE to ram the camp was smashed, but the rebels fired mortars to destroy the fuel dump and a relay station of the state television.

Officials said the destruction of the relay station knocked out all broadcasts to the Tamil-majority northeast.

Last month, some 40 army commandos were killed in a guerrilla ambush while trying to land on the east coast from the sea.

Military officials said Wednesday that three soldiers and 21 rebels had been killed when fierce fighting around the camp erupted Tuesday night with air force helicopter gunships too joining the fray firing at rebel positions.

It was not known how many troops were based in Kokkavil but the sources said it was not likely many had survived.

Military officials here said rebels were also firing rockets and mortars into the northern Killinochchi army detachment, using a hospital and homes of residents to launch the attacks.

Mortar fire was also being directed into the Elephant Pass army camp at the mouth of the northern Jaffna peninsula.

More than 1,550 people have died since the armed conflict between government troops and the LTTE broke out on June 11, according to unofficial and official sources.

The communique said that security forces are reported to have killed more than 50 guerrillas "in the final phase" of the operation to secure a massive LTTE hideout in eastern Ampara.

It said troops had seized a large quantity of explosives, mines and mortars from the hideout captured on Tuesday.

Elsewhere in Ampara district, security forces shot dead 10 more rebels.

The communique said a sailor was killed when three boatloads of LTTE cadres attacked a naval vessel off the eastern coast of Trincomalee, adding that two "terrorist boats were completely destroyed."

Meanwhile, the LTTE said in a statement received here Thursday from its London office that its black Tiger suicide unit had badly damaged a naval ship delivering supplies to government troops besieged in two camps in the north.

The brief statement said three guerrillas and "many Sri Lankan navy personnel" were killed in the operation off the northern Velvettithurai coast, birthplace of LTTE's legendary leader, Velupillai Prabakharan.

A naval officer said no naval personnel had died and that at least 12 Tiger guerrillas were killed in the attack including one with the rank of a "major" and two others with the rank of "captain."

He said the ship, which was used for surveillance off the northeastern coast, was returning to Colombo for minor repairs and that its engines were in perfect condition.

Moslems and Tamils are a minority in Sri Lanka, where more than 75 per cent of the population of some 16 million are Sinhalese.

JOHANNESBURG (JULY 12) - Three black men were shot dead by South African Defence Force (SADF) soldiers in war-torn Natal province after the troops walked into an ambush, South African state radio said here Thursday.

The incident occurred early Thursday near Richmond, 75 kilometres (47 miles) west of the eastern port city of Durban.

Police the shootings took place when soldiers were called to remove the body of a man burned to death in one of 27 huts that had been gutted there.

A bloody civil war has been raging in Natal between supporters of Zulu leader Mangosuthu Buthelezi's Inkatha movement and followers of the United Democratic Front, an ally of the anti-apartheid African National Congress (ANC).

The conflict has claimed more than 3,000 lives in four years.

In a bid to halt the black-on-black violence, President Frederik de Klerk ordered SADF troops into Natal townships on April 1 to assist the understaffed police.

PARIS (JULY 12) - French department store Galeries Lafayette, which said this week it was taking space in the Trump Tower in New York, said Thursday its net profit rose 10 percent last year to 117.9 million francs (21.4 million dollars).

Turnover was up 6.7 percent at 15.8 billion francs (2.8 billion dollars) from 14.8 billion.

Sales at the main store in Paris' Boulevard Haussmann soared 12.4 percent over the 1988 level to 2.6 billion francs (472 million dollars), helped by an influx of tourists to the French capital during the 200th anniversary of the French Revolution.

The group is planning a major renovation programme this year, notably opening a new department, Lafayette Gourmet, here in September offering French and foreign delicacies which customers can taste before buying.

Galeries Lafayette president Georges Meyer confirmed that the group was taking a 25-year lease at the Trump Tower - 15 years initially with two five-year renewal options - but refused to say how much rent it was paying.

He said however that the group would be investing 10 to 15 million francs (1.8 to 2.7 million dollars) to give the new store "a French flavour."

"We are being asked by many countries to open shops, but for the moment we have no definite plans," Mr. Meyer said.

HARARE (JULY 12) - A second round of direct peace talks between Mozambique's ruling Frelimo party and the rebel Resistencia Nacional de Mocambique will go ahead in Rome within the next 10 days, Zimbabwe President Robert Mugabe said Thursday.

Mugabe made the announcement at a press conference on his return from the Organisation of African Unity summit in Addis Ababa where he discussed the flagging Mozambique peace initiative with President Joaquim Chissano.

The Zimbabwe president said the first round talks held in secret in Rome from Sunday to Tuesday were ''harmonious and friendly.'' The talks were the first face-to-face discussions in the 15 years of civil war in which an officially estimated 700,000 people have died.

Earlier attempts to bring the two parties to the negotiating table collapsed last month when Afonso Dhlakama, leader of the rebel movement, known by its Portuguese acronym, Renamo, failed to turn up at a pre-arranged meeting in the Malawian city of Blantyre.

Mugabe also disclosed that the historic meeting had been manouevred by the churches in Mozambique - who were initialy responsible in 1988 for opening the path to peace talks.

No ''substantive issues'' had been discussed at the first meeting, Mugabe said, and it was expected now that these would be covered in the agenda of the next meeting.

Observers believe Chissano will be pressing strongly for a ceasefire, but they also warn that the talks are likely to continue with many hitches for a considerable time.

Chissano was quoted in a despatch by Aim, the official Mozambique news agency, as saying that the Vatican and the Italian government were originally approached in March this year over the possibility of aproviding a site for peace talks, and they agreed.

Chissano also said that the mediation between Frelimo and Renamo provided hitherto by the Zimbabwean and Kenyan governments, was no longer needed, as their mission to establish direct talks had now been achieved.

Diplomatic observers point out, however, that one of the main reasons for the failure of previous attempts was the deep mistrust held by the Mozambicans for the Kenyans, who were regarded as favouring Renamo.

JERUSALEM (JULY 12) - Israel's foreign debt dropped by 170 million dollars in the first three months of 1990 to 23.7 billion dollars, the Israeli Central Bank said Thursday.

The national debt stood at 16.6 billion dollars, while combined credits for private companies and banks reached 1.1 billion dollars by the end of March.

Israeli foreign debt had decreased by 1.5 billion dollars since the beginning of 1988, but from April 1990, Israel was expected to reimburse its creditors two billion dollars, the bank said.

#90193d5830 07/12/1990 ~French/German News Agency
KABUL (JULY 12) - The Afghan government Thursday said it was keeping up pressure on resistance fighters around the capital Kabul and eight more had been killed in overnight operations.

Government spokesman Humayun Mukammel said "mopping up" operations involving jet fighters and heavy artillery Wednesday aimed at flushing out mujahedeen guerrillas hiding near the capital.

No government casualties were reported.

In the five days ending Tuesday, government forces killed at least 45 mujahedeen guerrillas in separate incidents near Kabul without losing a single soldier, according to the spokesman.

However the guerrillas kept up rocket attacks on the capital. Seven missiles slammed into the city Wednesday, killing one person and wounding four, the official said.

Diplomats said the guerrillas had been pushed back from their usual rocket launching positions because of stepped-up government attacks on them, but rocketting nevertheless continued though shells fell short of the city centre.

Mujahedeen attacks on the capital are aimed at pressuring the government of President Najibullah to step down.

JAMMU, INDIA (JULY 12) - The Indian army Thursday shot dead seven alleged intruders from Pakistan into Kashmir, while Moslem militants killed five

civilians elsewhere in the northern region, officials said.

An Indian army patrol killed the group of seven when they tried to enter Kashmir through the Keran area from Pakistan, a Jammu and Kashmir state government spokesman said.

He described them as trained Moslem militants returning from Pakistan which has repeatedly denied Indian charges of helping the separatists.

In the mainly Moslem Kashmir valley, militants gunned down five civilians, according to the spokesman in Jammu, Jammu and Kashmir's winter capital.

More than 800 people have died this year in violence linked to the separatist campaign in Kashmir.

#90193d5870 07/12/1990 ~French/German News Agency

JOHANNESBURG (JULY 12) - Two dissident members of the African National Congress (ANC) Thursday called for a judicial inquiry to investigate their accusations of torture and murder against the black nationalist organization.

ANC leader Nelson Mandela admitted in April that members of Umkhonto we Sizwe (MK, or Spear of the Nation), the military arm of the ANC, had tortured prisoners in the organization's camps in Angola, but assured that disciplinary measures had been taken against the parties involved.

Speaking at a press conference in Johannesburg, Mwezi Twala and Nicholas Dyasop, released in April after four years in ANC prisons in Angola, criticized MK chief-of-staff Chris Hani, who recently said that no action had in fact been taken against those responsible for the torture and ruled out a formal investigation.

The two men called in a statement for "a public inquiry into the conditions in these prison camps," in view of the contradictory statements by Mr. Hani and Mr. Mandela.

Mr. Twala later specified that he wished the inquiry to be carried out by a judicial commission.

Mr. Twala and Mr. Dyasop were part of a group of eight ANC dissidents, one of whom, Sipho Phungulwa, was shot dead in June in Umtata, capital of the nominally independant black homeland of Transkei.

Mr. Dyasop, who says he was with the victim at the time and narrowly missed being gunned down himself, maintains that the assailant had just come out of the ANC premises in Umtata.

He described the shooting as "a continuation of what has happened" in ANC camps in Angola.

Mr. Twala said the seven other dissidents in the group met on June 28 with ANC leaders Wilton Mkwayi and Walter Sisulu, and agreed with them that both parties would refrain from making public declarations criticizing one another.

But, said Mr. Twala, Mr. Sisulu violated this understanding when he recently told the press that the dissidents had no further grievances against the ANC.

Mr. Twala and Mr. Dyasop belonged to a group of MK militants imprisoned by the ANC in 1984 in Angola.

The two men said that they were locked up for having demanded the convocation of a national conference of the movement and protesting against the lack of democracy wihin the organization.

#90193d6050 07/12/1990 ~French/German News Agency

HARARE (JULY 12) - Zimbabwe President Robert Mugabe admitted Thursday that elements within his ruling Zanu(Pf) were opposed to aims to establish a one-party constitution in Zimbabwe.

Zimbabwe retains a constitution guaranteeing freedom of political association, but in recent months Mugabe has been campaigning for a constitution which calls for the establishment of one-party state.

Last April, a series of constitutional clauses protecting the freedom of political association expired. To push through one-party rule, Mugabe needs a two-thirds majority in the 150-seat parliament, where only two seats are held by opposition parties.

Mugabe defended the one-party state system Thursday, arguing that the existence of more than one party in a state was no guarantee of democracy.

The president said democracy could well exist in a constituion which outlawed the existence of other political parties.

But he said that some people in the ruling party's central committee appeared to be getting cold feet over the issue of one-party rule. He called them ''political cowards''.

Mugabe is seen as being increasingly isolated from the trend of international events, first in Eastern Europe, and this year in Africa

where country after country has begun restoring pluralism.

The most recent was the formerly Marxist state of Angola, which announced two weeks ago that it planned to hold a referendum on whether to abandon the single party system and adopt a multi-party constitution.

MOSCOW (JULY 12) - Western and Moslem countries' intelligence services are stepping up their operations in the Soviet Union by sending agents through the Afghan border, a senior military officer alleged Thursday.

"The secret services of a number of Western countries and, primarily, Moslem ones, have lately increased attempts to send their agents here through the republic of Afghanistan," said Major-General Anatoly Martovitsky, deputy military commander in the Soviet central Asian border district.

His remarks were carried by the official Soviet news agency Tass.

"Over recent months, border guards and KGB personnel have detained more than 200 border violators. Some of them were carrying weapons and pro-Islamic, anti-Soviet printed matter," the officer said.

Soviet forces had information about contacts between leaders of some informal extremist groups in Soviet Tadzhikishtan and the leadership of the Afghan resistance, he added, without giving details.

LONDON (JULY 12) - Lord Rayner, chairman of the British chain store Marks and Spencer, is to retire in March when he reaches the age of 65, the retailer said Thursday.

He will be replaced by current director general Richard Greenbury.

Lord Rayner has been with Marks and Spencer for more than 30 years, joining the group as Mr. Derek Rayner in 1953 and becoming a member of the board in 1967, and chairman in 1984.

He was made a peer after acting as special adviser to Prime Minister Margaret Thatcher on management efficiency from 1979 to 1983.

Marks and Spencer made a taxable profit of 604 million pounds (one million dollars) last year on sales of 5.6 billion (10 billion dollars).

#90193d6180 07/12/1990 ~French/German News Agency
WASHINGTON (JULY 12) - The U.S. thrift scandal allegedly involving President George Bush's son Neil has Republicans baring their teeth and Democrats licking their chops as they look toward upcoming elections.

Wednesday President Bush defended the "honor an integrity" of his son, a 34-year-old oilman accused of negligence for his role as a director of the bankrupt, Colorado-based Silverado Banking, Savings and Loan Association.

Neil Bush, the third of the president's four sons, faces a public disciplinary hearing in September.

And federal savings and loan regulators say they could seek to recover 200 million dollars from him and his ex-colleagues to help cover the one billion dollars in losses incurred by U.S. taxpayers when the thrift failed in December 1988.

In an emotional defense of his son delivered during a press conference closing the G-7 summit in Houston, Texas, Wednesday, Mr. Bush said: "I have confidence in the honor and integrity of my son, and if the system finds he's done something wrong he will be the first to step up and do what's right.

"This is not easy for me, as a father; it's easy for me as the president because the system is going to work, and I will not intervene."

Analysts say the high profile being given Neil Bush's role in the Siverado failure is likely to help make the savings and loan crisis the hottest issue in next November's legislative elections and possibly even in the 1992 presidential polls.

"Neil Bush is on the verge of becoming the metaphor for an entire decade of greed, mismanagement and excess," said Representative Robert Torricelli, a New Jersey democrat.

"The central problem of the Democratic Party has been its inability to simply define and explain those years of excess and greed. Now, that may become known by the name Neil Bush," he said Wednesday.

Although the scandal has involved both Republicans and Democrats, the Democrats are seeking to present the savings and loan debacle as the result of a decade of Republican laxism -- under former president Ronald Reagan and then-vice president Bush -- towards rampant business speculation.

The opposition Democratic Party announced plans this week to exploit the

Bush government's handling of the affair in the November legislative and gubernatorial elections.

The need to scrape up enough money to bail out the savings and loans was also one of the key reasons Mr. Bush broke his campaign promise never to raise taxes.

Last month the president finally admitted that new taxes were needed to reduce the federal budget deficit, drawing choruses of "I told you so" from the Democrats and howls of protest from fellow Republicans.

Almost two-thirds of the some 2,500 U.S. thrifts are currently insolvent due to mismanagement and embezzlement. The total cost to taxpayers for the government's plan to rescue the savings and loans is now estimated at between 250 billion and 300 billion dollars.

An oil firm executive in Colorado, Mr. Bush sat on Silverado's board of directors from August 1985 to August 1988, quitting the thrift's board just four months before it was declared insolvent.

Federal regulators said that while on the Silverado board, Mr. Bush voted to approve more than 45 million dollars in loans or business deals to a business partner, Bill Walters, who never repaid the funds.

The regulators are investigating the possibility that Mr. Bush violated conflict-of-interest laws. He has denied any wrongdoing in the affair.

#90193d6250 07/12/1990 ~French/German News Agency

JERUSALEM (JULY 12) - Leaders of Israel's Labour Party Thursday endorsed a motion for early leadership elections in a move that threatens the status of party chief Shimon Peres.

Political sources said 60 per cent of the leadership voted for the motion presented by Labour's number-two man Yitzhak Rabin, while 40 per cent voted against.

The former defense minister and long-standing rival of Mr. Peres has spearheaded a campaign to oust the party's leader following his failure to form a new government earlier this year.

An opinion poll published Wednesday inthe Jerusalem Post newspaper showed Mr. Rabin could easily win election as Israeli prime minister if a nationwide vote were held now.

Mr. Peres has said that under party rules, he cannot be replaced before the end of his four-year mandate, which expires in 1992.

But a party panel disagreed and gave the 2,000-member central committee the go-ahead to begin procedures for the leadership dual between Mr. Rabin and Mr. Peres.

The vote, which highlighted Mr. Rabin's increasing popularity in the Labour Party and the nation, is intended as a recommendation, to be submitted to a July 22 meeting of the central committee.

That meeting, in turn, is to resolve the leadership challenge faced by Mr. Peres.

Mr. Peres said after Thursday's vote that he still had the support of the party's rank-and-file and expected the central committee to reject the motion endorsed here.

But Mordechai Gur, a supporter of Mr. Rabin, said he expected the former defense minister to come out victorious "after the success he reaped at the bureau's meeting Thursday."

#90193d6340 07/12/1990 ~French/German News Agency

JOHANNESBURG (JULY 12) - South Africa's key marginal gold mine, East Rand Proprierty Mines (ERPM), its creditors and the government agreed Thursday on a plan to rationalise the ailing mine's operations and financing.

In a statement, ERPM's parent company Rand Mines (RM), said a number of the rescue plan's aspects have already been implemented and outstanding aspects, which required government approval, would be implemented as soon as possible.

Main features of the plan include, mining activities will be concentrated on the high-grade underground sections, certain assets will be sold and the parent company and First National Bank will extend repayment of 30 percent interest due on loans of 80 million rand (30.7 million dollars).

The government has also undertaken to make available, if necessary, further loans not exceeding 33 million rand (12.7 million dollars) after January 1 1993 and has already underwritten 220 million rands (84.6 million dollars) of loans to ERPM and guaranteed interest payments.

Rand Mines will reduce its management fee by 50 percent until December 20 1992.

The mine employs some 10,000 people at Boksburg, east of Johannesburg. Around 65 percent of the shares are held in France.

On July 3, Rand Mines chairman Clive Knobbs warned the mine may have to close unless government stumps up cash to back the recues plan and on July 5 the government agreed to provide additional finance after a judicial commission of inquiry headed by Mr. Justice David Melamet found ERPM to be a special case.

#90193d6390 07/12/1990 ~French/German News Agency

PORT-AU-PRINCE (JULY 12) - Haiti's army chief called on security forces Thursday to arrest Roger Lafontant, a former strongman in the Duvalier dynasty who returned from exile last week, a ranking military source said.

For his part Mr. Lafontant, who once headed the Tonton Macoutes secret police which used violence and intimidation to crush opposition to the Duvalier dictatorship, announced Thursday that he would run for president in elections scheduled for November.

Mr. Lafontant fled into exile in the Dominican Republic prior to the February 1986 ouster of president Jean-Claude Duvalier.

"I returned to see my country, my relatives and friends," he told a Dominican television station Thursday in a telephone interview from Haiti.

"I have received a show of support from the provinces in Haiti for my aspirations to the presidency," he said, adding, "I am a very popular person."

Mr. Lafontant went on to say that now that he has returned home, "I will not be thrown out, not even by force."

The army's arrest order for Mr. Lafontant was accompanied by one from the Port-au-Prince chief of police and the attorney general.

The government's failure to move against Mr. Lafontant prompted a 24-hour strike Wednesday that paralyzed the capital and slowed down activity in other towns around the country.

Strike organizers demanded the arrest of both Mr. Lafontant and former general Williams Regala, the number-two man under general Henri Namphy, who ran a provisional government following the Duvlier ouster.

Military sources said an arrest warrant has not yet been issued for Mr. Regala, who is held responsible for a November 1987 election day massacre that left 34 people dead. Mr. Regala fled to the United States in March after an uprising toppled the current military ruler, Lieutenant General Prosper Avril.

The State Council had said the presence of the two men, "who repeatedly violated human rights" would the jeopardize "public peace and the electoral process."

Their return came as the provisional government of President Ertha Pascal-Trouillot stands accused of being ineffective in stemming political violence that has been mounting in the months before the November elections.

The 11 political organizations that called Wednesday's strike announced Thursday that they would give the provisional president until Monday to arrest and charge the two men or they will demand her resignation.

The November 1987 elections were aborted three hours after voting began when squads of men in collusion with soldiers shot and hacked to death at least 34 people at polling stations.

Mr. Regala has been accused by the Provisional Electoral Council, which is organizing the upcoming elections, of being the "principal instigator" in the November 29 massacre.

Wednesday's 24-hour strike affected much of the country and left the streets of Port-au-Prince nearly empty.

Witnesses said armed Lafontant supporters stopped the few drivers on the roads and forced them to shout "Viva Lafontant." They broke the windshields of motorists who refused to comply.

#90193d6480 07/12/1990 ~French/German News Agency

PORT MORESBY (JULY 12) - Papua New Guinean Justice Minister Bernartd Narakobi said Thursday that he would like to ban Amnesty International from his country, saying it is ''a criminal and illegal organisation, immoral, and they don't know what they are talking about''.

Narakobi, a former civil rights lawyer, was responding to an Amnesty report which included Papua New Guinea amongst nations guilty of human rights abuse.

Amnesty's report referred particularly to the actions of government security forces on the rebel island Bougainville and called on Australia to cease military aid to Papua New Guinea, which it alleged, was leading to the deaths of innocent people.

Justice Minister Narakobi accused Amnesty International of not understanding that every nation has a right to defend its sovereignty and its integrity against criminals and against rascals and thugs.

''Papua New Guinea has one of the best records in the world on human rights,'' he said.

Prime Minister Rabbie Namaliu also defended the nation's record. He suggested Amnesty International should have a look at the activities of the Bougainville Revolutionary Army (Bra) since the government troops were withdrawn from the island. The government has frequently alleged the Bra is resorting to terror tactics to hold onto power in Bougainville.

#90193d6500 07/12/1990 ~French/German News Agency

POTSDAM, EAST GERMANY (JULY 12) - Potsdam, the historic seat of Prussian kings and German kaisers outside Berlin, is to annul the honorary freedom of the city granted in 1933 to Nazi dictator Adolf Hitler and his deputy Hermann Goering, city officials said Thursday.

The officials said it was unclear why the move came at this time. The issue had been discussed in 1988, when East Germany was still a Communist state, but was then shelved.

The city executive had recommended to the council that it cancel the honorary titles as quickly as possible at the next council session, August 15.

Goering, who established the Nazi concentration camps and Gestapo secret police, committed suicide in 1946 after being sentenced to death at the Nuremburg war crimes trials. Hitler killed himself on the eve of the Allied victory that ended World War Two in 1945.

WASHINGTON (JULY 12) - The head of the 1994 World Cup Organizing Committee on Thursday dismissed rumours that the United States is to hand over the event to a reunified Germany because of a lack of media interest.

Committee president Scott LeTellier told Agence France-Presse that "there's no basis to the rumors", adding that the report in the West German newspaper Bild was "quite disturbing."

Bild reported that corporate sponsors were balking at contracts because the three major U.S. television networks were not interested in covering the 1994 Cup, and that the finals would be moved to a reunified Germany.

LeTellier countered that only NBC had dropped out of the bidding and that ABC, CBS and two cable networks continued to express interest.

The World Cup in Italy was televised in the United States on a relatively obscure cable network, TNT, and a Spanish language network, Univision.

While ratings for TNT's coverage of selected games were poor, Univision claimed their coverage was a success.

LeTellier said he expected that the "most important games" and those involving the U.S. team would be televised nationally, while the other games would be seen on cable.

As for corporate sponsorship, LeTellier said the two major sponsors, Coca Cola and Anheuser-Busch, had until the end of this year to sign a contract and he fully expected them to do so.

Anheuser-Busch, maker of Budweiser and Michelob beers, has been a sponsor for the last two World Cups.

LeTellier added, however, that "eight other national companies" were present at a recent meeting and had expressed interest in the World Cup.

MANILA (JULY 13) - Time bombs exploded at the education department headquarters and five other places across the Philippine capital before dawn Friday, causing property damage but no casualties, police said.

No one immediately claimed responsibility for the blasts, which hit commercial buildings and hotels as well as the education offices in Manila police said.

Mayor Mel Lopez said in a radio interview that the main lobby of the education department building in central Manila was severely damaged by the explosion of an undetermined type of bomb.

Bombs exploded outside the privately-owned Manila Midtown, Silahis and Century Park Sheraton hotels, all catering to foreign tourists.

The Avis car rental agency across from the U.S. embassy and a department store in the Makati financial district were also hit by explosions, which damaged cars parked outside.

A security guard found a dynamite bomb outside the government-owned Philippine Plaza hotel, and police defused the explosive.

LIMA (JULY 12) - Peruvian President-elect Alberto Fujimori, his wife and four children are staying in a local army barracks for security reasons pending his July 28 inauguration, sources said Thursday.

Since he defeated Mario Vargas Llosa in elections June 10, Mr. Fujimori had conducted business in his home and a Lima hotel before moving to the barracks Wednesday.

They are to stay at the barracks as a security precaution against possible rebel attacks until they move to the Government Palace July 28, the source said.

The country's leftist insurgency, the Maoist Shining Path and the pro-Cuban Tupac Amaru Revolutionary Movement (MRTA), have waged a guerrilla insurgency in Peru, killing farmers, elected officials and others in a bid to halt the democratic process in Peru.

Forty-eight MRTA rebels, including a MRTA leader, tunneled from a Lima prison Monday but as of Thursday none were reported to have been captured.

#90193d6840 07/12/1990 ~French/German News Agency

WASHINGTON (JULY 12) - U.S. lawmakers Thursday approved a bill requiring China to significantly improve its human rights record in order to retain its most-favored-nation trade status beyond this year.

A subcommittee of the U.S. House of Representatives approved the legislation on a voice vote, falling short of withdrawing the preferential trade status as called for by opponents of U.S. President George Bush's China policy.

Critics are insisting the Bush administration respond more forcefully to the Chinese Government's bloody supression of pro-democracy demonstrators in Beijing last year.

Approval of the bill irritated some administration officials who said it would harm U.S. competitiveness and do more harm than good.

"With increasing signs of moderate, pragmatic thinking in Beijing, we fear explicit public linkage of (most-favored-nation trade status) to human rights may harden China's posture and make it more difficult to address our concerns," Deputy Secretary of State Lawrence Eagleburger said in a letter to the subcommittee.

China and the United States do about 18 billion dollars annually in bilateral trade.

#90193e0005 07/12/1990 ~Latin America New Agency

QUITO (JULY 12) EFE - At least eight people were arrested during general strike violence in which protesters hurled molotov cocktails at banks and a police patrol, injuring one officer, Ecuadorean officials said.

Protesters attacked police and a branch of the United Netherlands Bank in the capital Wednesday, where government buildings were protected by troops during a 24-hour general strike, the third since President Rodrigo Borja took office almost two years ago.

Strikers in Guayaquil, Ecuador's most populous city, 250 km southwest of Quito, lobbed firebombs at a branch of the U.S. Citybank.

The stoppage, led by the United Workers Front (FUT), was called to force the government to change its economic austerity policies, raise wages and "honor its social debt".

A presidential spokesman described the violence as "acts of vandalism" and denied reports that an arrest warrant had been issued against FUT president Jose Chavez and other labor leaders.

Spokesman Rodrigo Rangles said the reports were propagated by those "who want to appear like victims of government persecution".

MADRID (JULY 12) EFE - The cost of living in Spain rose by 0.3 percent in June bringing the accumulated inflation rate for the first six months of 1990 to 2.5 percent, the National Statistics Institute announced Thursday.

The rate for the 12 months to June was 6.5 percent, said the institute.

The Socialist government of Prime Minister Felipe Gonzalez has set a target of 5.9 percent for the year.

GENEVA (JULY 12) EFE - A United Nations report claims that the U.S. invasion of Panama left up to 2,500 Panamanians dead and thousands more homeless and predicts a spiral of violence in the country if economic aid

is not forthcoming, according to a member of the commission which drew up the report.

Julio Prado Vallejo, president of the UN Human Rights Commission and member of the delegation which compiled the still unpublished report, told EFE that the December 20 invasion constituted an "open violation of the fundamental principles of international law."

"International public opinion must demand that the United States compensate the damage which it caused Panama, and Latin America must unite to prevent this type of aggression," Prado said.

"Until now U.S. economic hasn't been sufficient, despite promises to cover damage," he added.

"If there is no help for Panama to solve its problems, the division and profound trauma among the population which the invasion caused will unleash a spiral of violence of uncalcuable consequences," Prado said.

Washington ordered troops into Panama to capture Manuel Antonio Noriega who now faces drug-trafficking charges in the United States.

The report says that of the between 2,000 and 2,500 Panamanians killed during the invasion, only 350 were members of the Panamanian Defense Forces loyal to Noriega.

Twenty U.S. servicemen were killed in the operation.

The report says at least six common graves were used to bury the Panamanian victims.

The military operation left some 15,000 people homeless, according to the report, mostly in the neighborhoods of the capital surrounding Noriega's headquarters where a huge fire raged during the fighting.

Prado, from Ecuador, said the report indicated that the United States used the invasion to test new weapons, "chiefly bombs that penetrate and remain in the ground where they explode and destroy everything, and planes that can't be detected by radar."

The report was drawn up after a delegation, headed by former U.S. ambassador to El Salvador Robert White, traveled to Panama in March to view the aftermath of the invasion.

Prado said, "The conclusions were reached after contacts with President (Guillermo) Endara, the U.S. military command, political parties, unions, universities, and even ex-president (Francisco) Rodriguez."

He said that while Panamanians at first tolerated the U.S. presence following the invasion because it had freed them from Noriega's dictatorship, soon after it gave rise to disappointment and doubt about the future.

#90193e0019 07/12/1990 ~Latin America New Agency

BUCHAREST (JULY 12) EFE - The Romanian League of Students has called a protest march to demand the release of the group's leader who was detained during a brutal crackdown on anti-government demonstrators last month, the official news agency Rompress reported Thursday.

The students are to march through the capital Friday afternoon and hand in a written plea to the Ministry of Justice for the release of their leader Marian Munteanu.

The student group describes itself as apolitical and its members say they have obtained official permission for the march.

Munteanu was detained during the crackdown on protesters June 13 to 15 and is being held at Jilava prison hospital, just outside the capital, where he is recovering from injuries received at the time of his arrest.

At least six people were killed and over 500 were injured. Munteanu said he was beaten by miners called in by the government to quell the unrest.

The protesters had claimed that in May elections, won by the National Salvation Front which took power when hardline leader Nicolae Ceausescu was toppled and executed in December, had been rigged and that members of the old regime had infiltrated the new government.

#90193e0022 07/12/1990 ~Latin America New Agency

RIO DE JANIERO (JULY 12) EFE - Huge traffic jams snarled the city center Thursday during the second day of a public transport workers' strike for higher pay.

With no buses or subways running, many of Rio's six million commuters took to private cars in heavy rain, blocking the streets for hours.

Subway workers, on strike since Friday to demand a 166 percent pay rise, have been joined by bus staff who want a 90.26 percent increase.

Bus workers say their employers are prepared to give them the raise if city authorities agree to let them increase fares.

Rio Mayor Marcello Alencar said Thursday he would meet with labor leaders and transport companies to try negotiate an end to the action without allowing huge fare hikes.

Meanwhile, some 6,000 workers occupied a steel plant in Volta Redonda, 134 km northwest of the capital, and threatened to turn off the machinery if management did not meet with labor leaders to discuss union demands.

#90193e0031 07/12/1990 ~Latin America New Agency

LIMA (JULY 12) EFE - Suspected Maoist "Shining Path" rebels Thursday gunned down two policemen and one civilian as they were having breakfast at a sidewalk cafe in the Peruvian capital, officials said.

Four armed men shot the three in the back and shouted pro-Shining Path slogans before escaping in a waiting vehicle.

Two other people were wounded in the attack, which came as thousands of police combed Lima for 48 leftist rebels of the Tupac Amaru Revolutionary Movement who made a dramatic jailbreak from a maximum security prison four days ago.

More than 20,000 people have died in political violence since Shining Path took up arms in 1980.

#90193e0051 07/12/1990 ~Latin America New Agency

BRASILIA (JULY 13) EFE - Brazilian Economy Minister Zelia Cardoso de Mello described Thursday the turnaround of Brazil's budget deficit as a financial miracle without precedent in world history.

Cardoso de Mello attributed a budget surplus of 1.65 percent of gross national product (GNP) for 1990 from a 4.2 percent deficit a year ago to the shock economic austerity plan introduced by Brazilian President Fernando Collor de Mello in March.

Prior to the implementation of the plan, analysts had predicted a budget deficit of 7.8 percent of GNP, she said.

The ecomony minister said the elimination of the deficit was due to a drastic reduction in public spending, increased efficiency in collecting taxes, and a significant cut in the currency reserves used to service domestic debt.

Cardoso de Mello added that the government's 1990 budget, to be presented Friday to congress, would cut state investments by 39 percent and

government costs by 18 percent which, she predicted, would lead to further public-sector job losses.

Taxes collected had risen from 12.5 percent of GNP in 1989 to 15 percent in 1990, thanks to a clampdown on tax evasion and new taxes.

Asked about the consequences of unemployment and the slump in production following the introduction of the Collor plan, the minister replied, "There is no recession, only an adjustment where some sectors are cutting back and others are growing."

The government was also tackling repayments on its huge foreign debt, the developing world's biggest at dlrs 112.57 billion, through stage-by-stage negotiations, Cardoso de Mello said.

Arrangements to repay the debt would, she hoped, be made first with the International Monetary Fund (IMF), followed by the government creditors in the Paris Club, and the commercial banks.

"We don't want to follow past administrations, where the country promised figures it couldn't deliver on.

"From these budget figures we know what Brazil is capable is paying, and we can come to an agreement with our creditors," the minister said.

Cardoso de Mello announced that a Brazilian delegation would visit Washington in the coming weeks to present to the IMF proposals on debt repayments.

The IMF, meanwhile, could send a technical mission at the end of July to Brazil to study the government's books and forecasts on Brazil's economic performance.

#90193k0022 07/12/1990 ~Japanese News Agency
TOKYO (JULY 12) KYODO - JAPAN'S EXPORTS ON A CONTRACT BASIS IN JUNE FELL 2.3 PERCENT TO 21.94 BILLION DOLLARS, POSTING A YEAR-ON-YEAR DECLINE FOR THE NINTH CONSECUTIVE MONTH, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) REPORTED THURSDAY.

IMPORTS ROSE 2.7 PERCENT FROM THE YEAR-EARLIER LEVEL TO 16.66 BILLION DOLLARS, SLOWING SLIGHTLY FROM THE 4.8 PERCENT PICK-UP IN MAY, MITI SAID.

EXPORTS OF STEEL PRODUCTS, AUTOMOBILES, AND COMPUTER CHIPS FELL, WHILE EXPORTS OF SHIPS, MOTORBIKES, AND TV SETS SURGED.

BY REGION, EXPORTS TO NORTH AMERICA AND THE COMMUNIST BLOC WERE DOWN, BUT THOSE TO OTHER REGIONS POSTED GAINS.

EXPORTS TO THE U.S. AND CANADA SLIPPED 10.8 PERCENT FROM A YEAR EARLIER TO 7.1 BILLION DOLLARS.

ON THE IMPORT SIDE, JAPAN IMPORTED MORE MEAT, CARS, SHRIMP, AND COPPER IN JUNE COMPARED WITH THE SAME PERIOD A YEAR BEFORE, BUT A LESSER VALUE OF TEXTILE GOODS, DAIRY PRODUCTS, SOY BEANS, ALUMINUM, AND PRECISION INSTRUMENTS.

IMPORTS FROM NORTH AMERICA AND THE EUROPEAN COMMUNITY INCREASED, WHILE THOSE FROM OTHER REGIONS SLUMPED.

IMPORTS FROM THE U.S. AND CANADA LEAPT 19.3 PERCENT TO 4.5 BILLION DOLLARS.

#90193k0084 07/12/1990 ~Japanese News Agency

TOKYO (JULY 12) KYODO - FOUR JAPANESE COMPANIES ARE TO BE SUED BY A U.S. RESEARCH INSTITUTE FOR INFRINGING ITS PATENT ON A DRUG FOR TREATMENT OF OSTEOPOROSIS, A BONE DISORDER CHUGAI PHARMACEUTICAL CO. SAID THURSDAY.

CHUGAI PHARMACEUTICAL MAKES AND SELLS THE DRUG UNDER THE ALFAROL BRAND USING THE PATENT HELD BY THE INSTITUTE, THE WISCONSIN ALUMNI RESEARCH FOUNDATION (WARF).

IT SAID A SUIT WILL BE BROUGHT IN JAPAN AGAINST KANTO CHEMICAL CO., TEIKOKU CHEMICAL INDUSTRY CO., AND TWO OF THEIR SUBSIDIARIES FOR ALLEGEDLY MAKING SIMILAR DRUGS BY INFRINGING THE PATENT.

ALFAROL IS ONE OF CHUGAI PHARMACEUTICAL'S MAIN PRODUCTS, WITH SALES TOTALING SOME 27 BILLION YEN LAST YEAR.

THE MOVE COMES A DAY AFTER TEIJIN LTD., A DIVERSIFIED TEXTILE COMPANY MAKING A SIMILAR DRUG BASED ON ANOTHER PATENT, ANNOUNCED THAT IT WOULD FILE A SUIT AGAINST 10 OTHER JAPANESE FIRMS OVER INFRINGEMENT OF THE

PATENT, OBTAINED FROM ANOTHER U.S. RESEARCH INSTITUTE.

-30- 1122
#90193k0087 07/12/1990 ~Japanese News Agency
TOKYO (JULY 12) KYODO - YAKULT HONSHA CO. SAID THURSDAY IT IS APPLYING TO THE GOVERNMENT FOR PERMISSION TO MANUFACTURE A NEW TYPE OF ANTICANCER DRUG IT HAS DEVELOPED.

IT SAID IT IS FINALIZING CLINICAL TESTS ON THE NEW DRUG, CALLED CPT-11, WHICH WAS ANNOUNCED AT A RECENT INTERNATIONAL ACADEMIC MEETING.

ACCORDING TO YAKULT, THE NEW DRUG IS EFFECTIVE AGAINST CANCERS ON WHICH EXISTING ANTICANCER DRUGS NO LONGER WORK.

OFFICIALS SAID THE COMPANY WILL APPLY TO THE MINISTRY OF HEALTH AND WELFARE LATER IN THE YEAR FOR PERMISSION TO MANUFACTURE CPT-11 FOR TREATMENT OF LUNG, UTERINE, AND OVARIAN CANCERS.

EXPLAINING THE DEVELOPMENT OF THE DRUG, COMPANY OFFICIALS SAID THAT IN CELL GROWTH, DNA (DEOXYRIBONUCLEIC ACID), THE SUBSTANCE FROM WHICH GENES ARE MADE, IS REPLICATED.

IN SUCH REPLICATION, TOPOISOMERASE, A KIND OF ENZYME, PLAYS AN IMPORTANT ROLE. TOPOISOMERASE IS OF TWO TYPES. CONVENTIONAL DRUGS FOR CHEMICAL TREATMENT OF CANCERS HAVE THE FUNCTION OF INHIBITING THE GROWTH OF TYPE 2 TOPOISOMERASE.

THE NEWLY DEVELOPED DRUG CHECKS THE GROWTH OF TYPE 1 TOPOISOMERASE. THE COMPANY SAID THE NEW DRUG IS THE FIRST OF ITS KIND DEVELOPED IN THE WORLD.

-30- 1343
#90193k0092 07/12/1990 ~Japanese News Agency
TOKYO (JULY 12) KYODO - PRIME MINISTER TOSHIKI KAIFU WILL NEED TO EXERCISE FIRM LEADERSHIP IN COORDINATING DIVERGENT OPINIONS ON THE QUESTION OF JAPAN'S NEAR TOTAL BAN ON RICE IMPORTS UPON RETURN FROM THE HOUSTON SUMMIT, A SENIOR FOREIGN MINISTRY OFFICIAL SAID THURSDAY.

THE OFFICIAL, SPEAKING ON CONDITION OF ANONYMITY, SAID HE REMAINS SKEPTICAL THAT JAPAN'S INSISTENCE ON SELF-SUFFICIENCY IN RICE, A STAPLE OF THE NATIONAL DIET, WOULD BE A WISE POLICY TO PURSUE IN THE LONG TERM.

THE OFFICIAL, RESPONDING COOLLY TO THE FARM TRADE COMPROMISE REACHED AT THE ECONOMIC SUMMIT ON WEDNESDAY, URGED THE GOVERNMENT TO RETHINK ITS POSITION ON THE RICE ISSUE WITH A VIEW TO A SUCCESSFUL CONCLUSION TO THE CURRENT URUGUAY ROUND OF MULTILATERAL TRADE NEGOTIATIONS SCHEDULED TO END IN DECEMBER.

EXPERTS ON THE CONTENTIOUS FARM TRADE ISSUE SAID THE FOREIGN MINISTRY OFFICIAL'S CALL FOR A TOTAL GOVERNMENT POLICY REVIEW ON THE RISE ISSUE MAY GAIN STRENGTH AMONG OTHER POLICYMAKERS, THOUGH HIS OPINION CURRENTLY REMAINS AT ODDS WITH THOSE OF MINISTRY OF AGRICULTURE, FORESTRY, AND FISHERIES OFFICIALS.

A GOVERNMENT SOURCE ALSO SUPPORTED THE OFFICIAL'S VIEW, NOTING THAT AN OPINION WAS GROWING AMONG GOVERNMENT OFFICIALS THAT JAPAN SHOULD OPEN ITS RICE MARKET, IF ONLY PARTIALLY, TO BRING THE MULTILATERAL TRADE TALKS TO A SUCCESSFUL CONCLUSION BY THE END OF THIS YEAR.

JAPAN CURRENTLY IMPORTS A NEGLIGIBLE VOLUME OF RICE FROM FOREIGN COUNTRIES ESPECIALLY FOR PROCESSED USE.

AT A PRESS CONFERENCE ON THURSDAY, AGRICULTURE, FORESTRY, AND FISHERIES MINISTER TOMIO YAMAMOTO SAID, "I AM VERY SATISFIED" WITH THE ECONOMIC DECLARATION ISSUED THE PREVIOUS DAY BY SUMMIT LEADERS WHICH JAPANESE OFFICIALS BELIEVE CONTAINED SPECIAL REFERENCE TO THE RICE ISSUE.

YAMAMOTO SAID THE STATEMENT WOULD CLEAR THE WAY FOR FURTHER URUGUAY ROUND TALKS IN THE DIRECTION OF PROTECTION OF THE RICE MARKET, APPARENTLY BASING HIS OPTIMISM ON THE REFERENCE OF THE STATEMENT WHICH SAID "THE NEGOTIATIONS ON AGRICULTURE SHOULD THEREFORE BE CONDUCTED IN A FRAMEWORK THAT TAKES INTO ACCOUNT CONCERNS ABOUT FOOD SECURITY."

HE RENEWED HIS PLEDGE TO TAKE A TOUGH LINE ON LIBERALIZATION OF RICE IMPORTS, SAYING "I THINK THE ISSUE (OF OPENING JAPAN'S RICE MARKET) SHOULD NOT BE HANDLED BILATERALLY BUT BE TREATED MULTILATERALLY."

IN TIME FOR THE DEBATE ON THE RICE ISSUE AT THE HOUSTON SUMMIT, WORLD TRADE NEGOTIATORS OPENED SESSIONS ON THURSDAY SEEKING TO PROMOTE A COMPROMISE BETWEEN WASHINGTON AND BRUSSELS IN INTERNATIONAL TRADE TALKS OVER DOMESTIC FARM SUPPORTS, IMPORT BARRIERS AND EXPORT SUBSIDIES.

THE GATHERING, THE FINAL ROUND OF A SERIES OF FARM TRADE TALKS UNDER THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT), WILL DISCUSS A SET OF AGRICULTURAL REFORMS BASED ON A PROPOSAL RECENTLY ISSUED BY AART DE ZEEUW, CHAIRMAN OF THE AGRICULTURAL WORKING GROUP AT THE GATT FROM JULY 23.

AFTER REVIEWING DE ZEEUW'S DRAFT REPORT, WHICH HAD CIRCULATED A WEEK BEFORE FARM POLICY CAME UNDER SCRUTINY AT THE ECONOMIC SUMMIT IN HOUSTON, NEGOTIATORS WILL FURTHER DISCUSS THE PROPOSAL AT THE GATT'S TRADE NEGOTIATIONS COMMITTEE AT ITS GENEVA HEADQUARTERS.

THE TRADE NEGOTIATORS ARE MEANT TO AGREE ON A FRAMEWORK ACCORD FOR AGRICULTURE AND OTHER SECTORS BY THE END OF JULY.

THE FRAMEWORK OF THE ECONOMIC DECLARATION, WHICH WAS BASED ON THE PROPOSAL WAS WIDELY PERCEIVED BY ANALYSTS AS GIVING JAPAN'S PROTECTIONIST STAND SOME CREDENCE OR "PREFERENTIAL TREATMENT" AMID ONGOING FARM TRADE TALKS.

THE ANALYSTS SAID THE SEVEN-PAGE DOCUMENT COULD ALSO BE TAKEN AS PROVIDING A BASIS FOR JAPANESE CONCESSIONS THROUGH TEMPORARY EASING OF ITS OBJECTIONS TO THE OPENING OF ITS RICE MARKET.

-30- 3882

#90193k0093 07/12/1990 ~Japanese News Agency

MAEBASHI (JULY 12) KYODO - LOCAL PUBLIC PROSECUTORS THURSDAY CONFIRMED THEIR PREVIOUS DECISION NOT TO INDICT DEFENDANTS IN THE 1985 CRASH OF A JAPAN AIRLINES (JAL) JUMBO JET THAT KILLED 520 PEOPLE.

THE PROSECUTORS SAID THEY SAW NO REASON TO ALTER THEIR DECISION OF NOVEMBER LAST YEAR TO ACQUIT FOUR OFFICIALS FROM JAL AND THE AIRCRAFT MANUFACTURER, BOEING CO., OF BLAME FOR THE CRASH AFTER A FRESH PROBE INTO THE CAUSE OF THE WORST-EVER AIRLINE ACCIDENT IN JAPAN.

THE SECOND INVESTIGATION WAS LAUNCHED AFTER THE MAEBASHI PROSECUTION INQUEST, CALLING UNJUST THE PROSECUTION'S PREVIOUS DECISION NOT TO FILE CHARGES AGAINST THE FOUR OFFICIALS, RECOMMENDED REINVESTIGATION IN THE CASE LAST APRIL IN ACCORDANCE WITH A COMPLAINT FROM THE BEREAVED FAMILIES OF CRASH VICTIMS.

THE INQUEST URGED THE PROSECUTORS TO IDENTIFY AND CHARGE TWO BOEING ENGINEERS WHO UNDERTOOK REPAIRS ON THE JUMBO JET'S REAR BULKHEAD DAMAGED IN A SKIDDING ACCIDENT AT OSAKA AIRPORT.

THE INQUEST MEMBERS SAID DEPOSITION-TAKING FROM OTHER BOEING OFFICIALS WOULD BE POSSIBLE IF IMMUNITY WAS OFFERED FOR THEM FROM POTENTIAL CRIMINAL CHARGES AND OTHER ARRANGEMENTS WERE MADE.

TWO JAL EXPERTS WERE ALLEGED TO HAVE OVERLOOKED FAULTY REPAIR WORK ON THE DAMAGED AIRCRAFT IN 1979 IN THEIR POST-DELIVERY CHECKUPS, THE INQUEST SAID.

PROSECUTION AUTHORITIES USUALLY TAKE INTO CONSIDERATION THE DECISIONS OF THE INQUEST PANEL, COMPOSED OF MEMBERS OF THE PUBLIC OF ELIGIBLE VOTING AGE, ALTHOUGH THEY ARE NOT LEGALLY BINDING.

THE PROSECUTION, HOWEVER, DROPPED THE IDEA OF INDICTING THE AMERICAN NATIONALS LAST NOVEMBER BECAUSE THEY REFUSED TO TESTIFY.

THE FRESH PROBE, WHICH STARTED AROUND MID-MAY, FOUND THAT AS SO MANY BOEING OFFICIALS HAD ENGAGED IN REPAIR WORK ON THE REAR BULKHEAD OF THE JUMBO, IT WAS DIFFICULT TO DECIDE WHO SHOULD BEAR THE BLAME FOR THE CRASH.

THE JAL ENGINEERS WERE FOUND TO HAVE ABIDED BY RULES ON REPAIR WORK PROPERLY. THE REPUTATION OF BOEING AIRCRAFT WAS VERY HIGH, THE PROSECUTION SAID.

JAL FLIGHT 123 CRASHED INTO A MOUNTAIN IN GUNMA PREFECTURE, NORTHWEST OF TOKYO, ON THE EVENING OF AUGUST 12, 1985 EN ROUTE FROM TOKYO TO OSAKA.

ALL BUT FOUR OF THE 524 PASSENGERS AND CREW MEMBERS ABOARD WERE KILLED IN THE CRASH.

-30- 2414

#90193m0001 07/12/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 12) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The Nikkei average closed up 281.14 at 32,575.32. ... The FT 100 is up 17.0. ... The DAX index has also risen, up 12.71. ... MOTOROLA reported that second quarter profits were up 4.5% vs. a year ago, partly because of increased overseas demand for its cellular systems. that resident alien cards, known as "green cards," will now be produced by THOMSON-CSF, a French manufacturer. ... FANNIE MAE reports second-quarter profits up 50 percent over second-quarter 1989. ... DELTA AIR LINES has asked the NATIONAL MEDIATION BOARD to select a mediator to join contract talks with its pilots union. ... U.S. banks were ordered by federal bank regulators to write off 20% of their $11.1 billion in loans to Brazil and an additional 20% of their $2.9 billion in loans to Argentina.

WHAT'S AHEAD:

Congressional Budget Office director ROBERT REISCHAUER will testify before the Joint Economic Committee on Economic Outlook at 9:30 a.m. EDT. ... FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN goes before the Senate Banking Committee at 10 a.m. EDT. ... House Ways and Means will meet to discuss tax underpayments by foreign companies operating in the U.S. ... Budget talks continue at 1 p.m. EDT. ... ROCKWELL INTERNATIONAL says its board has authorized the extension of the company's stock repurchase program by an additional $500 million. ... PUBLIC SERVICE CO. OF NEW MEXICO officials say they are reviewing a $12 a share takeover proposal from WHEELER CAPITAL.

FROM THE BULLS:

"We were almost there, we just ran out of time," says PARKER/HUNTER trader JAMES CRIST of yesterday's stock market push toward a record on the Dow.

"We're headed for 3000 and we'll get there very soon." ("USA Today", 7/12)

FROM THE BEARS:

ROBERT STOVALL of STOVALL/TWENTY-FIRST ADVISERS is looking for "a near term correction - a drop in prices," because of influences abroad. He says the Japanese will boost interest rates to strengthen the yen, in turn weakening the dollar. "Historically, a weak U.S. dollar does not bode well for U.S. stocks or bonds because they become unattractive for non-U.S. investors," says Stovall. (NYT, 7/12)

STOCK MARKET:

From London this morning, SHEARSON'S MICHAEL BENSON says overseas profit taking in U.S. stocks was easily absorbed. That leads him to expect a firm opening, but the market could drift later in the session ahead of tomorrows PP and retail sales data. (FNN "World Business Update", 7/12)

"The Dow appears ready to test the 2960 area," says A.C. MOORE, director of research at ARGUS RESEARCH CORP. "My feeling is the current rally will not be sustainable without a decline in interest rates. I don't expect the Federal Reserve to ease monetary policy in the third quarter because of financing needed for the savings and loan bailout. Also, I am concerned about the auction in the bond market. For that reason, we are still recommending a defensive posture for our equity accounts with 60% in stocks and 40% in cash." ("Investor's Daily", 7/12)

"People are gaining confidence that the second quarter wasn't a disaster," says money manager JAMES AWAD, president of BMI CAPITAL. He also says that the successful completion Tuesday of the Refcorp bond sale helped to boost stock prices yesterday. (WSJ, 7/12)

Technology stocks led yesterday's rally, and according to PETER DA PUZZO of LEHMAN BROTHERS, a division of SHEARSON LEHMAN HUTTON, "History shows that leadership in the tech stocks creates follow- through in the overall market." Da Puzzo says that several institutions were "taking really big positions" in IBM, DIGITAL EQUIPMENT and COMPAQ. However, Da Puzzo warns that program trading "could take the legs out from under the rally - but only for a short time." (NYT, 7/12)

ABBY JOSEPH COHEN, chief strategist at BARCLAYS de ZOETE WEDD RESEARCH, says that investors should continue to be pleasantly surprised by earnings for the just-ended quarter, noting that the level of write-offs by corporations should be lower than in the first quarter. While she thinks earnings disappointments will hurt the market later this year, that danger doesn't exist yet, she says. Cohen says that corporate profits would have to jump roughly 40% in the third and fourth quarters to achieve the consensus of analysts' earnings estimates for the year on the S&P 500

Stock Index. "For that to happen, we'd have to be in a robust economy, and that's not the case." (WSJ, 7/12)

"The market probably senses ... an environmental change" in PRESIDENT BUSH's position on matters effecting the financial world, says MONTE GORDON of DREYFUS CORP. "There is a sense that he may be starting to deal more aggressively with some of the things that the market has been troubled about." He says there has also been "a subtle nuance of change in terms of Federal Reserve monetary policy," in that they may be shading more towards an easing than was previously the case. He predicts the market will stay in a range between 2800 and 3000, but says, "the market doesn't want to go down." (FNN "Marketwrap", 7/11)

The breadth of yesterday's advance was impressive, says SHEARSON'S NEWTON ZINDER. "Yesterday, everything chipped in, but we have to get some follow through strength today." Zinder avoids putting much emphasis on a possible new high in the Dow, saying the broader market averages still have a way to go. (FNN "World Business Update", 7/12)

"It looks like the market is heating up again," says KENNETH DUCEY, chief trader at S.G. WARBURG. ("The Washington Post", 7/12)

"The dark side of the whole picture is that if there is an earnings disappointment, the stocks hit air pockets and down they go," says HOLLY STARK, head of trading at DALTON, GREINER, HARTMAN, MAHLER & CO. (WSJ, 7/12)

Despite Wednesday's stock market rally, WILLIAM KUFTA, senior vice president at PITCAIRN FINANCIAL MANAGEMENT, remains cautious. "We would not go fully invested at this point," he says. Kufta says that inflation is still too high to allow the Fed to lower interest rates, which he believes is needed to get stocks higher. (WSJ, 7/12)

STOCK TIPS:

Analyst CRAIG WEICHMANN of MORGAN KEEGAN & CO. likes LUBY'S CAFETERIAS INC. which spurted up 1 3/4 yesterday to end at 30 3/4. He attributes the rise to a recently reported better-than-expected net income for the fiscal third quarter. He also says the stock is showing some positive technical action. For the fourth quarter, Weichmann is forecasting an 11% to 18% gain. He says Luby's is doing better because of an improvement in the Texas economy where it does 90% of its business. ("Investor's Daily", 7/12)

AMERICAN CYANAMID shares hit a 52-week high yesterday. But CNN'S DAN DORFMAN says talk of a takeover by WARNER LAMBERT is "strictly hype" with neither company interested in a deal. According to Dorfman, MABON NUGENT is telling clients, "Take profits and now." (CNN "Business Morning", 7/12)

ORACLE was yesterday's most active OTC stock falling 2 1/2 to 19 7/8 in hectic trading. DAVID READERMAN of SHEARSON LEHMAN HUTTON explains, "They have now had back-to-back earnings disappointments relative to expectations. The earnings-momentum investors are getting flushed out of the stock." HAMBRECHT & QUIST analyst BRUCE LUPATKIN suggests, "I think the basic issue here is that looking forward, Oracle must match their cost structure with the opportunities in terms of what the market will bear." FIDELITY INVESTMENTS analyst TOM SPRAGUE is a bit more hopeful on the stock. He says, "They are growing so fast that some things have gotten out of control, but if you have a long-term view, it's a good buy." ("Investor's Daily", 7/12)

PIPER, JAFFRAY & HOPWOOD analyst ROGER REDMOND repeated a buy recommendation yesterday for CRAY RESEARCH. He expects the company to post strong second-quarter earnings. His estimate for the period is $1.20 a share, compared with 15 cents in the year-ago period. Cray advanced 2 3/8 to 47 3/8 yesterday. (WSJ, 7/12)

Predictable growth issues are the key to this market, says portfolio strategist JOHN CONNOLLY at DEAN WITTER REYNOLDS. One of the most predictable areas is healthcare where Connolly likes SYNTEX's flow of future drug products. DISNEY has projects throughout the 1990s making the company's growth highly secure, says Connolly. He also likes the mammoth order backlog at BOEING. "Those are the kinds of companies that will build price earnings ratios in this environment." (CNN "Business Day", 7/12)

DESOTO INC. shares surged 5 1/2 to 45 yesterday as the company announced measures to shore up its stock price as it fights a hostile takeover attempt. Specifically, it is selling its industrial coating and emulsifier businesses for about $200 million and says the money will be distributed to shareholders. ("USA Today", 7/12)

BERNARD PICCHI, an analyst at SALOMON BROTHERS, says both oil stocks and oil prices may continue to advance if OPEC can rein in overproduction among some of the cartel's members at their July 25 meeting. That possibility "is enough to make some investors throw their hat in the ring" and buy the stocks, he says. (WSJ, 7/12)

"Airlines are having a very difficult year," says PAUL KAROS of FIRST BOSTON CORP. "The industry as a whole should see operating profits [for 1990] down 20%, with some airlines more than that." ("USA Today", 7/12)

#90193m0002 07/12/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 12) MCS - A SAMPLING OF TODAY'S COMMENTARY

COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"Most people in the [currency] market do believe that the G-7 thinks that a stronger yen would be good for correcting the [U.S. - Japan] trade imbalance, so [the national leaders] don't have to say it," says MR. OKURA of the BANK OF TOKYO. (WSJ, 7/12)

"The yen has appreciated in the right direction. We're happy about that. There's no need to comment on it," says HORST KOEHLER, state secretary in the WEST GERMAN FINANCE MINISTRY. His statement came after the concluding communique from the G-7 meeting which made no mention of the yen to the surprise of the currency market participants who were expecting such a statement. (WSJ, 7/12)

"I would say that fed funds rate is going to get down to 8% within the next 3-4 weeks, 6 weeks at the most. And then you'll get a prime rate cut to 9.75%," says CHARLES LEWIS, vice president of SHEARSON LEHMAN HUTTON. Lewis refers to comments made by FED CHAIRMAN GREENSPAN in yesterday's "Wall Street Journal" implying that the Fed can move quickly when prompted. According to his scenario, the Fed will act on the fed funds rate which will boost the stock markets. (CNBC "Business View", 7/11)

"The important factor behind any interest-rate adjustment will come from Government budget negotiations and from the weak economy," says WALTER S. FRANK, chief economist at DONOGHUE'S. "Right now, it's an eager market pitted against slow-moving events, accounting for the seesaw effect in rates." (NYT, 7/12)

A feud between Wall Street and the government exploded yesterday, as a few big bond dealers who were angered by a Treasury rule change deluged the TREASURY DEPARTMENT with what amounted to bogus bids at yesterday's auction of seven-year U.S. notes. The government received $47 billion in bids for only $8 billion of notes. The rule change announced just hours before the bidding started limits the maximum bid by any one dealer at any one price to 35% of the size of the government auction. Defending the rule change, MICHAEL BASHAM, deputy assistant Treasury secretary of federal finance, says, "We want to maintain the competitive nature of the auction process for the taxpayer as well as the investment community." (WSJ, 7/12)

THE ECONOMY:

"There's more of a feeling that there's a recognition that you don't have to have a recession in order to have a lower interest rate," says MONTE GORDON of DREYFUS CORP. Sluggish growth to contain inflation is

acceptable for a certain period, but "at some point there are longer-term objectives that require that you be a little less rigid in your persistence of maintaining a restricted monetary policy. We are beginning to emerge in a more favorable environment." (FNN "Marketwrap", 7/11)

The drop in oil prices may provide a momentary boost to the world economy, but the lower prices will be fleeting at best, says MARION B. STEWART, an energy economist at NATIONAL ECONOMICS RESEARCH ASSOCIATES INC. "It's a temporary phenomenon brought about by OPEC overproduction," says Stewart. "As the cartel cuts production,

prices will move back up again." Nonetheless, he says, "It will be nice while it lasts." ("Investor's Daily", 7/12)

IN WASHINGTON:

FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN says he supports changing the U.S. Constitution to make it harder for the government to spend money, but he turned thumbs down on a separate amendment that would require a balanced budget. "It's on the expenditure side clearly where the problem lies," he says. There is a clear "bias" in the American political system toward increased government spending. Greenspan believes this "bias" can be countered by a constitutional admendment requiring a three-fifths vote of both the House and Senate for authorization or appropriations legislation. ("The Washington Post", 7/12)

SEC CHAIRMAN RICHARD BREEDEN says Congress needs to overhaul regulation of the securities and banking industries, but stops short of recommending the best way to do it. But he did tell the Finance Subcommittee of the House Energy and Commerce Committee yesterday that if it repeals the GLASS-STEAGALL ACT that keeps banks out of the securities business, it also should let non-banking firms own banks. ("USA Today", 7/12)

The idea behind the government's new program to sell weak S&Ls "is they can stop the thrift from becoming insolvent if they seize it a little earlier," says HENRY PELTZ, a S&L analyst at KEEFE, BRUYETTE, & WOODS. Peltz points out that when the government does take over an S&L, it tends to lose value quickly, and therefore, "shareholders can get wiped out." He says 200-300 institutions may be effected by the program. (CNBC "World Business", 7/12)

#90193p3749 07/12/1990 ~PR Newswire

TROY, MI (JULY 12) PR NEWSWIRE - K Mart Corporation (NYSE: KM) today reported a sales increase of 13.7 percent for June 1990 over sales during the same period of last year.

Consolidated sales for the five-week period ended July 4, 1990, amounted to $3,079,057,000 versus sales of $2,708,485,000 for the five weeks ended July 5, 1989. Sales on a comparable store basis -- those stores open at least one year -- were up 4.3 percent.

Sales for the 22 weeks ended July 4, 1990, were $12,560,649,000, up 12.4 percent from the $11,171,190,000 for the first 22 weeks of 1989. Comparable store sales for the 22-week period rose by 2.9 percent.

K mart Chairman of the Board and Chief Executive Officer Joseph E. Antonini said, "We continue to be encouraged by our overall merchandising programs and customer reaction to our life style departments. The strength in apparel sales is particularly encouraging. In addition, we are pleased with customer response to our increased emphasis on pricing leadership as solid sales gains were realized in the consumables and convenience products areas of the business."

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,326 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse Clubs and The Sports Authority.

K mart Corporation's stock is listed on the New York, Pacific, Midwest and Tokyo stock exchanges. Its trading symbol is KM.

#90193p3751 07/12/1990 ~PR Newswire

WAKEFIELD, MA (JULY 12) PR NEWSWIRE - AGS Information Services, Inc., a NYNEX company, announced the creation of a Document Image Management Group for the New England area. The group will be headed by Cindy S. Simms, newly appointed image systems manager, and will be headquartered in Wakefield.

"Document image management uses image technology to manage information not captured by traditional information systems, paper-based documents and records," said Jack Berrigan, vice president, AGS Information Services. "AGS' Document Image Management Group will offer technical and business planning, systems development and selection, and implementation support to customers.

"Paper-intensive businesses credit image technology with reducing their operating costs and improving the efficiency and overall service they provide to customers," Berrigan continued. "Users are convinced image technology is a growing competitive advantage in their workplace and we look forward to offering them our expertise."

AGS Document Image Management Group will work with local NYNEX Business Centers to design and install image management systems.

Prior to joining AGS, Simms held a product management position at Wang Laboratories in its corporate imaging group. She also held marketing positions at both Wang and Four Phase Systems.

AGS Information Services, Inc., is headquartered in Mountainside, N.J., and has been in business for more than 20 years. The company is a leading provider of software information solutions in North America. Through 50 offices, AGS Information Services offers a wide range of software products and services related to consumer products, financial services, government, health care, manufacturing and telecommunications.

AGS is part of NYNEX Information Solutions Group, a first-tier subsidiary

of NYNEX Corporation (NYSE: NYN) providing software, systems and network integration and professional services. Based in White Plains, N.Y., NYNEX Information Solutions Group has 6,500 employees in 13 countries and across the United States. NYNEX Corporation is a leader in the information industry, providing information and telecommunications systems to a diverse base of customers internationally. With revenues of $13.2 billion and assets of $25.9 billion, NYNEX ranks among the largest corporations in the world.

#90193p3753 07/12/1990 ~PR Newswire

NEW YORK (JULY 12) PR NEWSWIRE - KPMG Peat Marwick, the international accounting, taxation, and consulting firm, has announced the release of 38 foreign country tax-planning modules as part of its PEAT/EXPATRIATE system. PEAT/EXPATRIATE facilitates tax planning by projecting the total costs of an international assignment and by performing the intricate computations involved in quantifying the U.S. and foreign tax burdens.

Released two months ahead of schedule, PEAT/EXPATRIATE's modules provide detailed tax calculations for each foreign country, including deductions, expatriate concessions, special calculations of housing perquisites, and local taxes. The firm announced plans to release modules for 20 additional countries before the end of the year.

"Computing tax costs is one of the most complex tasks companies face when they decide to relocate executives overseas," noted Samuel M. Russo, the firm's national director - tax services, international executives. He cited Switzerland as an example. The country is made up of 26 cantons, or states, each of which has its own tax system. Likewise, the cities in each canton have their own tax structure as well as a church tax, Switzerland, therefore, has a four-level tax system: national, cantonal, city, and church.

"If these computations were done manually, it could take days, assuming you know the tax law," Russo said. "The modules do it in minutes."

The PEAT/EXPATRIATE system contains actual and hypothetical U.S. tax calculations, as well as a generic module that can apply the appropriate tax rates for any foreign country. The basic system costs $7,500, including the generic module. The country-specific modules are available at additional cost.

KPMG Peat Marwick provides accounting and auditing, tax, and management consulting services to corporations, government organizations, non-profit

institutions, and individuals. It is the U.S. practice of KPMG, an international firm with more than 600 offices worldwide and 1989 revenues of $4.3 billion.

DOMINGUEZ, CALIF. (JULY 12) PR NEWSWIRE - Pic 'N' Save Corp. (NASDAQ: PICN) announced today that its sales for the five weeks ended July 1, 1990 were $44,271,000, up 11.7 percent from $39,641,000 in the prior year. Sales for the 22 weeks ended July 1, 1990 were $200,240,000, up 16.9 percent from $171,287,000 in the prior year. Sales in comparable stores for the month of June and for the year to date increased over the prior year by 1.2 percent and 4.7 percent, respectively. Sales in comparable stores excluding the 14 Job Lot Pushcart stores increased over the prior year during the month and for the year to date by 1.9 percent and 6.0 percent, respectively.

During the month of June, Pic 'N' Save Corp. opened one new store in San Pablo, Calif., and a replacement store in Tempe, Arizona, bringing the total number of stores in operation at the end of the month to 190.

"Comparable Pic 'N' Save store sales continue to show increases even over very strong sales in the prior year month," said Lewis B. Merrifield, III, chairman and chief executive officer. "The strongest increases again came from our Southeast region, as these stores continue to make progress toward sales and profit maturity."

The company, through its subsidiaries, PNS Stores Inc. and PNS Eastern Corp., operates a chain of 190 retail stores in the Far West, the South, and the New York Metropolitan area under several business names. These stores all specialize in new, closeout, variety general merchandise which is sold at substantial reductions from original retail prices.

#90193p3757 07/12/1990 ~PR Newswire

ARLINGTON HEIGHTS, IL (JULY 12) PR NEWSWIRE - Alcatel and Motorola, Inc. (NYSE: MOT), announced today that they have signed an agreement to license each other's essential patents for the GSM Pan-European Digital Cellular

standard in Europe.

The agreement is a result of bilateral negotiations carried out by the two companies during the past several months.

"This agreement with Alcatel is of particular significance," said Bernard R. Smedley, senior vice president of Motorola, Inc., and general manager of the Radio-Telephone Systems Group. "It reconfirms that cellular manufacturers are able to resolve IPR (Intellectual Property Rights) issues among themselves through negotiations in good faith," added Smedley.

"We are pleased about this agreement with Motorola," said Jacques Imbert, president of the Alcatel Radiocommunicatios, Space & Defense Group. "We hope that other GSM suppliers will enter into license agreements such as this to help settle GSM IPR issues, which lately caused some discomfort to the system operators and the general public," continued Imbert.

Motorola has been awarded several cellular digital systems contracts in Europe, among which are GSM validation systems for Denmark, Finland, Norway, Sweden, Spain, the United Kingdom and West Germany; GSM operational systems in Spain and the United Kingdom; and first phase operational systems in Sweden and the United Kingdom.

Motorola's speech coder technology was recently selected as the standard for Japan Digital Cellular. Earlier this year, the TIA (Telecommunications Industry Association) of the United States had also selected the Motorola speech coder as the U.S. Digital Cellular standard.

Alcatel is developing a pan-European standard GSM system and it is a member of the ECR 900 consortium with AEG of Germany and Nokia of Finland. Alcatel has been awarded contracts to introduce its GSM system by the PTTs of Austria, France, Germany, and the Netherlands, while the Italian public telecommunications company Italtel has signed an agreement with Alcatel in order to jointly introduce GSM in the Italian market.

Alcatel is the leading European company in communication systems including public switching, public and private networks, business systems, radiocommunication, space and defense systems and cables.

Motorola is the world's leading designer, manufacturer and supplier of cellular systems, infrastructure equipment and subscriber products.

#90193p3759 07/12/1990 ~PR Newswire

LOS ANGELES (JULY 12) PR NEWSWIRE - Century Park Pictures (NASDAQ: CPPC) announced today that its 50.1 percent owned subsidiary, Bietak Productions has acquired the rights to create live costumed characters of Fox Broadcasting's hit primetime animated cartoon show, "The Simpsons."

Bietak will market at least six full units of the characters in special appearances at theaters, theme parks, shopping centers and fairs nationwide.

Century Park President Phil Rogers said that initial bookings for the costumed Simpsons have been "nothing short of phenomenal," and have already resulted in "highly substantial" revenues for Century Park as well as Bietak.

"The Simpsons" were first seen during vignette appearances on Fox Broadcasting's "Tracey Ullman Show" last year. After a Christmas special featuring the characters garnered the second largest audience in the history of the Fox network, in mid-January, 1990, "The Simpsons" were launched on a separate half hour prime time series -- the first such animated prime time program in nearly two decades.

Since that time, the show has emerged as a breakaway ratings success, catapulting into the Nielsen Ratings Top 15 -- generally considered by industry experts to be an exceptional performance considering the fact that the Fox network reaches only four-fifths of the homes in the country,.

"The Simpsons" has also stimulated a merchandising blitz of products based on the show's characters. According to a recent article in Newsweek, officially licensed products now total more than 70, including "Simpsons" posters, hats, watches, key chains, beach towels, confections, dolls and T shirts -- the latter of which are selling at a consistent rate of 1 million per week.

Bietak, which has produced a wide array of television and theatrical productions, formerly created live shows based on animated characters of The California Raisins and Nintendo's Mario Brothers.

The William Morris Agency is acting as exclusive booking agent for the attraction.

Century Park Pictures is a developer, producer and marketer of entertainment properties for the motion picture, television and pay cable industries. The company is a 65.2 percent owned subsidiary of Minneapolis-based International Broadcasting Corporation, owner of the Harlem Globetrotters, the Ice Capades, three regional amusement parks, the Ice Capades Chalets skating centers and Chanhassen Dinner Theatres.

CONTACT: Phil Rogers of Century Park Pictures, 213-467-4642; Ed Morrell

#90193p3761 07/12/1990 ~PR Newswire

PHILADELPHIA (JULY 12) PR NEWSWIRE - General Accident Insurance has reached an agreement in principle to acquire The Silvey Corp., a subsidiary of the Royal Group Inc.

The sale is subject to the approval of certain regulators, as well as the boards of directors of both companies.

In making the announcement, James C. Corcoran, chairman and chief executive officer, General Accident Insurance, said, "The acquisition of Silvey represents a continuation of General Accident's strategy to acquire profitable regional companies in areas where we are under-represented."

According to William E. Buckley, Royal Group's president and chief executive officer, "The decision to enter into this agreement is consistent with Royal's new strategic direction which is focusing resources on specific product lines and geographic areas."

The Silvey Corp., headquartered in Columbia, Mo., writes primarily property-casualty business in Missouri, Oklahoma, Kansas, Arkansas and Florida. Silvey subsidiaries include Tri-State Insurance Co., Farmers and Merchants Insurance Co., Midwestern Insurance Co., and New American Life Insurance Co. Royal purchased Silvey in 1984.

Royal Group Inc. is the U.S. holding company of Royal Insurance Holdings plc, a worldwide insurer based in London. Written premiums for Royal Group subsidiaries operating under the trade style, Royal Insurance USA, exceed $2.2 billion annually.

General Accident Insurance is the U.S. holding company of General Accident plc, an international insurer headquartered in Perth, Scotland. GA's U.S. subsidiaries, comprised of nine companies, post annual written premiums of more than $1.5 billion, with assets totaling nearly $5 billion.

#90193p3765 07/12/1990 ~PR Newswire

WINSTON-SALEM, NC (JULY 12) PR NEWSWIRE - First Wachovia Corporation's (NYSE: FW) net income per share fully diluted for the second quarter of 1990 was $1.06, a 10.1 percent increase from $.96 in the same period of

last year, according to John G. Medlin Jr., chief executive officer.

Net income for the quarter was $75.2 million compared with $67.9 million in the prior year and, on an annualized basis, represented returns of 16.8 percent on shareholders' equity and 1.27 percent on assets.

For the first six months, net income per share fully diluted was $2.07, a 7.8 percent increase from the $1.92 earned in the prior year. Net income for the year to date totaled $146.5 million compared with $135.2 million in 1989 and produced returns of 16.5 percent on equity and 1.24 percent on assets.

The earnings increase reflected good growth in loans and other service revenues but was moderated by a narrower net interest rate yield, Medlin said.

Average interest-earning assets rose $1.585 billion or 8.3 percent for the second quarter and $1.645 billion or 8.7 percent for the six months in comparison with 1989 periods. Loans grew $1.192 billion or 8.3 percent for the quarter and $1.296 billion or 9.3 percent for the year to date.

Taxable equivalent net interest income was up $9.1 million or 4.2 percent for the quarter and $13.7 million or 3.2 percent for the first half. Other income grew 15.7 percent for the quarter and 14.3 percent for the six months and included a second quarter pretax gain of $3 million on the sale of real estate. Noninterest expense rose 2.5 percent for the quarter and 3.5 percent for the half.

The provision for loan losses was $22.6 million for the second quarter and $40.1 million for the six months compared with $14.5 million and $29 million, respectively, in the 1989 periods. Net credit charge-offs were $16.8 million for the quarter and $29.2 million for the year to date.

At June 30, nonperforming assets totaled $118 million or .74 percent of total loans and foreclosed real estate. The allowance for loan losses was $178 million and represented 1.12 percent of total loans and 1.50 times nonperforming assets. The corporation's ratio of equity capital to total assets was 7.55 percent, one of the strongest among major banking companies in the country.

#90193p3766 07/12/1990 ~PR Newswire

MT. HOLLY, N.J. (JULY 12) PR NEWSWIRE - Franklin Electronic Publishers Inc. (NASDAQ-NMS: FPUB) announced today it is entering into an agreement with Kenkyusha Limited Publishers, for the worldwide rights to publish

Kenkyusha's bilingual Japanese/English dictionary in hand- held electronic form.

This license represents the first step in a series of agreements between Kenkyusha, the oldest and most prestigious bilingual dictionary publisher in Japan, and Franklin, the creator of and world leader in hand-held electronic reference.

"We are deeply honored to have entered into a business relationship with Kenkyusha, the pre-eminent and most respected dictionary publishing company in Japan," said Peter N. Yianilos, president, Franklin Electronic Publishers.

"Lexicographic authoritativeness and depth of linguistic coverage are critical elements in developing quality products and thus establishing credibility in the Japanese market. These elements are intrinsic in association with Kenkyusha," he said.

Shiro Nagai, president of Kenkyusha, stated, "We are pleased to be joining Franklin Electronic Publishers in such an innovative venture. Although we have been publishing bilingual dictionaries for more than 80 years, the advent of this exciting technology compelled us to expand the traditional way we publish. This is the first time Kenkyusha has signed a licensing agreement with an American information publishing company."

The electronic Kenkyusha bilingual dictionary will be compact, solid-state quick to respond, and lightweight, in order to well serve the needs of Japanese businessmen, students and consumers. The hand-held electronic version of the "New Little English/Japanese Japanese/English Dictionary" will be available in late 1991.

Franklin said it is proud to add Kenkyusha's dictionary to its library of the world's most authoritative and scholarly reference works, including Merriam-Webster's dictionaries, "The Concise Columbia Encyclopedia" by Columbia University Press, "The Advanced Learner's Dictionary" by Oxford University Press, and a series of bilingual dictionaries from William Collins Sons & Co. Ltd.

Franklin Electronic Publishers Inc. is the creator and leader of the Electronic Reference Product category. Franklin publishes a library of electronic dictionaries, thesauruses, phonetic spelling correctors, spelling and language tutorial products and electronic bibles, including the popular Spelling Ace(R), Wordmaster(TM), Language Master(TM), Electronic Holy Bible, and Spanish Master/Maestro Ingles(TM) bilingual Spanish dictionary.

#90193p3770 07/12/1990 ~PR Newswire

DALLAS (JULY 12) PR NEWSWIRE - JCPenney (NYSE: JCP) stores and catalog sales for the five weeks ended July 7, 1990, increased 5.3 percent, from $1,247 million, to $1,312 million in the comparable 1989 period. On a comparative store basis, that is stores open at least a year, sales increased 4.4 percent.

William R. Howell, chairman of the board, said that June results reflected a pick up in shopper interest, with particular emphasis on children's apparel, women's and men's sportswear, and bedding coordinates.

For the 22 weeks ended July 7, 1990, sales of JCPenney stores and catalog rose 4.4 percent to $5,652 million from $5,414 million for the same period a year ago. On a comparative store basis, sales were up 3.3 percent.

JCPENNEY SALES SUMMARY
($ in millions)

FAIRFAX, VA. (JULY 12) PR NEWSWIRE - American Capital and Research Corporation (NASDAQ-NMS: ACRCA), an environmental and engineering firm based in Fairfax, and First City U.S. Corp., a subsidiary of Canada- based First City Financial Corporation Ltd. (Toronto: FCY), announced today that they have formed a joint venture partnership that will pursue environmental projects throughout North America and overseas.

The joint venture -- Environmental Industries Inc. -- will identify and fund business opportunities in the areas of waste management, remediation, recycling, and environmental monitoring and controls. In addition, the joint venture may own and operate facilities that provide these environmental services, and may license, manufacture, or distribute

environmental technologies.

The 50-50 joint venture gives American Capital and Research (ACR) and First City the ability to participate, in some instances with other partners, in treatment or disposal projects that neither company would tackle alone. For example, the joint venture might invest in a company that would research, develop, or license on-site remediation technologies.

Industry analysts predict that in the United States alone, nearly $3.8 billion in private and public funds will be spent in 1990 on hazardous waste treatment and disposal projects.

ACR is one of the largest and most rapidly growing hazardous waste engineering and remediation firms in North America, with operations in the "front-end" segments of the industry -- studies, science, engineering, and construction management. "This joint venture gives us access to capital as well as the ability to develop investment opportunities which we would otherwise have to forego," noted James O. Edwards, chairman and CEO of ACR. "We also expect that an increased role in and knowledge of environmental control technologies and capital equipment will enhance our leading position in this burgeoning industry."

For First City, the joint venture offers an avenue for achieving a strong position in the environmental protection field. "Environmental protection should be among the most dynamic growth industries of the 1990s and we intend to be heavily involved," said Samuel Belzberg, chairman and CEO of First City Financial as well as a director of ACR. "We are particularly pleased to enter this field in partnership with an outstanding company like ACR, which has been an industry pioneer."

About the Firms ACR is headquartered in Fairfax. The firm provides environmental, engineering and other professional services to clients in the United States and abroad, and has annual revenues of $500 million. ACR professionals are involved in addressing some of the most pressing environmental issues of the 1990s, including hazardous and nuclear waste cleanup, clean air and acid rain, groundwater contamination, global climate change and stratospheric ozone depletion, waste minimization and recycling, waste disposal and incineration and environmental compliance. The firm's stock trades in the NASDAQ National Market System (symbol ACRCA).

First City U.S. Corp, based in New York City, is a subsidiary of First City Financial Corporation Ltd., a diversified investment and holding company with annual revenues of $970 million. Headquartered in Vancouver Canada, First City Financial has operations in financial services, real estate development, and merchant banking, and is active in securities investment and trading. The company also has interests in several industrial companies. First City Financial's common stock is listed on

the Toronto Stock Exchange (symbol FCY).

NEW YORK (JULY 12) PR NEWSWIRE - Charles Srebnik, chairman and CEO of Genetic Engineering, Inc. (currently trading on OTC Bulletin Board: GEENE) stated today that the company settled part of its ongoing litigation against three previously announced defendants. As a result, Genetic Engineering's outstanding debt has been reduced by $1,160,000 through debt forgiveness and payment of legal fees.

Genetic Engineering is vigorously pursuing its ongoing litigation against a fourth defendant.

Several months ago, Genetic Engineering obtained a default judgment of $3.3 million against a fifth defendant.

FAIRFIELD, CT (JULY 12) PR NEWSWIRE - In a move to further strengthen its European operations, Acme United Corporation (AMEX: ACU) announced today the acquisition of the business and facilities of Homeric Ltd. of Sheffield, England, a manufacturer of cold-forged scissors, shears and

disposable medical scissors, for approximately $800,000.

With 1989 sales of approximately $1.2 million, Homeric is the second largest manufacturer of cold-forged scissors in England. Its operations will be folded into Surmanco Ltd., an Acme United subsidiary also in Sheffield, and one of England's leading scissor producers.

In December, 1989, Acme United acquired Emil Schlemper GmbH & Co. of Solingen, West Germany, the country's leading manufacturer of cold- forged scissors and manicure implements, for approximately $3.0 million.

"These acquisitions put Acme United in a dominant position in the scissor and shear market in both the United Kingdom and the unified Germany," said Henry C. Wheeler, chairman of the board and chief executive officer of Acme United.

"Acme United is now the largest producer of cold-forged scissors and shears in Europe, with improved efficiencies resulting from economies of scale and the sharing of technology and products among our plants," Wheeler commented. "The company is well positioned to sell to both the European Common Market and Eastern Europe."

At the same time, Acme United is investing heavily in new equipment and modernization of its scissor and shear plant in Bridgeport, Conn., to maintain its market leadership in the United States, Wheeler said. New grinding equipment for the production of stainless steel scissors and new packaging equipment have been added this year at the 167,000 square foot plant.

Acme United reported net income of $411,350, or 13 cents per share, for the first quarter of 1990, compared to net income of $32,155, or one cent per share, for the first quarter of 1989. Net sales for the first quarter of 1990 were $10,854,458, a 16 percent increase over net sales of $9,375,561 in the similar period of 1989.

Acme United is a leading producer of metal disposable surgical instruments sterile procedure trays, germicidal products and wound-care packs for hospitals and the after-care market as well as the country's largest producer of household shears, scissors, wooden rulers and yardsticks for the consumer.

#90193p3779 07/12/1990 ~PR Newswire

NEW YORK (JULY 12) PR NEWSWIRE - Woolworth Corporation (NYSE: Z) reported

that total sales for the five weeks ended July 7, 1990, rose 11.4 percent to $844 million from $758 million in the comparable year- earlier period.

Domestic sales for the five-week period increased 8.7 percent to $474 million from $436 million, and foreign sales, expressed in U.S. dollars, rose 15.0 percent. If foreign exchange rates had remained constant, foreign sales would have increased 7.6 percent and total sales would have increased 8.2 percent. Domestic comparable store sales for the five-week period rose 4.9 percent.

For the cumulative twenty-two weeks ended July 7, total sales rose 10.7 percent to $3,638 million from $3,286 million in the corresponding year-earlier period.

Domestic sales for the twenty-two-week period increased 8.6 percent to $2,099 million from $1,932 million, and foreign sales, expressed in U.S. dollars, rose 13.8 percent. If foreign exchange rates had remained constant, foreign sales would have increased 8.1 percent and total sales would have increased 8.4 percent. Domestic comparable store sales for the twenty-two-week period rose 5.5 percent.

Harold E. Sells, chairman and chief executive officer, stated, "Due to continued unseasonably cool and wet weather in many parts of the United States and Canada in the early part of the reporting period, June sales were somewhat disappointing. While sales registered by our North American general merchandise, apparel and leather footwear operations were lower than planned, sales of athletic footwear continued to be quite robust," he reported. "We remain very pleased with the results of our West German subsidiary, which continues to achieve double-digit comparable store sales gains," Sells added.

"Increased promotions and markdowns on seasonal merchandise helped generate greater sales gains late in the reporting period," Sells stated. "While these actions squeezed profit margins somewhat, they do help ensure that we will enter the second half of the year with well- balanced merchandise assortments," he said.

WILMINGTON, DEL. (JULY 12) PR NEWSWIRE - Delphi Financial Group Inc. (NASDAQ: DLFI) today announced the assumption of a $94 million indemnity reinsurance agreement, which produces an increase of approximately 6 percent in Delphi's assets.

The agreement to coinsure an existing block of annuities is subject to

board ratification by the ceding life insurance company.

This agreement is consistent with the company's operating strategy of achieving significant asset growth through such transactions without incurring the expenses associated with developing and maintaining an extensive captive marketing organization. In addition, management said it believes that the persistency and other performance statistics available with respect to this block of business allows for a more reliable estimate of future profitability.

Delphi Financial Group Inc. is an insurance holding company that underwrites, through its subsidiaries, a portfolio of life, long-term disability and personal accident insurance, targeted principally to the employee benefit market and annuities and guaranteed investment contracts throughout the 50 states and the District of Columbia.

#90193p3785 07/12/1990 ~PR Newswire

WOOSTER, OHIO (JULY 12) PR NEWSWIRE - Rubbermaid Incorporated (NYSE: RBD) today announced record sales and earnings for the three and six month periods ended June 30, 1990. Sales for the three month period were $346 million, a 4 percent increase over the $334 million of last year's second quarter. Net earnings increased 15 percent to $32.5 million, or 44 cents per share, from the $28.2 million, or 38 cents per share, of last year's comparable period.

For the six month period, sales were $705 million, a 3 percent increase over the $683 million of 1989's first six months. Net earnings were $65.6 million, or 89 cents per share, a 14 percent increase over last year's $57.5 million, or 78 cents per share.

"We are pleased with the second quarter performance," stated Stanley C. Gault, chairman of the board and chief executive officer. "The company continues to perform well in a sluggish economic environment. The second quarter results represent the 38th consecutive quarter that both sales and earnings have increased over the same period of the previous year.

"Unit volume in the quarter increased again at a faster rate than reported revenue," Gault stated. "After adjusting for the accounting treatment associated with our two joint ventures and for this year's lower price realization, comparable unit volume increased 9 percent.

"Net earnings also increased more rapidly than sales resulting from higher unit volume, stable raw material prices, and continued emphasis on cost

control and productivity programs," Gault added.

"Additionally, during the quarter we acquired EWU AG, a privately held Swiss company with manufacturing and distribution facilities in Switzerland and the U.S. This acquisition allows us to increase our distribution of commercial sanitary maintenance products in the growing European market and to broaden our product offering. It demonstrates our increasing efforts to expand all of our businesses internationally.

"Currently, order patterns continue to reflect the general economic environment. Rubbermaid, however, remains well-positioned to compete in this climate, and we expect to continue recording favorable sales and earnings results throughout the year," Gault concluded.

#90193p3786 07/12/1990 ~PR Newswire

TWINSBURG, OHIO (JULY 12) PR NEWSWIRE - Anac Holding Corporation, parent of Revco D.S., Inc., today announced results for the 52-week fiscal year ended June 2, 1990: sales of $2.5 billion and a net loss of $232.7 million. Figures for the 53-week fiscal year ended June 3, 1989 were: sales of $2.7 billion and a net loss of $133.4 million.

Net loss for the 1990 fiscal year includes a one-time non-cash charge to pre-tax earnings of $233 million to accrue for costs associated with Revco's previously announced divestiture program (A).

Excluding the effects of the provision for store divestitures in fiscal 1990 and of non-recurring charges of $55.3 million in fiscal 1989, operating profit before depreciation and amortization increased 23 percent to $75.9 million in fiscal 1990, compared to $61.7 million in fiscal 1989. Gregory K. Raven, Revco chief financial officer, noted that the increase was achieved while excluding from the fourth quarter results of 1990 the operating results and other related costs of the 712 stores Revco is divesting.

Raven said, "Revco's growth in sales and operating profit is a strong sign of the company's turnaround. Comparable store sales, excluding the 53rd week of fiscal 1989, have increased nearly 10 percent over last year. Total sales, prescription volume, average transaction per customer, and average sales per store are all up. All the trends show that Revco is performing well."

Currently operating under Chapter 11 of the federal Bankruptcy Code, Revco is working with its creditors and other constituencies toward a consensual

plan of reorganization. The current exclusive period within which only Revco can file a plan of reorganization expires on July 31, 1990. On July 3, 1990, the company filed a motion with the court to extend that period until October 31, 1990, and until January 31, 1991, the time in which Revco has exclusive right to obtain acceptances of the plan filed. That motion will be heard by the court on July 24, 1990.

ENGLEWOOD CLIFFS, NJ (JULY 12) PR NEWSWIRE - CPC International Inc. (NYSE: CPC) today reported second quarter net income of $95 million, 14 percent higher than the $83.1 million earned in the same quarter last year.

Earnings per common share increased 16 percent to $1.23 from $1.06 per share in the second quarter of 1989. Average common shares outstanding were 3.6 percent lower than in the second quarter of last year due to an ESOP-related stock repurchase program which was substantially completed in the fourth quarter of 1989.

Worldwide sales in the quarter were $1.45 billion, 16 percent higher than 1989's second quarter sales of $1.26 billion, and operating income was up 16 percent to $188.6 million from operating income of $162.8 million in the same quarter last year. Financing costs rose sharply compared to those in last year's second quarter due to acquisitions made since then.

For the first six months of 1990, CPC's net income was $173.9 million, up 15 percent from the comparable period last year, and earnings per common share were $2.24, 17 percent higher than last year's $1.92 per share.

Worldwide sales for the first half of 1990 were $2.81 billion, 11 percent over sales of $2.52 billion in 1989, and worldwide operating income was $348.3 million, 18 percent higher than operating income in 1989 of $295.2 million.

During the quarter, CPC's German affiliate formed a venture in East Germany with VEB Suppina Auerbach for the manufacture and sale of Knorr products in East Germany. CPC has a 75 percent interest in the venture and is managing the operation.

CPC also completed three small acquisitions during the quarter. They are: the leading producer in Portugal of jams, which are marketed under the brand names of Mateus and Casa de Mateus: the assets of the Bee Hive brand corn syrup business in Canada; and, in France, the Poti line of shelf stable, ready-to-eat fruit compote desserts.

Operating income from CPC's worldwide consumer foods operations increased 10.9 percent in the second quarter and 7.9 percent in the first half over comparable periods last year.

CPC's worldwide consumer foods business accounts for approximately 80 percent of the company's total sales. Best known among its U.S. brands are: Hellmann's and Best Foods mayonnaise, Mazola corn oil and margarine, Skippy peanut butter, Thomas' English muffins, Arnold breads, Mueller's pasta products, Karo and Golden Griddle syrups, and Knorr sauces, soups, and bouillons. CPC is also one of the largest corn refiners, with operations in North America and Latin America. Worldwide, CPC International has operations in 47 countries including 112 plants.

#90193p3792 07/12/1990 ~PR Newswire

ST. LOUIS (JULY 12) PR NEWSWIRE - The May Department Stores Company (NYSE: MA) today reported preliminary sales from continuing operations of $871.6 million for the five-week period ended July 7, an increase of 8.0 percent from sales of $807.1 million reported during the similar period a year ago.

Sales for the first five months of fiscal 1990 totaled $3.79 billion, up 9.7 percent from sales of $3.45 billion reported for the same period last year.

Department store sales for June were $740.4 million, up 7.9 percent or $54.5 million from last year. Sales for volume shoe totaled $131.2 million an increase of 8.2 percent or $10.0 million. Sales were as follows:

JUNE SALES (Millions)

	1990	1989	Percent Increase	Store-for-Store(A) Increase (Pct.)
Department stores	$ 740.4	$ 685.9	7.9	3.6
Volume shoe	131.2	121.2	8.2	1.4
Total	$ 871.6	$ 807.1	8.0	3.2

YEAR-TO-DATE SALES (Millions)

	1990	1989	Percent Increase	Store-for-Store(A) Increase (Pct.)
Department stores	$3,189.8	$2,924.4	9.1	4.8
Volume shoe	595.3	525.6	13.3	6.1
Total	$3,785.1	$3,450.0	9.7	5.0

(A) - Store-for-store sales represent sales of those stores open during both years.

The company's 1989 fiscal year included 53 weeks and, based on the 4-5-4 reporting calendar, the June 1990 period began one week later than the June 1989 period. On an adjusted basis aligning the 1989 calendar to 1990, sales would have been:

CALENDAR-ADJUSTED JUNE SALES (Millions)

	1990	1989	Percent Increase	Store-for-Store Increase (Pct.)
Department stores	$ 740.4	$ 659.0	12.4	7.8
Volume shoe	131.2	119.2	10.1	3.0
Total	$ 871.6	$ 778.2	12.0	7.1

Sales have been restated to exclude the sales of divisions which have been discontinued, as well as stores which have been closed and not replaced. Year-to-date sales, including nonreplaced closed stores, were $3.79 billion and $3.53 billion in the 1990 and 1989 periods, respectively.

#90193p3793 07/12/1990 ~PR Newswire

CHARLOTTE, NC (JULY 12) PR NEWSWIRE - First Union Corporation (NYSE: FTU) today reported $78 million, or 72 cents per common share, in net income applicable to common stockholders for the second quarter of 1990.

These results compared with net income applicable to common stockholders of $74 million, or 69 cents per common share, in the second quarter of 1989. The second quarter of 1990 included an after-tax gain of $7 million from the divestiture of 13 branches in Florida.

The impact of the gain was offset by the addition of an equivalent amount

to the unallocated portion of the allowance for loan losses. The second quarter of 1989 included after-tax gains of $2 million from the sale of investment securities.

For the first half of 1990, net income applicable to common stockholders was $149 million, or $1.39 per common share. In the same period of 1989, net income applicable to common stockholders of $146 million, or $1.37 per common share, included after-tax gains of $6 million primarily from the sale of mortgage servicing rights.

"We made progress in several important areas during the second quarter of 1990. The review by the Office of the Comptroller of the Currency (OCC) of our commercial real estate loans confirmed our confidence in our management of the loan portfolio, including its problems," said Edward E. Crutchfield Jr., First Union Corporation chairman and chief executive officer.

"We improved the net interest margin by focusing the attention of our employees on this crucial factor in our earnings. We gained efficiencies from our January acquisition of Florida National, and continued our focus on additional efficiencies throughout the corporation," Crutchfield said.

As First Union reported previously, the OCC required no special provision for loan losses following its examinations of the commercial real estate loan portfolios of First Union's subsidiary banks in Florida, North Carolina, South Carolina and Georgia during the first and second quarters of 1990.

First Union's second quarter average net loans increased eight percent from a year ago, after adjusting for growth related to the purchase accounting acquisition of Florida National. Average deposits in the second quarter of 1990 increased two percent from a year ago, after adjusting for growth related to Florida National.

Tax-equivalent net interest income, the largest component of First Union's earnings, increased 20 percent to $352 million from $293 million in the second quarter of last year.

The net interest margin of 4.06 percent showed improvement for the second consecutive quarter as First Union employees focused on pricing of loans and deposits as well as increasing volume.

The net interest margin was 3.97 percent in the first quarter of 1990 and 4.39 percent a year ago. The margin is expected to remain above four percent for the remainder of 1990.

DEARBORN, MICH. (JULY 12) PR NEWSWIRE - Ford Motor Company (NYSE: F) is establishing the largest, most comprehensive auto-industry testing and certification process available for dealership employees who interact with the public.

Approximately two-thirds of Ford Motor Company's U.S. dealers already have enrolled in the voluntary program, which covers product knowledge, ethics, customer contact and interpersonal skills. The certification process is being offered to thousands of Ford and Lincoln-Mercury salespeople, service advisers, and parts counterpeople.

"Certification for these key people in our dealerships certainly will lead to a higher degree of customer satisfaction," said Darryl B. Hazel, education and training manager, Marketing Services, Ford North American Automotive Operations.

"But this program is designed to step up the satisfaction level another notch," he added. "For example, salespeople will learn more about the products they sell, while at the same time developing better customer-handling skills. And service advisers and parts counterpeople will become more aware of their responsibility to develop and maintain good customer relations."

For salespeople, certification will be dependent on ratings from customers as well as grades on a series of tests. Service adviser certification involves successful completion of a special customer- handling course as well as in-dealership testing. For parts counterpeople, successful completion of Ford's parts training program is the main component of their certification.

For every employee in the program, the final step in the process is a recommendation from the dealership's top-ranking official.

Although aspects of this process are in place at several automotive companies and others are planning new programs, Ford hopes to set a new trend in recognizing the importance of customer satisfaction throughout the ownership cycle and in establishing methods to increase that satisfaction.

Development of the certification process included customer research, as well as input from dealership employee focus groups. The goal was to increase the level of professionalism in Ford and Lincoln-Mercury dealerships and promote public trust by providing recognition to top employees in customer contact jobs.

DURHAM, N.C. (JULY 12) PR NEWSWIRE - Home Savings and Loan Association, Inc. (NASDAQ-NMS: HSLD) of Durham, North Carolia today reported that net income for the quarter ended June 30, 1990 was $610,474 or $.36 per share compared with $766,596 or $.45 per share for the comparable 1989 period. For the nine months ended June 30, 1990, net income was $1,725,049 or $1.01 per share versus $2,338,781 or $1.38 per share for the nine months ended June 30, 1989.

The decline in net income for the quarter was attributable to the writeoff of accrued interest on some delinquent loans and real estate acquired through foreclosure, and an increase in general loan loss reserves. C. Darrell DeLoatche, President and CEO of Home Savings, commented, "In light of the sluggish real estate market, we are quite satisfied with the quality and performance of our loan portfolio, but feel it prudent to increase general loss reserves. Overall, we are pleased with the operating results of the Association and expect relatively stable earnings for the remainder of the fiscal year."

Home Savings and Loan Assocation, Inc. is headquartered in Durham, N.C. with offices in Roxboro and Chapel Hill. The approximately 1.66 million shares of common stock outstanding are traded in the NASDAQ National Market System under the symbol HSLD.

#90193p3799 07/12/1990 ~PR Newswire

WOBURN, MA (JULY 12) PR NEWSWIRE - Thermo Cardiosystems Inc. (AMEX: TCA) announced today that two of the country's leading cardiac transplant centers have received U.S. Food & Drug Administration approval to begin implants of the company's HeartMate(R) cardiac-assist device. As soon as appropriate patients are identified, Columbia- Presbyterian Hospital in New York and Sharp Memorial Hospital in San Diego will be ready to perform their first implants of Thermo Cardiosystems' pneumatically driven heart-assist devices.

Columbia-Presbyterian, where cardiac surgeons last year performed 84 heart transplants, is one of the nation's most active heart transplant centers. Sharp has performed 70 cardiac transplants to date. Thermo Cardiosystems' HeartMate device is used in patients awaiting a heart transplant to

support the natural heart until a donor organ becomes available. The device is already in use at several other clinical sites throughout the country including the Texas Heart Institute at St. Luke's Episcopal Hospital in Houston where 20 patients have been supported by the heart-assist system.

"We are very pleased that two more of the nation's leading cardiovascular centers will be participating in clinical trials with our HeartMate device " said Victor L. Poirier, president of Thermo Cardiosystems. "We have used the current version of our air-driven device in 30 patients so far without the adverse effects of clot- related strokes. We view this as a very positive indication of our long-term prospects with a second-generation, battery-driven device."

The company has filed an application with the U.S. Food & Drug Administration to begin clinical trials of the battery-powered HeartMate device.

Thermo Cardiosystems Inc. is a leader in research and development of implantable ventricular-assist devices. These devices are designed to perform substantially all or part of the pumping function of the left ventricle of the natural heart for patients suffering from cardiovascular disease. Thermo Cardiosystems is a public subsidiary of Thermedics Inc. (AMEX: TMD) and Thermo Electron Corporation (NYSE: TMO)

EAST AURORA, NY (JULY 12) PR NEWSWIRE - Fisher-Price today announced plans to discontinue manufacturing at its Holland, N.Y., facility. The plant closing, which will affect approximately 475 employees, will occur gradually from Sept. 14 to Nov. 2, 1990. The company also announced the termination of 245 headquarters employees.

"The closing of the Holland plant was necessary because of the excess capacity throughout our manufacturing system and the continued decline in sales volume," said Ronald J. Jackson, chairman and chief executive officer.

"The headquarters reductions are necessary to help us align the size of our work force with the smaller size of our business. These were very difficult decisions, but, in light of current business conditions, they are absolutely essential at this time.

"While we did our best to make Holland a fully integrated facility, combining fabrication and assembly with molding capabilities, it is simply

no longer economically feasible to operate it.

"This action is in no way a reflection on employee performance. In fact, these employees have performed very well over the years, rising to the challenge to be as efficient and cost competitive as possible," Jackson said.

All terminated employees will receive a competitive severance package. The company has also arranged for individual counseling and outplacement workshops to assist Holland and headquarters employees during this period.

Manufacturing of products currently produced in the Holland plant will be transferred to other U.S. facilities. Some of the molding equipment will be relocated throughout Fisher-Price's manufacturing system.

Fisher-Price will maintain a staff of approximately 950 employees in such areas as research and development, quality control, and marketing at its headquarters in East Aurora. In addition, approximately 25 technical and maintenance personnel will be retained for a mold debug and sampling operation in Holland. Fisher-Price's Medina, N.Y., plant continues to employ approximately 850 people.

In February, Fisher-Price announced the closing of its East Aurora, N.Y., plant which resulted in the termination of 450 employees at that facility. Following the workforce reductions announced today, total Fisher-Price employment will be approximately 6,400.

In April, The Quaker Oats Company (NYSE: OAT) announced its decision to spin off Fisher-Price to Quaker shareholders. Fisher-Price expects to become an independent, free-standing company that will be publicly traded by early 1991.

WHIPPANY, N.J. (JULY 12) PR NEWSWIRE - Channel Home Centers, Inc. announces the resignation of its president and chairman of the board, Leon Berger. Malcolm L. Sherman, chief executive officer, said, "Mr. Berger's career with Channel spanned 18 years, during which time he provided strategy, vision and direction for the company through its major growth periods. In addition, Berger was a significant factor in the development of the Home Center industry."

Joseph Nusim has been appointed president and chief executive officer. Nusim was, most recently, the president, CEO and a director of Makro, Inc.

a warehouse club with nine stores and annual sales exceeding $600 million. Prior to Makro, Nusim held positions of: executive vice president, merchandising and store operations at Gaylord's National Stores; executive vice president, Jamesway Corporation; and general manager, Spartan Atlantic Department Stores, among others.

Malcolm L. Sherman will become chairman of the board. Channel Home Centers Inc. is an independent chain of home centers, operating 89 stores in nine Northeast and Middle Atlantic states.

CLEVELAND (JULY 12) PR NEWSWIRE - The Sherwin-Williams Company (NYSE: SHW) today reported that earnings per share for the quarter increased 14.4 percent to $1.03 per share compared to $.90 per share for the second quarter of 1989. Net income was $44,910,000 versus $38,696,000 last year. Net sales for the quarter increased 4.7 percent to $611,385,000 from $583,984,000. For the first six months, sales increased 5.9 percent to $1,110,845,000 and earnings per share increased 14.5 percent to $1.26 per share from $1.10 per share a year ago. Net income for the first half was $54,905,000 compared to $47,506,000 last year.

Sales in the Paint Stores Segment increased 7.1 percent during the quarter despite sluggish retail sales and inclement weather throughout much of the country. Comparable-store sales increased 6.5 percent. For the quarter, Stores' operating income improved only slightly over a year ago as price competition remained intense, putting pressure on gross margins. However, cost containment programs resulted in SG&A expenses decreasing as a percent of sales in the quarter. For the first six month, Stores' sales have increased 7.6 percent while operating income increased 5.4 percent.

The Coatings Segment's sales increased less than one percent, due in part to disposition of Lyons Transportation in June. Operating income advanced 9.6 percent over last year's second quarter as raw material cost pressures continue to subside, helping to improve gross margins. For the six month period, Coatings' sales increased 3.2 percent and operating income increased 9.8 percent.

Commenting on the quarter and six months, John G. Breen, chairman and chief executive officer said, "We are pleased with the operating results for the quarter and the six months and are encouraged by the stabilization of raw material cost increases. However, intense price competition continues to affect the Paint Stores Segment's margins although our market share continues to improve.

"The acquisition of the Krylon brand, completed in late June, is important to the company as it will assist us in continuing to expand our market share and profitiability in the aerosol products market."

MINNEAPOLIS (JULY 12) PR NEWSWIRE - Best Buy Co., Inc. (NYSE: BBY), today reported sales for June 1990, (June 3 through July 7), the fourth period of the company's 1990-91 fiscal year.

According to Allen Lenzmeier, senior vice president/finance, June 1990 sales of $55 million were 25 percent more than the $44 million achieved for the comparable five-week period last year. Year-to-date sales (March 4 through July 7) were $181 million, a 21 percent over $149 million for the comparable period last year. Comparable store sales increased 5 percent for June 1990 (41 of the company's stores are considered comparable).

Best Buy entered the Dallas/Ft. Worth market June 29, 1990, opening three new stores, bringing the company's total number of retail locations to 52.

Best Buy reports sales on a 5-4-4 week basis. Net income and earnings per share are disclosed quarterly. Best Buy is the fourth largest publicly held consumer electronics and major appliance retailer in the U.S.

The company sells nationally recognized name-brand consumer electronic products, 35mm photographic equipment, home office products, entertainment software, and major appliances at 52 stores located in Minnesota, Iowa, Wisconsin, South Dakota, Illinois, Kansas, Missouri, Nebraska, and Texas. Best Buy's common stock is traded on the New York Stock Exchange under the

symbol "BBY."

BALTIMORE (JULY 12) PR NEWSWIRE - MNC Financial Inc. (NYSE: MNC) today announced it expects to report a loss of approximately $75 million, or about $.90 per fully diluted share, for the second quarter ended June 30, 1990, as a result of further increases in reserves for possible loan losses, principally relating to commercial real estate.

MNC has completed its current review of its loan portfolios, which was previously announced June 12, 1990. The company said that today's announcement is based on this loan portfolio review and a preliminary accounting of the second quarter. Full, detailed financial statements for the quarter should be availablefor release on July, 24, 1990, the company said. In disclosing its anticipated second quarter results, the company stated:

-- Nonperforming assets are expected to increase from $359 million at March 31, 1990, to approximately $750 million as of June 30, 1990.

-- Approximately $200 million of the loans in this category were either contractually current or past due by fewer than 90 days as of June 30, 1990.

-- Other Real Estate Owned (including insubstance foreclosures) increased from $92 million at March 31 to approximately $160 million at June 30, 1990.

-- Of the $750 million in total nonperforming assets, approximately $500 million are commercial real estate-related.

-- A provision of $230 million will likely be added to reserves for possible loan losses, bringing total reserves to approximately $550 million.

-- Net loan chargeoffs during the second quarter (including $37 million of write-downs relating to assets reclassified as OREO) are expected to total approximately $94 million.

On a fully diluted basis, earnings were $.78 per share for the second quarter of 1989; net income for the second quarter a year ago was $66,641,000. For the first half of 1989, MNC reported net income of $124,028,000 or $1.45 per fully diluted share, compared with an anticipated loss of $69 million, or $.85 per share for the six months

ended June 30, 1990.

MNC Financial is a $25-plus billion-asset diversified financial services company which delivers a broad range of commercial and consumer banking products in the Baltimore/Washington common market, and in the mid-Atlantic states. In addition, MNC is the largest national marketer of endorsed affinity group credit cards, a pioneer in asset securitization and sales, and a leader in national consumer finance products. MNC manages one of the largest trust entities in the region.

#90193p3817 07/12/1990 ~PR Newswire

BIRMINGHAM, AL (JULY 12) PR NEWSWIRE - First Commercial Bancshares Inc. (Jasper, Ala.) (NASDAQ: FSCB) today announced per share earnings of $0.44 (unaudited) for the second quarter of 1990, representing an increase of 4.8 percent over earnings per common and diluted common equivalent shares of $0.42 for the same period in 1989.

Earnings for the second quarter were $1.66 million compared to $1.61 million for the second quarter of 1989.

The company's total assets on June 30 were $719 million as compared to $606 million on June 30, 1989, representing an increase of 18.6 percent. Total stockholders' equity at June 30 was $60.8 million, or $16.41 on a per share basis.

John T. Oliver Jr., chairman and CEO of the company, stated that: "The company is poised for a very successful year. Asset quality is good with non-performing assets as a percentage of gross loans remaining well below industry averages at 1.04 percent. At the same time, the company continues to maintain a loan loss reserve of 1.40 percent of total loans net of unearned interest, well above the average for our peers. We are proud of the growth that our new subsidiaries have achieved in Tuscaloosa and Montgomery and, we believe the company will capitalize on this growth during the second half of the year."

First Commercial Bancshares Inc. has four banking subsidiaries: First National Bank of Jasper (Jasper), First Commercial Bank (Birmingham), The Bank of Tuscaloosa (Tuscaloosa), and Sterling Bank (Montgomery).

JACKSON, MI (JULY 12) PR NEWSWIRE - With the dog days of summer approaching, Consumers Power Company is offering suggestions to customers to help them keep cool while conserving their energy dollars.

"Hot, humid weather can cause your appliances, especially cooling equipment such as air conditioners and refrigerators, to run longer than they need to," said Carl L. English, vice president, gas distribution and customer services for the utility. He offered common sense tips to minimize the effects of heat and humidity:

-- Run major appliances such as dishwashers and clothes dryers at night or early in the morning when temperatures are cooler to take advantage of natural ventilation.

-- Keep direct sunlight out by closing drapes, drawing blinds or using awnings. This will keep inside temperatures lower.

-- Lower the temperature setting on an electric hot water heater to reduce the consumption of one of the biggest household electricity users.

-- If you have a window-mounted air conditioner, close off furnace registers to prevent cool air from escaping into the basement.

-- Close off rooms not in use during the day, such as bedrooms. Open them an hour or two before bedtime to allow cooling to circulate.

-- Consider installing an attic fan and running it at night to draw hot air from the house, thereby creating a breeze effect while you sleep.

By following these suggestions, you can stay comfortable, enjoy the convenience of your appliances and still keep your energy bills down.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90193p3827 07/12/1990 ~PR Newswire
WORCESTER, MASS. (JULY 12) PR NEWSWIRE - Transgenic Sciences, Inc. (NASDAQ: TSIN) announced today that it has licensed key technology from two other biotechnology firms to lower its time and cost in developing its

advanced new products. The first agreement is with Biogen, Inc. of Cambridge, Mass., and includes a license to a Biogen patent on the production of pharmaceuticals in animal milk, as well as exclusive rights to develop urokinase using proprietary cell lines developed at Biogen. The second agreement is with Alpha-Beta Technology of Worcester, Mass., and gives TSI exclusive rights to use a new cholesterol-lowering agent in animal feed.

"TSI is continually re-examining its options to maximize its return on research investment," said James P. Sherblom, chairman and CEO of TSI. "With the help of these kinds of agreements, TSI expects to start generating project revenues in the agricultural area by 1991 and in the pharmaceutical area by 1996, both of which will supplement TSI's growing profitable business in preclinical testing."

Sherblom noted that the Biogen license stregthens TSI's position as a leader in the use of transgenic technology for the production of biopharmaceuticals in animal milk. "Transgenic technology has major potential for reducing the cost of producing protein-based drugs, and as a result, expanding markets for them," he said. The first biopharmaceutical TSI is developing through transgenic technology is human growth hormone.

TSI is a life sciences company developing advanced toxicology tests and disease models based on genetic engineering and transgenic techniques to improve the efficiency of the pharmaceutical/chemical development process. TSI is also developing animal strains capable of producing commercially valuable pharmaceutical proteins, as well as strains with desirable growth and genetic characteristics.

#90193p3834 07/12/1990 ~PR Newswire

LEXINGTON, MA (JULY 12) PR NEWSWIRE - Raytheon Company (NYSE: RTN) today reported an 8.3 percent increase in earnings and a 9.4 percent increase in earnings per share, on a 2.5 percent increase in sales for the second quarter of 1990 compared with the same period last year.

Earnings rose to $144.8 million, or $2.22 per share, on sales of $2.346 billion. In the second quarter last year, the company earned $133.7 million, or $2.03 per share, on sales of $2.290 billion.

For the first six months, earnings were $275.7 million, or $4.22 per share on sales of $4.571 billion. In the same period last year, earnings were

$254.5 million, or $3.86 per share, on sales of $4.363 billion.

"Raytheon's second quarter profit growth was led by the Electronics, Aircraft Products and Energy Services segments," said Thomas L. Phillips, Raytheon's chairman and CEO. "Operating improvements in Aircraft and Energy Services continued the same strong growth as in the first quarter. All five business segments achieved continued profitability."

Total backlog at the end of the quarter was $9.230 billion, including funded U.S. government orders of $6.702 billion. Total backlog at the end of last year's second quarter was $8.362 billion, including a government backlog of $6.319 billion.

The profit gain in Electronics was led by government electronics systems with its broad base of defense and non-defense programs.

During the quarter, the company was awarded a $414 million contract, including initial funding of $204 million, for Patriot system ground equipment for the air defense of Italy. The company also was awarded a $145.4 million contract for AN/ALQ-184 airborne electronic countermeasures pods and a $58.6 million contract to modernize the Cobra Dane surveillance and early warning radar system at Shemya Air Force Base, Alaska.

Aircraft Products' strong profit growth was a result of increased domestic order rates and improved manufacturing costs. The momentum at Beech continues to be strong.

Energy Services' significant rate of profit growth was attributable to good markets and improved operating performance. All companies in the segment exceeded year-earlier results. Energy Services' diversification has resulted in expanded capabilities in environmental services, giving this segment added growth potential.

Internationally, Raytheon announced during the quarter that its Badger Company's Netherlands subsidiary, Badger B.V., and Camp Dresser & McKee Inc. (CDM) have initiated a joint venture to develop opportunities for environmental management services in Europe.

Major Appliances' performance was affected by a number of factors, including continued start-up costs associated with a South Carolina manufacturing facility, and a spotty replacement market.

Provisions for federal and foreign income taxes were $71.7 million in the second quarter and $136.1 million in the first half, compared with $57.9 million and $111.2 million, respectively, last year. The effective tax rates were 33.1 percent in both the quarter and the half. In the same periods last year, these rates were 30.2 percent and 30.4 percent, respectively. Both years are below the statutory rate of 34 percent, due

to foreign tax credits -- and 1989 also benefited from estimated deferred tax benefits.

Earnings per share are based on the average number of shares outstanding during the period. Average shares outstanding were 65.3 million in both the second quarter and the first half, compared with 65.9 million and 66.0 million, respectively, last year.

#90193p3835 07/12/1990 ~PR Newswire

MOUNT PROSPECT, IL (JULY 12) PR NEWSWIRE - Zenith Data Systems (ZDS) today reduced the suggested retail prices of its desktop Z-386SX and portable SupersPort 286e personal computers (PCs) by $300, or up to nine percent. ZDS also announced the new Z-286 LP Plus, an 80286-based PC that can be upgraded with an Intel386SX processor.

"We expect 386SX-based PC sales to continue their record-breaking pace, as the market grows increasingly competitive with promotions and pricing actions," said Arthur Lambert, ZDS vice president of sales and marketing.

"This price drop, combined with our recent strategy to bundle a mouse and factory-installed Microsoft Windows 3.0 and Asymetrix ToolBook on the hard drive models, has allowed us to add almost $1,000 of value to these systems within the last two months."

The Z-386SX Model 1, which has a 16-megahertz Intel386SX processor, two megabytes (MB) of memory, a VGA video card and a 1.44MB 3.5-inch floppy drive, now has a suggested retail price of $2,999, down from $3,299.

The prices of the Model 40, which has a 40MB hard drive, and the Model 80, which has an 80MB hard drive, are now $3,699 and $4,399, down from $3,999 and $4,699, respectively.

In response to growing demand for 80286-based portable PCs with VGA video, ZDS lowered the prices of its SupersPort 286e Model 20 and Model 40 to $4,399 and $4,699, from $4,699 and $4,999, respectively.

Z-286 LP Plus The new Z-286 LP Plus is ZDS' first system designed to be easily upgraded with a faster processor. "Although '386-based systems clearly represent the best long-term PC investment, '286-based systems still offer significant value and performance," said Arthur Lambert, ZDS' vice president of sales and marketing.

"With the Z-286 LP Plus, users can protect their investment by upgrading to '386 computing whenever they're ready. The new graphical user interface

Microsoft Windows 3.0, which we've pre-installed on the hard disk systems will further aid a swift and seamless migration to 32-bit computing," he said.

The Z-286 LP Plus can be upgraded by the user in less than five minutes. The system's 12-megahertz 80286 processor is mounted on a removable card that can be replaced by an upgrade card featuring a 16-megahertz 386SX.

This SX upgrade will increase performance by more than 25 percent in typical DOS applications. Coprocessor sockets are included on the cards. The upgrade card has a manufacturer's suggested retail price of $599.

NEWARK, CALIF. (JULY 12) PR NEWSWIRE - Ross Stores Inc. (NASDAQ: ROST) today reported sales of $73 million for the five week period ended July 7, 1990, an 11 percent increase above the $66 million in sales for the five weeks ended July 8, 1989. Comparable store sales for the same period were even on a day-for-day basis with last year.

For the five months through July 7, 1990, sales were $304 million, a 7 percent increase above the $283 million in sales for the prior year's comparable period ended July 8, 1989. Comparable store sales for the five month period were down 3 percent on a day-for-day basis from last year.

Ross Stores Inc. operates a national chain of off-price retail stores offering first quality, in-season, branded apparel and apparel- related merchandise for the entire family. The company had 161 stores in operation at July 7, 1990, compared to 143 stores at the end of the same period last year.

SAN FRANCISCO (JULY 12) PR NEWSWIRE - Visa International is "going for the gold," again. The worldwide card association, representing more than 21,000 financial institutions, announced that it has signed an agreement to be a worldwide sponsor of the 1992 Olympic Winter Games in Albertville, France, and the Summer Olympic Games in Barcelona, Spain.

As a worldwide sponsor of the 1988 Olympic Games, Visa raised nearly $3

million for various national Olympic committees. "We expect to top that amount this time with a far-reaching fund-raising effort," said Charles T. Russell, president, Visa International.

Although details of the upcoming fund-raising program are not yet available, Russell said the effort would break new ground.

"Our association with the Olympics has been mutually beneficial. Not only has it been an opportunity to express our commitment to and belief in the Olympic ideals, but the business returns have been substantial," Russell said.

During one six-month fund-raising promotion that triggered a donation to the U.S. Olympic Team each time someone used a Visa card or purchased a Visa Travelers Cheque, the company's sales soared to $54 billion and transaction growth was 50 percent higher than Visa originally projected.

Visa called on the services of three Olympians to help raise funds for the 1988 U.S.Olympic Team -- three-time gold medal gymnast Bart Conner, silver medal skier Christin Cooper and Willie Banks, who set a world record for the triple jump in 1985. Governors of six U.S. states also pitched in to help raise funds.

More than 5 million Visa cards bearing the Olympic Rings were issued to consumers as part of Visa's 1988 Olympic sponsorship. In addition to a massive corporate marketing and public relations effort, financial institutions associated with Visa in 50 countries launched their own individual Olympic promotions.

Visa is the world's largest consumer payments program with more than 220 million cardholders and annual card volume exceeeding $259 billion.

PHILADELPHIA (JULY 12) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) is investing more than $6.4 million to upgrade sections of its lines in central and northern New Jersey.

The work, which began in April and is scheduled to be completed in October includes the installation of more than 48,000 crossties and the surfacing (raising and smoothing) of more than 220 miles of supporting railbed.

The project, part of Conrail's capital program for 1990, is being conducted along sections of the following lines:

-- The Newark and New York Industrial Track, which serves customers in the Newark area.

-- The Southern Secondary, between Lakehurst and Red Bank. -- The Manufacturers Industrial Track, between Newark and Elizabeth. -- The Trenton Line, between Philadelphia and Manville, via Trenton. -- The Lehigh Line, between Newark and Allentown, Pa. -- The Bay Shore Connecting Track, between Newark and Kearny. -- The Passaic and Harsimus Branch, between Newark and Jersey City. -- The Northern Running Track, between Jersey City and Sparkill, N.Y. -- The Pompton Industrial Track, between Mountainview and Pompton. -- The Totowa Spur, between Little Falls and Mountainview. -- The Newark Industrial Track, between Newark and Paterson. -- The Port Reading Secondary, between Manville and Port Reading. ?-- The Washington Secondary, between Netcong and Phillipsburg.

Commodities carried on these lines include auto parts and new automobiles, coal, fresh and processed foods, grain, lumber, newsprint and other paper products, plastics, scrap metal, steel, chemicals, and a wide variety of general merchandise and manufactured goods transported in highway trailers and marine containers by Conrail's high-speed, high priority Trailvan intermodal trains.

"Conrail's capital program ensures safe, reliable and customer- responsive service," said James A. Hagen, Conrail's chairman, president and chief executive officer. "Projects such as this will provide a sound track structure essential to Conrail's ability to compete in the transportation marketplace."

#90193p3841 07/12/1990 ~PR Newswire

SECAUCUS, N.J. (JULY 12) PR NEWSWIRE - The Genlyte Group, Inc. (NASDAQ: GLYT) today announced that second quarter sales and earnings were below last year's results for the same period, as anticipated in the company's June announcement. The company also announced that debt was reduced by about $2,000,000 during the quarter.

For the three months ended June 30, 1990, sales were $123,012,000 versus $128,507,000 in 1989; operating profit was $8,239,000 versus $11,847,000; net income was $1,650,000 versus $3,367,000 and earnings per share were 13 cents versus 26 cents.

For the first six months of 1990, sales were $254,746,000 compared to $257,760,000 in 1989; operating profit was $19,005,000 compared to $22,692,000; net income was $4,816,000 compared to $6,289,000 and earnings per share were 37 cents compared to 48 cents.

David E. Momot, president of Genlyte, cited two factors for the decline -- construction industry strikes in Canada, which have now ended, and the continuing softness in commercial and residential construction in the United States.

Momot stated that strikes by construction industry unions in Canada's Province of Ontario, which halted construction from May 1 to July 9, and shorter wildcat strikes by construction unions in the Province of Quebec have had a major impact on sales and operating profit at Genlyte's Canadian operations in the second quarter. He said that a return to more normal operations is expected during the third quarter. Momot went on to say that the softness in the construction market in the U.S., particularly in the Northeast, has caused a slowdown in sales and has resulted in greater price competition. He added that the company's spending for sales promotion has been increased to maintain market share. He also said that steps have been taken to reduce total costs in light of expectations that the construction industry softness will continue.

Momot concluded by saying that debt was reduced by $2,000,000 during the quarter bringing it down to about $162,500,000, the lowest level since Genlyte was spun-off in 1988.

The Genlyte Group Inc. is a leading manufacturer of lighting fixtures and controls for the commercial, industrial and residential markets. Its products are sold under the brand names of Lightolier, KLP, Hadco, Wide-Lite, Bronzelite, Timely, Crescent, Stonco, Diamond F and Basic Concept in the U.S. and Lightolier, Keene-Widelite, Prodel and C.F.I. in Canada.

PRINCETON, N.J. (JULY 12) PR NEWSWIRE - The Liposome Company, Inc. (NASDAQ: LIPO), announced today the appointment of Horst Witzel to its

board of directors. Witzel, former chairman of the board of executive directors of Schering AG, Berlin (West Germany), fills a new board seat created through the expansion of the current board from six to seven members.

Witzel is currently a member of the supervisory board of Schering AG. He joined Schering in 1950 where he held several positions of increasing responsibility in research and development and general management. In 1962 he became a member of the board of executive directors and served as its chairman from 1986 until his retirement in 1989. Witzel also serves on the boards and advisory councils of several other German companies and institutions. He holds an undergraduate degree in organic chemistry and a doctorate in chemistry from the Technical University of Berlin.

Commenting on Witzel's appointment, the Liposome Company's chairman, Charles A. Baker, said, "We are very pleased that Dr. Witzel has agreed to join our board. His extensive background in the pharmaceutical industry, with his particular expertise in the European markets, will be a very valuable asset as we continue to seek strong corporate partners for our lead products. We believe that he will provide important input to our strategic decisions both from a marketing and a research point of view."

The largest company dedicated exclusively to the development of liposome-based pharmaceuticals, the Liposome Company is developing pharmaceutical products designed to enhance the therapeutic benefit of existing drugs. The company is primarily focused on developing advanced lipisomal drugs for the treatment of cancer and serious infectious diseases.

MIAMI (JULY 12) PR NEWSWIRE - Just two months after launching operations, Pan Am Express is planning further expansion in Florida, William R. Lange, president of Pan Am Express, announced today.

Pan Am Express currently offers service between Miami and Key West, Fort Myers, Sarasota/Bradenton, Melbourne and West Palm Beach. The airline plans to offer service to Daytona Beach and other destinations to be announced shortly.

"A large number of passengers are traveling from our Express cities in Florida and connecting with Pan Am's international and domestic flights in Miami," Lange said. "Meanwhile, many foreign travelers are using Pan Am

Express to reach the wide network of Florida destinations we have recently inaugurated."

As expected, the Key West stop is one of Express' more popular final destinations for the international traveler, according to Lange. Conversely, most of the Express' passengers flying from West Palm Beach to Miami are connecting to international flights, he said.

Lange also reported that nearly half of the Express passengers flying from Melbourne, Fort Myers and Sarasota/Bradenton combined are connecting to either international or domestic flights.

"Basically, we've brought access to Europe and Latin America directly to Florida's doorstep," Lange said, "and we are making plans to add more Florida cities to the service in the very near future."

The 25 intra-Florida Express flights include six daily departures from Key West, five from Sarasota/Bradenton, six from Fort Myers, five from West Palm Beach and three from Melbourne, providing direct service to 32 destinations in Europe, South America and the Caribbean, and 13 destinations in the U.S., with further connecting service to Pan Am's more than 100 destinations worldwide.

Lange also announced that the Pan Am Express schedule has been refined to expand flights for business travel within Florida. Earlier morning flights have been added, departing Key West, West Palm Beach, Fort Myers and Sarasota/Bradenton. The new schedule allows business travelers sufficient time to reach their destination for a full day's work and return home on the same day, Lange said.

The inauguration of Pan Am Express service last May 15 is part of an aggressive expansion of Pan Am's operations in Florida. Pan Am departures from Miami International Airport (MIA) now total 82, more than any other carrier. Pan Am is planning additional flights which could increase the number of departures at MIA to more than 100 by October.

OCALA, FL (JULY 12) PR NEWSWIRE - Action Products International, Inc. (NASDAQ: APII) of Ocala, Fla. is a major manufacturer and importer of space, dinosaur, animal and aquarium gift items specializing in the museum and corporate specialty market and the manufacturer of All Natural Astronaut Ice Cream and other Astronaut foods.

Warren Kaplan, president, announced the following fiscal results:

ACTION PRODUCTS INTERNATIONAL, INC.

6 Months June 30th	1990	1989	Pct. Gain
Sales	$2,169,833	$1,757,252	+ 24.48
Net Income (Loss)	$ 13,392	$ (36,729)	+136.46
3 Months June 30th	1990	1989	Pct. Gain
Sales	$1,215,438	$1,052,801	+ 15.45 Net Income
$ 34,613	$ 29,512	+ 17.28	

Kaplan said, "We have had nine straight months of sales gains and we expect the up trend to continue for the balance of the year. Besides gains in our Astronaut food division, we have increased our export and soft goods sales. We expect to bring on a new Astronaut food product within the next 60 days. That should add to the excitement of the line. We added new quality inflatable models such as the SR-71, a 22" earth globe and a 16" moon globe and these are having a positive effect. In conjunction with the British Museum of Natural History, the company added a 1:45 scale Muttaburrasaurus to its line and expects to add another

dinosaur before the end of the year. Based on our current outlook and backlogs, we expect a very good year in 1990 and we are looking for historic record sales and earnings in 1991."

#90193p3854 07/12/1990 ~PR Newswire

ATLANTA (JULY 12) PR NEWSWIRE - A food warehouse and distribution center, Huddle House Inc. of Decatur, has been fined $20,000 by Georgia Commissioner of Agriculture Tommy Irvin for violation of the Georgia Food Act.

The fine, the maximum allowed by law for such violations, was issued after an investigation revealed that the firm was mislabeling and misbranding steaks and hams sold to independent Huddle House franchise owners. Ungraded steaks were being sold as "U.S. Choice" to restaurant owners, and the weights on boxes of hams were being altered.

"The deceitful practices of the parent company were unfair to independent franchise owners who were required to buy food products from this distribution center," said Irvin. "Our goal was to bring this firm into compliance to assure the restaurant owners and patrons that they will get the quality products they are paying for in the future."

As a result of a hearing held June 29, the company paid a cash fine of $10,000 and the remaining $10,000 of the fine was suspended after the firm signed a consent order agreeing to comply with Georgia law and to dispose of the mislabeled meat products under supervision of the agriculture department. The meat may not be distributed to Huddle House restaurants but may be sold through other channels as ungraded meat. In addition, the Huddle House distribution center has been placed on probation for one year.

"This is the largest fine we have ever levied against an operation for

labeling violations. But we felt it was warranted because of the large number of franchise owners and restaurant patrons being misled," said Irvin. "Our goal is to assure the consuming public that when such violations are identified, we will move quickly to see that food establishments are brought into compliance with Georgia law."

There are 176 Huddle House restaurant locations in Georgia and throughout the Southeast, most of which are independently owned and operated.

#90193p3860 07/12/1990 ~PR Newswire

WASHINGTON (JULY 12) PR NEWSWIRE - David Bell, president of Bozell, Inc., one of the world's largest advertising agencies, told a House subcommittee today that legislation restricting the content of tobacco advertisements is "based on a false premise and misunderstanding of the role of advertising in the marketing of a product."

Bell serves as chairman of the American Advertising Federation and testified on behalf of AAF and the American Association of Advertising Agencies.

Bell testified before the House Subcommittee on Health and the Environment in response to H.R. 5041, sponsored by subcommittee chairman Henry Waxman (D-Calif.), which would ban the use of human and cartoon figures, logos or symbols, pictures and colors in tobacco advertisements.

Bell explained that the assumptions used to justify the legislation -- that tobacco advertising was designed to attract new smokers, and that children were vulnerable to tobacco advertising -- were patently false.

Bell explained that advertising for established products is designed to increase brand awareness and market share. "In a highly competitive market, such as tobacco, advertising is essential to maintaining brand loyalty. ... It is inefficient to spend closely scrutinized advertising dollars to increase the overall size of a market as opposed to building a focused market share."

Bell pointed out that increased advertising expenditures are not increasing the number of smokers, and drew a parallel between tobacco and political advertising. "Fewer people smoke, and unfortunately, fewer people are voting. This situation persists despite the fact that advertising expenditures for both are rising."

Bell testified that children are not influenced by tobacco advertisements.

"It is documented that the greatest determinants (of a minor's decision to smoke) are parental and peer influence. Numerous studies have found that advertising plays at most a negligible role."

In closing, Bell defended the rights of advertisers and consumers in the American economic system. "Like our political system, our free market economy is based on the free flow of information about the goods and services available to the consumer. It is the consumer who has the right to make an informed choice of whether or not to use a product."

Commenting on the legislation Bell said: "This is not a debate over health or tobacco, but over censorship, pure and simple. If this legislation passes, the advertising for any product which may be unpopular with some members of the government is vulnerable. The advertising industry will continue to resist all attempts to censor the truthful advertising of all legal products."

The American Advertising Federation is the only national association encompassing and representing all aspects and disciplines in the advertising industry. Headquartered in Washington, the AAF serves its 47,000 affiliate members by representing their views and concerns on public issues affecting advertising. AAF also serves to promote a better understanding of advertising among the public, in government and in education.

NEW ORLEANS (JULY 12) PR NEWSWIRE - The support structure for a decommissioned offshore platform formerly operated by Chevron U.S.A. was toppled today in Gulf waters, to begin serving as an artificial reef for coastal marine life.

The 5,200-ton structure, called a platform jacket, was sunk in Destin Dome Block 576, about 60 miles south of Alabama. The site was designated by the Alabama Department of Conservation and Natural Resources.

As an underwater reef, the jacket will provide shelter for a wide variety of marine life, including many delicate species, and is expected to provide increased deep-water fishing opportunities. Its location is about five miles south of the Marathon fishing reef.

Chevron entered into a $1.6 million contract with McDermott Inc., a salvaging firm, to remove and take possession of the jacket from Chevron's South Pass 62B oil field (located in Viosca Knoll Block 899, about 90 miles south of Mississippi). McDermott began removing the jacket about

two weeks ago and then towed it to Destin Dome 576 for toppling.

The jacket, which is 416 feet tall and measures 132 feet by 230 feet wide at the base, was toppled on its side in 375 feet of water, leaving a clearance of more than 200 feet below the surface.

This is the second former Chevron jacket to become an artificial reef. In October 1988, the South Timbalier Block 128 rig was toppled in place to form a reef about 20 miles southwest of Grand Isle in Louisiana.

NEW YORK (JULY 12) PR NEWSWIRE - The American Stock Exchange announced that the initial public offering of 3,300,000 common shares of Foundation Health Corporation of Rancho Cordova, Calif., began trading today. Foundation Health Corporation is a managed health care company that provides managed health care services through one of the largest health maintenance organizations (HMOs) in California and its government contracting subsidiary.

Trading under ticker symbol FH, the common stock opened on 511,000 shares at 13-7/8.

Foundation Health Corporation operates a federally qualified, state licensed HMO subsidiary, Foundation Health, a California Health Plan, that provides enrollees with specified health care services through a network of independent physicians, physician groups, hospitals and other providers in northern and central California.

The company also serves as the prime contractor for the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), under an exclusive contract with the U.S. Department of Defense. The CHAMPUS entitlement program provides health care services to eligible military-related beneficiaries in California and Hawaii.

Foundation Health Corporation reported net income of $8,409,000, or $1.06 per share, on revenues of $647,461,000 for the nine months ended March 31, 1990, compared with a loss of $3,736,000, or a $.65 per share loss, on revenues of $561,312,000 for the comparable period in 1989.

DALLAS (JULY 12) PR NEWSWIRE - Joseph F. McKinney, chief executive officer of Tyler Corporation (NYSE: TYL), announced the naming of James E. Russell and Richard W. Margerison to the board of directors of the company. Russell is president and chief executive officer of Tyler Pipe Industries, the operating company of Tyler Corporation. Margerison is executive vice president of Tyler Corporation.

Russell joined Tyler Pipe in 1968 as a cost accountant and advanced to vice president and controller in 1977. He served as vice president-finance and senior vice president of Tyler Corporation prior to returning to Tyler Pipe in 1988. He has been president and chief executive officer of Tyler Pipe since December 1988.

Russell, a native of Van, Texas, is a graduate of Stephen F. Austin University and a CPA. He is married and has two children.

Margerison joined Tyler Corporation in 1977 as manager of acquisitions and became director of marketing services for Atlas Powder Company, a subsidiary of Tyler Corporation in 1978. He rejoined Tyler Corporation in 1985 as vice president and was promoted to executive vice president in February 1989. A graduate of the University of North Carolina at Chapel Hill and Harvard Graduate School of Business, Margerison is married and has two children.

Tyler Corporation, with national headquarters in Dallas, provides cast iron pipe and fittings for drain, waste and vent and waterworks applications.

EL SEGUNDO, CA (JULY 12) PR NEWSWIRE - The U.S. Air Force Systems Command has awarded a four-year Operations Support Services (OSS) contract valued at $17 million to Wyle Laboratories' (NYSE: WYL) Scientific Services & Systems Group. The contract calls for technical services to be provided to the Air Force Astronautics Laboratory at Edwards Air Force Base in California.

As the OSS contractor, Wyle will provide a dedicated staff of engineering and technician specialists, on-site, to serve as an arm of the Astronautics Laboratory supporting propulsion systems testing, vehicle integration and related activities.

Wyle's technical staff will operate and maintain designated experimental test facilities at the Astronautics Laboratory. These include the National Flight Test Facility where Wyle is currently involved with testing on a prototype of SDI's Space-based Interceptor, and the Test Stand 2A complex where engine components of the proposed Advanced Launch System (ALS) will be set up and tested.

Wyle will also provide specialty engineering services in reconfiguring test facilities and test equipment as directed by the Astronautics Laboratory.

"Wyle Laboratories has supported various programs at Edwards AFB, including a major role in the Titan 34D Recovery Program in 1986 and 1987 " stated C.D. "Gus" Yiakas, the group's vice president, Western Operations. "The OSS program represents yet another step of Wyle's continuing development of expertise within the space technology arena."

Yiakas added, "The Astronautics Laboratory is one of the primary facilities in the Air Force program of space/propulsion systems testing. The maturing interest in space has the laboratory in a position of rapid growth.

"We believe the Wyle team, directed by John Shimada of the El Segundo Operations Staff, will be a vital force in the expansion of Laboratory capabilities and activities."

Wyle Laboratories is a major supplier of research, engineering and testing services to the aerospace, defense and energy industries. The company is also one of the nation's leading marketers of high- technology electronic components and computer systems.

#90193p3871 07/12/1990 ~PR Newswire

HOUSTON (JULY 12) PR NEWSWIRE - Rowan Companies, Inc. (NYSE: RDC) reported an improvement in unaudited financial results for the second quarter and six months period ended June 30, 1990.

The net loss for the second quarter was $2,227,000, $.03 per share, comparing to a net loss of $4,607,000, $.06 per share, for the same period a year ago. The six months net loss amounted to $8,390,000, $.12 per share, compared to a net loss of $15,736,000, $.22 per share, for the same 1989 period.

C.R. Palmer, chairman and president, commented, "The second quarter results reflect a continued improvement in both drilling and aviation operations. Compared to the first quarter, revenues increased $11.4 million while expenses increased only $5.6 million. The month of June was profitable; however, we did not achieve the anticipated return to profitability for the entire quarter.

For the third quarter, scheduled day rate increases on five of the seven rigs in the North Sea, commencement of operations in Southeast Asia, prospects for increased utilization in the Gulf of Mexico and a seasonal upturn in the aviation division provide sufficient confidence to predict that the period will be profitable.

The Rowan Gorilla III and the Rowan-Juneau are scheduled to depart the Gulf of Mexico prior to year-end. The misguided political decisions of Congress and the Administration, regarding offshore drilling, encourage us to continue our efforts to relocate drilling equipment from the United States to more favorable international areas."

Rowan Companies, Inc. serves the petroleum industry as a contract driller, onshore and offshore in domestic and international areas, and operates a fleet of charter helicopters and fixed-wing aircraft.

NEW YORK (JULY 12) PR NEWSWIRE - The Prudential Intermediate Income Fund (NYSE: PIF) today issued the following monthly update for July 1990:

Distribution Information: Amount Payable Date Record Date Declaration Date $0.07 July 27, 1990 July 13, 1990 July 2, 1990

Investment Adviser Commentary: -- Throughout June, bond markets worldwide rallied, spurred on by reduced inflationary fears. The fund took

advantage of this environment through extended and increased net foreign currency exposure.

-- The U.S. government bond market rallied in June. Weak unemployment and price data pushed bond prices higher earlier in the month. The market continued to rally following a successful Treasury auction and comments by President Bush on budget reform.

-- The fund's investment adviser is generally bullish on the bond market, believing future economic data could be weaker than expected. This could contribute to an easing of monetary policy by the Federal Reserve Bank, resulting in a decline in long term rates.

-- The fund's investment adviser currently believes foreign government bond markets offer greater value than the U.S. market. For that reason, the fund's allocation in the foreign bond market has been increased while the allocation in the U.S. bond market has been reduced. In addition, the dollar is expected to continue its trend of moderate weakness which would provide the fund with currency gains on its foreign position.

Performance Update:

	6/29/90	5/31/90	3/31/90
NAV	$8.52	$8.43	$8.29

MELBOURNE, AUSTRALIA (JULY 12) PR NEWSWIRE - Pacific Dunlop Limited (NASDAQ: PDLPY) today announced the appointment of Graham Spurling and Rod Chadwick to the company's board as executive directors.

Both Spurling and Chadwick are chief executive officers of two of Pacific Dunlop's largest operating groups, GNB International Batteries, which is based in Mendota Heights, Minn., and the South Pacific Tires joint venture with Goodyear.

Spurling, 52, joined Pacific Dunlop in 1987 as president and chief executive officer of GNB International Batteries, which developed and patented the Champion Switch automotive battery that provides fail-safe service through an emergency cell.

Previously, he was managing director and chief executive officer of Mitsubishi Motors Australia Limited. Spurling has a master of automotive engineering degree from the Chrysler Institute in Detroit.

Chadwick, 44, has been managing director of South Pacific Tyres since its formation in 1987. A qualified accountant, he is a graduate of the Harvard Business School Advanced Management Program.

Pacific Dunlop is a global company with more than $3 billion in sales that manufactures and markets consumer and industrial products, including batteries, footwear and apparel, tires, and latex and medical products.

In the United States, Pacific Dunlop is the parent company of Ansell-Americas (Eatontown, N.J.), GNB International Batteries (Mendota Heights, Minn.) Penaljo Shoe Corp. (St. Louis, Mo.) and Biflex International (New York, N.Y.)

In 1989, Pacific Dunlop made a global offering of more than 37 million ordinary shares to significantly broaden the company's shareholder base. Today, more than 15 percent of its outstanding shares are held by U.S. investors.

CALABASAS, CALIF. (JULY 12) PR NEWSWIRE - Lockheed Corporation (NYSE: LK) reported today it has formed a new, wholly owned subsidiary, Lockheed Commercial Aircraft Center Inc., to perform maintenance and modification of 747 aircraft.

The company also announced the appointment of Gary Bowring, a 30-year veteran of the commercial aircraft maintenance industry, as president. The new subsidiary will be headquartered in San Bernardino, Calif. Earlier this week Lockheed announced it had signed a joint-use agreement with the U.S. Air Force and the Inland Valley Development Agency to occupy two bays of a four-bay hanger at Norton Air Force Base to perform maintenance on 747 aircraft. When the Air Force closes Norton AFB in 1994, Lockheed will occupy the entire hangar.

Bowring joined Lockheed from the Dee Howard Division of Aeritalia in San Antonio, Texas, where he was general manager and chief operating officer. Prior to that he was vice president of Engineering and Quality Assurance for Trans World Airlines. His experience also includes president of Aviation Management Services Inc., vice president of operations for Eastern Provincial Airways of Canada, and staff vice president of Braniff. He has also held key positions in engineering and quality control with Federal Express, Frontier Airlines, Pan American Airways, and the Aircraft Engine Group of General Electric.

Bowring is a graduate of Long Island University where he received a bachelor of science degree in Engineering Science. He is a member of the Society of Automotive and Aerospace Engineers, and past chairman of the Engineering and Maintenance Committee of the Air Transport Association.

Lockheed Commercial Aircraft Center anticipates that commercial aircraft maintenance work will start at Norton AFB about mid-December of this year. The company's forecast shows that employment will grow from 630 personnel at the end of the first year of operations to 970 employees by 1994.

NEW YORK (JULY 12) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today announced that the San Francisco office of Turner Construction Company secured seven contracts totalling

$110 million during the month of June.

"These contracts are the direct result of our increased efforts to expand into the San Jose area," said D. Barry Sibson, group vice president of Turner's Western Coast operations. "In addition, the range of building types, from renovations to laboratories to advanced technology and manufacturing facilities, justifies our decision to diversify activities in the Western Group." This diversification helped Turner complete nearly $600 million worth of construction in California in 1989.

In addition to the building types mentioned above, the seven contracts, ranging in volume from $800,000 to $35 million, include projects in Turner's traditional commercial building market. Turner's Bay Area operation secured the jobs despite what has been described as a slow year for domestic construction markets. This is further evidence of the company's vastly increased market share on the West Coast, which, in the past several years has made Turner California's largest general contractor.

Based in New York City, The Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest diversified builder of commercial, industrial, hospital and healthcare, institutional, government building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad.

During 1989, The Turner Corporation completed $3.6 billion of construction.

NEW YORK, NY (July 12) PR Newswire - The Prudential Strategic Income Fund, Inc. (NYSE: PSF) today issued the following July monthly update:

Distribution Information

Amount	Payable Date	Record Date	Declaration Date
$0.08	July 27, 1990	July 13, 1990	July 2, 1990

Investment Adviser Commentary:

- Throughout June, bond markets worldwide rallied, spurred on by reduced inflationary fears. The fund took advantage of this environment through extended durations and increased net foreign currency exposure.

- The U.S. government bond market rallied in June. Weak unemployment and price data pushed bond prices higher earlier in the month. The market continued to rally following a successful Treasury auction and comments by

President Bush on budget reform.

- The fund's investment adviser is generally bullish on the bond market, believing future economic data could be weaker than expected. This could contribute to an easing of monetary policy by the Federal Reserve Bank, resulting in a decline in long-term rates.

- The fund's investment adviser currently believes foreign government bond markets offer greater value than the U.S. market. For that reason, the fund's allocation in the foreign bond market has been increased while the allocation in the U.S. bond market has been reduced. In addition the dollar is expected to continue its trend of moderate weakness which would provide the fund with currency gains on its foreign position.

- The high-yield market was stable in June with prices on the larger, more liquid issues generally increasing one to two points. Demand continued to exceed supply as new buyers came into the market seeking undervalued bonds and new-issue volume remained low.

HOUSTON (JULY 12) PR NEWSWIRE - Tescorp, Inc. and American Century Corporation (NYSE: ACT) jointly announced yesterday that, in consummation of American Century's Chapter 11 plan of reorganization, Tescorp, Inc., a Houston-based manufacturer and distributor of oil field products, purchased substantially all of American Century's assets in exchange for the issuance of Tescorp securities to American Century debentureholders and stockholders.

Each holder of $1,000 principal amount of American Century debentures due 1990 and 1991 will be entitled to approximately 67 shares of Tescorp common stock and approximately 86 shares of Tescorp Series 1990, ten percent convertible preferred stock, of which approximately 17 preferred shares per $1,000 principal amount of debentures are being held back under the terms of the Bankruptcy Plan in a special brokerage account to satisfy the fees and expenses of the indenture trustee for American Century's debentureholders.

The claims of the indenture trustee are to be determined by the Bankruptcy Court at a later date and will be paid by the wales of the Tescorp Series 1990 preferred stock from the special brokerage account over a period of ten days.

If there are any shares of Tescorp Series 1990 preferred stock left over after payment of the indenture trustee claims, the excess shares will be distributed pro rata to American Century debentureholders of record on the record date.

American Century stockholders and debentureholders will also receive warrants expiring July 11, 1993, to purchase Tescorp common stock at an initial exercise price of $3.50 per share.

Debentureholders will receive warrants to purchase 245 shares of Tescorp common stock for each $1,000 principal amount of debenture; stockholders will receive warrants to purchase 0.253 shares of Tescorp common stock for each one share of American Century common stock.

The Tescorp common stock, preferred stock and warrants have been authorized for quotation in the NASDAQ system and trading is expected to

commence on a "when issued" basis on July 12, 1990. The regular NASDAQ symbol for Tescorp common stock will be "TESC."

Initially there will be additional characters in the symbol to denote when issued trading and that the NASDAQ inclusion is via temporary exception to NASDAQ's requirement that included securities be registered under the Securities Exchange Act. Tescorp has made a filing for the registration, but the registration has not become effective.

ARMONK, NY (JULY 12) PR NEWSWIRE - Freda S. Johnson, a leading figure in the field of public finance for more than two decades, today was elected a director of MBIA Inc. (NYSE: MBI), the nation's leading insurer of municipal securities.

Johnson headed the public finance department of Moody's Investors Service from 1979 to 1989 before becoming a public finance consultant to state and local governments, foreign governments and corporations.

In this capacity she serves EcoLink, Inc., a joint American-Soviet project to establish a public finance system in the U.S.S.R., as the senior credit advisor and director.

While at Moody's, Johnson was chairperson of the public finance department rating committee and a member of the senior management group of the Dun & Bradstreet Corporation, Moody's parent organization.

In 1979, she was elected a senior vice president of Moody's and director of its municipal department and two years later was elected executive vice president. She began her career in 1968 when she joined Dun & Bradstreet's municipal service division as an analyst.

William O. Bailey, MBIA Inc. chairman said, "We're very pleased to have Freda Johnson join our board. Her distinguished career has been marked by broad knowledge of the financing needs of state and local governments."

Johnson is a member of the Anthony Commission on Public Finance and has appeared before the U.S. Senate's Committee on Banking, Housing and Urban Affairs and its Committee on Governmental Affairs.

She has also addressed the U.S. House of Representatives' Subcommittee on Fiscal Affairs and Health, the Joint Economic Committee of Congress and appeared before the Securities and Exchange Commission and the Supreme Soviet of the U.S.S.R.'s committee on health. Johnson is a member of the

nominating and advisory committees of the Municipal Securities Rulemaking Board, and a former president of the Municipal Forum.

MBIA Inc., through its wholly owned subsidiary, MBIA Corporation, is a leading insurer of municipal bonds, including new issues and bonds traded in the secondary market. MBIA is rated Triple-A by Moody's Investors Service, Inc. and Standard & Poor's Corporation and municipal bonds insured by MBIA receive these ratings.

WILMINGTON, DEL. (JULY 12) PR NEWSWIRE - Hercules Inc. (NYSE: HPC) today dedicated its new technical center at Jefferson, Pa., as the A.P. "Sil" Patellis Technical Center in memory of the former plant manager.

The center, which began operations in late 1989, is equipped to serve the worldwide hydrocarbon resin needs of manufacturers of products ranging from adhesives and printing inks to tires and road markings. Its modern equipment provides for electronic interaction with other Hercules resins technology centers and manufacturing sites for analyzing and designing properties of more than 100 types of hydrocarbon resins. Hercules' worldwide network of resins facilities includes those in Brunswick and Savannah, Ga.; Hattiesburg, Miss.; Middelburg, The Netherlands; and Burlington, Ontario, Canada, as well as those in South America, New Zealand, Australia, and Japan.

Patellis, a native of Clairton, Pa., received a B.S. degree in chemistry from Pennsylvania State University and joined the Pennsylvania Industrial Chemical Co. (PICCO) in 1956. He served in research, supervisory and managerial positions at the Clairton-Jefferson complex. After Hercules acquired PICCO in 1973, Patellis was named manager of research and development. Four years later, he was named plant manager of the Clairton-Jefferson complex. Patellis orchestrated the consolidation of the Clairton and Jefferson locations into one facility in Jefferson, which is now the largest and most modern hydrocarbon resins plants in the world. He conceived the idea of the technical center, combining the Jefferson plant's testing capabilities with technical services and analytical laboratories, for a single center with up-to-date computer equipment.

In 1985, Patellis transferred to Hercules' corporate headquarters in Wilmington, as worldwide director-hydrocarbon resins, the position he held at the time of his death in 1987.

In his address at the dedication ceremony, David S. Hollingsworth, chairman and chief executive officer, stated, "The facility will play an

important role in the success of Hercules' resins business. Like all laboratories, it will be devoted to progress, new ideas, better ways of doing things -- precisely the characteristics that Sil Patellis exhibited during his successful career."

COATESVILLE, PA. (JULY 13) PR NEWSWIRE - Lukens Inc. (NYSE: LUC) will announce record sales and earnings for a second quarter, when it reports results on Tuesday, July 17, according to W.R. Wilson, chairman and chief executive officer.

Lukens Inc., which is a plate steel-based diversified company headquartered in Coatesville, has compiled three consecutive years of record sales and earnings.

Wilson today said preliminary results indicate the second quarter results will not only exceed those for the second quarter last year, but also the record first quarter results this year.

Lukens reported sales of $163 million and earnings of $8.9 million, or $1.06 a share, for the 1989 second quarter. For the first quarter of this year, sales were $170.6 million and earnings were $10.9 million, or $1.26 a share.

Wilson said markets for plate steels appear generally healthy and the company's pipe coating business is experiencing a major upturn in orders due to activity associated with natural gas pipelines. Wilson said that through the first five months of the year, U.S. steel industry shipments of plate steel were at an annualized rate of 5.3 million tons, or roughly six to eight percent ahead of earlier predictions.

Lukens Inc. subsidiaries provide products and services for construction, energy, transportation, defense, steel service center and other industrial markets. Their products include carbon, alloy and clad steel plate, reflective and industrial glass beads, highway construction-zone safety products, pipe coating and cathodic corrosion protection services, woven wire cloth and heavy materials handling equipment.

VERO BEACH, FL (JULY 12) PR NEWSWIRE - Dixon Ticonderoga Company (AMEX:

DXT) announced it has reached a new financing agreement with First Fidelity Bank, N.A., of New Jersey.

Under the terms of the arrangement, Dixon Ticonderoga Company will receive a $35.75 million revolver and term loan package, bearing interest at three-quarters of one percent over the prime rate.

President Gino N. Pala stated, "Under the current environment within the banking industry where credit has been tightened, management is extremely gratified by the confidence evidenced by our major lenders. First Fidelity and our secondary lenders have expressed strong support for our current strategic plans, which include the restructuring of our operations, as well as new market growth and product development."

The company recently announced the closing of a labor-intensive plant in Newmarket, Ontario with the plant's activities being transferred into modernized facilities in the United States.

In addition, the company's Marketing and Sales operations are being consolidated into a new location. Both moves are anticipated to significantly reduce operating costs.

Dixon Ticonderoga Company is a diversified manufacturer and marketer of the well-known Dixon Ticonderoga, Wearever and Prang writing and art products, a producer of graphite and lubricant products and an operator of refractories.

#90193p3916 07/12/1990 ~PR Newswire

DETROIT, (JULY 12) PR NEWSWIRE - NBD Bancorp, Inc. (NYSE: NBD) today reported a 3-percent increase in Net Income for the quarter ended June 30, 1990.

Net Income was $67,972,000, or $.92 per share ($.91 fully diluted), compared with $66,032,000, or $.92 per share ($.88 fully diluted), for the quarter ended June 30, 1989. Net Income for the six months ended June 30, 1990, was up 4 percent to $134,594,000, or $1.83 per share ($1.81 fully diluted), compared with the $129,511,000, or $1.80 per share ($1.73 fully diluted), reported for the first six months of 1989.

In commenting on the improvement in earnings, Chairman and President Charles T. Fisher III stated Net Interest Income in the second quarter increased 4.4 percent compared with the second quarter of 1989. The increase was the net result of income earned from a 9.4-percent increase in earning assets partially offset by a decrease in the net interest margin earned on assets. The margin in the current quarter was 4.08 percent compared with 4.28 percent a year earlier. For the six months ended June 30, 1990, Net Interest Income was up 4.8 percent compared with the first half of 1989, and earning assets grew 9.6 percent while net interest margin dropped to 4.05 percent from 4.24 percent.

Non-Interest Income, excluding Securities Gains or Losses, for the second quarter increased 7.8 percent from the second-quarter 1989 level as a result of growth in trust fees and charges for deposit account activity. For the first six months of 1990, Non-Interest Income was up 10.7 percent. Excluding non-recurring gains in the first quarter of 1990 the rate of increase for the six months would have been 8.4 percent rather than 10.7 percent. Securities losses of $6.8 million have been realized in 1990 principally from the sale of U.S. Government securities in the first quarter. Securities losses in the first half of 1989 were minimal.

Non-Interest Expenses increased 5.9 percent in the second quarter, compared with the second quarter of 1989, and 4.7 percent for the six months. Excluding a non-recurring recovery in the first quarter of 1990, Non-Interest Expense growth for the first six months would have been 5.7 percent or essentially the same as the growth rate for the quarter.

The Provision for Possible Credit Losses was $15.0 million in the second

quarter of 1990 compared with $14.0 million a year earlier. The Provision for the first six months of 1990 was $29.0 million vs. $26.1 million in the first half of 1989. Net loan charge-offs in the second quarter of 1990 were $13.5 million, or 0.35 percent (annualized) of average loan and lease balances, and $23.0 million, or 0.30 percent (annualized), for the first six months. Comparable figures for 1989 were $16.2 million, or 0.44 percent, for the second quarter and $30.4 million, or 0.41 percent, for the six months.

Excluding $88.9 million obligations of the United Mexican States renegotiated during the first quarter of 1990 at below-market interest rates, nonperforming loans and leases at June 30, 1990, totaled $139.4 million, or 0.88 percent of total loans and leases. Nonperforming loans and leases at March 31, 1990, were $116.9 million, or 0.76 percent of total loans and leases, and were $91.5 million, or 0.61 percent, at June 30, 1989. Other Real Estate was $14.2 million at June 30, 1990, $14.9 million at March 31, 1990, and $16.4 million at June 30, 1989.

The Allowance for Possible Credit Losses at June 30, 1990, was $241.7 million, or 1.53 percent of total loans and leases. Comparable amounts one year earlier were $233.2 million and 1.56 percent. The Allowance at June 30, 1990, was equivalent to 173 percent of nonperforming loans and leases, excluding renegotiated United Mexican States obligations, compared with 205 percent at March 31, 1990, and 255 percent at June 30, 1989.

NBD Bancorp, Inc. total assets at June 30, 1990, were $26.6 billion as compared with $24.6 billion at June 30, 1989. Total loans and leases increased $869 million in the past year to $15.8 billion. Deposits totaled $20.8 billion compared with $20.0 billion one year earlier. Total Shareholders' Equity at June 30, 1990, was $1.8 billion, an increase of $193 million since June 30, 1989.

BRIDGEPORT, CONN. (JULY 12) PR NEWSWIRE - The Hydraulic Company (THC), through its nonutility Hydrocorp. Inc. subsidiary, has acquired Eastern Analytical Laboratory, Inc. (EAL), an environmental testing laboratory in North Billerica, Mass. Terms of the transaction were not disclosed.

William F. Emswiler, president and chief operating officer of Hydrocorp, said the acquisition is in line with THC's objective of growth in unregulated but water-related businesses to complement its core business in public water supply.

EAL, which has annual sales of approximately $1.3 million, provides analytical services for environmental investigations, industrial hygiene and manufacturing clientele. EAL will augment existing THC multidisciplinary environmental testing capability in New England provided by Industrial and Environmental Analysts, Inc. (IEA), a Hydrocorp subsidiary with facilities in North Carolina and Vermont, Emswiler said.

Robert L. MacDonald, owner, president and a founder of EAL, will continue in a management capacity with EAL, Emswiler said.

A New York Stock Exchange-listed company, THC provides public drinking water service through its Bridgeport Hydraulic Company (BHC) subsidiary, which is among the 10 largest investor-owned water suppliers in the U.S., and through BHC's Stamford Water Company subsidiary. THC also is engaged through other subsidiaries, in forest products, electricity cogeneration and real estate businesses.

BEDMINSTER, N.J. (JULY 12) PR NEWSWIRE - Bell Atlantic Mobile Systems and Ford Motor Company have reached an agreement to provide cellular service to Ford customers in a wide area of the mid-Atlantic region.

Under the agreement, Lincoln-Mercury dealers in parts of New Jersey, Pennsylvania, Delaware, Maryland, Virginia, and Washington, D.C., will offer a cellular telephone as a factory-installed option on the Lincoln Town Car, Lincoln Continental, and Lincoln Mark VII automobiles.

"The ability to purchase a cellular phone as a manufacturer- installed option will become more prevalent in the 1990s," said A. Robert Handell, Bell Atlantic Mobile Systems' vice president for sales and marketing. "As more and more people come to appreciate the benefits of cellular communications, we expect that in many models, it will become a standard feature, like car stereo radios and air conditioning."

"The agreement will make Bell Atlantic Mobile Systems part of the Ford Cellular System nationwide cellular network. The Ford Cellular Systems is an outgrowth of our commitment to provide a 'total package,' from installation of the phone through start-up of the service," said Don Duncan, audio planning, marketing, and sales manager for Ford Electronics division.

Lincoln-Mercury customers who choose the car phone option will have a

high-quality Motorola car phone, transceiver unit, wiring and antenna installed as factory equipment.

Bell Atlantic Mobile Systems will offer customers who select the car phone option a wide variety of service plans and will provide billing services.

Bell Atlantic Mobile Systems, located in Bedminster, N.J., is a subsidiary of Philadelphia-based Bell Atlantic Corporation. Bell Atlantic Mobile Systems provides cellular equipment and service in New Jersey, Pennsylvania, Delaware, Maryland, Virginia, and Washington, D.C. A subsidiary, Bell Atlantic Paging, provides paging equipment and service.

RYE BROOK, NY (JULY 12) PR NEWSWIRE - MCI International, a subsidiary of MCI Communications Corporation (NASDAQ: MCIC), today announced its agreement with the Seattle Organizing Committee (SOC) of the 1990 Goodwill Games to become the Official Supplier of Telemessaging Services. The agreement covers the provision of both telex and electronic mail services.

MCI is already providing telex and electronic mail to the SOC, which used the services for planning and organizing the details of the Games, including the arrival of the athletes and worldwide press.

During the games, which begin July 21, 1990, and run through Aug. 5, 1990, athletes as well as press will be able to use the MCI services from terminals set up at various competition and athletic village sites.

"MCI is very pleased to be working with the Seattle Organizing Committee of the 1990 Goodwill Games," said Seth Blumenfeld, president of MCI International. "The Games are an important athletic event that bring together the best of many nations and promote international understanding -- a tenet MCI has long advocated."

MCI's telex services will enable the international press to keep their publications overseas up-to-date on the outcome of events.

MCI's electronic mail service, MCI Mail, will enable users to communicate worldwide through e-mail, telex, fax, postal and courier delivery of messages.

MCI will have staff at the main press center to assist those using the services. Goodwill Game volunteers have been trained by MCI to help at other terminal locations at the game venues.

Subscribers to MCI Mail will be able to send good luck or congratulatory messages to the participating athletes. By responding to the HANDLING prompt with "FORM:SEATTLE", a Fax disptach message to athletes will carry the Goodwill Games logo. Subscribers will be able to view the game highlights from an on-line bulletin board updated daily. MCI Mail users simply type "VIEW GOODWILL HIGHLIGHTS" to gain access. A separate bulletin board, GOODWILL ATHLETES, lists the names and events of all participating athletes.

MCI has a complete range of domestic and international communications services. International services include worldwide direct dialing, telex, facsimile, electronic mail, television transmission, private voice and data networks. MCI's offices in 46 countries worldwide are positioned to provide and support the full range of global telecommunications services.

#90193p3921 07/12/1990 ~PR Newswire

BRIDGEWATER, NJ (JULY 12) PR NEWSWIRE - Allstate Insurance Co. today filed with Superior Court Judge Paul G. Levy a complaint challenging the constitutionality of The Fair Automobile Insurance Reform Act of 1990.

Allstate believes the law is an unfair and unconstitutional effort to avoid facing up to the real problems of auto insurance in New Jersey by punishing Allstate and other insurers. Filing this suit is in the best interests of Allstate's customers, shareholders and New Jersey employees.

Allstate filed this suit in New Jersey Superior Court because United States District Court Judge John Bissell recently ruled that a federal court did not have jurisdiction to hear Allstate's challenge to the new insurance law and therefore could not rule on the merits of Allstate's suit.

This suit, as did the federal court suit, alleges that the new law is an unconstitutional form of punishment which violates the impairment of contract, Bill of Attainder, and due process provisions of the United States and New Jersey constitutions.

SAN JOSE, CALIF. (JULY 12) PR NEWSWIRE - Wyse Technology announced today

that the subsidiary it formed to develop the company's new UNIX-based products has acquired the interest held by its partners, the venture capital arms of Morgan Stanley and Merrill Lynch.

The dollar value of the transaction was not disclosed. The company said that venture funding was important to the program's early development, but now that the systems have been successfully launched it was appropriate to consolidate responsibility.

"Our advanced systems business is critical to our future. The buy-out gives us more control over the marketing and development of the product line," said Daniel Wu, president of Wyse. "As we are well on the way to returning to profitability, we are able to take this step now."

In addition to the financial improvements the company is experiencing, Wu said that he is pleased with progress on a number of fronts at Wyse. "We're strengthening our leadership position in terminals. We're coming back in PCs -- we've introduced two highly competitive products, with several more in the wings. And we're very excited about our new multiuser systems. Our multiprocessing technology and UNIX implementation continue to outperform competition in industry benchmarks, and the feedback we're receiving from our first end user installations is extremely positive."

Building on Wyse's strategy of supporting standards while providing innovations that significantly increase product performance, the Wyse Series 9000i and the Series 5000i form a family that can support one to 128 users with up to 288 connected devices. The Series 9000i features true symmetric multiprocessing and is designed to achieve performance levels suitable for I/O intensive office automation, database management, communications and software development environments. The Series 5000i is targeted at automating small businesses, mid-size departments and work groups.

Wyse Technology is a leading independent supplier of microprocessor-based products, which include terminals, IBM PC-compatible computers, monitors and multiuser systems. The company sells its products through customers that add value, such as distributors, value-added resellers and original equipment manufacturers. Headquartered in San Jose, Wyse operates sales offices across the United States and in Canada, Australia, Hong Kong and Western Europe. The company employs about 2,400 people worldwide.

SEATTLE, (JULY 12) PRNEWSWIRE - David Leland, president and chief executive officer of Plum Creek Timber Co. (NYSE: PCL), today released the following statement:

"Plum Creek fully supports the agreement reached at the Sustainable Forestry Roundtable's recent 'Snoqualmie Summit.' We have been an active participant in the roundtable's efforts and are delighted that private industry -- together with state and local government agencies, environmental groups, and Indian nations -- has reached a breakthrough agreement on a number of issues critical to the health of the environment in the state of Washington.

"The accord incorporates many of the progressive concepts such as enhanced water quality safeguards and expanded measures to ensure habitat diversity for wildlife that Plum Creek has already adopted through our participation in the Yakima Resource Management Plan. Cooperative efforts such as these are the key to the protection of Washington's forest environment."

Plum Creek is the second-largest private timberland owner in the Pacific Northwest, with holdings in Washington, Montana and Idaho.

#90193p3931 07/12/1990 ~PR Newswire

ATLANTA (JULY 12) PR NEWSWIRE - The U.S. Environmental Protection Agency announced today that Firestone Tire & Rubber Company has signed an Administrative Order on Consent to conduct a comprehensive study of the Firestone Tire & Rubber Co. (Albany plant) Superfund site located in Dougherty County, Ga.

The purpose of the study is to determine the extent of contamination at the site and to assess possible alternatives for addressing the contamination.

"Federal funds will not be needed to study this site because of this company's willingness to conduct the remedial investigation/feasibility study under EPA's oversight," said Greer C. Tidwell, EPA regional administrator.

Firestone has manufactured tires on the 329.2-acre site since 1968. Until 1980, drums of waste cement were stored on the ground in an area of less than one acre. In another area, wastes were buried in a pit during fire training exercises.

In 1968, a consultant to the company detected benzene,

1,1-dichloroethylene, toluene, 1,1-dichlorethane, 1,1,1-trichloroethane, and zinc in on-site wells. The site was placed on the National Priorities List (NPL) in October 1989. An estimated 400 people obtain drinking water from private wells within three miles of the site, and 1,000 acres of nearby cropland are irrigated with well water.

The Administrative Order on Consent provides for the company to devise a workplan for sampling and analysis of groundwater, surface waters, and soils, and evaluating alternatives for cleaning up the site. EPA will oversee all activities and review and approve all reports and documents developed during the study. All work must follow EPA guidelines for remedial investigations and feasibility studies.

EPA will keep the public informed of activities at the site and will conduct public meetings at various stages during the study to solicit input on cleanup activities.

#90193p3933 07/12/1990 ~PR Newswire

MILWAUKEE, (JULY 12) PR NEWSWIRE - A. O. Smith Corporation (AMEX: SMC.A) today announced second quarter earnings of $11.6 million or $1.25 per fully diluted share on sales of $266.0 million.

Earnings were 77 percent higher than the $6.6 million earned in the second quarter of 1989, with sales at approximately the same level.

"Each of our operating units reported higher second quarter earnings compared to the 1989 second quarter," Robert J. O'Toole, president and chief executive officer, said. "Both Water Products and Smith Fiberglass remain on a record-setting sales and earnings pace."

For the first six months of 1990, earnings were $15.6 million or $1.74 per fully diluted share on sales of $503.1 million. Earnings were $11.3 million or $1.30 per share on sales of $542.6 million for the first six months of 1989.

"Our earnings to date are evidence that our restructuring activities of last year are starting to impact our bottom line," O"Toole pointed out.

"We are gratified, but not complacent as we enter the second half of the year," he said. It is still critical that we maintain this momentum to reach our earnings objectives for 1990."

"I was pleased to see Automotive Products come back strongly in the second

quarter after the industry problems at the beginning of the year," O'Toole added.

Automotive Products' earnings for the quarter were up compared with the second quarter of last year, despite a slight drop in sales. Automotive Products manufactures full frame assemblies and other structural components for passenger cars, light and heavy trucks.

The Electrical Products Company, benefiting from lower material costs and improved productivity also reported higher earnings for the quarter, despite a 10 percent sales decrease due to continuing weak demand for pump motors and motors for air conditioning applications.

A. O. Smith, with its subsidiaries and affiliates, is a diversified manufacturer headquartered in Milwaukee. Its product lines include auto and truck structural components, fractional horsepower and hermetic electric motors, residential and commercial water heating systems, fiberglass reinforced piping systems, inorganic protective industrial coatings, agricultural feed storage systems, agricultural financing, industrial/municipal water and bulk storage systems.

#90193p3939 07/12/1990 ~PR Newswire

PITTSBURGH (JULY 12) PR NEWSWIRE - Westinghouse Electric Corp.'s (NYSE: WX) net income increased 11 percent in both the second quarter and first six months of 1990 compared to the same periods of last year, Chairman Paul E. Lego reported today.

Revenues were about even in both the quarter and half of 1990. However, after adjusting last year's results for the divestiture of the transmission and distribution business, 1990 revenues are 11 percent higher for both the quarter and first half.

Second-quarter 1990 net income was a record $252,000,000 or 86 cents per share on revenues of $3,175,000,000 compared to net income of $228,000,000 or 78 cents per share on revenues of $3,178,000,000 for the second quarter of 1989. Per-share figures for 1989 have been restated to reflect the two-for-one stock split effective in May of 1990.

Net income for the first six months of 1990 increased to $462,000,000 or $1.57 per share on revenues of $6,037,000,000 compared to net income of $417,000,000 or $1.43 per share on revenues of $6,065,000,000 for the first half of 1989.

Other income increased in the quarter mainly because of a gain from the sale of a minority interest in a cable television system.

Second-quarter operating profit was $336,000,000 resulting in an operating profit margin of 11.5 percent as compared to 10.9 percent for the same quarter last year. First-half operating profit margin was 10.9 percent compared to 10.3 percent for the first six months of 1989.

Lego said, "I am encouraged by the continuing strong revenue growth in our ongoing businesses and the improvement in operating profit margins. One of the most positive aspects of our performance during the past six months is that we are beginning to see increasing contributions to operating profit coming from the concerted efforts of our employees."

Segment Information Broadcasting revenues and operating profit were up substantially for the quarter compared to the same period of 1989 primarily because of the recently acquired radio stations. Revenues and operating profit for the first six months were also higher.

Commercial revenues and operating profit were higher for the quarter and first half of 1990 because of recent acquisitions in the Furniture Systems Business Unit.

Revenues in Electronic Systems were well ahead for both the quarter and first six months while operating profit was up slightly for both periods, even though additional investments were made to further develop commercial market opportunities.

Operating profit for Energy and Utility Systems was up significantly in the quarter and first six months of 1990 on higher revenues in the Power Generation Business Unit.

Financial Services reported higher revenues in the quarter and first half of 1990. Financial Services' operating profit was higher for the first six months and up slightly in the quarter. Within Financial Services, Westinghouse Communities had significantly higher operating profit for the

quarter which was partially offset by lower results in Westinghouse Credit.

Operating profit for Industries was higher for the quarter and first half of the year due to the strong performance of the Industries and Environmental Services Business Unit. Revenues were about even in both periods.

CAMBRIDGE, MA (JULY 12) PR NEWSWIRE - Repligen Corporation (NASDAQ: RGEN) today reported that it has named Walter C. Herlihy, Jr., Ph.D., to the new position of senior vice president -- research and development. In announcing the appointment, Repligen President and CEO Sandford D. Smith said, "Since 1985, when Dr. Herlihy assumed his previous position at Repligen as vice president and director of research, he has been instrumental in directing and advancing the company's scientific programs. Repligen's research and development accomplishments during the past five years are attributable in large part to Dr. Herlihy's expertise as both a scientist and an administrator."

Dr. Herlihy joined Repligen in 1981 as principal investigator in protein chemistry. Previously, he was a research scientist and a post-doctoral research associate at Massachusetts Institute of Technology in Cambridge, Mass., where he earned a Ph.D. in chemistry in 1979. He graduated magna cum laude from Cornell University in 1973 with a B.A., in chemistry. He is an associate editor of "Analytical Chemistry" and the author of numerous scientific patents and publications. In addition to directing Repligen's healthcare programs, Dr. Herlihy is a member of the Executive Research Board of Repligen Sandoz Research Corporation, a joint venture company which is developing industrial and agricultural products.

Repligen develops and manufactures biochemical products for the healthcare market. The company's headquarters and research and production facilities are in Cambridge, Mass.

TORONTO (JULY 12) PR NEWSWIRE - Abitibi-Price Inc. (NYSE: ABY) today announced the signing of a letter of intent with two partners to acquire the shares of North British Newsprint Limited (NBN), and proceed with construction of a 100 percent recycled-fiber newsprint mill in Gartcosh, Scotland, subject to certain conditions.

The partners are The Daily Telegraph plc, led by Conrad Black; and Mirror Group Newspapers Limited, owned by Robert Maxwell. The publishers will each own 25 percent of NBN; Abitibi-Price will hold the other half and will operate the newsprint mill.

The conditions include updating engineering studies and cost estimates, financing arrangements, and final approval from the three partners' boards of directors. Groundbreaking could take place during the first half of 1991. Construction time is estimated to be two years.

The NBN project was conceived and developed by Stirling Fibre, a leading U.K. waste paper merchant. The Scottish Development Agency and the Scottish office worked closely with Stirling throughout the development period. "We are delighted that Abitibi-Price and its partners are taking over this outstanding project," said Christopher Wilkins, chairman of Stirling.

Current estimates set the cost of the new, 220,000 ton-per-year mill at about Pounds Sterling 200 million, or C$400 million, with 80 percent of the cost externally financed.

The mill's advanced deinking technology will convert about 270,000 tons of old newspapers and magazines per year into high quality newsprint. This will be sold mainly in the U.K., but some tonnage is expected to go to continental Europe.

Abitibi-Price Inc., headquartered in Toronto, is a major forest products company with manufacturing, sales and distribution operations in Canada and the United States plus other investments outside North America.

CHICAGO (JULY 12) PR NEWSWIRE - UNR Industries, Inc. (NASD: UNRI) reported that at its annual meeting held today in Chicago, stockholders approved the following measures proposed in its Proxy Statement:

1) An amendment to UNR's Certificate of Incorporation to eliminate cumulative voting for the election of directors;

2) Election of 11 directors to serve until the next annual meeting of stockholders;

3) The UNR Industries, Inc. Key Executives Stock Option Plan, and 4) Appointment of the firm of Arthur Andersen & Co. as UNR's independent public accountants for 1990.

The 11 directors include William F. Andrews, president and chief executive officer of the company; Charles M. Brennan III, chairman and chief executive officer of the L.E. Myers Group; Robert J. Cull, a partner in Cull, Priestes & Kolosh, Certified Public Accountants; Darius W. Gaskins Jr., visiting professor at the Kennedy School of Government at Harvard University; James E. Hurley, a consultant for D.P. Kelly & Associates; William S. Leavitt, chairman of the board and senior vice president and assistant secretary of the company; Gene Locks, a partner in the law firm of Greitzer & Locks; Ruth McMullin, former president and chief executive officer of John Wiley & Sons Co.; Thomas F. Meagher, chairman of the board of Continental Air Transport Co.; Robert B. Steinberg, a partner in the law firm of Klein and Marias; and William J. Williams, chairman and chief executive officer of The Huntington National Bank.

Andrews reported at the meeting that sales for the five-month period ended May 31, 1990, were $169.2 million, up 9 percent from the $154.7 million of sales for the same period in 1989. Net income was $9.0 million or $.20 per share as compared to $4.7 million or $.10 per share in the prior-year five-month period. Andrews also stated that second-quarter earnings, which will be reported later this month, should approximate $.15 per share a 50-percent increase over the $.10 per- share earnings reported in the first quarter of 1990. Operating income for the first six months of 1990 is estimated to be approximately $12.7 million compared to operating income of $10.6 million in 1989. Net income comparisons to 1989 for the six-month period are not meaningful due to the reorganization charges in 1989.

#90193p3947 07/12/1990 ~PR Newswire

CHICAGO, (JULY 12) PR NEWSWIRE - UNR Industries, Inc. (NASD: UNRI) reported that at its annual meeting held today in Chicago, stockholders approved the following measures proposed in its Proxy Statement:

1) An amendment to UNR's Certificate of Incorporation to eliminate cumulative voting for the election of directors;

2) Election of 11 directors to serve until the next annual meeting of stockholders;

3) The UNR Industries, Inc. Key Executives Stock Option Plan, and 4) Appointment of the firm of Arthur Andersen & Co. as UNR's independent public accountants for 1990.

The 11 directors include William F. Andrews, president and chief executive officer of the company; Charles M. Brennan III, chairman and chief executive officer of the L.E. Myers Group; Robert J. Cull, a partner in Cull, Priestes & Kolosh, Certified Public Accountants; Darius W. Gaskins Jr., visiting professor at the Kennedy School of Government at Harvard University; James E. Hurley, a consultant for D.P. Kelly & Associates; William S. Leavitt, chairman of the board and senior vice president and assistant secretary of the company; Gene Locks, a partner in the law firm of Greitzer & Locks; Ruth McMullin, former president and chief executive officer of John Wiley & Sons Co.; Thomas F. Meagher, chairman of the board of Continental Air Transport Co.; Robert B. Steinberg, a partner in the law firm of Klein and Marias; and William J. Williams, chairman and chief executive officer of The Huntington National Bank.

Andrews reported at the meeting that sales for the five-month period ended May 31, 1990, were $169.2 million, up 9 percent from the $154.7 million of sales for the same period in 1989. Net income was $9.0 million or $.20 per share as compared to $4.7 million or $.10 per share in the prior-year five-month period. Andrews also stated that second-quarter earnings, which will be reported later this month, should approximate $.15 per share a 50-percent increase over the $.10 per- share earnings reported in the first quarter of 1990. Operating income for the first six months of 1990 is estimated to be approximately $12.7 million compared to operating income of $10.6 million in 1989. Net income comparisons to 1989 for the six-month period are not meaningful due to the reorganization charges in 1989.

UNR INDUSTRIES, INC. AND SUBSIDIARIES
Notes to Financial Statements

(1) On July 29, 1982, UNR Industries, Inc. and certain subsidiaries filed voluntary petitions for reorganization under Chapter 11 of the Bankruptcy Code. The filings were precipitated by contingent liabilities resulting from litigation arising out of asbestos-related operations owned by UNR's predecessor corporations. On June 2, 1989, the company's Plan of Reorganization (the "Plan") was confirmed by the Bankruptcy Court following acceptance of the Plan by the company's creditors and stockholders. The Plan relieves the company of the burden of defending and settling thousands of asbestos lawsuits. This was accomplished through the creation of the UNR Asbestos-Disease Claims Trust, which will assume responsibility for, administer, settle and pay all asbestos-related claims. In lieu of bringing actions against the company, asbestos claimants must assert their claims against this Trust, which owns 29,437,004 shares of common stock of the company. The Order confirming the Plan of Reorganization, the Injunction Order and the Federal Bankruptcy Code prohibit all persons from taking any actions against the company with respect to any past, present or future asbestos-related liabilities.

On June 9, 1989, an appeal was filed from the order confirming the Plan of Reorganization. A motion is pending in the U.S. District Court to dismiss the appeal as moot. The company and its counsel expect the company to prevail on the motion. Requests for stays of the effect of the confirmation order have been denied by the Bankruptcy Court, the U.S.

District Court and the U.S. Court of Appeals for the Seventh Circuit.

By another order effective June 2, 1989, the Bankruptcy Court permanently enjoined any actions against the company by asbestos-disease claimants and others. An appeal from the injunction order is pending. The company and its counsel believe that the appeal has no merit and the company expects to prevail.

(2) For financial reporting purposes, the company has net operating loss carry-forwards of more than $150 million, for which no tax benefit has been recorded. The extraordinary reorganization charges included in the 1989 Statement of Income are not deductible for income tax purposes until the year distributions are actually made by the UNR Asbestos- Disease Claims Trust to claimants. However, the timing of future distributions is undeterminable. The related deductions will result in a reduction of that year's current tax liability and may also generate tax-loss carry-backs or carry-forwards. Net operating losses resulting from the payment of tort claims could be subject to the limitations of Section 382 of the Internal Revenue Code.

(3) The interim determination of inventories under the LIFO method is based on the management's estimates of the expected year-end inventory levels and costs and as such, interim financial results are subject to final year-end inventory amounts.

SAN FRANCISCO (JULY 12) PR NEWSWIRE - Merus Capital Management today announced the appointment of Christopher D. Knef, 49, as managing director responsible for marketing, sales and client relations activities.

Knef joins Merus with nearly 25 years of experience in marketing management with investment management and commercial banking firms.

Knef formerly was senior vice president of client services and marketing for Trust Company of the West, an investment management firm with assets of approximately $15 billion under active management.

In this position, he was responsible for 40 Midwest client relationships where he added significant new business.

Prior to Trust Company of the West, Knef was a senior vice president for Crocker National Bank and served as manager of the U.S. Central Division, manager of the Latin American Division and manager of the Southern California and Southwestern U.S. Regions.

In these positions at Crocker, Knef was responsible for marketing, lending administration, and managing corporate and institutional relationships.

Knef began his career in the financial services industry at Morgan Guaranty Trust in New York, where he was a division controller responsible for internal management, planning, and accounting, helped develop an internal management system for the wholesale side of the firm, and served as assistant vice president and regional account officer.

"Chris' broad background in finance and investment, and the superb combination of skills he brings to our team are significant. His experience and expertise in managing corporate and institutional relationships will greatly enhance the growth of our business," said Harold C. "Tim" Warner, president and chief investment officer for Merus.

Knef holds a B.A. in Economics and an M.B.A. from Rutgers University. Merus Capital Management, a division of The Bank of California, manages investment portfolios totaling approximately $5 billion for public and private institutions and high net-worth individuals.

KALAMAZOO, MI (JULY 12) PR NEWSWIRE - International Controls, Corp., which has made an offer to the holders of its 12-3/4 percent senior subordinated debentures due 2001 and its subordinated discount debentures due Jan. 1, 2006 to exchange their debentures for a package of cash, new senior debentures and warrants to purchase the company's common stock, has been advised that holders of in excess of $97 million of the 12-3/4 percent debentures (2/3 of the principal amount outstanding) and $92 million of the subordinated discount debentures (1/2 of the principle

amount outstanding) have formed a committee to engage in discussions with the company regarding the exchange offer. The committee has engaged Rothschild Inc. as its financial advisor and Kronish, Lieb, Weiner & Hellman as its legal counsel. The company has agreed in concept to pay the fees and expenses of the financial advisor and legal counsel, subject to the negotiation of definitive agreements and the satisfaction of certain other conditions.

The company has extended the expiration date of the exchange offer from midnight, July 16, 1990, to 5:00 p.m. Aug. 16, 1990. As of 5:00 p.m. on July 11, 1990, approximately $1.7 million of subordinated discount debentures have been tendered and none of the 12-3/4 percent debentures have been tendered. Debentureholders who desire further information about the committee may contact Wilbur L. Ross, Jr., senior managing director of Rothschild Inc., at 212-757-6000, or Robert Feinstein, an attorney at Kronish, Lieb, Weiner & Hellman, at 212-841-6127.

SOUTHGATE, MI (JULY 12) PR NEWSWIRE - Security Bancorp, Inc. (OTC: SECB) of Southgate announced that consolidated net income for the six months ended June 30, 1990, increased 10.2 percent to $14,347,000 as compared to consolidated net income of $13,019,000 for the comparable six months of 1989, establishing a new all-time corporate record. Primary net income per common share for the six months ended June 30, 1990, increased 10.9 percent to $1.22, compared to $1.10 for the same period of 1989. Fully diluted net income per common share increased 9.1 percent to $1.08 as compared to $.99 for the comparable 1989 six- month period. The company cited six-month increases in its net interest margin and earning assets, as compared to the first six months of 1989, as the primary reasons for the increase in net income.

Second-quarter consolidated net income increased 9.9 percent to $7,342,000 as compared to the comparable second quarter of 1989, a corporate record. Primary net income per common share for the second quarter increased 12.5 percent to $.63, compared to $.56 for the same period of 1989. Fully diluted net income per common share increased 7.8 percent to $.55 as compared to $.51 for the comparable 1989 second quarter.

Security Bancorp, Inc. is the parent company of Security Bank and Trust Company, Security Bank Northeast, Security Bank St. Clair Shores, Security Bank of Monroe, Bank of Commerce, and SecureData Corporation.

CHICAGO (JULY 12) PR NEWSWIRE - Three Chicago Tribune advertising executives have been promoted to new positions within the newspaper and other Tribune Company (NYSE: TRB) subsidiaries.

Robert B. Holzkamp, vice president and director of advertising of the Chicago Tribune, has been named senior vice president of advertising and marketing of Tribune Company's New York Daily News.

Dennis J. Grant, Chicago Tribune director of retail and national advertising, has been named vice president and director of advertising for the newspaper.

David D. Williams, Chicago Tribune director of classified advertising, has been named executive vice president of Tribune Media Services Inc. (TMS), an Orlando, Fla.-based subsidiary of Tribune Company. Williams will be located in Chicago. In this position, Williams will be expanding the role of TMS within Tribune Company and developing more information products and services. TMS' primary business is newspaper syndication, but it continues to expand its marketing activities to include areas such as network newspaper sales and electronic publishing.

"These promotions recognize outstanding achievements at the Chicago Tribune by these individuals," said John W. Madigan, president and chief executive officer of the newspaper. "Under Bob Holzkamp's leadership, the newspaper has attained record levels in all areas of advertising. We are confident that these successes will be continued under Dennis Grant."

"Likewise, classified advertising has reached all-time revenue and market share levels under Dave Williams," Madigan said. "His promotion to Tribune Media Services is directly related to his achievements here at the Tribune."

NEW YORK (JULY 12) PR NEWSWIRE - Goldman, Sachs & Co., sole manager of the underwriting group, announced the public offering of $500 million of

9.55 percent guaranteed notes due July 15, 2000, of Sumitomo Bank International Finance N.V., a wholly owned subsidiary of the Sumitomo Bank Limited. The notes are guaranteed on subordinated basis by the Sumitomo Bank's New York branch. The notes are priced at 99.972 percent.

The proceeds from the sale of the notes will be lent on a subordinated basis to the Sumitomo Bank for its international operations, and are intended to qualify as Tier II capital. The offering represents the first time a Japanese bank has accessed the public subordinated debt market.

The notes will also feature global clearing capability through Depository Trust Corporation in the United States and through Euroclear and CEDEL in Europe.

The Sumitomo Bank, with assets of 63 trillion yen ($397 billion) and deposits of 45 trillion yen ($284 billion) at March 31, 1990, is the world's third largest banking organization. For the fiscal year ended March 31, 1990, the bank had income before income taxes of 349 billion yen ($2.2 billion), making it the most profitable bank in Japan.

The bank operates through 325 branches and 46 sub-branches throughout Japan and conducts international banking operations in 31 countries. The bank, founded in 1895, is one of Japan's 12 city banks.

SEATTLE (JULY 12) PR NEWSWIRE - Bill Ackerley, project coordinator of the New Seattle Arena and vice president/corporate development, Ackerley Communications Inc. (AMEX: AK), announced today that the company has selected the design team and design concept for the proposed New Seattle Arena.

There will be four companies joining Ackerley Communications in the design team, two of which are based in Seattle: NBBJ, an architecture firm, and Skilling Ward Magnusson Barkshire, a structural and civil engineering firm. The third member of the team is Ellerbe Becket, an architectural and engineering firm. The electrical and mechanical engineering company is Flack and Kurtz.

NBBJ, Seattle's largest architecture firm -- one that has expertise in Pioneer Square style architecture, will be working in association with Ellerbe Becket on all design aspects of the arena. The partner in charge of the project for NBBJ is Dave Hoedemaker.

Ellerbe Becket is a firm that specializes in the design of sports arenas, and is located in Kansas City, Mo. It has been commissioned to work on 23 such facilities, including the Phoenix Suns Arena and the Boston Garden Project. Michael Hallmark, senior vice president, is the partner in charge of the project for Ellerbe Becket.

Leading the project for Skilling Ward Magnusson Barkshire is Jon Magnusson chief executive officer. This structural and civil engineering company and NBBJ have designed many well-known buildings in Seattle, such as Two Union Square.

Flack and Kurtz, located in San Francisco, will be represented by principals Reg Monteyne and Randy Meyers. Specializing in electrical and mechanical engineering for arenas with high-profile design architects, such as NBBJ in Seattle, Flack and Kurtz is one of the largest firms of its kind.

This state-of-the-art facility will contain between 16,400-18,000 seats, depending upon the event. It is designed so as to provide an intimate setting for the many kinds of events that will take place in the arena. It will also include 70 luxury suites, as well as club facilities and a restaurant. Each suite will have 16 seats; suiteholders will receive an equal number of arena "Gold Cards" which will be valid for any event taking place in the building.

The proposed, privately financed $100 million arena will be used primarily for sports and family events, as well as concerts.

PHILADELPHIA (JULY 12) PR NEWSWIRE - National Media Corp. (NASDAQ: NMCO), a national marketing organization, "has taken the first step in its previously announced program of acquiring service organizations complementary to our existing business with the acquisition today of Kwik-Way Marketing Corporation, a fulfillment organization, for approximately $3 million," according to John J. Turchi Jr., chairman and chief executive officer of National Media.

Turchi noted that the acquisition includes a 45,000-square-foot plant situated on 4-1/2 acres in West Chester, Pa.

"This acquisition will save National Media at least $1.5 million annually in shipping fees and gives us the space to expand to properly service to our rapidly growing sales base." In the year ended March 31, 1990, National Media sales rose 99.5 percent to $130,766,100 "and these trends are continuing" Turchi said. The company also reported earnings for the year rose 371 percent to $11,539,600 or $1.01 per share, from $2,450,600 or $.23 per share, for the prior year and earnings this year should significantly exceed those records," Turchi added.

#90193p3988 07/12/1990 ~PR Newswire

WHITE PLAINS, NY (JULY 12) PR NEWSWIRE - The following statement was issued today by NYNEX Corporation (NYSE: NYN):

A story in today's Wall Street Journal discusses annual private parties held by a group of individuals in Florida during the years 1984 to 1988. Among these individuals were several NYNEX employees who attended these gatherings on their own time during one or more of the years in question. Employees of a number of NYNEX suppliers also attended the parties.

Corrective action, including the dismissal of two employees, was taken in 1988 based on the results of investigations conducted at that time by professionals inside and outside NYNEX. Notice of this action and the results of the investigations were shared in 1988 with the Federal Communications Commission and the New York State Public Service Commission.

The investigations found that none of the NYNEX family of companies, including its telephone companies, engaged in business activities which

resulted in improper costs to NYNEX customers.

All the details of these investigations have been given to the Administrative Law Judges hearing the pending New York Telephone rate case including the provision of many thousands of pages of documents and exhibits and interviews and depositions with NYNEX employees and outside professionals who participated in the investigations. Although the Administrative Law Judges have reviewed all materials, the corporation has not made public the names of individuals involved, the names of their employers or details of activities which may have taken place at private parties, nor do we feel that any business or public purpose would be served by doing so.

NYNEX has and will continue to cooperate fully with all governmental and regulatory bodies, including the New York State Attorney General's Office, in their appropriate review of our business practices. We have and are fully respecting rules of due process and privacy, including orders of the Public Service Commission and its Administrative Law Judges, and find it unfortunate that others have chosen to leak unproven allegations to the media.

NYNEX looks forward to the scheduled completion of the New York State Public Service Commission's review of New York Telephone's rate request based on a complete and thorough review of all facts as they affect the people of New York.

CONTACT: Peter Goodale of NYNEX, 914-644-7211.

#90193p3989 07/12/1990 ~PR Newswire

DALLAS (JULY 12) PR NEWSWIRE - Kimberly-Clark Corp. (NYSE: KMB) today reported record quarterly operating results. Second quarter sales were $1.6 billion and operating profit was $195.5 million, representing increases over the 1989 second quarter of 15.5 percent and 26.2 percent, respectively.

Pretax income for the quarter was $152.0 million, net income was $80.4 million and earnings per share were $1.01. These amounts reflect a pretax charge of $28.2 million and an aftertax charge of $44.0 million, or 55 cents per share, as a consequence of the previously announced pending sale of Spruce Falls Power and Paper Co. Limited, the company's 50.5 percent-owned Canadian newsprint subsidiary.

Excluding these charges, pretax income was $180.2 million, net income was $124.4 million and earnings per share were $1.56, representing increases over the year-earlier period of 21.8 percent, 22.8 percent, and 23.8 percent, respectively.

Darwin E. Smith, chairman of the board and chief executive officer, said that much of the improvement in second quarter operating income came from U.S. consumer-related businesses. Additionally, net income was influenced by improvements in the results of the company's affiliates in Mexico and Australia. As previously forecasted, there was a substantial increase in interest expense.

Operating results for the six months were also records. Six-month sales rose 13.1 percent to $3.2 billion and operating profit increased 18.4 percent to $386.6 million.

Pretax income for the six months was $324.8 million, net income was $197.6 million and earnings per share were $2.47. Excluding the charges related to Spruce Falls, pretax income advanced 14.8 percent to $353.0 million, net income improved 18.2 percent to $241.6 million and earnings per share rose 18.9 percent to $3.02.

Smith said that further details of the operating and financial results would be released when available later this month.

Kimberly-Clark is a manufacturer of household, personal care and health care products, as well as newsprint and premium business, correspondence and specialty papers. The company's well-known consumer products include Kleenex facial tissue, Huggies disposable diapers, Kotex and New Freedom feminine pads, Hi-Dri household towels and Depend incontinence products.

CHARLOTTE, NC (JULY 12) PR NEWSWIRE - NCNB Corporation (NYSE: NCB) today announced an Education Initiative designed to target the company's resources at two areas critical to improved education: human and financial resources.

The NCNB initiative, in effect, embraces two long-standing objectives of company policies and philosophies. NCNB supports improved schools in every NCNB community and has developed a pro-active, multi-faceted program to help every NCNB employee better manage the often-conflicting demands of career and family.

As part of the initiative, NCNB is encouraging employees to attend parent-teacher conferences, during paid working hours if necessary. Also, NCNB employees are encouraged to volunteer in schools as tutors, discussion leaders, coaches, mentors, administrative assistants, leaders of PTA or other support groups, or in other ways.

To facilitate this, any NCNB employee may devote up to two hours per week of paid time during working hours to such school activities, subject to supervisory approval and scheduling.

In addition, the Education Initiative expands NCNB's six-year-old Matching Gifts program for qualified contributions to include primary and secondary schools. Prior to this, the program -- through which NCNB matches individual employee contributions to educational institutions -- applied only to colleges and universities.

Many of NCNB's working parents who have opted for flexible work schedules have cited the ability to be more involved in school activities as a major benefit of that program.

Under the expanded Matching Gifts program, NCNB will match employee donations up to $500 per year for educational institutions. Schools must have a tax-exempt status from the Internal Revenue Service and be accredited by a nationally recognized accrediting agency.

Since 1984, when the Matching Gifts program began, NCNB has contributed more than $600,000 in matching funds to colleges and universities.

Smith stressed that the NCNB initiative is designed to provide local NCNB officers flexibility in developing appropriate responses to local educational needs.

WASHINGTON (JULY 12) PR NEWSWIRE - Saying that he has had to "carry the ball" on funding, U.S. Sen. Robert C. Byrd (D-W.Va.) today urged U.S. Interior Secretary Manuel Lujan to earmark more federal dollars for West Virginia for an array of national park and wildlife service projects.

"The Interior Department is extremely important to West Virginia because we have such an abundance of the resources that the department manages," Byrd said during a hearing of the Senate Interior Appropriations Subcommittee, which he chairs.

"I have initiated a number of projects in West Virginia to expand the national park system, create a wildlife refuge, and establish a national Fish and Wildlife Service Training Center," Byrd told Lujan.

"These are worthwhile projects, both for West Virginia and for the nation,

and they deserve strong federal backing," Byrd said.

"Thus far, I have had to carry the ball when it comes to federal funding for these projects. I will continue to do what I can, but my job would be easier if the Interior Department would provide more funding for West Virginia in its budget," Byrd said.

Projects Byrd is working on for West Virginia include development of the New River Gorge National River in southeastern West Virginia; establishment of a national Fish and Wildlife Service Training Center to be located near Harpers Ferry; acquisition of additional Ohio River islands to enlarge West Virginia's first national wildlife refuge; renovation of structures at Harpers Ferry National Historical Park; and development of a National Park unit in Wheeling.

"West Virginia offers a unique perspective on America's history and America's natural splendor," Byrd said. "The Interior Department has a key role to play in West Virginia, and I would like to see West Virginia become a higher priority within the department."

MIDLOTHIAN, TEXAS (JULY 12) PR NEWSWIRE - Chaparral Steel Co. (NYSE: CSM) today reported net income for the fiscal year ended May 31, 1990, of $24,046,000 or 74 cents per share, compared with the prior year's income of $49,106,000 or $1.57 per share.

"An inventory reduction by Chaparral's prime customers during the latter half of calendar year 1989 reduced domestic demand that resulted in lower selling prices," stated President Gordon E. Forward. "Although net income was reduced from last year, it represented a 14 percent return on average shareholders' equity."

Forward continued, "During the past six months, domestic shipments and orders have strengthened with resulting improvements in pricing. The current outlook continues to be positive."

Chaparral Steel is a manufacturer of steel products which are shipped throughout North America and points in Europe and Asia.

CHICAGO (JULY 12) PR NEWSWIRE - Playboy Magazine Publisher Michael S. Perlis has been named president of an expanded Publishing Group of Playboy Enterprises, Inc. (NYSE: PLA). The announcement was made today by

Playboy Chairman and Chief Executive Officer Christie Hefner.

Perlis will develop strategies for and oversee day-to-day operations of the Publishing Group, which include Playboy magazine and an investment in the duPont Registry, newsstand specials and calendars, and Special Editions, Ltd., the company's art publishing subsidiary. The expanded Publishing Group will also include international publishing and catalogs. Prior to joining Playboy in 1989, Perlis was president of International Data Group and former group publisher at Rodale Press.

In conjunction with the organizational changes, Hefner announced the promotions of Haresh Shah, formerly vice president of international publishing, to senior vice president of international publishing in the Publishing Group. A 17-year veteran of Playboy, Shah serves as editorial director of the 14 foreign editions, 12 of which he has been instrumental in launching. In fiscal 1990, he supervised the start-up of Playboy editions in Hungary and Taiwan just as major democratic reforms were taking place in those countries.

Barbara Gutman, was named senior vice president of circulation and planning. Gutman, formerly, vice president of subscription circulation, oversees subscription efforts of Playboy magazine and the duPont Registry as well as the list rental business. Effective with this promotion, she will also assume long-range planning responsibilities for Playboy magazine.

Gutman joined the company in 1987 from Citicorp Publishing, where she served as vice president and circulation director of Signature magazine. Since her arrival at Playboy, she has improved the profitability and efficiencies of Playboy magazine's 2.5 million subscription base. Subscriptions currently account for 75 percent of Playboy's total circulation.

As part of the restructuring, Herbert Laney, senior vice president of direct marketing, will now report to Michael Perlis. Laney, who is responsible for the catalog business, joined Playboy in 1988. Since his arrival at the company, he has overseen significant growth for Critics' Choice, directed the redesign and repositioning of the Playboy catalog and launched the Sarah Coventry catalog.

Mary E. Levenson Named Playboy Senior VP-Product Licensing Hefner today announced the promotion of Mary Levenson to senior vice president of product licensing of Playboy Enterprises, Inc.

LOS ANGELES (JULY 12) PR NEWSWIRE - Leonard Green & Partners, a Los Angeles-based, private merchant banking firm, announced the opening of a London office to be headed by Christopher V. Walker, a founding partner of the firm. It is the first American leveraged buyout firm to open an office in the UK.

Leonard Green & Partners specializes in structuring, sponsoring and

executing management buyouts for established companies.

Leonard I. Green has been organizing buyouts since 1969, when he co-founded Gibbons, Green, van Amerongen (GGVA), a New York firm that pioneered the leveraged buyout industry. While with GGVA, Green and Walker directed a number of successful buyouts, including the acquisitions of Budget Rent-A-Car, Rival Manufacturing Company, Foodmaker Inc., and Kash n' Karry Food Stores Inc.

In addition to Walker and Green, the firm's partners are Roger B. Wachtell and Jonathan D. Sokoloff.

Green and Sokoloff live in Beverly Hills. Walker was a Pasadena resident before moving to London recently. Wachtell also is a Pasadena resident.

Leonard Green & Partners has a committed capital fund of $224 million. Investors include an international group of financial institutions, insurance companies, and other corporate and individual investors.

Before the formation of Leonard Green & Partners, Walker was a General Partner of GGVA, having joined that firm in 1985. Prior to that he worked for Zimmerman Holdings Inc., a private holding company based in California and engaged in the acquisition and operation of manufacturing firms. Before joining Zimmerman, Walker was with Security Pacific Bank for 13 years, and was based in both Hong Kong and the Philippines before returning to the Los Angeles offices.

Walker is managing director of the London office, and is joined there by Susan H. Martin, who received her master of business administration from the Massachusetts Institute of Technology and spent several years in investment banking before joining the firm.

Leonard Green & Partners seeks friendly acquisitions and is actively looking in the U.S., United Kingdom and Europe for established operating companies with strong management teams.

DALLAS (JULY 12) PR NEWSWIRE - Texas Industries Inc. (NYSE: TXI) today reported a loss of $7,342,000 or 84 cents per share for the fiscal year ended May 31, 1990. This compares with the prior year's net income of $3,780,000 or 13 cents per share adjusted for the May 1990 stock dividend.

"Fiscal year 1990 was the first year in which TXI recorded a loss during

its 40-year life," stated President Robert D. Rogers. "External elements were almost universally negative, but by the most recent quarter, market demand, pricing and costs were headed in the right direction. Pricing is showing signs of recovery, and volumes have increased 6-8 percent from one year ago.

"Chaparral Steel broke ground this spring on its most innovative expansion since the early 1980s -- a large section mill to roll product from a near-net-shape cast billet. Start-up is scheduled for this coming winter."

Texas Industries produces steel and cement/concrete products and develops real estate.

DECATUR, GA (JULY 12) PR NEWSWIRE - Darrell D. Pittard, president and chief executive officer of Prime Bancshares Inc. (NASDAQ: PMBS), reported second quarter net earnings of $611,000, or 36 cents a share, compared with $376,000 a year ago.

For the six months ended June 30, net earnings were $1,104,000 or 64 cents a share, compared to $678,000 for the same period in 1989. Since the bank holding company's stock first traded on July 27, 1989, there are no historical per share data for periods prior to that date.

Non-performing assets decreased by $812,000 to $7.7 million during the first six months of the year and amounted to 1.31 percent of total assets at June 30.

Net interest income increased to $3.0 million for the second quarter,

compared to $1.5 million for the same period in 1989. At June 30, total assets amounted to $585 million, representing an increase of $77 million for the first half of the year. Total deposits increased $58.8 million during 1990, reflecting the opening of full-service banking offices in Tucker and Buckhead.

Stockholders' equity increased during the quarter to $34.4 million. Tangible capital at June 30 equaled 5.88 percent of assets and substantially exceeds current regulatory requirements. Based on 1,713,658 shares of common stock outstanding, Prime Bancshares' book value per share was $20.09 at June 30.

Prime Bancshares, with consolidated total assets of $585 million at June 30, is the holding company for DeKalb Federal Savings Bank, the fourth-largest savings bank based in metropolitan Atlanta. The common stock of Prime Bancshares is traded Over-the-Counter and quoted on the National Association of Securities Dealers Automated Quotation (NASDAQ) System under the symbol "PMBS."

PITTSBURGH (JULY 12) PR NEWSWIRE - Donald R. Whitehead, president and managing director of Pennsylvania Capital Bank, today announced that the bank has now raised its initial capitalization requirements of $5,000,000.

Although this is the amount that was specified as a regulatory minimum by the Commonwealth of Pennsylvania when it granted the bank its preliminary charter last April, capital-raising efforts will continue until the bank's official opening, Monday, Sept. 10, 1990.

According to Charles A. Warden, organizer and a director of Pennsylvania Capital Bank and president of Mid-Atlantic Capital Group Inc., the investment banking firm which is raising the bank's capital, final capitalization should exceed $8,000,000.

Pennsylvania Capital Bank, located in the Times Building at 336 Fourth Ave. between Smithfield and Wood streets in the heart of Pittsburgh's financial district, will offer full service private banking to individuals and closely held businesses with sophisticated financial needs.

#90193p4067 07/12/1990 ~PR Newswire
RIVERDALE, N.J. (JULY 12) PR NEWSWIRE - Robert M. Kossick, president and chief executive officer of National Community Banks, Inc. (NASDAQ: NCBR) reported that earnings for the first six months of 1990 were $10 million or 96 cents per share as compared with $23.7 million or $2.27 per share for the first half of 1989. Earnings for the second quarter of 1990 were $4.6 million or 44 cents per share compared with $12.1 million or $1.16 per share for the second quarter of 1989.

Kossick stated that: "Given the recent slow-down in local economic conditions and the decision to establish larger than normal provisions for the loan loss reserve, we are satisfied with overall performance."

Kossick further stated, "The well recognized downturn in the real estate markets has resulted in a higher than normal level of non- performing loans to approximately 3.51 percent of total loans. While we do not anticipate large loan losses, we will, however, continue to bolster our reserves until the real estate sector stabilizes."

Kossick noted that when compared with June 30, 1989, assets grew 8 percent to $4.1 billion, loans increased 5 percent to $3 billion, and deposits grew 11 percent to $3.6 billion. For the first six months of 1990, provisions to the loan loss reserve were $25.6 million, compared with $3.2 million for the first half of 1989.

During the first half of 1990, National Community opened new offices in Ramsey (Bergen County), and Rocky Hill (Montgomery Township, Somerset County). Additional offices are scheduled to open in Bayonne (Hudson County); Union (Union County); and Newark in the Port Authority's new Legal and Communications Center (Essex County) in the second half of 1990. NCB currently operates 113 facilities serving 13 counties.

BALTIMORE (JULY 12) PR NEWSWIRE - Atlanfed Bancorp, Inc. (NASDAQ-NMS: AFED), Baltimore, announced net income of $258,040 for the first quarter ended June 30, 1990, or 30 cents per share, as compared to earnings for the same quarter in 1989 of $83,759, or 10 cents per share, an increase of 208 percent.

Commenting on the announcement, Richard E. Funke, chairman and president stated: "We are pleased to be able to report this continued profitability from operations of Atlanfed Bancorp, Inc., and particularly because the increase in earnings for 1990 relates to an increase in core earnings from the bank's operations."

Total assets of Atlanfed Bancorp, Inc. as of June 30, 1990, were $227.1 million as compared to $227.1 million at June 30, 1989. Total savings deposits as of June 30, 1990, were $171.3 million as compared to $168.7 million at June 30, 1989. Total stockholders' equity of Atlanfed Bancorp, Inc. was $17 million or $19.88 per share as compared to $16.4 million or $19.12 per share at June 30, 1990.

Atlanfed Bancorp's primary subsidiary, Atlantic Federal Savings Bank, was founded in 1897 and currently operates 10 branch offices throughout the state of Maryland. Atlantic Home Mortgage Corporation, the bank's mortgage banking subsidiary, operates loan production offices in Towson, Columbia and Pasadena, Md., and in Newark, Del.

WEST CHESTER, PA (JULY 12) PR NEWSWIRE - Adage, Inc. announced today that its subsidiary, Fort Orange Paper Company, Inc., has signed an agreement giving Cogeneration Energy Technology L.P. the right to build a 60-megawatt cogeneration plant at the Fort Orange manufacturing site in Castleton, N.Y.

The new plant will supply low-cost steam energy to Fort Orange and produce electricity which will be sold to Niagara Mohawk Corporation under long-term agreements. The plant will be owned by Cogeneration Energy Technology, which has financed the project with Prudential Power Funding Associates. It is expected to be completed in the first half of 1992.

Fort Orange Paper Company, a producer of high-quality recycled paperboard and folding cartons, accounts for approximately 23 percent of Adage's revenue. Robert Cahill, president of Adage, said the company is looking forward to the significant cost savings this cogeneration project will give Fort Orange. To illustrate these savings, Cahill noted that if the cogeneration operation had been in effect in 1989, pre-tax profit would have been increased by approximately $900,000 by replacing expensive coal-burning equipment.

MINNEAPOLIS (JULY 12) PR NEWSWIRE - Employee Benefit Plans Inc. (NASDAQ: EBPI), today announced its intention to file a registration statement within the next 30 days for the public offering of two million common shares. One million of these shares will be offered by certain selling shareholders, principally Summit Partners, a Boston based venture capital firm. The balance of the shares will be offered by the company. The company intends to use the proceeds from the sale of its shares for opening new sales offices and expanding its sales force, repurchasing at least 380,000 of the outstanding warrants exercisable for the purchase of an equivalent number of shares of common stock, increasing the capacity of its reinsurance subsidiaries, and for working capital and other general corporate purposes, including possible future acquisitions. The offering will be made only by means of a prospectus following filing of a registration statement under the Securities Act of 1933.

Employee Benefit Plans Inc., headquartered in Minneapolis, provides an integrated program of managed healthcare services to employers that self-fund their benefit programs. The company is one of the largest for profit managed healthcare companies in the united States, with over 1,500

single employer clients nationwide representing more than one million employees and dependents.

DALTON, GA (JULY 12) PR NEWSWIRE - The Board of Directors of CrownAmerica Inc. (NASDAQ: CRNA), a major processor of filament yarn for U.S. and international carpet manufacturers, today elected G. Lane Hamilton as president, treasurer and chief executive officer, succeeding David Hamilton, who was elected chairman. The changes in duties will be effective with the beginning of the Company's new fiscal year on September 1, 1990.

In another announcement, Dana F. Hamilton, credit manager of CrownAmerica since 1986, was named secretary.

G. Lane Hamilton, 65, becomes the Company's eighth president since it was founded in 1884 as Crown Cotton Mills. He joined Crown Cotton Mills in 1947 and in 1951 was named treasurer, and later secretary. He has been a member of the board since 1951. A native of Dalton, Lane Hamilton is a member of the American Institute of Certified Public Accountants and of the Institute of Certified Management Accountants.

"Lane is exceptionally qualified to assume the day-to-day responsibilities of chief executive officer," said David Hamilton. "Through his recent duties here and in Europe, he has gained a comprehensive understanding of the domestic and international marketplace. He will provide excellent leadership for CrownAmerica as it moves toward the next century."

David Hamilton has served as president of Crown Cotton Mills and CrownAmerica since 1951. He is a former director and chairman of the board of Hardwick Bank & Trust Co.; a former member and chairman, City Board of Education, Dalton; former member and chairman, Dalton Whitfield County Hospital Authority; and a former director of the Georgia Textile Manufacturers' Association.

CrownAmerica, Inc. is engaged chiefly in the processing of heat-set filament yarn for the carpet industry through its Texture-Tex subsidiaries which operate plants in Dalton and Valdosta, Georgia and near Heerlen in the Netherlands. The Company also operates a warehousing and leasing subsidiary for light manufacturing and storage in Dalton, Georgia.

WILSON, NC (JULY 12) PR NEWSWIRE - BB&T Financial Corporation (NASDAQ-NMS: BBTF) established new records in earnings for both the six months and second quarter ended June 30. For the first two quarters, net income increased by 18.7 percent, while primary net income per share was up 15.8 percent. Net income for the first half of the year totalled $25.8 million, $1.32 per share, compared with $21.7 million, $1.14 per share, in 1989. Fully diluted earnings per share rose 15.7 percent to $1.25 from $1.08 last year. On an annualized basis, the return on assets was 1.12 percent, compared with .97 percent in 1989, while the returns on shareholders' equity were 16.3 percent and 15.4 percent, respectively.

For the second quarter, net income was $13.0 million, a 21.7 percent increase over the $10.7 million reported last year. For the quarter, primary net earnings per share was $.67, and fully diluted earnings per share was $.63, compared with $.55 and $.53 in 1989.

In releasing the results for the first half of 1990, John A. Allison, Chairman and Chief Executive Officer of BB&T, noted: "We are very pleased with the excellent results for the first half of 1990. An improved net interest margin, excellent credit quality, strong growth in noninterest income, and enhanced efficiency all contributed to these results.

"Our nonperforming assets did increase in the second quarter as we placed the loans of a large borrower ($9,000,000) on nonperforming status. This customer's loans were also written down to the expected liquidation value. Even with this event, our net loan losses and nonperforming assets remain significantly better than our national peer group. We expect our key asset quality ratios to remain better than those of our peers.

"Our already strong capital position continued to improve, with average equity to average assets increasing from 6.30 percent to 6.91 percent and total risk-based capital reaching 12.56 percent."

At the end of June, BB&T had total assets of $4.78 billion, total loans of $3.22 billion and total deposits of $3.80 billion. Through its subsidiary banks in North and South Carolina, BB&T operates 190 offices in 105 cities. BB&T Financial Corporation common stock is traded on the NASDAQ National Market System and is listed under the symbol BBTF.

MIAMI (JULY 12) PR NEWSWIRE - Eastern Airlines today introduced a new overnight and second day, door-to-door shipping service that will be available to more than 10,000 communities in the U.S., Puerto Rico, U.S. Virgin Islands, and Canada.

The new overnight service, called "Door-to-Door," will deliver high priority and time-sensitive shipments to their final destinations by 5 p.m. the next business day, and offers rates up to 40 percent below Federal Express priority overnight service. Door-to-Door second day service offers similar savings over Federal Express' economy distribution service.

A state-of-the-art tracing system, "CargoTrac," will provide up-to-the-minute information on the status of Door-to-Door shipments. The pricing system, according to Eastern officials, is "simply the easiest way to determine transportation costs in the transportation market today."

Eastern also provides Door-to-Door same day small package service called "Sprint" for packages weighing up to 70 pounds.

Door-to-Door service can be arranged by calling Eastern's toll-free number 800-832-2746. For Sprint, call 800-336-0336.

NEW YORK (JULY 12) PR NEWSWIRE - Chris-Craft Industries, Inc. (NYSE: CCN) announced today a no cost selling program for holders of fewer than 100 shares of its common and/or Class B common shares.

Chris-Craft is not buying the shares. Shares sold pursuant to the program will be aggregated and sold in round lots on the New York Stock Exchange. Each stockholder who sells shares in the program will receive the average of the prices received for all shares sold under the program on the date his shares are sold. No deduction will be made for brokerage fees or other expenses. Only holders of less than 100 shares of common and/or Class B common shares as of the close of business on June 29, 1990, may participate in the program, and any such holder must sell all shares he holds of a class, if he sells any.

Information regarding the program will be mailed on July 13 to all such holders. The program will expire on Aug. 17, 1990, unless extended.

NEW YORK (JULY 12) PR NEWSWIRE - Superintendent of Banks Jill M. Considine announced today that Peter Herrick, vice chairman of the Bank of New York (NYSE: BK), will represent the state's money center banks on the New York State Banking Board.

Herrick, one of four new members of the 17-member policy-making board of the State Banking Department, was nominated to the non-salaried post by Governor Cuomo and confirmed by the Senate. The banking board is chaired by the superintendent and includes eight public members and an equal number representing the financial services industry.

Herrick, 63, replaces John Torell III who resigned from the board after his departure from Manufacturers Hanover Trust Company.

"Peter Herrick's extensive banking experience will be extremely helpful to the banking board," the superintendent said.

A 1950 graduate of Williams College, Herrick joined the Bank of New York in 1951 and rose through the ranks to become president, chief operating officer and a director in 1982. He was named vice chairman last month. Herrick is also president and a director of the bank's parent, the Bank of New York Company, Inc.

Herrick served in the Army Air Corps during World War II. He returned to active duty to serve in the U.S. Air Force during the Korean War.

Herrick is a former director and president of the New York State Bankers Association, a director of Mastercard International and a member of the Association of Reserve City Bankers. He is also a director of Skandia America Corporation, Skandia America Reinsurance Corporation and Hudson Insurance Company and he is a director and vice chairman of the Better Business Bureau of Metropolitan New York. His other memberships include the British-North American Committee of the National Planning Association and the Board of Trustees of Hood College.

Herrick and his wife reside in Bronxville, N.Y. They have two grown children.

BOISE, ID (JULY 12) PR NEWSWIRE - Idaho Power's (NYSE: IDA) board of directors, at its regular July board meeting today, elected Larry R. Gunnoe to replace Wayne W. Anderson as the company's president and chief operating officer effective Sept. 1 when Anderson will retire after a 42-year career with the utility. The directors also named Gunnoe to replace Anderson on the board.

Gunnoe has been serving as the company's vice president of distribution since that post was created as part of a corporate restructuring in 1987. Before that he was the company's vice president of division operations.

Gunnoe, 54, is a graduate of Washington State University with a degree in electrical engineering. He joined Idaho Power in 1968 as an engineer. Over the years he has served as a division engineering supervisor, assistant division electrical superintendent, division electrical superintendent and manager of distribution. He was manager of the company's Eastern Division headquartered in Pocatello from 1982 until 1985 when he transferred to Boise as manager of division operations.

Although Anderson, who will turn 65 in August, is retiring from Idaho Power, he will continue as president and a board member of Ida-West, an Idaho Power subsidiary developing power projects. He originally joined Idaho Power in 1946 as an apprentice lineman and over the intervening decades held a wide variety of jobs in the company, including construction marketing, operations and management. He was elected vice president of human resources in 1982 and executive vice president in 1987. He became president and chief executive officer and a member of the board in 1988.

Jackson, 53, joined Idaho Power in 1956 as a warehouseman in Nampa. He later worked as a meter reader, accounting supervisor and assistant division accounting manager. From 1981 to 1988, he was Western Division manager in Payette, then served briefly as assistant to the chairman and chief executive officer. In 1989, he was named senior manager of corporate services.

LOS ANGELES (JULY 12) PR NEWSWIRE - Unocal (NYSE: UCL) has agreed to purchase Amoco Production Company's 62.5 percent interest in the Chakachatna Group of oil and gas properties in the Cook Inlet of Alaska, subject to normal consents, including a waiting period required by the Hart Scott Rodino Act.

Amoco is the current operator for the group. Unocal is expected to assume that role after a vote by the other group partners, Chevron and Texaco.

Offering continued employment to the employees associated with the Cook Inlet operations was a major objective of Amoco and Unocal. Therefore, all those employees will have the option of employment with Unocal after the purchase is completed. The employees are based in Kenai, where Unocal has a district production office and operates a chemical plant.

The Chakachatna Group owns two platforms in the Granite Point field and two in the Middle Ground Shoal field. Current gross production from the four platforms is about 5,100 barrels of oil per day.

Unocal estimates that more than 11 million barrels of developed oil reserves remain in the fields, with additional reserves available for development.

"This purchase strengthens Unocal's presence not only in the Cook Inlet but in Alaska itself, where we expect to continue to play a major role in

the state's economy," declared Ray M. Barnds, vice president for the company's Alaska Region.

Aside from the Cook Inlet properties, Amoco holds a 10 percent interest in the Endicott field on Alaska's North Slope, and an interest in nearly two million acres of exploration leases onshore and offshore Alaska.

#90193p4112 07/12/1990 ~PR Newswire

NEW YORK (JULY 12) PR NEWSWIRE - The Cooper Companies, Inc. (NYSE: COO) stockholders voted approval of all four proxy issues at today's annual meeting, held at the University Club in New York City.

More than 81 percent of the common shares voted with respect to these proposals were cast in favor of management-recommended issues, relating to two stock incentive plans for employees and outside directors.

Stockholders also re-elected all nine current directors and approved the appointment of KPMG Peat Marwick as its independent auditor.

By voting to amend the company's 1988 long-term incentive plan, stockholders increased both the types of awards which could be made and

the number of shares which could be granted to attract, retain and motivate key employees of Cooper and its subsidiaries.

Stockholders also approved a restricted stock plan for non-employee directors, which will enable the company to attract additional directors in the future and to motivate current directors without paying substantially more in cash compensation. The plan reserves an aggregate of 100,000 restricted shares of common stock for one-time automatic grants to the independent directors.

#90193p4115 07/12/1990 ~PR Newswire

WASHINGTON (JULY 12) PR NEWSWIRE - National Cooperative Bank (NCB) today reported net income of $3.8 million for the three months ended June 30, 1990, an increase of 8.6 percent from the same period last year.

For the first six months of 1990, net income was $7.6 million, an increase of 9.6 percent from last year. Total assets were $429.1 million, a slight decrease from December 31, 1989, and a 12.2 percent increase from June 30, 1989.

At June 30, 1990 loans increased to $379.5 million or 1.4 percent from year-end. Real estate loans were $148.9 million at June 30, 1990, a 13.4 percent increase, while loans and leases to commercial customers decreased 5 percent from year-end.

In the first half of 1990, NCB sold $40.5 million of real estate and 18.2 million of commercial loans to various investors and banks on advantageous terms. Two sales of significance were the direct sale of highly rated real estate loans to a major insurance company and the sale of ESOP loans on a tax advantage basis, with NCB retaining the positive spread to improve earnings over the life of the loans.

NCB's credit quality continues to improve as non-performing assets decreased 35 percent to $8.9 million, which is 2.4 percent of loans. The provision for credit losses to average loans outstanding increased to 0.4 percent for the first six months compared with 0.3 percent for the same period last year. As a result, the allowance for credit losses as a percent of non-performing assets increased to 64 percent. Non- performing assets as a percent of equity decreased to 9 percent.

Thomas S. Condit, president and chief executive officer stated: "We are pleased with the results for the first six months. While we are somewhat below the volume of new business we would like, particularly in real

estate, we are confident that our new loan volume will meet the budgeted increase by year-end. Our earnings increase is the result of even further improvements in credit quality and the extremely low level of non-earning assets. We've analyzed our portfolio carefully, and expect these levels to continue into 1991."

NCB did not sell commercial paper in the second quarter due primarily to the adverse impact of recent defaults by other issuers in the commercial paper markets. NCB has subsequently increased bank borrowings to replace the commercial paper funding source. The bank borrowings were approximately 30 basis points more expensive, which marginally affected earnings.

Non-interest income for the first six months was $1.7 million compared with $1 million a year earlier. Higher fees on loan transactions and gains on sales of loans, investments and other real estate owned accounted for the majority of the increase. Non-interest expense increased 11.7 percent in the first six months as compared to last year.

Members' equity increased 7 percent from year-end to $97.1 million at June 30, 1990, and accounted for 22.6 percent of total assets. The significant equity base is augmented by the Subordinated Class A Capital Notes of $184.3 million, and gives NCB total capital equal to 65.6 percent of total assets.

National Cooperative Bank, based in Washington, provides mortgage banking, commercial lending, capital markets and depository services to cooperative enterprises nationwide, serving cooperatives and their members through these related companies: NCB Business Credit Corp., NCB Capital Corp., NCB Capital Markets, Inc., NCB Development Corp., NCB Mortgage Corp. and NCB Savings Association.

NCB operates regional offices in Atlanta, Minneapolis, New York and Seattle. NCB Savings Association is based in Hillsboro, Ohio.

LEXINGTON, Ky. (JULY 12) PR NEWSWIRE - Kentucky Utilities Company (NYSE: KU) reported earnings per average share of common stock for the three and twelve months ended June 30, 1990, of $.40 and $2.05, respectively, as compared to $.34 and $2.20 for the corresponding periods in 1989. Results for the twelve months ended June 30, 1989 include a one-time addition to earnings of 30 cents per share associated with the cumulative effect of the accounting change to recognize unbilled revenues.

Operating revenues for the second quarter of 1990 were $130.4 million, a 6.7 percent increase from the same quarter of 1989. This increase can primarily be attributed to continued growth in commerical and industrial sales. Operating expenses and taxes of $108.4 million for the current quarter increased 7.1 percent from 1989.

For the twelve months ended June 30, 1990, operating revenues of $537.2 million were 1.5 percent below those in the corresponding period last year. Operating expenses and taxes for the twelve month period of 1990 were $430.3 million, down from $442.5 million in 1989.

THOMSON, Ga. (JULY 12) PR NEWSWIRE - Allied Bankshares, Inc. (NASDAQ: ABGA) announced today that net income for the quarter ended June 30 was $973,000 or $.19 per share as compared to $951,000 or $.18 per share for the quarter ended June 30, 1989.

Net income for the six months ended June 30, 1990 was $1,911,000 or $.37 per share as compared to $2,055,000 or $.39 per share for the six months ended June 30, 1989.

No after tax securities gains were recognized in the second quarter or first six months of 1990. For the second quarter of 1990 net income excluding securities gains was $.19 per share as compared to $.17 per share for the second quarter of 1989. For the first six months of 1990 net income excluding securities gains was $.37 per share as compared to $.34 per share for the first six months of 1989. After tax securities gains of $54,000 or $.01 per share were recognized in the second quarter of 1989 and $242,000 or $.05 per share for the first six months of 1989.

The company also announced that its directors declared a quarterly cash dividend of $.075 per share payable on Aug. 10, to stockholders of record as of July 25, 1990.

#90193p4125 07/12/1990 ~PR Newswire

MEMPHIS, TENN. (JULY 12) PR NEWSWIRE - Federal Express Corporation (NYSE: FDX) today announced record annual revenues of $7 billion for the fiscal year ended May 31, 1990, a 36 percent increase over the prior year. Fiscal 1990 marked the first full year of combined financial results for

Federal Express and Tiger International, Inc., which was acquired in February 1989.

Operating income in the current fiscal year dropped 2.6 percent to $413.6 million from $424.4 million. Pre-tax income was $218.4 million compared with $298.3 million in the previous year, reflecting a $72.8 million increase in net interest expense (from $115.3 million to $188.1 million).

Net income declined to $115.8 million, a 30.5 percent decrease from the prior year, and earnings per share were $2.18 vs. $3.18 a year ago (before the cumulative effect of a change in accounting for income taxes in fiscal 1989).

Total revenues for the quarter ended May 31, 1990, increased 14.7 percent to $1.9 billion from $1.7 billion in the prior year. Operating income fell to $115.5 million from $124.2 million in fiscal 1989, a 7 percent decline.

Pre-tax income rose 9.2 percent to $67.1 million from $61.4 million, primarily reflecting a reduction in net interest expense resulting from the sale-and-leaseback of aircraft during the fiscal year. Pre-tax income was also affected by adjustments to liabilities related to the Tiger acquisition and a one-time change in reporting procedures to reflect, on a concurrent basis, the results of certain of the company's international operations. The net effect of these adjustments, however, was not significant.

The effective tax rate in the quarter was 35.7 percent, higher than the 33.3 percent rate in the prior year but less than the rate for the first three quarters of fiscal 1990. The lower rate in the fourth quarter resulted in an effective rate of 47 percent for fiscal year 1990 and reflects a reorganization of certain international operations which enabled the company to utilize losses of these operations for U.S. income tax purposes.

Net income was up 5.3 percent to $43.1 million, and earnings per share increased to $0.81 from last year's level of $0.78.

Commenting on the year-end results, Chief Executive Officer Frederick W. Smith said, "Fiscal 1990 was a difficult year for Federal Express. The integration of Tiger International into the FedEx network, continued aggressive international expansion, introduction of new products and services, disappointing air freight volumes, and operational expansions at major hub facilities in Anchorage and Indianapolis all contributed to making this one of the most challenging years in the company's 17-year history.

"Although we are not satisfied with the year's financial results,

important strategic objectives were accomplished. Our operational gains during fiscal 1990 resulted in creation of a new global Federal Express system -- the world's most extensive transportation and distribution network. We believe that this network, coupled with our employees' relentless pursuit of quality and the highest levels of customer service, positions Federal Express to capitalize on the growing needs of multinational businesses and increasingly integrated international economies."

#90193p4127 07/12/1990 ~PR Newswire

RICHMOND, VA (JULY 12) PR NEWSWIRE - Central Fidelity Banks, Inc. (NASDAQ: CFBS) reported today increased earnings for the quarter ended June 30, 1990, and for the initial six months of 1990.

Net income for the second quarter increased 4.6 percent to $14,196,000 compared with $13,578,000 for the 1989 period. Net income per share was $.93 versus $.88 in 1989 representing a gain of 5.7 percent.

For the initial six months of 1990, net income was $28,250,000 or $1.84 per share versus $26,502,000 or $1.72 per share in 1989. This represents an increase of 6.6 percent in net income and 7.0 percent in earnings per share.

Total assets as of June 30, 1990, were $5,707,195,000, representing growth of 19.2 percent over the prior year. Total loans grew 9.5 percent to $3,678,801,000 while total deposits gained 12.6 percent to $4,381,669,000. Stockholders' equity at quarter-end was $392,572,000 or 6.9 percent of total assets, while the book value per common share was $25.66 compared with $23.34 on June 30, 1989.

The company's return on average total assets for the six-month period was 1.06 percent versus 1.15 percent for the same 1989 period. The return on average stockholders' equity was 14.62 percent for 1990, down from 15.04 percent for 1989.

Net interest income for the second quarter of 1990 increased 5.2 percent to $51,683,000. On a tax equivalent basis, the net interest margin was 4.44 percent, down from 5.01 percent in second quarter 1989. The margin reduction was attributable primarily to higher levels of deposits tied to money market rates of interest and reduced yields of earning assets in a generally lower rate environment.

Noninterest income for the second quarter of 1990 was $13,218,000

representing an increase of 3.6 percent over the same period last year. The primary source of this gain was increased deposit fees and charges.

Noninterest expenses were basically flat during the quarter at $40,105,000. The company's productivity initiatives and aggressive expense control directives combined to produce this favorable result. For the first six months of 1990, noninterest expenses grew 4.0 percent.

Nonperforming assets as of June 30, 1990, were $29,244,000 or .79 percent of net loans compared to $12,297,000 or .34 percent at the end of first quarter and $32,918,000 or .98 percent for the same date last year. The increase in nonperforming assets during the quarter resulted primarily from effects of the softness in real estate markets in various areas of the state. The company believes that adequate steps have been taken to write-down these credits where appropriate. The allowance for loan losses at quarter-end was $36,710,000 or 1.00 percent of loans compared to $33,579,000 or 1.00 percent last year. The existing allowance for loan losses represents 1.26 times nonperforming assets. Central Fidelity's credit quality indicators continue to be among the best of major banks in the region and the nation.

Net loan charge-offs for the quarter were $5,500,000, representing .61 percent of average loans on an annualized basis compared to .46 percent for the second quarter of 1990. For the six months ended June 30, 1990, net charge-offs were $9,140,000 or .51 percent of average loans compared to $7,037,000 or .43 percent for 1989.

Central Fidelity Banks, Inc. is a Richmond, Virginia based bank holding company with 190 branch offices throughout the state.

#90193p4141 07/12/1990 ~PR Newswire

NEW YORK (JULY 12) PR NEWSWIRE - Motel 6, L.P. (NYSE: SIX) and Accor S.A. two leaders in the lodging industry, today announced a definitive agreement to join their businesses to create the world's largest group of budget motels.

Under the terms of the agreement, IBL Acquisition, L.P., a wholly owned subsidiary of Accor, will acquire Motel 6 through a tender offer to commence no later than Wednesday, July 18, 1990. The purchase price is approximately $1.3 billion for the common equity, which represents a cash payment of $22.50 per common unit. The transaction is not conditioned on financing and Accor has stated that the transaction is fully financed.

Existing debt is expected to remain outstanding.

On a fully diluted basis, there are over 55 million Motel 6 common units and general partnership equivalent common units outstanding, of which Motel 6 Holdings, L.P., an affiliate of Kohlberg Kravis Roberts & Co., owns in excess of 50 percent. Motel 6 Holdings has agreed to tender in the offer the common units owned by it and has granted Accor an irrevocable option to purchase such units if Motel 6 Holdings fails to tender under certain circumstances. The tender offer is expected to close in August.

The proposed combination will make Accor the international leader in the economy lodging business. Motel 6, the preeminent American brand name in economy lodging, will join Accor's worldwide portfolio of hotels, which includes Formula 1, Europe's fastest-growing budget hotel chain.

Motel 6 was acquired by KKR and its investors in 1985 from City Investing Company and converted to a publicly traded master limited partnership in 1986. Since the 1985 KKR buyout, Motel 6 has furthered its role as an industry leader, investing more than $700 million in capital improvements, advertising, new property development, and acquisitions.

Motel 6 headquarters will remain in Dallas. Accor is a worldwide leader in the hotel, catering, voucher and tourist industries, with almost 3,000 restaurants and more than 850 hotels in 60 countries. With the proposed acquisition, Accor will be the largest international hotel company on the basis of owning and operating hotels with more than 160,000 rooms. Its hotel properties currently include: Sofitel, its luxury chain; Novotel and Mercure, accommodating the business traveler; and Ibis-Urbis, moderately-priced chains. Accor has achieved its most recent success with Formula 1, its budget motel division, whose motels have been opening in Europe at the rate of one per week. Accor's voucher business allows for pre-payment of restaurant meals, food, and other services. Accor is publicly traded on the Paris stock exchange, with a market capitalization of $4 billion, one of the largest of any worldwide quoted hotel groups. In 1990, it will have estimated consolidated sales of more than $4 billion and estimated net profits after tax of nearly $150 million.

Motel 6 is the largest chain of exclusively owner-operated economy motels in the United States and a pioneer of convenient, comfortable accommodations priced below most competitors.

Accor's subsidiary, IBL Acquisition, has agreed to commence a tender offer within five business days for all outstanding common limited partnership units at a price of $22.50 per unit, net to the unitholders in cash. Motel 6 Holdings has also agreed that, immediately after the consummation of the tender offer, it will sell to an Accor affiliate all of the outstanding common stock of the general partner of Motel 6. Following

completion of the tender offer and after approval by unitholders, Accor will cause IBL Acquisition to merge into the company, and all remaining common limited partnership units will be converted into the right to receive $22.50 per unit. In the alternative, if more than 90 percent of the outstanding units are acquired in the tender offer, IBL Acquisition, through Motel 6, may redeem the remaining units for at least $22.50 per unit.

Euroforce Enterprises, a French-controlled management and financial consulting firm, acted as advisor to Accor.

CONTACT: Michael Claes, 212-614-5236, or Jerry Seeman, 212-614-5135, both of Burson-Marsteller for Accor; or Ruth Pachman or Maureen Burgess of Kekst and Company, 212-593-2655, for KKR and Motel 6

ST. LOUIS (JULY 12) PR NEWSWIRE - Thompson & Mitchell, a St. Louis-based regional law firm, has signed a $3.5 million contract with Data Systems Network Corp., a Michigan-based network integration company, to provide a computer network system for its offices.

The project includes establishing a computer local area network (LAN) that will integrate the information and support functions of Thompson & Mitchell's offices in the Midwest and Washington.

"Data Systems' network solution will allow our attorneys and staff to have all of the firm's operations at their fingertips," says Charles A. Newman, chairperson of the firm's Technology Committee. "In addition to creating and editing documents, the lawyers can access databases, conduct research, and share data with each other, our clients and other law firms. It truly represents a revolution in the practice of law."

The turn-key installation, to be phased in over the next few years, is believed to be the first use of Microsoft's Windows 3.0 in a major law firm automation system. Windows 3.0 allows users who have no knowlege of computers to run complex programs.

Fully integrated work stations will be placed in the majority of attorneys' and paralegals' offices, and in virtually all secretarial and administrative support staff offices.

Thompson & Mitchell developed a request for proposal and conducted a nationwide search of office automation systems integrators before selecting Data Systems Network Corp. to install the LAN. Data Systems is one of the leading independent network integration companies in North America.

Thompson & Mitchell has 160 attorneys: 112 attorneys in St. Louis; 26 attorneys in Belleville, Ill.; nine attorneys in St. Charles, Mo.; and 13 attorneys in Washington.

Data Systems Network Corp. provides network integration services and products to major corporations and governmental and educational institutions throughout North America. Data Systems is an Avis Information Systems Co.

#90193p4166 07/12/1990 ~PR Newswire

NEWPORT NEWS, Va. (JULY 12) PR NEWSWIRE - In filings today with the Securities and Exchange Commission, the Flight International Group, Inc. satisfied its outstanding filing requirements by issuing an amended and restated annual report on Form 10-K for the fiscal year ended April 30, 1989, and quarterly reports on Form 10-Q for each of the first three fiscal quarters of the fiscal year ended April 30, 1990.

Today's SEC filings mark the first financial statements to come from the company since accounting errors prompted Flight International to withdraw its fiscal 1989 annual report in September of last year. This subsequently led to the company's delisting by NASDAQ in December 1989.
